

**CITY OF RICHMOND
GOODS AND SERVICES CONTRACT**

This Contract, dated this 5th day of September, 2023 (the "Commencement Date") between the City of Richmond, Virginia (the "City") and Vision Government Solutions, Inc. (the "Contractor"), is binding among and between these parties as of the date of the City's final signature.

WHEREAS, the City has awarded the Contractor this Contract pursuant to Request for Proposals No. 230003292, as modified by Addendum No. 1 dated December 1, 2022 (the "Request for Proposals"), for Computer Assisted Mass Appraisal (CAMA) System.

THEREFORE, in consideration of the Recital set forth above and good and valuable consideration as set forth below, the parties agree as follows:

1. **Scope of Contract.** The Contractor shall provide the goods and services to the City as set forth in the Contract Documents enumerated in Section 3 below.
2. **Contract Amount.** The maximum authorized contract amount for this Contract is One Million One Hundred-Forty Six Thousand and Thirty Seven U. S. dollars (\$1,146,037.00). The aggregate of all payments by the City under this Contract shall not exceed this amount. All payments shall be as provided in the Contract Documents.
3. **Contract Documents.** This Contract shall consist of the following Contract Documents, listed in order of precedence from highest to lowest:
 - A. This Goods and Services Contract between the City and the Contractor.
 - B. The Negotiated Modifications to Contract Documents for Contract No. 23000012317, attached hereto as Attachment A.
 - C. The General Terms and Conditions attached to the Request for Proposals.
 - D. The Statement of Needs attached to the Request for Proposals.
 - E. The CAMA Software Implementation Terms, attached hereto as Attachment B.
 - F. The CAMA Software Subscription Terms, attached hereto as Attachment C.
 - G. The Contractor's proposal dated December 13, 2022.
 - H. The Instructions to Offerors attached to the Request for Proposals.

All of these documents are incorporated herein by reference.

IN WITNESS WHEREOF, the parties hereto on the latest day and year written below have executed this Contract.

**ATTACHMENT A:
NEGOTIATED MODIFICATIONS TO CONTRACT DOCUMENTS FOR
CONTRACT NO. 23000012317**

These Negotiated Modifications are hereby incorporated into Contract No. 23000012317 (the “Contract”) for Computer Assisted Mass Appraisal (CAMA) System as of the date of the City’s final signature.

WHEREAS, the City and the Contractor desire to agree in writing to modify the final terms and conditions of Contract No. 23000012317.

THEREFORE, in consideration of the Recital set forth above and good and valuable consideration as set forth in the Contract, the parties agree that the Contract Documents are modified as follows as of the Commencement Date of the Contract:

1. Part I (“Statement of Needs”), Section 2.12 (“Payments”) of Request for Proposals No. 230003292 is hereby deleted in its entirety.
2. Part III (“General Terms and Conditions”), Section 1.0 (“Duration of Contract”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

1.0 Duration of Contract.

1.1 **Term; Renewal.** The term of this Contract (the “**Term**”) shall begin on the Commencement Date and shall continue until the expiration of the Subscription Period (as defined below) or until the termination of the Contract in accordance with section 6.0 (“Remedies and Termination”) of the General Terms and Conditions of the Contract. The Term shall include the following phases:

- 1.1.1 Implementation Period: The initial phase of this Contract (the “**Implementation Period**”) shall begin on the Commencement Date and shall conclude on the date on which the Contractor completes the installation and implementation of the Software Services (as defined in Attachment B).
- 1.1.2 Subscription Period: The second phase of this Contract (the “**Subscription Period**”) shall begin immediately upon the conclusion of the Implementation Period. The Subscription Period shall consist of an initial three-year term (the “**Initial Subscription Term**”) and up to eight one-year renewal terms, which may be exercised by the parties through signature of a Contract Modification pursuant to section 8.5 (“**Modification**”) of the General Terms and Conditions of the Contract (each, a “**Renewal Term**”).

1.1.3 The following diagram is for illustrative purposes only.

Term	(a) Implementation Period	
	(b) Subscription Period	(i) Initial Subscription Term
		(ii) Renewal Term(s)

3. Part III (“General Terms and Conditions”), Section 2.2 (“Advertising”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

2.2 **Advertising.** The Contractor shall not use any indication of its services to the City for commercial or advertising purposes. However, the Contractor may list the City in client lists and as a reference account for prospective customers.

4. Part III (“General Terms and Conditions”), Section 2.10 (“Personnel”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

2.10 **Personnel.** If the Contractor wishes to replace a person assigned to perform services under the Contract, the Contractor shall provide the CAMA Administrator for the City with prompt written notice of the reassignment as soon as reasonably practicable, but no later than 14 calendar days after such reassignment occurs. The Contractor shall ensure that the substituted person is substantially as qualified to perform the services as the person being replaced.

5. Part III (“General Terms and Conditions”), Section 2.11 (“Property of Work”) of Request for Proposals No. 230003292 is hereby deleted in its entirety.

6. Part III (“General Terms and Conditions”), Section 2 (“Contractor Responsibilities”) of Request for Proposals No. 230003292 is hereby modified to include the following subsection 2.12 (“Disclaimer of Warranties”):

2.12 **DISCLAIMER OF WARRANTIES.** CONTRACTOR DISCLAIMS, AND THE CITY WAIVES ALL IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND ANY WARRANTIES ARISING FROM COURSE OF DEALING OR COURSE OF PERFORMANCE. THE SOFTWARE AND SERVICES ARE PROVIDED SOLELY ON AN “AS IS” BASIS, AND THE CITY’S ACCESS TO OR USE OF THE SOFTWARE OR SERVICES IS AT ITS SOLE RISK. CONTRACTOR DOES NOT WARRANT THAT THE SERVICES WILL BE UNINTERRUPTED OR ERROR-FREE.

7. Part III (“General Terms and Conditions”), Section 5.1 (“By City”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

5.1 **By City.** The City may assign their rights or delegate their duties, in whole or in part, under this Contract by written notice delivered to the Contractor. Such

transfer of rights or duties shall take effect upon the date specified in the notice or upon the assumption, if necessary, of the delegated duties by the assignee, whichever is later. To the extent such assignment results in a material change in the number of users of the services, the Contractor may require a modification of fees as a result of such an assignment.

8. Part III (“General Terms and Conditions”), Section 6.1 (“Default”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

6.1 **Default.** In case of default of the Contractor, and such default is not cured during the period allowed by section 6.2.2 (“Cure”) herein, the City, after due notice in writing, may procure the services required under the Contract from other sources. This remedy shall be in addition to any other remedies available to the City.

9. Part III (“General Terms and Conditions”), Section 6.2.3 (“Effect”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

6.2.3 **Effect.** Upon such termination, (a) the City shall be liable only to the extent of costs which may be reimbursable under this Contract that have been submitted by the Contractor and approved by the City up to the time of termination and only upon delivery to the City of all completed or partially completed work performed by the Contractor; (b) all rights, including license rights, granted by the Contractor to the City in this Contract will immediately cease to exist; (c) the City must discontinue all use of the Software Services (as defined in Attachment B); and (d) City must erase all copies of the Installed Software (as defined in Attachment B) from City’s computers or systems, and return to the Contractor or destroy all copies of the Installed Software. Following the effective date of termination, the City’s license(s) under this Contract shall expire and the City shall not be permitted to access the Software Services thereafter. Within thirty (30) days following the effective date of termination, each party shall satisfy its obligations regarding “Confidential Information” within its possession or control in accordance with Section **Error! Reference source not found.** (“Confidentiality”) of Attachment C (“CAMA Software Subscription Terms”) of the Contract. At the Contractor’s request, the City shall certify in writing that it has erased all copies of the Installed Software from the City’s systems.

10. Part III (“General Terms and Conditions”), Section 6.3 (“Termination without Cause”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

6.3.1 **Notice.** Only after the 540th calendar day of the Initial Subscription Term, the City may terminate this Contract without cause by delivery of written notice to the Contractor of the City’s intent to so terminate. Such notice must be delivered at least 90 calendar days prior to the date of termination and must otherwise be given in accordance with the requirements of this Contract for the delivery of notices.

6.3.2 **Effect.** Upon such termination, (a) the City shall be liable only to the extent of any (i) costs which may be reimbursable under this Contract that have been submitted by the Contractor and approved by the City up to the time of termination and (ii)

fees to which the Contractor may be entitled under this Contract as a result and only upon delivery to the City of completed or partially completed work; (b) all rights, including license rights, granted by the Contractor to the City in this Contract will immediately cease to exist; (c) the City must discontinue all use of the Software Services (as defined in Attachment B); and (d) City must erase all copies of the Installed Software (as defined in Attachment B) from City's computers or systems, and return to the Contractor or destroy all copies of the Installed Software. Following the effective date of termination, the City's license(s) under this Contract shall expire and the City shall not be permitted to access the Software Services thereafter. Within thirty (30) days following the effective date of termination, each party shall satisfy its obligations regarding "Confidential Information" within its possession or control in accordance with Section **Error! Reference source not found.** ("Confidentiality) of Attachment C ("CAMA Software Subscription Terms") of the Contract. At the Contractor's request, the City shall certify in writing that it has erased all copies of the Installed Software from the City's systems. No termination notice will relieve the Contractor of the obligation to deliver or perform on all outstanding orders issued prior to the effective date of termination. City shall not be entitled to a refund of prepaid, but unused fees resulting from termination pursuant to this Section 6.3.

11. Part III ("General Terms and Conditions"), Section 6.4 ("Termination by Contractor") of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

- 6.4.1 **Non-Appropriation of Funds.** The Contractor may terminate this Contract if the City Council does not appropriate sufficient funds for the City to perform its obligations under this Contract by delivery of written notice to the City of the Contractor's intent to so terminate. Such notice shall be delivered at least 45 calendar days prior to the date of termination and shall otherwise be given in accordance with the requirements of this Contract for the delivery of notices. If the City cures the non-appropriation of funds by appropriating sufficient funds during this 45 calendar day period, then the Contractor's notice of termination shall be deemed null and void.
- 6.4.2 **Material Breach of the Agreement.** The Contractor may terminate this Contract immediately upon written notice if the City breaches any material provision of this Agreement and does not cure such breach within sixty (60) business days after receiving written notice thereof.
- 6.4.3 **Effect.** Upon such termination, (1) the Contractor shall have no further obligations under this Contract; and (2) (a) any amounts owed to Contractor under this Contract before such termination or expiration will be immediately due and payable; (b) all rights, including license rights, granted by Contractor to the City in this Contract will immediately cease to exist; (c) the City must discontinue all use of the Software Services (as defined in Attachment B); and (d) City must erase all copies of the Installed Software (as defined in Attachment B) from City's computers or systems, and return to the Contractor or destroy all copies of the Installed Software. Following the effective date of termination, the City's license(s) under this Contract shall expire and the City shall not be permitted to access the Software Services thereafter. Within thirty (30) days

following the effective date of termination, each party shall satisfy its obligations regarding “Confidential Information” within its possession or control in accordance with Section **Error! Reference source not found.** (“Confidentiality”) of Attachment C (“CAMA Software Subscription Terms”) of the Contract. At the Contractor’s request, the City shall certify in writing that it has erased all copies of the Installed Software from the City’s systems. At Contractor’s request, the City shall certify in writing that it has erased all copies of the Installed Software from the City’s systems. Terms used in this Section 6.4.3 shall have the meanings set forth in Attachments B and C.

12. Part III (“General Terms and Conditions”), Section 7.0 (“Dispute Resolution”) of Request for Proposals No. 230003292 is hereby modified to include a new Section 7.6 (“Limitation of Liability”) reading in its entirety as follows:

7.6 **LIMITATION OF LIABILITY.** EXCEPT FOR A PARTY’S GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, IN NO EVENT WILL EITHER PARTY BE LIABLE FOR ANY CONSEQUENTIAL, INDIRECT, EXEMPLARY, SPECIAL, OR INCIDENTAL DAMAGES, OR ANY LOST DATA OR LOST PROFITS, ARISING FROM OR RELATING TO THIS CONTRACT EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. EXCEPT FOR LIABILITY TO CITY FOR BODILY INJURY, PROPERTY DAMAGE, BREACH OF CONFIDENTIALITY, DATA BREACH, AND INTELLECTUAL PROPERTY INFRINGEMENT, THE CONTRACTOR’S TOTAL CUMULATIVE LIABILITY TO THE CITY IN CONNECTION WITH THIS CONTRACT OR THE SERVICES WILL NOT EXCEED THE AMOUNT OF FEES PAID TO CONTRACTOR HEREUNDER DURING THE TWELVE (12) MONTH PERIOD PRECEDING THE EVENTS GIVING RISE TO SUCH LIABILITY OR THE AMOUNTS PAID OR PAYABLE UNDER CONTRACTOR’S COMMERCIAL GENERAL LIABILITY INSURANCE POLICY FOR DAMAGES SUFFERED BY THE CITY, WHICHEVER IS GREATER. THE REPRESENTATIONS AND WARRANTIES MADE IN THIS CONTRACT EXTEND ONLY TO THE CITY AND ITS PERMITTED SUCCESSORS AND ASSIGNS.

13. Part III (“General Terms and Conditions”), Section 8.7.2 (“Address”) of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows

8.7.2 **Address.** All notices to the City shall clearly indicate the City’s Contract Number and shall be directed to:

Director of Procurement Services
Department of Procurement Services
City of Richmond
900 East Broad Street, Room 1104
Richmond, Virginia 23219

With copies to:

City Assessor
City Assessor's Office
City of Richmond
900 East Broad Street, Room 802
Richmond, Virginia 23219

All notices to the Contractor shall be directed to:
Vision Government Solutions, Inc.

1 Cabot Road
Hudson, MA 01749
With a copy to:
accounting@vgi.com

14. Part III, ("General Terms and Conditions"), Section 8.1 ("Audit") of Request for Proposals No. 230003292 is hereby modified to read in its entirety as follows:

8.1 **Audit.** Upon reasonable notice, the City may at its own expense audit and copy from the Contractor's books, records, and other documents to the extent necessary to verify Contractor's adherence to the terms and conditions of the Contract. The City shall exercise its audit rights in a manner which does not unreasonably interfere with the Contractor's course of business. All information and materials gathered pursuant to any audit shall be, as permitted by law, subject to confidentiality obligations and shall be used solely for the purpose of verifying the Contractor's compliance with the Contract.

15. The line reading "TOTAL \$785,575" appearing on page 147 of the Contractor's proposal dated December 13, 2022, is hereby deleted in its entirety.

By signing the Contract, the parties thereto have approved these Negotiated Modifications.

STATE CORPORATION COMMISSION FORM

Complete Legal Name of Offeror Firm: _____

Virginia State Corporation Commission registration information. The offeror:

- ☐ is a corporation or other business entity with the following State Corporation Commission identification number:

-OR-

- ☐ is not a corporation, limited liability company, limited partnership, registered limited liability partnership, or business trust

-OR-

- ☐ is an out-of-state business entity that does not regularly and continuously maintain as part of its ordinary and customary business any employees, agents, offices, facilities, or inventories in Virginia (not counting any employees or agents in Virginia who merely solicit orders that require acceptance outside Virginia before they become contracts, and not counting any incidental presence of the offeror in Virginia that is needed in order to assemble, maintain, and repair goods in accordance with the contracts by which such goods were sold and shipped into Virginia from offeror's out-of-state location)

-OR-

- ☐ is an out-of-state business entity that is including with this proposal an opinion of legal counsel which accurately and completely discloses the undersigned offeror's current contacts with Virginia and describes why those contacts do not constitute the transaction of business in Virginia within the meaning of section 13.1-757 or other similar provisions in Titles 13.1 or 50 of the Code of Virginia

-OR-

- ☐ has not completed any of the foregoing options but currently has pending before the State Corporation Commission an application for authority to transact business in the Commonwealth of Virginia and wishes to be considered for a waiver to allow the offeror to submit the State Corporation Commission identification number after the due date for proposals. The offeror shall promptly provide any information the City requires to enable the City to properly evaluate the offeror's request for such a waiver. The City reserves the right to determine in its sole discretion whether to allow such a waiver.

PART I

STATEMENT OF NEEDS

1.0 Introduction.

1.1 Purpose. The City of Richmond is soliciting proposals to establish a contract through competitive negotiation for a Computer Assisted Mass Appraisal (CAMA) system for the City's Office of the Assessor of Real Estate (ASR).

1.2 Background. The City of Richmond contains over 75,000 parcels of real estate, of which appraisals are levied by the ASR annually as a basis for taxation. In order to promote fair and equitable assessments of many diverse classes of properties, Automated Valuation Models (AVMs) are applied through the use of a CAMA system. These types of systems are designed to store and manage property characteristics data, sales records, assessment histories, case records for appeals, and other pertinent data.

The Existing System is being provided by Harris Computer pursuant to a long standing contract entered into with the original vendor, Manatron Inc. The Existing System includes integration with the City's Online Property Search, Transfer Search, Rehab Tracker, Assessor's Tracking System and Parcel Edit Tracker applications, as well as the City's Data Warehouse.

Reporting needs are satisfied through both the CAMA system source database as well as the City's Data Warehouse, and are implemented using a combination of CAMA System Internal Reports, Ad Hoc Programs such as MS Access and MS Power BI, and the City's Integrated Systems.

The ASR has used several versions of ProVal dating back to 1998. Features introduced in version updates mainly involved only minor interface improvements, making these conversions a cumbersome process for ASR staff which yielded little results. As such, the CAMA selected shall provide both excellent functionality and usability in accordance with the technical requirements as specified in Exhibit A and Exhibit B of this Statement of Needs.

Through role creation, the Existing System provides various levels of access to all ASR employees. Additionally, read only access to the Existing System is granted, but not limited to the following internal City departments:

- A. Department of Finance
- B. City Attorney Office

1.3 Pre-Proposal Meeting Conference Call: There will be a pre-proposal meeting conference call at 1:00 P.M on Tuesday, November 29, 2022. All Perspective Offerors with no more than two individuals may participate on the conference call. The conference call number is listed below:

Toll Free Number: 804-316-9457

1.4 **Definitions.** The following words and phrases, when used in this Request for Proposals, have the meanings ascribed to them in this section, except where the context clearly indicates another meaning is intended:

- A. **Area Tax Tracker.** “Area Tax Tracker” means an Internal web application used to track and record the billable area tax amount.
- B. **Assessment Data Mart.** “Assessment Data Mart” means a database containing a combination of assessment and address data. The database is updated 3 times a week through an automated process that pulls the source data from our CAMA and GIS systems.
- C. **Assessor’s Tracking System.** “Assessor’s Tracking System” means an internal web application used by the Assessor’s Office to handle administrative tasks such as managing exempt codes and jurisdiction codes.
- D. **ASR.** “ASR” means the Office of the Assessor of Real Estate for the City of Richmond.
- E. **AVM.** “AVM” means Automated Valuation Model which refers to several onboard CAMA algorithms which produce property valuations.
- F. **BTS.** “BTS” means BizTalk Server which is an Inter-Organizational Middleware System (IOMS) which automates business processes, through the use of adapters which are tailored to communicate with different software systems used in an enterprise. Created by Microsoft, it provides enterprise application integration, business process automation, business-to-business communication, message broker and business activity monitoring.
- G. **Business Hours.** “Business Hours” means the City’s standard hours of operation which are Monday-Friday, 8:00 a.m. – 5:00 p.m. EST except for holidays observed by the City.
- H. **CAMA.** “CAMA” means the Contractor’s computer assisted mass appraisal system meeting all requirements of this Request for Proposals and provided by the Contractor pursuant to the Contract.
- I. **CAMA Administrator.** “CAMA Administrator” means the City employee identified by the City in writing as the CAMA Administrator.
- J. **City.** “City” means the City of Richmond, a municipal corporation and political subdivision of the Commonwealth of Virginia, acting through its duly authorized representatives.
- K. **City Assessor.** “City Assessor” means the Director of the ASR.
- L. **City Data Warehouse.** “City Data Warehouse” means a collection of data marts, which includes our Assessment Data Mart and our Address Data Mart.
- M. **Contract.** “Contract” means the Goods and Services Contract, a sample of which is attached to this Request for Proposals, together with all Contract

Documents referred to therein, awarded to the Contractor as a result of this solicitation.

- N. **Contractor.** “Contractor” means the Offeror to whom the City awards the Contract.
- O. **Exempt Tracker.** “Exempt Tracker” means an internal web application used to track the workflow and application processing of tax exempt parcels.
- P. **Existing System.** “Existing System” means the ProVal Computer Aided Mass Appraisal (CAMA) System currently in use by the ASR.
- Q. **Integrated System.** “Integrated System” means each of the other City systems which are currently integrated or have planned integrations with the Existing System. Integrated Systems include EnerGov, MUNIS, Oracle EBS, Property Search, Transfer Search, Rehab Tracker, Assessor’s Tracking System, Parcel Edit Tracker, Exempt Tracker, and Area Tax Tracker. See also Exhibit B – CAMA Technical Requirements T9.06 – T9.17.
- R. **Integrated Systems Administrator.** “Integrated System Administrator” means the City employee, City contractor or other designated representative who has administrative authorities within any of the Integrated Systems.
- S. **Offeror.** “Offeror” means any person or legal entity who may choose to submit a proposal in response to this solicitation.
- T. **Parcel Edit Tracker.** “Parcel Edit Tracker” means an internal web application used by the Assessor’s Office to track actions like merges and splits on parcels.
- U. **Property Search.** “Property Search” means an externally accessible web application used by the general public to search real estate property information along with assessment history, transfer history, and GIS data for City of Richmond parcels. The application utilizes our Assessment Data Mart and our Address Data Mart.
- V. **Rehab Tracker.** “Rehab Tracker” means an internal web application used to track the workflow of tax rebates for parcel rehabs.
- W. **SaaS.** “SaaS” means a software as a service software program.
- X. **Transfer Search.** “Transfer Search” means an externally accessible web application used by the general public to search transfer details for City of Richmond parcels based on residential, multifamily, or commercial categories. The application utilizes our Assessment Data Mart and our Address Data Mart
- Y. **UAT.** “UAT” means User Acceptance Testing, or testing by key City internal users or internal user groups using expertly prepared test scripts for key implementation or migration milestones.

1.5 **Provisions Excluded from Resulting Contract.** There are certain provisions which will not be evaluated by the City. The City will not accept and cannot agree to any provisions which:

- A. Require the City to maintain any type of insurance either for the City's benefit or for the Contractor's benefit;
- B. Automatically continue the contract period from term to term;
- C. Require or state the terms of any Offeror's form agreement shall prevail over the terms of any part of this Request for Proposals in the event of conflict;
- D. Require the City to indemnify, hold harmless or defend the Contractor for any act or omission or waive the City's sovereign immunity;
- E. Require the application of the law of any state other than Virginia to interpret or enforce the contract or require or permit where any dispute under the Contract be resolved in any court not located within the corporate limits of the City;
- F. Require any total or partial compensation or payment for lost profit or liquidated damages by the City if the Contract is terminated before its ordinary term ends;
- G. Require the Contract be endorsed by the home office, or by any other officer of the Contractor, subsequent to execution by the Director of Procurement Services for the City before the Contract is considered in effect;
- H. Delay the acceptance of the Contract beyond the date of execution;
- I. Limit or add to the time period within which claims can be made or actions can be brought;
- J. Limit the liability of the Contractor for property damage, personal injury, wrongful death or infringement of intellectual property rights;
- K. Permit unilateral modification of the Contract by the Contractor;
- L. Bind the City to any arbitration or to the decision of any arbitration board, commission, panel or other entity;
- M. Obligate the City to pay amounts beyond the maximum aggregate contract amount set forth in the Contract or any costs of collection or attorney's fees;
- N. Grant the Contractor a security interest in property of the City or a right to an injunction against the City greater than that which is authorized by City Charter § 2.08; or
- O. Require the City to keep confidential any records subject to disclosure under the Virginia Freedom of Information Act or with respect to which the Contractor has not complied with the requirements of City Code § 21-5 or Code of Virginia § 2.2-4342.

This is not an exhaustive list, and the City may amend this list at any time.

- 1.6 **Exhibits to Statement of Needs.** Exhibit A ("CAMA Functional Requirements") and Exhibit B ("CAMA Technical Requirements") are incorporated into this Statement of Needs by reference.
- 2.0 **Requirements and Deliverables.** The Contractor shall provide all services, deliverables, and expert resources as outlined in this Request for Proposals and Exhibits

incorporated herein. The Contractor shall provide a CAMA that meets all requirements of this Statement of Needs, including all CAMA functional requirements set forth in Exhibit A and all CAMA technical requirements set forth in Exhibit B.

The Contractor must provide a CAMA that is a complete solution, excluding hardware. The CAMA must be fully compliant with the legal and technical assessment roll submission requirements of the Commonwealth of Virginia. The CAMA must have built-in statistical analysis capability, preferably including regression analysis, or at a minimum must seamlessly interface with off-the-shelf statistical analysis software.

2.1 **Project Management and Implementation.** The Contractor shall provide project management and implementation services, including but not limited to:

- A. Create detailed project plan including timelines which clearly define each milestone required for implementation, and demonstrates Contractor's ability to have CAMA fully implemented, tested and operational by the Final Completion Date specified herein;
 - a. The Contractor shall provide the first draft of the detailed project plan to the City no later than 30 calendar days after the Commencement Date of the Contract.
 - b. The City will provide comments within 10 business days of receipt of the draft project plan.
 - c. The Contractor shall make all required edits to the project plan, incorporating all feedback and revisions from the City, and provide an updated draft project plan within 10 business days of receipt of the City's comments, and Contractor shall continue making such revisions until the project plan is accepted by the City.
- B. Create a proposed organizational change management plan, including strategies, recommendations, tools, techniques, workshops, and training, which would contribute to a successful implementation of the CAMA;
 - a. The Contractor shall provide the first draft of the organizational change management plan to the City no later than 30 calendar days after the Commencement Date of the Contract.
 - b. The City will provide comments within 10 business days of receipt of the draft organizational change management plan.
 - c. The Contractor shall make all required edits to the organizational change management plan, incorporating all feedback and revisions from the City, and provide an updated draft within 10 business days of receipt of the City's comments until the organizational change management plan is accepted by the City.
- C. Facilitate the City's ability to continue use of the Existing System in parallel while the CAMA is implemented and tested;

- D. Provide ongoing project management services using a recognized project management methodology;
- E. Provide real-time updates to the project plan and scheduled monthly project meetings to discuss the project plan;
- F. Provide summary updates to City Assessor and CAMA Administrator on a weekly basis and upon request by City;
- G. Provide dedicated account representatives and technical subject matter experts necessary for project management and implementation; including data conversation and migration services, integration services, configuration assistance, and training.

2.2 **Data Conversion and Migration Services.** The Contractor shall provide data conversion and migration services, including but not limited to:

- A. Create detailed field level conversion maps and coordinate mapping and migration of data from the Existing System into the CAMA;
 - a. The Contractor shall provide the first draft of the field level conversion maps no later than 30 calendar days after the Commencement Date of the Contract.
 - b. The City will provide comments within 10 business days of receipt of the draft field level conversion maps.
 - c. The Contractor shall make all required edits to the field level conversion maps, incorporating all feedback and revisions from the City, and provide updated drafts within 10 business days of receipt of the City's feedback until the field level conversion maps are accepted by the City.
- B. Create detailed plan for go-live weekend to bring all interim data collected into production system of the CAMA, and ensure no data is lost or excluded;
 - a. The Contractor shall provide the first draft of the plan no later than 30 calendar days after the Commencement Date of the Contract.
 - b. The City will provide comments within 10 business days of receipt of the draft plan.
- C. The Contractor shall make all required edits to the plan, incorporating all feedback and revisions from the City, and provide an updated draft within 10 business days of receipt of the City's feedback until accepted by the City. Provide detailed identification of data requirements from the City not present in existing database;
 - a. The Contractor shall provide the first draft of the list of data requirements no later than 30 calendar days after the Commencement Date of the Contract.
 - b. The City will provide comments within 10 business days of receipt of the draft.

- c. The Contractor shall make all required edits to the plan, incorporating all feedback and revisions from the City, and provide an updated draft within 10 business days of receipt of the City's feedback until accepted by the City.
- D. Create detailed UAT plan and coordinate UAT of data migrated from Existing System to the CAMA;
 - a. The Contractor shall provide the first draft of the UAT plan no later than 30 calendar days after the Commencement Date of the Contract.
 - b. The City will provide comments within 10 business days of receipt of the draft.
 - c. The Contractor shall make all required edits to the plan, incorporating all feedback and revisions from the City, and provide an updated draft within 10 business days of receipt of the City's feedback until accepted by the City.
- E. The Contractor shall provide the first draft of the conversion and migration plans no later than 30 days after the Commencement Date of the Contract;
 - a. The City will provide comments within 10 business days of the receipt of the draft.
 - b. The Contractor shall make all required edits to the plan, incorporating all feedback and revisions from the City, and provide an updated draft within 10 business days of receipt of the City's feedback until accepted by the City.
 - c. Review with and obtain approval from CAMA Administrator for all conversion and migration plans no later than 50 calendar days after the Commencement Date of the Contract;
- F. The Contractor shall start data conversion and migration no later than 80 calendar days after the Commencement Date of the Contract;
- G. The Contractor shall finish data conversion and migration process testing no later than 160 calendar days after the Commencement Date of the Contract;
- H. The Contractor shall migrate defined reports and queries from Existing System into CAMA no later than 260 calendar days after the Commencement Date of the Contract;
- I. The Contractor shall complete data conversion and migration no later than 260 calendar days after the Commencement Date of the Contract;
- J. The Contractor shall perform and document verification of converted and migrated data integrity and continuity no later than 260 calendar days after the Commencement Date of the Contract; and
- K. The Contractor shall verify the City's ability to report on and perform contiguous trend and other cumulative analysis that is inclusive of data converted and migrated from Existing System.

2.3 **Integration Services.** The Contractor shall provide the integration services listed in this section 2.3 for each of the following Integrated Systems: EnerGov, MUNIS, Oracle EBS, Property Search, Transfer Search, Rehab Tracker, Assessor's Tracking System, Parcel Edit Tracker, Exempt Tracker, and Area Tax Tracker.

- A. Utilize BTS to integrate the CAMA with the City's other Integrated Systems;
- B. Develop integration plans, architectural and data flow diagrams for each Integrated System;
 - a. The Contractor shall provide the first draft of the deliverables in section 2.3(B) no later than 30 calendar days after the Commencement Date of the Contract;
 - b. The City will provide comments within 10 business days of receipt of the draft.
 - c. The Contractor shall make all required edits to the plan, incorporating all feedback and revisions from the City, and provide updated drafts within 10 business days of receipt of the City's feedback until accepted by the City; and
- C. Coordinate integration services with the Integrated Systems Administrators for each Integrated System;
- D. The Contractor must start testing of integration services no later than 180 calendar days after the Commencement Date of the Contract;
- E. Coordinate and complete UAT, including end-to-end testing, for each Integrated System; and
- F. The Contractor must complete integration services testing no later than 260 calendar days after the Commencement Date of the Contract.

2.4 **Configuration Assistance.** The Contractor shall provide configuration assistance services, including but not limited to:

- A. Assistance with initial setup of CAMA in dedicated City partitions, including creation of any ancillary data structures, if required (such as separate reporting databases or document repositories);
- B. Initial setup of CAMA must be completed by the Contractor no later than 110 calendar days after the Commencement Date of the Contract;
- C. Assist with configuration of any migrated request types, workflows, user groups, site configurations, security settings;
- D. Full installation of CAMA must be completed by the Contractor no later than 120 calendar days after the Commencement Date of the Contract;
- E. Coordinate and complete UAT, including end-to-end testing of all configured services for internal, external, and/or mobile users, including but not limited to service requests, workflows and request assignments, user profiles, and notification elements; and
- F. The Contractor shall provide a CAMA that is fully installed and configured in accordance with all requirements of this Contract no later than 170

calendar days after the Commencement Date of the Contract (the “Final Completion Date”).

2.5 **Release Management.** The Contractor shall provide ongoing release management services for the CAMA, including but not limited to:

- A. Provide CAMA Administrator annually, at a minimum, with anticipated release schedules and planned release cycles, including any hotfixes when required due to critical issues or bugs with the CAMA;
- B. Provide the City with detailed release notes for features, functionality and bug fixes included in each release as well as report any known issues with each release to be delivered one week, at a minimum, before release;
- C. Maintain updates to online help and training materials as appropriate for newly released functionality and features for the CAMA;
- D. Facilitate the staging of releases to allow the City to review and test pending releases (in order to allow the City time to communicate changes, train users, prepare citizens and update procedures.); and
- E. Allow the City to schedule production release to allow for release staging, internal communication cycle, and avoid disruption during Business Hours or peak usage hours, as specified by CAMA Administrator (based on reporting, trend analysis, planned City activities or anticipated events).

2.6 **Training and Documentation.** The Contractor shall provide the following training and training documentation, at a minimum:

- A. Provide training for all user types of the CAMA, including but not limited to CAMA Administrators, Supervisors, Appraisers, Technical Users, and Read-Only Users no later than 240 calendar days after the Commencement Date of the Contract;
- B. Provide access to a minimum of 30 users to online training documentation, webinars, video training, user guides and manuals for the CAMA no later than 240 calendar days after the Commencement Date of the Contract; and
- C. Provide access to training materials related to all future upgrades or enhancements of the CAMA.

2.7 **Maintenance and Support.** The Contractor shall provide ongoing maintenance and support to the City for the CAMA and related issues, including but not limited to:

- A. Provide phone support during Business Hours;
- B. Provide access for the City to report issues via a call center or access to Contractor’s self-service support portal;
- C. Provide ongoing maintenance and upgrades to the CAMA quarterly, at a minimum;
- D. Provide staff training to the City on CAMA with each version update provided to the City pursuant to this Contract no later than 30 calendar days after the version update;
- E. Provide clear escalation protocols for any issues identified by the City that (i) require additional expertise or (ii) are not being addressed to the City’s satisfaction.

- 2.8 **System Documentation.** The Contractor shall provide system documentation, including but not limited to:
- A. System setup and implementation documentation, including but not limited to documentation specific to any unique City implementations, architectural and data-flow diagrams for integrations with Integrated Systems;
 - B. Technical documentation and best practices recommendations and documentation related to configuration and use of the CAMA; and
 - C. System and user manuals.
- 2.9 **Warranty.** The Contractor shall warrant all work relating to the CAMA throughout the term of the Contract. The Contractor shall also provide a warranty for both the CAMA and all implementation services, as specified below:
- A. **CAMA Warranty.** The Contractor shall warrant the CAMA will conform, throughout the term of the Contract, to all the requirements and specifications as stated in this Request for Proposals.
 - B. **Service Warranty.** The Contractor shall warrant that all services provided pursuant to the Contract will be of good quality, free of faults and defects, and in accordance with the Contract, throughout the term of the Contract.
 - C. **Assignment of Warranties.** The Contractor shall assign to the City any manufacturer's warranties associated with the CAMA.
- 2.10 **Acceptance Procedures.**
- A. The Contractor shall notify the CAMA Administrator in writing upon completion of each milestone;
 - B. The CAMA Administrator will approve a milestone only if it is completed by the Contractor in accordance with the Contract. If the CAMA Administrator does not approve a milestone, the Contractor shall make any necessary corrections or revisions. Once the milestone has received CAMA Administrator approval, the Contractor may proceed again from milestone.
 - C. For each of the following milestones, the Contractor may only invoice the City for the fee associated with that milestone after the Contractor's receipt of written approval of that milestone from the CAMA Administrator as set forth in this section 2.10:
 - 1. Data Conversion and Migration Services (Detailed in Statement of Needs, Section 2.2)
 - 2. Integration Services (Detailed in Statement of Needs, Section 2.3)
 - 3. Configuration Assistance (Detailed in Statement of Needs Section 2.4)
 - 4. Onboarding Training and Documentation (Detailed in Statement of Needs, Section 2.6(A) and (B))
 - 5. System Documentation (Detailed in Statement of Needs, Section 2.8)

2.11 **Cooperation Required.** The Contractor shall work professionally and courteously with the City and any contractors utilized by the City.

2.12 **Payments.** The Contractor shall perform and provide all Data Conversion and Migration Services; Integration Services; Configuration Assistance; Onboarding Training and Documentation; and System Documentation as required by this RFP on a flat fee basis.

The Contractor shall only bill the City for any monthly or recurring fees related to the CAMA in accordance with the Contract.

The City, in its sole discretion, may determine whether to purchase any annual maintenance services offered by the Contractor under the Contract during the term of the Contract.

3.0 **Proposal Contents.** The proposal must include all of the information set forth in this section and be organized as set forth in this section. In addition to the original, the offeror shall submit (i) 7 of complete, bound paper copies of its proposal and (ii) electronic copies in a portable document format readable by the Adobe Reader program.

3.1 **Tab 1 – Signed Forms.** This tab should include the completed and signed Signature Sheet, Addenda Acknowledgement, State Corporation Commission Form, and Office of Minority Business Development Forms included with this Request for Proposals.

3.2 **Tab 2 – Statement of Scope.** In concise terms, state the Offeror’s understanding of the scope of work presented by the Request for Proposals.

3.3 **Tab 3 – Executive Summary.** This tab should provide a brief summary of the proposal’s contents, emphasizing any unique aspects or strengths of the proposal. The Executive Summary should not exceed three pages.

3.4 **Tab 4 – Experience.**

- A. Include a list of customers, contracts and projects for both private and public entities, for which the Offeror has provided the proposed CAMA software and services over the last five years;
- B. Include the history of Offeror’s CAMA system offerings, (e.g. initial release date, current version number and development history); and
- C. Explain the Offeror’s product roadmap over the next three years for ongoing development of their CAMA system and their commitment to and investment in the proposed CAMA system.
- D. Explain the Offeror’s experience providing technical and customer support for governmental entities similar in size and structure to the City of Richmond.
- E. Explain the Offeror’s qualifications, including a description of the offeror’s experience in providing the products services required by this Request for Proposals for entities similar to the City, and a brief history of the offeror’s

experience providing the products services required by this Request for Proposals.

- 3.5 **Tab 5 – Key Personnel.** This tab must include the résumés or curriculum vitae of the Offeror’s key staff members. It should identify the specific employees assigned to provide the services solicited by this Request for Proposals. For each person identified by the Offeror, this tab must include the following information:

- A. Name and title.
- B. Office location and city of residence.
- C. Project responsibilities and roles.
- D. Years having these responsibilities/roles with Offeror.
- E. Educational background.
- F. Professional registrations and memberships, if applicable.
- G. Years of relevant experience.

- 3.6 **Tab 6 – References.**

- A. Include the names, addresses and telephone numbers of at least four other government organizations with whom the Offeror has worked during the last five years providing the software and services required by this RFP;
- B. Briefly identify the project, location, and services performed; and
- C. This tab must include an affirmative statement where the Offeror grants its consent for the City to contact the Offeror’s references for purposes of evaluating the Offeror and acknowledges any information obtained from the Offeror’s references will not be disclosed to the Offeror.

- 3.7 **Tab 7 – Project Approach.** This tab should describe in detail the Offeror’s proposal for providing a CAMA system which meets the requirements in and required by the Statement of Needs. The Offeror’s proposed CAMA software product must demonstrate proven opportunities to improve the efficiency and effectiveness of the ASR. Offerors should propose options which will provide the optimum in system performance, growth, flexibility, and reliability. The Offeror must describe the hardware requirements for effectively and efficiently running the application software. The City will also consider proposals which include hardware in a turnkey solution.

The Offeror’s proposal must, at minimum, include:

- A. **Description of CAMA Solution.** The Offeror shall provide a detailed description of the proposed CAMA solution and how the solution meets the requirements set forth in the Statement of Needs.
- B. **Project Management and Implementation Plan.** The Offeror shall provide a comprehensive and detailed plan for implementing the proposed CAMA which is inclusive of all services and meets all requirements of this RFP. The implementation plan and rollout strategy should be based on Offeror’s previous experience with organizations of similar size, projects of

comparable complexity and designed to limit risk to the City. The Project Management and Implementation plan must, at minimum, include:

- a. Clearly defined milestones and be organized in achievable and realistic phases for both the City and the Offeror;
- b. An overview of project management and implementation methodology. Offerors are to describe their methodology for implementing a fully functioning CAMA that meets all the functional and technical requirements defined in this RFP;
- c. A project timeline with clearly defined milestones, tasks (including responsible party) dependencies and deliverables for each phase of the implementation;
- d. The staff assignments (including expected assistance from the ASR and partner service teams) for project tasks and estimated number of hours and anticipated duration required from City staff for each task;
- e. Detailed description and timeline that incorporate all additional services and support included in this RFP;
- f. A transition plan for moving the City from implementation to support model;
- g. A detailed “go-live” plan that includes all tasks required and a list of responsible on-site and remote resources needed to complete implementation and begin production use of the Offeror’s CAMA; and
- h. Any value-added services or support that are not listed in this RFP, but that based on the Offeror’s experience would enhance the successful implementation, adoption and utilization of the Offeror’s CAMA

C. **Data Conversion and Migration Plan.** The Offeror shall provide a comprehensive and detailed plan for providing data conversion and migration as detailed in Statement of Needs, Section 2.2. The Data Conversion and Migration plan must, at minimum, include:

- a. Retrieving all data from the Existing System, including all related electronic data related to attached photos, documents, and sketches;
- b. Converting all Existing System records into the data format required by the Offeror’s CAMA;
- c. Migrating all converted records into the Offeror’s CAMA such that aggregated, historical and trend over time reports can be inclusive of data migrated over from the Existing System;
- d. Recommended start date and time to accurately complete record conversion and migration in the Offeror’s proposal submission;
- e. Estimate number of hours required to complete requirements of the data conversion and migration as detailed in the Statement of Needs;

- f. Detail the role of City resources in the data conversion and migration and estimate level of effort required both in total hours and duration;
 - g. Offerors must define the conversion process, note what measures are in place to ensure an accurate data conversion and include checks and information on how Offeror plans to monitor effectiveness and quality of the data migration process;
 - h. Offeror must describe any limitations to the format of conversion data and include a description of the data scrubbing process;
 - i. Offeror must indicate the post data reconciliations performed to ensure accuracy of data conversion, including sample sizes used for verification by Offeror data team as well as guidelines for any UAT; and
 - j. Offeror must describe how it proposes to manage data continuity between testing and go-live, particularly if multiple data cuts or parallel test periods, or both, are proposed as part of conversion strategy.
- D. **Integrated System Plan.** The Offeror shall provide a comprehensive and detailed plan for integration of the Offeror's CAMA with each of the Integrated Systems defined in Statement of Needs, Section 1.4(Q). For each plan, indicate if custom development efforts will be required. If required, this must be factored into all relevant plans, timelines and pricing submitted by the Offeror in response to this RFP. The Offeror's integrated system plan must, at minimum, include:
- a. All APIs and BTS interactions necessary for each Integrated System;
 - b. Experience of Offeror in integrating each Integrated System with the Offeror's proposed CAMA;
 - c. Vendor management services available with respect to each integration;
 - d. Expert technical resources and services available with respect to each integration; and
 - e. Methodology to complete end-to-end testing for each integration.
- E. **Training Plan.** The Offeror shall provide a comprehensive and detailed training plan with their proposal to describe training for the City's personnel that meets the requirements of the Statement of Needs, Section 2.6. The training plan must include, at minimum, the following:
- a. Estimated number of hours required;
 - b. Proposed methodology and delivery mechanism, timelines/schedules, facility needs, materials, documentation/manuals, equipment;
 - c. Descriptions of classes/courses proposed in the training plan;
 - d. Samples of training manuals and documentation;
 - e. Samples of training tutorials or other computer based programs;

- f. Plans and options for on-site training of City personnel; and
 - g. The knowledge transfer strategy proposed by the Offeror to prepare City staff to operate the CAMA after it is placed into production.
- F. **Release Management Support Program.** The Offeror shall provide details regarding their release management practices.
 - a. Explain Offeror's problem reporting and resolution procedures and issue or ticket escalation processes;
 - b. Describe release methodology, including the tracking system or process Offeror uses to report on the status of upgrade releases and record and track problems and bugs;
 - c. Describe Offeror's service support center and indicate whether there are resources trained and dedicated to supporting the Offeror's proposed CAMA;
 - d. Define Offeror's delivery methodology for future software upgrades, including frequency of upgrades, average downtime, as well as process for notification to Offeror's subscribers, process for staging subscriber releases and documentation provided to subscribers, for new CAMA releases;
 - e. Describe customer communications processes that announce issues and events such as service outages, bug fixes, application or database updates, known issues, EOL dates, and breaches; and
 - f. Provide a list of any user groups, social-networking sites or public discussion areas relating to Offeror's product or service offerings.
- G. **Additional Services Available.** If the Offeror offers other product capabilities, functional or technological advances, or additional services related to the CAMA system project set forth in this RFP, the Offeror may describe them in this section. This can include, but isn't limited to SaaS, web hosting of assessment information, mobile applications, GIS integration, etc. Any additional costs for these offerings (above the costs set forth in Tab 9) must be explained and identified separately in this section.
 - a. If SaaS is offered, provide architectural diagram depicting SaaS implementation, including data storage, and how the solution provides for:
 - i. Data security across multiple tenants;
 - ii. Backup and recovery;
 - iii. High availability;
 - iv. Distributed data storage and replication;
 - v. Device authentication;
 - vi. City access to data;
 - vii. Support and maintenance;
 - viii. Performance; and

3.8 **Tab 8 – Solution Architecture.** This tab should describe in detail the architecture of Offeror’s proposed CAMA, and should, at minimum, include the following:

- A. Clearly define the security features of the Offeror’s proposed CAMA
- B. Explain Offeror’s capabilities around user management, integration options with enterprise user management applications such as Active Directory, and support for multi-factor authentication.
- C. Describe any technology requirements to support the Offeror’s proposed CAMA, at a minimum include any third-party software packages being provided by Offeror in order for the Offeror’s proposed CAMA to function correctly (for example, hosted application servers, Web servers, integrated business intelligence tools, databases and database versions, remote access or VPN technologies, geo-location services, agents or clients for backup/replication, or software distribution and security).
- D. Describe any additional technology requirements that would be considered relevant or material to the ability of the Offeror’s proposed CAMA to meet the requirements of this RFP.

3.9 **Tab 9 – Development Methodology.** This tab should include detail about how the Offeror approaches the ongoing development of features and functionality as well as support and prioritization processes for evaluation of reported bugs, enhancement requests, releases and upgrades. The Offeror must include, at minimum, the following descriptions as well as any other information that the Offeror believes is relevant:

- A. Describe development methodology, including how best practices, UX design and usability are factored into the design and development process for proposed CAMA;
- B. Indicate whether resources are dedicated to the ongoing development of proposed solution;
- C. Describe the tracking system to report on and prioritize the product backlog of proposed features and functionality into product roadmap;
- D. Describe how customers are kept aware of product roadmap, and how much future visibility is available;
- E. Describe the tracking system for reporting on and prioritizing problems or bugs;
- F. Describe methodology for evaluation of problems and bugs and prioritization for hotfix compared to standard release;
- G. Describe customer communications processes for new releases and provide sample of typical release notes; and
- H. Describe Offeror’s process for receiving, evaluating, and implementing requests from customers for enhancements to the proposed system post implementation.

3.10 **Tab 10 – Subcontracting.** This tab must identify any of the required services the Offeror intends to subcontract, and provide the following information:

- A. Reasons for subcontracting;
- B. Proposed subcontractor responsibilities; and
- C. Identity of proposed subcontractors, including the subcontractor's location, relevant personnel and experience, previous use by Offeror as a subcontractor, and any other relevant supporting information.

3.11 **Tab 11 – Offeror History.** This tab should include a comprehensive narrative history of the Offeror's firm, including the development of its experience in providing the solicited services. Explain the size of the firm, including years in business, office location, and legal structure.

This section of the proposal must contain the following organizational information and data for the Offeror's organization:

- A. If a corporation, include: state of incorporation; date of incorporation; principal place of business; Federal I. D. number; whether the corporation is a Subchapter S corporation; the name, position, address, and number of years in position of each officer and director; and the names of any affiliates, partner corporations, and subsidiaries;
- B. If a limited liability company, include: state in which the limited liability company is organized; date organized; list of all managers of the limited liability company, including the name, telephone number, and years as a manager for each manager; and list of all members of the limited liability company, including the name, telephone number, years as a member, and membership interest for each member;
- C. If a partnership, include: state in which the partnership was formed; date formed; type of partnership; and list of all general and limited partners, as applicable, including the name, telephone number, years as a partner, and partnership interest for each partner;
- D. If a joint venture, include: date of formation; name and address of each joint venture partner; name and address of the principals of each joint venture partner; and percentage of interest of each joint venture partner; or
- E. If the Offeror is not a corporation, limited liability company, partnership, or joint venture, this tab must identify the type of business entity and provide any pertinent information.
- F. This tab should state whether the Offeror has operated under another name within the past ten years and, if so, the other name, the number of years in business under this other name, and the State Corporation Commission identification number under this name.
- G. This tab must state whether the Offeror is a subsidiary or affiliate of another organization and, if so, the name and address of each parent or affiliate organization.
- H. This tab must include the following statement, signed by the Offeror's contractually binding authority:

“By submitting its proposal, {Insert Legal Name of Offeror} (the “Offeror”) certifies and represents the information the Offeror provides in response to this Request for Proposal is accurate and

complete as of the date of such submission. If the Offeror provides no information in response to any of the requirements of this Request for Proposal, then the Offeror, by submitting its proposal, certifies and represents such requirements do not apply because no information exists that would respond to the requirement. The Offeror further covenants that, during the time between the submission of its proposal and the City's announcement of its decision to award the Contract, the Offeror will furnish the City with any changes or additions to such information necessary to ensure this information remains accurate, complete and up-to-date."

- 3.12 **Tab 12 – CAMA Functional Requirements.** Offerors must complete Exhibit A and submit as Tab 12 of the Offeror's proposal. Any deviations must be specifically noted by the Offeror. Additional sheets may be attached, if necessary.
- 3.13 **Tab 13 – CAMA Technical Requirements.** Offerors must complete Exhibit B and submit as Tab 13 of the Offeror's proposal. Any deviations must be specifically noted by the Offeror. Additional sheets may be attached, if necessary.
- 3.14 **Tab 14 – Cost Proposal.** Offerors must complete Exhibit C and submit as Tab 14 of the Offeror's proposal.
- 4.0 **Evaluation Criteria.** The following evaluation criteria will be used in ranking and selecting Offerors for negotiation pursuant to this RFP:

Available Points

- | | | |
|----|--|----------------|
| A. | Compliance with Functional and Technical Requirements..... | 20 Pts. |
| B. | Project Approach..... | 15 Pts. |
| C. | Experience & Qualifications..... | 10 Pts. |
| D. | Cost (allowed by City Code § 21-67(e))..... | 20 Pts. |
| E. | Accessibility (required by City Code § 21-69)..... | 5 Pts. |
| F. | MBE / ESB Commitment..... | 30 Pts. |

In accordance with City Code § 21-67(e), this criterion considers the offeror's "good faith minority business enterprise and emerging small business participation efforts" as defined in City Code § 21-4. Pursuant to City Code § 21-67(e), an offeror must receive at least 15 points under this criteria in order to be selected for negotiations, unless granted a waiver by the Chief Administrative Officer. The MBE/ESB participation goal for this contract is 0%. See sections 2.4 of the Instructions to Offerors and 2.6.2 and 3.9 of the General Terms and Conditions for the MBE/ESB provisions.

Total Available Evaluation Points..... 100 Pts.

END OF STATEMENT OF NEEDS

PART II

INSTRUCTIONS TO OFFERORS

1.0 Interpretations.

- 1.1 Incorporation of City Policies and Procedures.** This Request for Proposals is subject to the provisions of Chapter 21 of the Code of the City of Richmond, as amended, and the Policies and Procedures of the Department of Procurement Services, as amended, which are hereby expressly incorporated into this Request for Proposals by reference. Offerors may inspect copies of these documents at the City's website, www.rva.gov.

1.2 Explanations to Offerors.

- 1.2.1 Inquiry.** All inquiries requesting clarification of this Request for Proposals should be made in writing no later than ten business days prior to the closing date to the Contracting Officer identified on the cover sheet of this Request for Proposals. If submitting an inquiry by electronic mail or facsimile transmission, the offeror should notify the Contracting Officer by telephone that the person is sending the inquiry by that means. All inquiries should clearly state the number of this Request for Proposals. Because each offeror may have different needs for information, that offeror must make whatever inquiries it deems necessary in order to respond to the Request for Proposals. Inquiries that the Contracting Officer determines to be pertinent to all solicited contractors will be answered by addenda to all solicited firms.
- 1.2.2 Form of Explanation.** No oral explanation in regard to the meaning of this Request for Proposals will be made and no oral instructions will be given before the award of the contract. Any explanation, interpretation or modification of the Request for Proposals that is pertinent to all solicited offerors will be made only by an addendum duly issued by the City, a copy of which will be mailed or delivered to each offeror known to have received the Request for Proposals. The City shall not be responsible for any other explanations or interpretations anyone presumes to make on behalf of the City before the expiration of the ultimate time set for the receipt of proposals.
- 1.2.3 Addenda.** From time to time, addenda may be issued that will provide clarifications or supplemental information about the Request for Proposals documents. All firms receiving Request for Proposals documents issued by the City will be provided copies of addenda. If an offeror fails to acknowledge any addendum that (i) has a material effect on the proposal (i.e., that relates to price, quantity, quality or delivery) and (ii) is not merely administrative, the City may consider that offeror's proposal incomplete, and the proposal thus may be rejected or receive a lower score in the evaluation process. The offeror shall acknowledge receipt of all addenda as part of its proposal and on the form provided for that purpose by the City. The offeror shall be solely responsible for verifying the existence of all addenda items.
- 1.3 No Contact Policy.** Any contact with any City officer, employee, agent, or other representative concerning this Request for Proposals other than that outlined in section 1.2

("Explanation to Offerors") above is prohibited. Any such unauthorized contact may disqualify the offeror from this procurement.

- 1.4 **Other Documents.** The Statement of Needs, the General Terms and Conditions, and any Special Terms and Conditions attached to this Request for Proposals are hereby expressly made a part of and incorporated into this Request for Proposals. The General Terms and Conditions and any Special Terms and Conditions shall be a part of any contract that results from this Request for Proposals. This Request for Proposals also includes a sample of the City's form contract as an attachment. All conditions contained in this attached contract are hereby expressly made a part of and incorporated into this Request for Proposals.

1.5 **Disqualification Due to Participation in Preparation of Solicitation.**

- 1.5.1 **Prohibition.** City Code § 21-281(a) prohibits any person who, for compensation, prepares a solicitation for or on behalf of the City from submitting a response to that solicitation or any portion thereof.

- 1.5.2 **Definition.** For purposes of this section 1.5 ("Disqualification Due to Participation in Preparation of Solicitation"), the word "prepares" has the meaning set forth in City Code § 21-281(b) and thus includes but is not limited to the following:

- (1) Serving as a director or deputy director of the agency which has initiated the procurement;
- (2) Serving as the director of procurement services after the department of procurement services has received information on an agency's intent to procure;
- (3) Serving as the procurement manager for the agency which has initiated the procurement;
- (4) Serving as the procurement officer in charge of the procurement;
- (5) Assisting in the development of specifications for invitations for bids or requests for proposals;
- (6) Attending an evaluation committee meeting that is closed to the public;
- (7) Voting on or scoring a bid or proposal; or
- (8) Any other participation in the procurement process which could lead to unfair advantage.

- 1.5.3 **Disqualification and Waiver.** Pursuant to City Code § 21-281(c), the Chief Administrative Officer shall make the determination that a person is disqualified from submitting a response to a particular solicitation because of that person's participation in preparing that solicitation.

- 1.5.4 **No Contact Policy Applicable.** If a person planning to submit a response to a solicitation contacts the Chief Administrative Officer concerning such a disqualification, such person and the person's firm shall be disqualified from responding to the solicitation for violating the City's no contact policy because the person discussed the solicitation with a City representative other than the Contracting Officer responsible for the procurement.
- 1.5.5 **Appeal of Disqualification.** In accordance with City Code § 21-281(d), any person who has been disqualified pursuant to this section 1.6 ("Disqualification Due to Participation in Preparation of Solicitation") and City Code § 21-281 may appeal the Chief Administrative Officer's determination of disqualification by following the administrative appeals procedure set forth in City Code § 21-168 or by instituting legal action as provided in City Code § 21-169.
- 2.0 **Preparation of Proposals.**
- 2.1 **General Requirements.** The proposal must be typed and bound and should be presented as described in the paragraphs that follow. All pages in the proposal must be consecutively numbered. To be considered substantive, the proposal must respond to all requirements of this part of the Request for Proposals. Information supplied must be current and up to date. Any other information thought to be relevant, but not applicable to the enumerated categories, should be provided as an appendix to the proposal. If the offeror supplies publications to respond to a requirement, the response must include reference to the document number and page number to provide a quick reference for the evaluation panel. Proposals not providing this reference will be considered to have no reference included in the additional documents. The proposal must include all the information defined below and be organized as set forth in the Statement of Needs.
- 2.2 **Substantive Nature of Proposals.** Proposals must be substantive. It is not sufficient for the offeror to address the proposal in general terms or in terms other than those outlined in this Request for Proposals. Proposals should be prepared simply and economically, providing a straightforward, concise description of the offeror's ability to meet the requirements set forth in the Request for Proposals.
- 2.3 **Authorized Signature.** All proposals must be signed in order to be considered. If the offeror is not an individual or a sole proprietor but rather a corporation or any other type of legal entity, the offeror must show the title of the individual executing the proposal and a resolution or other documentation clearly establishing the authority of the individual to sign the proposal and any subsequent contract.
- 2.4 **MBE/ESB Participation.** When the City of Richmond establishes a goal for MBE/ESB participation on a city project, all minority and non-minority prime contractors/vendors are required to have MBE/ESB participation.

2.4.1 **Policy.** It is the policy of the City to encourage minority participation on all City contracts. To advance this policy, the City encourages minority participation through subcontracting, joint ventures, or other methods in contracting for services.

2.4.2 **Certification.**

- A. All Minority Business Enterprise subcontractors and vendors must be registered with the City of Richmond's Office of Minority Business Development (OMBD) and certified by the Commonwealth of Virginia Department of Minority Business Enterprise or a comparable certifying entity as a Minority Business Enterprise. OMBD reserves the right to accept the certification of other certifying agencies.
- B. All Emerging Small Business subcontractors and vendors must be certified by the City of Richmond's Office of Minority Business Development (OMBD).

2.4.3 **Evaluation.**

- A. In the proposal evaluation process, up to 30 points will be given to those proposals that have documented past good faith efforts and have proposed MBE/ESB participation that relate to the established goal. All MBE/ESB forms that relate to this matter must be included in the prime contractors/vendors response. All documentation as it relates to past good faith efforts and proposed MBE participation must be submitted on the required forms in order to expedite the evaluation process. We have attached the Participation Commitment and the Current and Past Good Faith Effort forms for completion. The offeror should complete all pertinent MBE/ESB forms or risk forfeiting the 30 points assigned to Minority Business Enterprise and Emerging Small Business participation.
- B. The City of Richmond encourages MBE/ESB participation on all City of Richmond contracts. If the City of Richmond waives the setting of goals, it is up to the prime contractor/vendor to determine whether or not they will voluntarily have MBE/ESB participation. Voluntarily committing to MBE/ESB participation allows the prime contractor/vendor to use this commitment as past good faith efforts for credit on future projects that have MBE participation with the City. When presenting MBE/ESB participation, use the forms created by the Office of Minority Business Development (OMBD) (MBE-1, MBE-2 and Good Faith Effort) in order to properly document your participation efforts.

2.5 **Faith-Based Organizations.** The City does not discriminate against faith-based organizations. By signing its proposal, the offeror, if a faith-based organization, agrees that it understands the requirements of City Code § 21-43 (Va. Code § 2.2-4343.1).

2.6 **Licenses, Permits and Fees.** All proposals submitted shall have included in the prices submitted the cost of any business or professional licenses, permits or fees required by the City of Richmond or the Commonwealth of Virginia.

2.7 **Public Inspection of Records.**

2.7.1 **In General.** All proceedings, records, contracts and other public records relating to the procurement transaction that this Request for Proposals concerns shall be open to the inspection of any citizen of the Commonwealth of Virginia or any representative of a media organization with circulation in or that broadcasts in or into the Commonwealth of Virginia in accordance with the Virginia Freedom of Information Act.

2.7.2 **Inspection by Offerors.** Any offeror, upon request, shall be afforded the opportunity to inspect proposal records within a reasonable time after the evaluation and negotiations of proposals are completed, but prior to award, except in the event that the City decides not to accept any of the proposals and to reopen the contract. Otherwise, proposal records shall be open to public inspection only after award of the contract.

2.7.3 **Proprietary Information.** Pursuant to City Code § 21-5(f) (Va. Code § 2.2-4342(F)), trade secrets or proprietary information submitted by an offeror in connection with this procurement transaction shall not be subject to the Virginia Freedom of Information Act, provided that the offeror (i) invokes the protections of section 21-5 of the Code of the City of Richmond prior to or upon submission of the data or other materials, (ii) identifies the data or other materials to be protected, and (iii) states the reasons why protection is necessary. Classifying aspects of the proposal that are not trade secrets or proprietary is cause for the City to reject the proposal. Budgets and price quotations are considered public information in proposals submitted to the City. Classifying budgets and price quotations as “proprietary” or “confidential” is cause for the City to reject the proposal.

2.8 **Use of Brand Names.** Where a brand or trade name appears in the Request for Proposals, it is understood that the brand or trade name referred to, or its approved equal, shall be furnished. If the offeror proposes similar but not identical items, it must furnish full particulars. If no mention is made of any exceptions, it is assumed that the offeror’s pricing is for the article mentioned and not an approved equal, and the offeror will be required to deliver the exact article specified. The City shall decide, in its sole discretion, if a proposed equal will be approved.

2.9 **Descriptive Literature.** Each offeror shall submit with its proposal descriptive literature of equipment or supplies that the offeror proposes to furnish if such articles are of a different manufacture than those specified in this Request for Proposals. Should the description furnished in such literature differ from the specifications submitted by the City and should no mention be made to the contrary, the description shall be construed to mean that the offeror proposes to furnish equipment or supplies in accordance with such description and not in accordance with the City’s specifications, and the City will evaluate the offeror’s proposal accordingly.

2.10 **Exceptions.**

A. An exception is any condition, limitation, qualification, restriction, term, or other deviation from the requirements of the Request for Proposals that is a condition of

the offeror's proposal or that the offeror expects to become part of a contract with the City. Offerors are neither required nor encouraged to take exceptions to the requirements of the Request for Proposals. In some cases, where permitted by law, exceptions may count against an offeror during the evaluation stage or the negotiation stage of the procurement process.

- B. The offeror shall state in its proposal each exception, including the page number, the part and section numbers, the specific text at issue, and the nature of the exception, except as follows:
1. If the Request for Proposals is one for "information technology" as defined in Va. Code § 2.2-2006, the offeror shall not state in its proposal any exception to any liability provisions contained in the Request for Proposals. Instead, if the offeror is selected for negotiations, the offeror shall state any exception to any liability provisions contained in the Request for Proposals in writing, including all of the information required by this section, at the beginning of negotiations.
 2. If the Request for Proposals is one for architectural or professional engineering services, the offeror shall not state in its proposal any exception to any proposed contractual term or condition unless such term or condition is required by statute, regulation, ordinance, or standards developed pursuant to Va. Code § 2.2-1132 until after the qualified offerors are ranked for negotiations. If the offeror is selected for negotiations, the offeror shall state any exception to any proposed contractual term or condition contained in the Request for Proposals in writing, including all of the information required by this section, at the beginning of negotiations.
- C. If the offeror fails, neglects, or refuses to note any exception in the manner and at the time required by this section, the offeror agrees that it shall comply with the Request for Proposals as originally issued and modified by any addenda.

3.0 Warranties and Representations of Offeror.

- 3.1 **Compliance with Request for Proposals Documents.** By signing its proposal in response to this Request for Proposals, the offeror warrants and represents that the offeror is in compliance with all terms and conditions of this Request for Proposals.
- 3.2 **Ethics in Public Contracting** By signing its proposal in response to this Request for Proposals, the offeror warrants and represents that (i) it has not violated any provisions of federal law, the Code of Virginia, the Charter of the City of Richmond, or the Code of the City of Richmond, (ii) its proposal is made without any understanding, agreement, or connection with any other person, firm, corporation, or joint venture making a proposal for the same purposes, and is in all respects fair and without collusion or fraud, (iii) it has not offered or received any kickbacks or inducements from any other contractor, supplier, manufacturer or subcontractor in connection with its proposal and (iv) it has not conferred

on any public employee having official responsibility for this procurement transaction any payment, loan, subscription, advance, deposit of money, services or anything of more than nominal value, present or promised, unless consideration of substantially equal or greater value was exchanged. The offeror further warrants and represents that no officer, employee or other person whose salary is payable in whole or in part by the City is, shall be, or become interested, directly or indirectly, as a contracting party, partner, stockholder, surety or otherwise, in this proposal, in the performance of the contract, in the supplies, materials, or equipment and work or labor to which it relates, or in any portion of the profits thereof. In addition, the offeror warrants and represents that the provisions of City Code §§ 21-274—21-285 (Va. Code §§ 2.2-4367—2.2-4377) pertaining to offerors, contractors and subcontractors apply to this Request for Proposals and any resulting contract. The offeror agrees that if these warranties and representations are in any respect breached, such breach shall constitute a material breach of any contract that the City may award to the offeror and the offeror shall pay to the City the full price agreed by the City to be paid for the supplies, materials, equipment or services to be furnished under its proposal.

- 3.3 **Lawful Age and No Others Have Interest.** By signing its proposal in response to this Request for Proposals, the offeror represents that the offeror is of lawful age and that no other person, firm, corporation or joint venture has any interest in this proposal or in the contract proposed to be entered into.
- 3.4 **No Debts to City.** By signing its proposal in response to this Request for Proposals, the offeror warrants and represents that it is not in arrears to the City, upon debt or contract; is not a defaulter, as surety or otherwise, upon any obligation to the City; and has not been delinquent or unfaithful in any former contract with the City.
- 3.5 **Offeror Not Debarred.** By signing its proposal in response to this Request for Proposals, the offeror warrants and represents that neither its organization nor any of its officers, directors, partners or owners is currently barred from bidding on contracts by any agency of the federal government, any agency of the Commonwealth of Virginia, any agency of any other state, or any other public body or agency thereof.
- 3.6 **No Kickbacks or Conflicts of Interest.** By signing its proposal in response to this Request for Proposals, the offeror represents and warrants that it is in compliance with the provisions of section 2.3 (“Anti-Kickback Provision”) of the General Terms and Conditions included with this Request for Proposals and, further, that the offeror’s firm has no business or personal relationships with any other companies or persons that could be considered as a conflict of interest or potential conflict of interest to the City, and that there are no principals, officers, agents, employees, or representatives of the offeror’s firm that have any business or personal relationships with any other companies or persons that could be considered as a conflict of interest or a potential conflict of interest to the City, pertaining to any and all work or services to be performed as a result of this Request for Proposals and any resulting contract with the City.
- 3.7 **State Corporation Commission Registration.**

- 3.7.1 **Generally.** State law requires most business entities to register with the Commonwealth of Virginia's State Corporation Commission to obtain legal authorization to transact business in Virginia. A contractor organized as a stock or nonstock corporation, limited liability company, business trust, or limited partnership or registered as a registered limited liability partnership shall be authorized to transact business in the Commonwealth as a domestic or foreign business entity if so required by Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law. Any business entity described above that enters into a contract with the City shall not allow its existence to lapse or its certificate of authority or registration to transact business in the Commonwealth, if so required under Title 13.1 or Title 50, to be revoked or cancelled at any time during the term of the contract.
- 3.7.2 **Form Required.** Each offeror organized or authorized to transact business in the Commonwealth of Virginia pursuant to Title 13.1 or Title 50 of the Code of Virginia shall include in its proposal the identification number issued to it by the State Corporation Commission. Any offeror that is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 of the Code of Virginia, or as otherwise required by law, shall include in its proposal a statement describing why the offeror is not required to be so authorized. Each offeror shall indicate the above information on the State Corporation Commission Form included with the Request for Proposals.
- 3.7.3 **Warranty.** By signing its proposal in response to this Request for Proposals, the offeror represents and warrants that all information the offeror submits on its completed State Corporation Commission Form is true and complete at the time the offeror submits its proposal and will remain true and complete throughout the duration of any contract between the City and the offeror that results from this Request for Proposals. The offeror agrees that the process by which compliance with Title 13.1 and Title 50 of the Code of Virginia is checked during the solicitation stage (including without limitation the State Corporation Commission Form provided) is streamlined and not definitive, and the City's use and acceptance of such form, or its acceptance of the offeror's statement describing why the offeror was not legally required to be authorized to transact business in the Commonwealth of Virginia, shall not be conclusive of the issue and shall not be relied upon by the offeror as demonstrating compliance.
- 4.0 **Submission of Proposals.**
- 4.1 **Copies.** Offerors shall submit an original proposal, clearly identified as such and signed in blue ink by the offeror's contractually binding authority. In addition, offerors shall submit additional copies of their proposals in such number and such electronic and paper formats as may be specified in the Statement of Needs.
- 4.2 **Labeling.** All proposals must be sealed and labeled (on the outside of the sealed container), with the label displaying the following information:

Proposal for
Request for Proposals No.
Name of offeror

Address of offeror
Receipt and Closing Date:

- 4.3 **Recipient.** All proposals are to be addressed and delivered by the date and time specified on the Cover Sheet to the Contracting Officer identified on the Cover Sheet.
- 4.4 **Transmittal Letter.** The proposal should include a transmittal letter that lists the following:
- Firm's Name
 - Firm's Address
 - Contact Name and Telephone Number
 - Fax Number and E-mail Address
- 4.5 **Closing Date.** To be considered, a proposal must arrive at the address set forth in section 4.3 ("Recipient") on or before the time and date set forth on the Cover Sheet to this Request for Proposals. The City will not accept a proposal that is late. Offerors mailing proposals should allow sufficient mail delivery time to ensure timely receipt of their proposals. The offeror shall not make any other distribution of proposals. However, materials or information received from a prospective contractor as result of a request by the Contracting Officer shall not be considered a violation of this section.
- 4.6 **Multiple Proposals.** An offeror may submit more than one proposal. At least one of the proposals should be complete and should comply with all of the instructions contained in this Request for Proposals. Additional proposals may be in abbreviated form following the same format and providing only the information that is different from that in the complete proposal.
- 4.7 **Separate Proposals.** Proposals for separate Requests for Proposals shall not be combined on the same form or placed in the same envelope. At its option, the City may decline to consider such proposals.
- 4.8 **Return of Proposal.** All proposals submitted pursuant to this Request for Proposals will become the property of the City and will not be returned.
- 5.0 **Evaluation and Selection Process.**
- 5.1 **Opening.** At the designated time and date, the Department of Procurement Services will open and list the proposals for the record. This is not a public opening. The proposals will then be forwarded to the using agency and evaluation panel to initiate the review and selection process. Proposals received after the date and time specified in section 4.5 ("Closing Date") are late and will be returned unopened at the offeror's expense.
- 5.2 **Evaluation.** During the evaluation phase, an evaluation panel will review and score the proposals in accordance with the evaluation criteria set forth in the Request for Proposals. Some offerors may be eliminated at this stage. Once the evaluation panel has completed this initial scoring, the evaluation panel may engage in discussions with offerors not eliminated by the initial scoring to clarify specific matters presented in those offerors' proposals.

Discussions may include oral interviews or presentations or written communications as specified in the Request for Proposals or, if not so specified, at the sole discretion of the City. The evaluation panel will use information gained during these discussions together with information presented in the proposal to rank offerors in accordance with the evaluation criteria stated in the Request for Proposals. The evaluation panel reserves the right to visit the premises of the offeror if the evaluation panel determines that it is necessary to do so.

- 5.3 **Samples.** The offeror shall furnish the City with samples of items, if requested, without charge, upon request and within ten calendar days of such request. The offeror's failure to provide such samples within the specified time frame or to otherwise comply with this section shall be sufficient cause for the City, at its sole option, to reject the offeror's proposal. If not destroyed and upon request at the time of submission, the City will return samples at the offeror's expense.
- 5.4 **Tests.** The City reserves the right to conduct any test it may deem advisable and to make all evaluations necessary.
- 5.5 **Negotiation with Offerors.**
 - 5.5.1 **In General.** The City may undertake negotiations with offerors whose proposals show them to be qualified, responsible and capable of performing the work in accordance with the stated criteria.
 - 5.5.2 **Procedure.** Unless the Director of Procurement Services determines that only one offeror is fully qualified or that one offeror is clearly more highly qualified than the others under consideration, selection shall be made of two or more offerors deemed to be fully qualified and best suited among those submitting proposals, on the basis of the factors involved in the Request for Proposals, including price if so stated in the Request for Proposals. Negotiations shall then be conducted with each of the offerors so selected. (See City Code § 21-67.)
- 6.0 **Award and Execution of Contract.**
 - 6.1 **Award.**
 - 6.1.1 **In General.** The City will make the award to the responsible and responsive offeror whose proposal is determined in writing to be the most advantageous to the City, taking into consideration price and the evaluation factors set forth in this Request for Proposals.
 - 6.1.2 **Multiple Awards.** The City reserves the right to make awards under this Request for Proposals to more than one offeror if the City determines that doing so is in the best interests of the City. If the City makes multiple awards under this Request for Proposals, each contract awarded will specify the portion of the scope of services awarded to that offeror.

- 6.2 **Rejection of Proposals.** The City reserves the right to reject any or all proposals, in whole or in part, and to delete items prior to making the award, whenever it is deemed in the sole opinion of the City to be in its best interest.
- 6.3 **Nondiscrimination in Award.** The City shall not discriminate against any offeror in the solicitation or award of a contract based on this Request for Proposals because of race, religion, color, sex, national origin, age, disability, faith-based organizational status or any other basis prohibited by state law relating to discrimination in employment or because the offeror employs ex-offenders unless the using agency has made a written determination that employing ex-offenders on the specific contract is not in its best interest.
- 6.4 **Notice of Award.** A contract is awarded only when the Director of Procurement Services signs the contract. The Contracting Officer may provide notice of the City's decision to award a contract prior to award of that contract by posting a notice of intent to award on the website of the Department of Procurement Services. A notice of intent to award means that the City intends to award the contract to the offeror named in the notice ten calendar days after the notice is posted. Offerors are responsible for monitoring the website of the Department of Procurement Services for content posted thereon.
- 6.5 **Contractual Obligation.** The proposal submitted by the selected contractor and this Request for Proposals shall become an attachment to the contract signed by the City and the selected offeror. Price quotations and other time-dependent information contained in proposals should be valid for a minimum of 90 days from the closing date of this Request for Proposals. The City may undertake negotiations with offerors whose proposals show them to be qualified, responsible and capable of performing the work in accordance with the stated criteria. The City shall not be liable for any costs incurred by offerors in connection with the preparation or submission of proposals and related materials or negotiations.
- 6.6 **When Contractual Obligation Arises.** No contract shall result from the submission of any proposal and no liability shall accrue with respect thereto until a written contract and any other necessary documents have been fully and completely executed by both the successful offeror and the City.
- 6.7 **Contract Execution Requirements.** Upon notice of the award of a contract pursuant to this Request for Proposals, the successful offeror shall sign the final contract document, a sample of which is included with this Request for Proposals, upon receipt thereof from the Contracting Officer, register in the City's online Supplier Portal, and furnish the insurance documents required by the General Terms and Conditions included with this Request for Proposals. The offeror shall furnish the City with the signed contract and the required insurance documents and must have registered in the City's online Supplier Portal within 15 calendar days after the date of the notice of award or within such further time as the City may allow. Once the City has received the signed contract and insurance documents from the successful offeror, the City's representative will then sign the contract. The signature of the City's representative on the contract constitutes the award of the contract.

END OF INSTRUCTIONS TO OFFERORS

PART III

GENERAL TERMS AND CONDITIONS

1.0 Duration of Contract.

1.1 Commencement and Expiration. This Contract shall commence on the Commencement Date set forth in the Goods and Services Contract and shall expire 5 years later, unless terminated earlier in accordance with the provisions of this Contract.

1.2 Extension of Contract. The City reserves the right to extend the Contract for any reason for a period or periods up to but not to exceed 12 months. This extension clause may be exercised when the City determines that an extension of the Contract is advantageous to the City. Any extension beyond 12 months will be subject to section 1.3 (“Renewal”). This provision in no way affects or alters the ability of the City to renew the Contract consistent with section 1.3 (“Renewal”). If it is then decided to renew the Contract, the renewal date will commence on the day following the last day of the contract extension.

1.3 Renewal. The City may, at its sole option, renew this Contract for up to 1 five-year renewal terms by furnishing the Contractor with written notice of its decision to renew the Contract at least 60 calendar days before the expiration of the preceding term.

2.0 Contractor Responsibilities.

2.1 Independent Contractor. The Contractor shall provide the services required under this Contract as an independent contractor.

2.2 Advertising. The Contractor shall not use any indication of its services to the City for commercial or advertising purposes. However, the Contractor may list the City as a reference account for prospective customers.

2.3 Anti-Kickback Provision. The Contractor warrants that it has not employed or retained any company or person other than a bona fide employee working solely for the Contractor to solicit or secure this Contract and that it has not paid or agreed to pay any company or person other than a bona fide employee working solely for the Contractor any fee, commission, percentage, brokerage fee, gifts or other consideration contingent upon or resulting from the award or making of this Contract. For breach or violation of this warranty, the City shall have the right to annul or void this Contract without liability or, in its sole discretion, to deduct from the contract price or consideration, or otherwise recover the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

2.4 Century Compliance. The Contractor warrants that the hardware, software and firmware products, provided for use by the City or used by the Contractor to provide any service or commodity that is the subject of this Contract, individually and in

combination, shall successfully process, store and perform calculations with dates regardless of the century in which the dates occur.

2.5 **Compliance with Laws.** The Contractor shall comply with the provisions of any statutes, ordinances, rules, regulations, or other laws enacted or otherwise made effective by any local, state, or federal governmental entity which may be applicable to the performance of this Contract and shall obtain all necessary licenses and permits thereunder.

2.6 **Contractor Misrepresentation.**

2.6.1 **In General.** If the Contractor knowingly makes a material misrepresentation in submitting information to the City, such misrepresentation will be sufficient grounds for rescinding the award of this Contract.

2.6.2 **MBE/ESB Participation.** By issuing the Request for Proposals, the City intends that MBE / ESB participation proposed as part of any proposal in response hereto be binding on the Contractor. Consequently, if the Contractor falsely representing proposed MBE/ESB participation, or failing to comply with proposed participation, may be in breach of contract. Upon determination of a breach, the City shall have all available remedies for breach of contract, which may include, but is not limited to, one or more of the following: (i) forfeiture, (ii) investigation, and (iii) debarment.

2.7 **Drug-Free Workplace.**

2.7.1 **Policy.** City Council Resolution No. 2000-R197-191 prohibits the City from contracting with any contractor that fails to comply with this policy. The Contractor certifies that it has taken and will continue to take appropriate and effective action to (i) educate its employees about the dangers of drug abuse in the workplace, (ii) provide its employees with effective drug counseling, rehabilitation and employee assistance programs, any or all, (iii) discipline employees who violate the requirement of a drug-free workplace, and (iv) minimize, to the greatest extent possible, the risks of drugs entering the workplace. The Contractor is also prohibited from contracting with any other party that fails to comply with this policy. Failure by the Contractor or its subcontractor to comply with the provisions outlined above will be cause for termination of the Contract.

2.7.2 **Contractor's Plan.** The Contractor shall implement and maintain a Drug-Free Workplace Plan specific to the services and work covered by this Contract that is implemented and effectively used throughout the duration of this Contract to accomplish the requirements of section 2.7.1 ("Policy") above.

2.8 **Human Rights.**

2.8.1 **Civil Rights Act Compliance.** During the performance of this Contract, the Contractor agrees, pursuant to Resolution No. 74-R8-11 adopted February 25, 1974 by the Council

of the City of Richmond, to comply fully with Titles VI and VII of the Civil Rights Act of 1964, as amended, and all regulations promulgated thereunder.

The essence of this requirement is found in the United States Code Annotated, Title 42, Section 2000e-2, which states in part:

- “a. It shall be an unlawful employment practice for an employer:
 - (1) to fail or refuse to hire or to discharge any individual, or otherwise to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual’s race, color, religion, sex, or national origin; or
 - (2) to limit, segregate, or classify his employees or applicants for employment in any way which would deprive or tend to deprive any individual of employment opportunities or otherwise adversely affect his status as an employee, because of such individual’s race, color, religion, sex or national origin.”

By entering into this Contract, the Contractor certifies that it has complied with Titles VI and VII of the Civil Rights Act of 1964, as amended.

2.8.2 **Richmond City Code Compliance.** Pursuant to section 21-70 of the Code of the City of Richmond (2004), as amended:

- (a) During the performance of this Contract, the Contractor agrees as follows:
 - (1) The Contractor shall not discriminate against any employee or applicant for employment because of race, religion, color, sex, national origin, age, disability, or other basis prohibited by state law relating to discrimination in employment, except where there is a bona fide occupational qualification reasonably necessary to the normal operation of the Contractor. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.
 - (2) The Contractor, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, shall state that such Contractor is an equal opportunity employer.
 - (3) Notices, advertisements and solicitations placed in accordance with federal law, rule or regulation shall be deemed sufficient for the purpose of meeting the requirements of this section.

- (b) During the performance of this Contract, the Contractor shall include the provisions of subsection (1) of the section in every subcontract or purchase order of over \$10,000.00, so that the provisions will be binding upon each subcontractor or vendor.

2.9 **Intellectual Property.** The Contractor represents and warrants that all goods and services that it will furnish under this Contract do not and will not infringe on any valid copyright, patent, service mark or trademark. The Contractor shall pay all royalties and license fees which may be due on the inclusion of any patented or copyrighted materials, methods or systems selected by the Contractor or used by the Contractor in the performance of its services. The Contractor shall defend, hold harmless and indemnify the City from all suits or claims for infringement of any patent rights or copyrights arising out of such selection.

2.10 **Personnel.** The Contractor shall not replace a person indicated in the Contractor's proposal as being assigned to perform services under this Contract for the City except in accordance with the provisions of this section. If the Contractor wishes to replace such a person, the Contractor shall provide the contract administrator of the City with a résumé of any proposed substitute, the opportunity to interview the proposed substitute and an explanation of the reason the substitution is necessary. The contract administrator of the City will only approve such a substitution when, in their opinion, the proposed substitute has equal or greater qualifications and experience than the person replaced.

2.11 **Property of Work.**

2.11.1 **Work Product.** Any material, report or product, whether in electronic or paper form, that results from the execution of this Contract shall be the sole property of the City. The Contractor shall not copyright any material or reports. Upon request, the Contractor shall turn over all work papers and related documents to the City.

2.11.2 **City Property.** Any data or material with which the City furnishes the Contractor shall remain the property of the City. When it no longer needs such data or material for its performance of this Contract, the Contractor shall return such data or material to the City or destroy such data or material using a method approved by the City.

3.0 **Payment.**

3.1 **Basis.** The City shall pay the Contractor for all goods delivered and services performed under this Contract in accordance with the pricing provisions set forth in the Contract Documents.

3.2 **Schedule.** The Contractor shall invoice the City on a schedule in accordance with the Contract Documents.

3.3 **Terms.** The City shall pay the Contractor as follows: Net 45 days.

- 3.4 **Subject-to-Appropriations.** All payments and other performance by the City under this Contract are subject to annual appropriations by the City Council; consequently, this Contract shall bind the City only to the extent that the City Council appropriates sufficient funds for the City to perform its obligations hereunder.
- 3.5 **When City Obligated to Pay.** The City shall not be obligated to purchase or pay for any goods or services covered by this Contract unless and until they are ordered and either delivered or performed, as the case may be.
- 3.6 **Offset Clause.** Pursuant to the Richmond City Charter, the City may withhold the payment of any claim or demand by any person, firm or corporation against the City until any delinquent indebtedness or other liability due the City from such person, firm or corporation shall first have been settled and adjusted.
- 3.7 **Taxes.** All prices shall be submitted exclusive of direct Federal, State and Local Taxes. The City shall not be liable for the payment of any taxes levied by any local, state, or federal governmental entity against the Contractor, and the Contractor shall pay all such taxes; furthermore, should the City nevertheless pay any such taxes, the Contractor shall reimburse the City therefor.
- 3.8 **Invoices.** The Contractor shall submit invoices that include a unique invoice number, the applicable City purchase order number, and the Contractor's federal Taxpayer Identification Number. All invoices submitted by the Contractor must set forth each item billed in sufficient detail to enable the City to ensure that the item was ordered and corresponds with the contract price for such item. If the Contractor does not include all of the required information on the invoice, the City may reject and return the invoice unpaid. The Contractor shall submit the original invoice to the City's Department of Finance at either:

accountspayable@richmondgov.com

or

City of Richmond
Accounts Payable
900 East Broad Street
Richmond, VA 23219.

The City prefers that the original invoice be sent to the above electronic mail address to facilitate timely payment. The Contractor shall submit a duplicate invoice to the attention of the "Requester" identified on the purchase order at the "Ship To" address identified on the purchase order.

- 3.9 **MBE/ESB Participation—Reporting Requirement.** In cases where the Contractor uses a minority subcontractor or vendor, it shall indicate the percentage of the invoiced amount that such minority subcontractor or vendor performed on the MBE-3 form

available on the City's website. The Contractor shall submit this form directly to the Office of Minority Business Development. The Contractor may contact the City's Office of Minority Business Development at (804) 646-3985 for questions or clarifications on the reporting policy. At the end of its performance of this Contract, the Contractor shall submit a summary in a format designated by the City of all payments made to minority subcontractors or contractors.

3.10 **Payment by ACH.** The Contractor agrees that the City may make all payments to the Contractor, at the option of the City, of any or all amounts due under this Contract through the Automated Clearing House network.

4.0 **Indemnification and Insurance.**

4.1 **Indemnification.** The Contractor shall indemnify, defend and hold harmless the City, its officers, agents and employees from and against any and all losses, liabilities, claims, damages and expenses (including court costs and reasonable attorneys' fees) arising from any material default or breach by the Contractor of its obligations specified in this Contract, as well as all claims arising from errors, omissions, negligent acts or intentional acts of the Contractor, its officers, agents and employees. Further, the Contractor shall assume the entire responsibility and liability for any and all damages to persons or property caused by or resulting from or arising out of any act or omission on the part of the Contractor, its subcontractors, its agents or its employees under or in connection with this Contract. The Contractor shall hold harmless and indemnify the City, and its agents, volunteers, servants, employees, and officers from and against any and all claims, losses or expenses, including but not limited to court costs and attorneys' fees, which any of them may suffer, pay or incur as the result of claims or suits due to, arising out of or in connection with any and all such damage, real or alleged. The Contractor shall, upon written demand by the City, assume and defend at the Contractor's sole expense any and all such claims or legal actions.

4.2 **Insurance.** The Contractor shall provide and maintain throughout the life of this Contract insurance in the kinds and amounts specified in this section with an insurer licensed to transact insurance business in the Commonwealth of Virginia. Each insurance policy, endorsement and certificate of insurance shall be signed by duly authorized representatives of such insurers and shall be countersigned by duly authorized local agents of such insurers.

4.2.1 **Costs and Premiums.** The Contractor shall pay all premiums and other costs of such insurance. The consideration paid or to be paid to the Contractor for the performance of the Contract includes the premiums and other costs of such insurance, and neither the City shall be responsible therefor.

4.2.2 **Policy Requirements.** All insurance contracts and policies shall provide, or be endorsed to provide, as follows:

- (i) Subrogation against the City shall be waived.

- (ii) The City, and its officers, employees, agents and volunteers shall be listed as an additional insured, except for Workers Compensation and Professional Liability.
- (iii) Coverage will not be canceled, non-renewed or materially modified in a way adverse to the City without 30 days' written notice to the City.
- (iv) The insolvency or bankruptcy of any of the insured shall not release the insurer from its obligation to satisfy claims otherwise within the coverage of such policies.

No insurance contract or policy shall be expanded to afford coverage which is greater than the maximum coverage approved for writing in the Commonwealth of Virginia.

4.2.3 **Evidence to Be Furnished.**

4.2.3.1 **Endorsements.** The Contractor shall furnish the City with a copy of the policy endorsement listing the City, and its officers, employees, agents and volunteers as an additional insured for each policy, other than Workers Compensation and Professional Liability, required under this section 4.2 ("Insurance"). The Contractor shall furnish the City with copies of such other endorsements as may be required under this Contract upon request by the City therefor.

4.2.3.2 **Certificates of Insurance.** The Contractor shall furnish the City with a certificate of insurance evidencing the above coverage, indicating that the City, and its officers, employees, agents and volunteers are listed as additional insured for each policy, other than Workers Compensation and Professional Liability, and that the coverage will not be canceled, non-renewed or materially modified in a way adverse to the City without 30 days' written notice to the City. All certificates of insurance shall show the Contract Number assigned to this Contract by the City.

4.2.3.3 **Contracts and Policies.** The Contractor is not required to furnish the City with copies of insurance contracts or policies required by this section 4.2 ("Insurance") unless requested at any time by the City's Director of Procurement Services.

4.2.4 **Schedule of Coverage.** The Contractor shall provide and maintain the following types of insurance in accordance with the requirements of this section 4.2 ("Insurance"):

- (i) Commercial General Liability Insurance with a combined limit of not less than \$1,000,000 per occurrence.
- (ii) Automobile Liability Insurance with a combined limit of not less than \$1,000,000 per occurrence.

- (iii) Statutory Workers' Compensation and Employers' Liability Insurance with the Alternate Employer Endorsement WC 000301.
- (iv) Either (a) for professional services, Professional Liability Insurance with limits of not less than \$1,000,000 per claim, or (b) for non-professional services, Errors and Omissions Insurance with limits of not less than \$1,000,000 per occurrence.

5.0 **Assignment, Delegation and Subcontracting.**

5.1 **By City.** The City may assign their rights or delegate their duties, in whole or in part, under this Contract by written notice delivered to the Contractor. Such transfer of rights or duties shall take effect upon the date specified in the notice or upon the assumption, if necessary, of the delegated duties by the assignee, whichever is later.

5.2 **By Contractor.** The Contractor shall not assign its rights or delegate its duties, or any part thereof, under this Contract without the prior written consent of the City. Further, the Contractor shall not assign, sublet or transfer its interest or any part thereof in this Contract by means or as part of any sale, merger, consolidation, assignment or any other event that would result in new or different ownership, control, operation or administration of the Contractor's business affairs without the prior written consent of the City.

5.3 **Subcontracting.** This Contract shall not be subcontracted without the prior written approval of the City's Director of Procurement Services.

6.0 **Remedies and Termination.**

6.1 **Default.** In case of default of the Contractor or if the Contractor fails to deliver the supplies or services ordered by the time specified, the City, after due notice in writing, may procure them from other sources and hold the Contractor responsible for any excess cost occasioned thereby. This remedy shall be in addition to any other remedies available to the City.

6.2 **Termination with Cause.**

6.2.1 **Notice.** The City may terminate this Contract with cause at any time for the Contractor's failure to perform its obligations under this Contract or to otherwise adhere to the terms and conditions of this Contract by delivery of written notice to the Contractor of the intent of the City to so terminate. Such notice shall be delivered at least seven calendar days prior to the date of termination and shall otherwise be given in accordance with the requirements of this Contract for the delivery of notices.

6.2.2 **Cure.** If the Contractor cures the failure to perform or otherwise adhere to the terms and conditions of this Contract to the satisfaction of the City, indicated in writing to the Contractor, during this seven calendar day period, then the notice of termination with cause shall be deemed null and void.

6.2.3 **Effect.** Upon such termination, the City shall be liable only to the extent of costs which may be reimbursable under this Contract that have been submitted by the Contractor and approved by the City up to the time of termination and only upon delivery to the City of all completed or partially completed work performed by the Contractor. The City shall have full right to use such work in any manner when and where it may designate without claim on the part of the Contractor for additional compensation.

6.3 **Termination without Cause.**

6.3.1 **Notice.** The City may terminate this Contract without cause by delivery of written notice to the Contractor of the City's intent to so terminate. Such notice must be delivered at least 90 calendar days prior to the date of termination and must otherwise be given in accordance with the requirements of this Contract for the delivery of notices.

6.3.2 **Effect.** Upon such termination, the City shall be liable only to the extent of any (i) costs which may be reimbursable under this Contract that have been submitted by the Contractor and approved by the City up to the time of termination and (ii) fees to which the Contractor may be entitled under this Contract as a result and only upon delivery to the City of completed or partially completed work. The City shall have full right to use such work in any manner when and where it may designate without claim on the part of the Contractor for additional compensation. No termination notice will relieve the Contractor of the obligation to deliver or perform on all outstanding orders issued prior to the effective date of termination.

6.4 **Termination by Contractor.**

6.4.1 **Notice.** The Contractor may terminate this Contract if the City Council does not appropriate sufficient funds for the City to perform its obligations under this Contract by delivery of written notice to the City of the Contractor's intent to so terminate. Such notice shall be delivered at least 45 calendar days prior to the date of termination and shall otherwise be given in accordance with the requirements of this Contract for the delivery of notices.

6.4.2 **Cure.** If the City cures the non-appropriation of funds by appropriating sufficient funds during this 45 calendar day period, then the Contractor's notice of termination shall be deemed null and void.

6.4.3 **Effect.** Upon such termination, the Contractor shall have no further obligations under this Contract.

6.5 **Waiver.** The waiver by any party of any term or condition of this Contract shall not be deemed to constitute either a continuing waiver thereof or a waiver of any further or additional right that such party may hold under this Contract.

7.0 **Dispute Resolution.**

7.1 **Governing Law.** All issues and questions concerning the construction, enforcement, interpretation and validity of this Contract, or the rights and obligations of the City and the Contractor in connection with this Contract, shall be governed by, and construed and interpreted in accordance with, the laws of the Commonwealth of Virginia, without giving effect to any choice of law or conflict of laws rules or provisions, whether of the Commonwealth of Virginia or any other jurisdiction, that would cause the application of the laws of any jurisdiction other than those of the Commonwealth of Virginia.

7.2 **Construction and Interpretation.** Each of the parties has had the opportunity to have its legal counsel review this Contract on its behalf. If an ambiguity or question of intent arises with respect to any provision of this Contract, this Contract will be construed as if drafted jointly by the parties. Neither the form of this Contract, nor any language herein, shall be construed or interpreted in favor of or against any party hereto as the sole drafter thereof.

7.3 **Contractual Claims.**

7.3.1 **Notice and Submission.** The Contractor shall give written notice of its intention to file a contractual claim at the time of the occurrence or the beginning of the work upon which the claim is based. In addition to such notice of its intention to file a claim, the Contractor shall submit all contractual claims, whether for money or other relief, in writing to the City's Director of Procurement Services no later than 60 calendar days after final payment. (*See City Code § 21-167(a); see also Va. Code § 2.2-4363(A).*)

7.3.2 **Required Contents of Claim Submission.** The Contractor's claim submission shall (i) set forth the primary, secondary and indirect claim issues in a clear, concise manner, (ii) identify the specific contract provisions, schedule impact and cost consequences related to each claim issue, and (iii) include all factual data supporting the claim as well as all supporting cost and delay data. The City's Director of Procurement Services, in the Director's sole discretion, may return claim submissions lacking any of the elements enumerated in the preceding sentence for resubmission or review the claim as though the missing elements are not factually present to support the claim. Such return of a claim submission shall not toll the 60-day period within which the Contractor must submit a claim.

7.3.3 **Procedures and Time Limit.** The procedures set forth in this section 7.3 ("Contractual Claims") and in City Code § 21-167 shall govern the consideration of contractual claims. The City's Director of Procurement Services shall issue a written decision on a claim no later than 90 calendar days after receipt of such claim in writing from the Contractor. (*See City Code § 21-167(b); see also Va. Code § 2.2-4363(B).*)

7.3.4 **No Action before Decision.** The Contractor may not invoke administrative procedures as provided in City Code § 21-168 or institute legal action as provided in City Code § 21-169 prior to receipt of the decision on the claim, unless the City's Director of

Procurement Services fails to render such decision within the 90-day time limit. A failure of the City's Director of Procurement Services to render a final decision within the 90-day time limit shall be deemed a final decision by the City denying the claim. (See City Code § 21-167(c); *see also* Va. Code § 2.2-4363(D).)

- 7.3.5 **Finality of Decision.** The decision of the City's Director of Procurement Services shall be final and conclusive unless the Contractor appeals within 30 calendar days of the date of the final decision on the claim by the Director either as provided in City Code § 21-168 for administrative appeals or, in the alternative, by instituting legal action as provided in City Code § 21-167. (See City Code § 21-167(d); *see also* Va. Code § 2.2-4363(E).)
- 7.3.6 **No Cessation of Performance.** Nothing in this section 7.3 ("Contractual Claims") shall be construed to authorize or permit the Contractor, while pursuing, by any available procedure, an appeal of a contractual claim or dispute, to cease performance of the Contract while such claim or dispute is pending. (See City Code § 21-167(e).)
- 7.4 **Alternative Dispute Resolution.** The City's Director of Procurement Services, with the concurrence of the City Attorney, may agree in writing on behalf of the City to submit particular disputes arising from this Contract to arbitration and to utilize mediation and other alternative dispute resolution procedures; however, any such procedures entered into by the City shall be nonbinding. (See City Code § 21-170; *see also* Va. Code § 2.2-4366.)
- 7.5 **Forum and Venue Choice.** Any and all disputes, claims and causes of action arising out of or in connection with this Contract, or any performances made hereunder, shall be brought, and any judicial proceeding shall take place, only in a federal or state court located in the city of Richmond, Virginia. The Contractor accepts the personal jurisdiction of any court in which an action is brought pursuant to this article for purposes of that action and waives all jurisdiction- and venue-related defenses to the maintenance of such action.
- 8.0 **Miscellaneous Provisions.**
- 8.1 **Audit.** The City reserves the right to audit all aspects of this Contract, including but not necessarily limited to (i) the Contractor's financial capability and accounting system, (ii) the basis for progress payments, (iii) the Contractor's compliance with applicable laws and (iv) appropriate vendor records. The City further reserves the right to review, on demand and without notice, all files of the Contractor or any subcontractor or vendor employed by the Contractor to provide services or commodities under this Contract where payments by the City are based on records of time, salaries, materials or actual expenses. The Contractor shall maintain all records subject to audit under this provision locally or in a manner deliverable at the Contractor's expense to a location in the metropolitan Richmond area.

- 8.2 **Captions.** This Contract includes the captions, headings and titles appearing herein for convenience only, and such captions, headings and titles shall not affect the construal, interpretation or meaning of this Contract.
- 8.3 **Force Majeure.** If any party is unable to perform its obligations under this Contract due to acts of God or circumstances beyond its reasonable control, such obligations shall be suspended as long as those circumstances persist, provided that the delaying party promptly notifies the other party of the delay and the causes. Except where the delay is caused by an act or omission of the delaying party, any costs arising from such delay shall be borne by the party incurring the delay.
- 8.4 **Merger / Entire Agreement.** This Contract, including the exhibits incorporated herein, constitutes both a complete and exclusive statement and the final written expression of all the terms of this Contract and of the entire understanding between the City and the Contractor regarding those terms. No prior written agreements or contemporaneous or prior oral agreements between the City and the Contractor regarding this Contract's subject matter shall be of any effect.
- 8.5 **Modification.** This Contract shall not be amended, modified, supplemented, or otherwise changed except in the form of a City Contract Modification signed by the authorized representatives of the City and the Contractor in accordance with the City's Purchasing Policies and Procedures.
- 8.6 **No Third-Party Beneficiaries.** Notwithstanding any other provision of this Contract, the City and the Contractor hereby agree that: (i) no individual or entity shall be considered, deemed or otherwise recognized to be a third-party beneficiary of this Contract; (ii) the provisions of this Contract are not intended to be for the benefit of any individual or entity other than the City or the Contractor; (iii) no individual or entity shall obtain any right to make any claim against the City or the Contractor under the provisions of this Contract; and (iv) no provision of this Contract shall be construed or interpreted to confer third-party beneficiary status on any individual or entity. For purposes of this section, the phrase "individual or entity" means any individual or entity, including, but not limited to, individuals, contractors, subcontractors, vendors, sub-vendors, assignees, licensors and sub-licensors, regardless of whether such individual or entity is named in this Contract.
- 8.7 **Notices.**
- 8.7.1 **In General.** Any written notice by any party to the Contract shall be sufficiently given by any one or combination of the following, whichever shall first occur: (i) delivered by hand to the last known business address of the person to whom the notice is due, (ii) delivered by hand to the person's authorized agent, representative or officer wherever they may be found or (iii) enclosed in a postage prepaid envelope addressed to such last known business address and delivered to a United States Postal Service official or mailbox. Notice is effective upon such delivery.

8.7.2 **Address.** All notices to the City shall clearly indicate the Contract Number assigned to this Contract by the City and shall be directed to:

Director of Procurement Services
Department of Procurement Services
City of Richmond
900 East Broad Street, Room 1104
Richmond, Virginia 23219

All notices to the Contractor shall be directed to the contact person stated at the address given in the Contractor's proposal.

END OF GENERAL TERMS AND CONDITIONS

CONTRACT No. <NUMBER>

**CITY OF RICHMOND
GOODS AND SERVICES CONTRACT**

This Contract, dated this _____ day of _____, 20____ (the “Commencement Date”) between the City of Richmond, Virginia (the “City”) and <CONTRACTOR NAME> (the “Contractor”), is binding among and between these parties as of the date of the City’s final signature.

WHEREAS, the City has awarded the Contractor this Contract pursuant to Request for Proposals No. <NUMBER>, as modified by <LIST ADDENDA WITH DATES SEPARATED BY COMMAS> (the “Request for Proposals”), for <SUBJECT MATTER OF REQUEST FOR PROPOSALS>.

THEREFORE, in consideration of the Recital set forth above and good and valuable consideration as set forth below, the parties agree as follows:

1. **Scope of Contract.** The Contractor shall provide the goods and services to the City as set forth in the Contract Documents enumerated in Section 3 below.
2. **Contract Amount.** The maximum authorized contract amount for this Contract is <AMOUNT IN WORDS> U. S. dollars (\$<AMOUNT IN NUMERALS>). The aggregate of all payments by the City under this Contract shall not exceed this amount. All payments shall be as provided in the Contract Documents.
3. **Contract Documents.** This Contract shall consist of the following Contract Documents, listed in order of precedence from highest to lowest:
 - A. This Goods and Services Contract between the City and the Contractor.
 - B. The General Terms and Conditions attached to the Request for Proposals.
 - C. The Statement of Needs attached to the Request for Proposals.
 - D. The Contractor’s proposal dated <DATE>.
 - E. The Instructions to Offerors attached to the Request for Proposals.

All of these documents are incorporated herein by reference.

IN WITNESS WHEREOF, the parties hereto on the latest day and year written below have executed this Contract.

Appeals					
1001	Ability to maintain a log of appeal-related call-ins by the property owner after the assessment notices have been sent out, as well as the principal reasons for the inquiry.				
1002	Ability to open an appeals appraisal case.				
1003	Ability to maintain a time stamp on an appeal-related inquiry, as well as any additional remarks on the call (ex. complexity of the inquiry, did the property owner communicate with an appraiser?)				
1004	Ability to maintain a record of all documents sent to the property owner as part of an appeals case.				
1005	Ability to import scans of the completed appeals package and supporting evidence to an open appeals case.				
1006	Ability to track the date a completed appeals package is received.				
1007	Ability to assemble a list of appeals to be examined by the Board of Equalization (BOE).				
1008	Ability to create a comp adjustment report as part of the appeals list to be examined by the Board of Equalization (BOE), to include maps and locations of the parcel (or group of parcels) in question.				
1009	Ability to tag an appeals case as needing additional inspection, and to track and notify of appointment times if an inspection is set.				
1010	Ability to add remarks to an open appeals case, noting the date and any comments from a physical inspection of the appealed property.				
1011	Ability to identify an appeal to be addressed by the Board of Equalization (BOE).				
1012	Ability to open an appeals appraisal case and automatically assign an appeals case to the appropriate appraiser.				
1013	Ability to report in appeals cases: status (open, closed), BOE status, appraiser, outcome (no-change, \$ change, original vs. revised values), change reason where applicable.				
1014	Ability to send a property owner an assessment appeal package by mail or email.				
1015	Ability to allow a property owner to file an assessment appeal electronically, email or secure on-line portal				
1016	Ability to identify an appeals appraisal case needing completion within a user-defined due date.				
1017	Ability to send a letter to the property owner if the appeal is not completed 30 days prior to the 1st BOE meeting				
1018	Ability to open an appeals appraisal case and manually assign an appeals case to the appropriate appraiser.				
1019	Ability to generate an authorization letter to the property owner of an appeals case who has requested for their appeal to be submitted to the Board of Equalization (BOE).				
1020	Ability to generate a letter to a property owner regarding the results of their assessment appeal to include any assessment changes to the appeal, if applicable, on completed appeals.				
1021	Ability to generate a report listing all the appeals cases forwarded to the Board of Equalization (BOE), as well as their status and the final decision if the appeals case is completed/closed. [BOE report (April)]				
1022	Ability for the Hearing Schedule module to automatically create hearing panels and parcel assignments to panels based on user defined criteria.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1023	Ability to create a hearing schedule listing all hearings scheduled for each hearing panel.				
1024	Ability to schedule a hearing automatically for the next available hearing date.				
1025	Ability to schedule a hearing for a specific date and time.				
1026	Ability to create a form letter for each owner indicating the date and time for which the hearing has been scheduled.				
1027	Ability to create a postcard for each owner indicating the date and time for which the hearing has been scheduled.				
1028	Ability for taxpayers to attach electronic documents to their online appeals.				
1029	Ability for taxpayers to attach photos to their online appeals.				
1030	Ability to automatically populate online appeal forms with required data from the CAMA system.				
1031	Ability to prevent taxpayers from submitting online appeal forms if required information is omitted.				
1032	Ability to add an indicator on each parcel indicating whether the parcel's value has been appealed before.				
Assessment Notices					
1101	Ability to generate assessment notices on an on-demand basis for current year plus five previous years.				
1102	Ability to post assessment values at year-end and generate assessment notices.				
1103	Ability to generate annual assessment notices for all properties on record, or only for parcels where the value or ownership has changed.				
1104	Ability to re-print annual assessment notices on an ad-hoc basis.				
1105	Ability to generate supplemental assessment notices reflecting the current year and prior three years' assessment values.				
1106	Ability to have the option of sending annual assessment notices based on user-defined criteria, such as properties with a change in value and properties with a change in ownership but no value changes.				
1107	Ability to send assessment notices to property owner either through mail or any other form of communication (ex. RVA.gov website account, email).				
1108	Ability to store records or images of any assessment notices on a parcel from the current and previous years, according to regulatory guidelines.				
1109	Ability to print a random sample of assessment notices and preview the notices prior to publication/mailing, for quality control purposes.				
1110	Ability to store international mailing addresses.				
1111	Ability to identify when the notices are ready for printing.				
1112	Ability to mass print assessment notices.				
1113	Ability to send consolidated assessment notices to either the owner of the main commercial parcel or individually to each of the out-parcel's designated recipient separately.				
1114	Ability to manually or automatically produce an updated assessment notice if the current or prior years' assessed value is changed based on user-defined rules.				
1115	Ability to generate the Assessment facts spreadsheet which compares the current year's assessment values and parcel count to the previous year's assessment values and parcel count. [Assessment facts]				
1116	Ability to generate a report detailing changes to assessed property values for a user-defined date range, which will result in a supplemental or adjusted tax bill. {Includes: change reason code, date, supplemental assessment grouping, exoneration} [Changes in assessed value report]				
Audit					
1201	Ability to establish a quality control point to check on whether the value adjustment is for current or projected assessment value.				
1202	Ability to identify an improvement/modification to a parcel warranting a projected value adjustment versus an improvement/modification leading to a current value adjustment.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1203	Ability to create and manage workflow items including task, assignment, status, approval, and routing integrated with the application (i.e., not external emails).				
1204	Ability to view historical tracking of closed cases to identify areas for improvement.				
1205	Ability to query workflow items by selected criteria (ex. Person, type, assignments, etc.)				
1206	Ability to perform a quality assurance assessment on a case or group of cases at any specified point(s) within the case flow process, where the review should be based on a set of user-defined logic rules that trigger the process.				
1207	Ability to produce transaction and balancing reports.				
1208	Ability to verify and update usable sale and arm's length transaction indicators as part of the appraisal.				
1209	Ability to view and track the following information to all cases: review date, reviewer, person assigned to case.				
1210	Ability to tag a new appraisal case for correction purposes, and allow the user to update the assessment for the current year and, if applicable, have the system automatically calculate the value changes for one or more of the previous 5 years from the effective date.				
1211	Ability to view an individual record or a list of records for comparison of projected values and current assessment values.				
1212	Ability to view change history on the workgroup.				
1213	Ability to generate audit reports, sorted by reason code, indicating summary changes in current and projected values, as well as reason code changes and other identified data elements to audit.				
1214	Ability to send audited cases back to appraiser for error correction.				
1215	Ability to send an open case to Audit for additional quality control, after supervisor approval, based on a set of user-defined criteria.				
1216	Ability to identify, for quality assurance purposes, mass parcel updates based on the following user-defined criteria: outliers, percent increase, equity on subdivisions/multiple parcels/user-selected parcel group, lot values.				
1217	Ability to define randomized samples of cases or parcels, based on user-defined criteria, to be included in the REA's quality assurance program.				
1218	Ability to produce quality control reports on active appeals, value changes, new constructions, and all other cases affecting the billing rate of the parcel.				
1219	Ability to generate a report on the reason codes for records containing a factual error. {Includes: erroneous record count, percent of erroneous records detected in open/approved cases, grouping by state code (residential/commercial classification)}				
1220	Ability to identify any individual parcel as needing a final end of year review after its initial yearly mass valuation.				
1221	Ability to track the appraiser worksheets that correspond to a particular parcel or group of parcels.				
1222	Ability to access mass appraisal report at the parcel detail level.				
1223	Ability to generate a summary report of all assessed property values for a given year. [Value Summary report]				
1224	Ability to develop and publish CAMA dashboards with drill-down capabilities in order to enhance analytics				
1225	Ability to generate a performance report on each appraiser on a weekly basis. {Includes: appraiser name, number of parcels assigned to an appraiser, total number of completed parcels, total number of changed parcels, percent of changed parcels} [weekly production report by appraiser]				
1226	Ability to generate a case workload analysis report, highlighting essential statistics for a given date or date range. {Includes: number of cases worked, type of case, assigned appraiser, length of time to complete case, completed within required timeframe (Y/N)} [Case workload analysis report]				
1227	Ability to generate a report of non-usable sales for audit check purposes. [non-usable sales report]				
1228	Ability to perform a quality assurance assessment on a case or group of cases for any specified points within the case flow process, through an overall review of the case details.				
1229	Ability to maintain version control of documents and reports created.				
1230	Ability to print previous versions of a document or report.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
Case Management					
1301	Ability to have an approval process for all changes to assessed values.				
1302	Ability to capture appraisal approval date, authorizing personnel, reason code and any associated notes justifying the reason for the approval.				
1303	Ability to monitor active/open cases and manage workflow.				
1304	Ability to manually modify the parcel zoning codes on one or multiple parcels.				
1305	Ability to require a field inspection for a sale dependent on the sale-to-assessment ratio.				
1306	Ability to print appraiser worksheets by tax id, subdivision, neighborhood, building use code, work area and address range in any combination for an individual parcel or group of parcels.				
1307	Ability to select multiple cases and print associated appraiser worksheets.				
1308	Ability to view and report on the status of final inspection cases, as well as final inspection case details, based on user-defined criteria.				
1309	Ability to have a summary view of outstanding final inspections with assignments and status, filtered by permit type and supervisor.				
1310	Ability to create a Board of Equalization package for a given set of parcels.				
1311	Ability to set user-defined parameters (ex. sales-to-assessment ratio) to determine if a sale needs to be inspected.				
1312	Ability to automatically open a case based on the following factors: transfer, final inspections, parcel re-zoning, external appraisal request, internal appraisal request, rehabilitation, routine inspection, appeal.				
1313	Ability to manually open a residential appraisal case based on input from internal sources, such as a call-in by a source within the City.				
1314	Ability to manually open a residential appraisal case, and identify the reason for opening it.				
1315	Ability for cases to automatically capture, at a minimum, the person opening the case, the person assigned to the case, the date the case was opened, as well as the reason the case has been opened.				
1316	Ability to relate any appraisal case to one or more parcels (ex. re-zoning case, splits).				
1317	Ability to allow other Richmond City agencies to open a case (ex. fire department).				
1318	Ability to open a case, communicate current status of parcel, and add initial notes to case before sending to appraiser				
1319	Ability to open a "draft" case, where further information on the case is still pending before being finalized.				
1320	Ability to see open cases which haven't been assigned.				
1321	Ability to generate report on case type and age.				
1322	Ability for appraiser to add items to the inspection checklist on an ad-hoc basis, such as MLS review parameters.				
1323	Ability to view cases based on their age, type, assigned appraiser, case priority.				
1324	Ability to produce reports on the number of cases open, closed, the age of the cases, and the appraiser assigned to them.				
1325	Ability to add supervisor notes, in the case the valuation is rejected.				
1326	Ability to send case back to appraiser if value adjustment is rejected.				
1327	Ability to add remarks to case.				
1328	Ability to allow the supervisor to re-assign cases on an individual or mass scale.				
1329	Ability to track who has sent their survey back and who hasn't, and to track attempt to send response twice.				
1330	Ability to identify which properties need surveys sent out, sorted by use code.				
1331	Ability to open an appraisal case due to zoning code changes.				
1332	Ability to add comments or remarks on a parcel record justifying the reason for further review.				
1333	Ability to automatically open a case based on a zoning change.				
1334	Ability to manually open a case, based on a zoning change identified in the Planning interface (ELM).				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1335	Ability to allow a supervisor to open a mass appraisal case with pre-defined appraisal assignments (such as work area and responsible appraiser), and assign the case to the appropriate appraiser.				
1336	Ability to access MLS listings while processing an individual or mass residential valuation.				
1337	Ability to manually open a case using information on tentatively and finally approved plans.				
1338	Ability to assign commercial mass appraisal cases for land valuation, building valuation, or both.				
1339	Ability for a supervisor to re-open a closed appraisal case.				
Correspondence					
(Note: Includes requirements for Commercial Surveys, Correspondence. Other Correspondence requirements may be included in other groupings as appropriate.)					
1401	Ability to capture commercial income&expense survey data.				
1402	Ability to produce commercial income&expense survey questionnaire and cover letter for mass mailing.				
1403	Ability to allow the commercial property owner to complete commercial income&expense survey online.				
1404	Ability to have online surveys for different property types.				
1405	Ability to generate statistical reports on commercial property based on income&expense reports.				
1406	Ability to check if survey sent in is adequate.				
1407	Ability to integrate with Laserfiche to scan income & expense surveys for a commercial property.				
1408	Ability to email standard and ad hoc reports from within the reporting tool				
1409	Ability to communicate with builders on the plans of a building or multiple buildings under development within a parcel or group of parcels.				
1410	Ability to communicate with surveyors on the geographic layout of a parcel or group of parcels, as needed.				
1411	Ability to communicate with the property owner for feedback on customer service, through issuance of the customer service survey.				
1412	Ability to prevent document mailings for each account with a "bad" mailing address based on configurable criteria.				
1413	Ability for authorized users to configure the criteria for preventing document mailings for each account with a "bad" mailing address				
Customer Support					
(Note: Other Customer Support requirements may be included in other groupings as appropriate.)					
1501	Ability to provide real estate information to a third party, based on user-defined criteria, on a routine or ad hoc basis.				
1502	Ability to communicate with the property owner through email or web account on any information pertaining to a parcel's details or valuation.				
1503	Ability to access online or inline user documentation for different applications within the solution (ex. user guide, application FAQs).				
1504	Ability to log and track all inquiries made by external or internal customers.				
1505	Ability to attach and view all information sent to a customer as part of a customer service inquiry.				
1506	Ability to collect customer information via the City's website and have that data passed to the CAMA system for processing (ex. Request for parcel data correction).				
1507	Ability to process FOIA requests for a certain reason, with a certain due date, and set a tickler reminder.				
Land Book					
1601	Ability to review and finalize real estate values prior to creation of the land book.				
1602	Ability to generate a report of assessment information to validate the value recorded in the land book. {Includes parcel count and values for: CDAs, SADs, taxable properties, tax-exempt properties}				
1603	Ability to integrate with the Department of Finance in order to send annual land book assessment values for annual tax billing purposes.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1604	Ability to indicate the final assessment value for the notice land book and for the annual land book submissions.				
Operational					
(Note: Includes requirements for Document Management, Historical Data Tracking, Notes&Remarks, Mobile Capability, Security Permissions.)					
1701	Ability to maintain a history of all changes and approvals for a parcel.				
1702	Ability to view and maintain records on a parcel for the current year, the projected year, and prior 19 years. The record sets should include all of the parcel's detail records used to create assessments.				
1703	Ability to create custom CAMA interface templates to satisfy data presentation needs for various end user roles. (Aspects of this feature might include modular/drag and drop design editors, queries/scripting, user defined aggregated fields, etc.)				
1704	Ability to maintain current year plus nineteen-year history of sketches.				
1705	Ability to store multiple years' of commercial income&expense survey data.				
1706	Ability to interface with the permitting system (Energov) to view a permit based on user-defined criteria (ex. no auxiliary permits).				
1707	Ability to view sub-fact information linked to each parcel's details.				
1708	Ability to view a historical record of sub-fact information for each parcel record for at least the previous 5 years.				
1709	Ability to identify who has access to run and view different reports.				
1710	Ability to access FAQs or related documentation on the CAMA solution features.				
1711	Ability to purge selected parcel data by tax or fiscal year, according to user-defined timeline, while meeting VA state retention guidelines.				
1712	Ability to take a snapshot of what information was prior to case being opened or appraisal process starts.				
1713	Ability to add external web links to case.				
1714	Ability to update parcel records in real time while in the field.				
1715	Ability for appraiser to work online and offline from the CAMA system.				
1716	Ability to allow remote use of system.				
1717	Ability for appraiser to print out an inspection cover sheet (electronic or paper-based).				
1718	Ability to add remarks to parcel during inspection.				
1719	Ability to keep a historical record of valuation approaches.				
1720	Ability to assign and include detailed workload expectations on a parcel or a group of parcels.				
1721	Ability to restrict survey data access based on security controls.				
1722	Ability to upload an aerial image of a parcel and attach it to the parcel details.				
1723	Ability for the appraiser to create a comprehensive set of mass valuation notes as part of their mass appraisal process, as attachments to the case.				
1724	Ability for a supervisor to review all appraiser notes for each mass appraisal group.				
1725	Ability for a supervisor to view log notes for their approval review and either reject the proposed valuations or approve the proposed valuations.				
1726	Ability to add a flag to restrict owner information from being displayed on the website.				
1727	Ability to have a bar code associating to parcel ID and printed on all correspondence as needed.				
1728	Ability to view permits on a mobile device, and make comments on the permit when onsite.				
1729	Ability to retain notes and remarks on a parcel's appraisal, where the remarks can be purged at a user-defined date.				
1730	Ability to allow the CAMA system to automatically capture subfacs information on mass residential appraisal cases, based on the published subfacs rules for subdivisions. See subfacs guidelines attachment.				
1731	Ability to require Director approval for an appeal of a mass residential appraisal case, where the change in value is not based on the correction of parcel data.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1732	Ability to transfer notes & remarks from the parent parcel to new parcels in the case of parcel splits and combinations.				
1733	Ability to view and attach a Certificate of Assessment letter to the assessment notice before sending to the appropriate property owner.				
1734	Ability for authorized user to create custom user roles with specifically defined privileges to CAMA modules, utilities and individual data fields.				
1735	Ability for authorized user to create access accounts for other users and assign roles, user names, passwords and account expiration dates.				
1736	Ability for authorized user to track user log in/out times over a specified timeframe.				
Parcel Maintenance					
(Note: Other Parcel Maintenance requirements may be included in other groupings as appropriate.)					
1801	Ability to record improvements or modifications to residential buildings which lead to an adjustment to the building's projected value for the next year.				
1802	Ability to track the date a building permit final inspection occurs.				
1803	Ability to query parcels by selected criteria (owner name, owner account, property address, tax id, legal subdivision, commercial use).				
1804	Ability to create a custom search query to view parcels.				
1805	Ability to identify, search, access and maintain records of parcels with special assessment district codes and CDAs.				
1806	Ability to display parcel change history.				
1807	Ability to identify land segments and buildings as tax exempt, including partially tax-exempt parcels.				
1808	Ability to maintain a "master" record on a condominium, where the master record is not considered an active parcel, but would consolidate all individual condominium tax records and accessory improvements (ex. Rec building, pool).				
1809	Ability to view and maintain land segment information.				
1810	Ability to verify the total acreage of all land segments based on the deeded acreage or the GIS calculated acreage if deeded acreage is not available.				
1811	Ability to link appropriate land segments to commercial buildings for calculation of income approach to value and sales comparison approach. This would include the parcel where the building resides as well as another parcel.				
1812	Ability to capture additional land information: flood plain acreage amount and percentage, Resource Protection Area (RPA) amount and percentage, zoning amount and percentage, major easements' amount and percentage.				
1813	Ability to capture the number of tentatively approved and actually approved lots for any parcel.				
1814	Ability to view a list (summary) of all main buildings on a parcel (year built, building use, model, value and building sequence) when viewing the parcel's details.				
1815	Ability to add, update, transfer, delete and view main physical characteristics on a building.				
1816	Ability to capture specific building segment information pertaining to building elements associated with value, such as square footage, value per square foot, quality, exterior code, cost adjustments, architectural adjustments, percent complete.				
1817	Ability to require comments justifying edits to the following information: cost adjustment, architectural adjustment, economic and functional obsolescence, land segment adjustments, additional physical depreciation, and adjustments to effective age of building.				
1818	Ability to identify a sketch segment/component for current valuation and/or projected valuation of a building.				
1819	Ability to view a list (summary) of all commercial buildings on a parcel (year built, building use, building name, model, value and building sequence)				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1820	Ability to add building information for valuation of partially complete structures using a percentage.				
1821	Ability to add, update, transfer, delete and view miscellaneous improvements on a parcel.				
1822	Ability to require adding and displaying comments for adjustments to key data elements on a parcel.				
1823	Ability to display a summary view of the Assessment History on a given parcel.				
1824	Ability to access and view a historical snapshot of a parcel for any previous given year.				
1825	Ability to view all ownership history of a parcel.				
1826	Ability to display current and historical owner address information.				
1827	Ability to capture multiple owner addresses, with one effective address for a given time.				
1828	Ability to apply batch changes to any information on a group of parcels where necessary (i.e. neighborhood number, model selection, cost year, depreciation, market adjustment), using input files, SQL commands or expression builders, for the purposes of revaluation, valuation of new lots, and data cleanup.				
1829	Ability to create a new parcel record with a reason code and a description on the created parcel (City-initiated, owner-initiated, owner-initiated family).				
1830	Ability to transfer a given parcel to a new owner account and maintain an owner history record.				
1831	Ability to search and select a current owner to assign to a given parcel.				
1832	Ability to have multiple owners assigned to a parcel, with one owner identified as the primary owner.				
1833	Ability to add, edit and view all property owners for a parcel.				
1834	Ability to add an indicator on each owner indicating whether they wish to receive correspondence.				
1835	Ability to view and enter the following information on a transfer case: review date, reviewer, notes and reason code (recommended by Dept of Taxation) related to qualification status of sale.				
1836	Ability to display sale to assessment ratio at time of sale.				
1837	Ability to identify a transaction as foreclosure.				
1838	Ability to view and search owner account by account number, name, parcel number, address and legal description.				
1839	Ability to manually create new parcels, splits and combinations.				
1840	Ability to keep track and view all parents and siblings of each individual parcel when parcels are split or combined.				
1841	Ability to select a parent or child parcel to open corresponding parcel details.				
1842	Ability to update current assessment plus five previous years.				
1843	Ability to copy corrected sketches and descriptions to a parcel for the prior years being adjusted.				
1844	Ability to identify parcel records subject to further review after a Pictometry update.				
1845	Ability to access individual parcel details from a summary list.				
1846	Ability to view summary information, based on user-defined criteria, for a selected group of parcel records, including parcels containing multiple buildings.				
1847	Ability to perform one or more changes (incremental data submission, percentage base, or value replacement) to an individual or a mass group of records based on specified criteria for either residential or commercial properties (i.e., model selection, cost year (MS), depreciation, market adjustment, neighborhood number.)				
1848	Ability to view results of proposed changes to a group of parcels before final submission of the changes for review/approval.				
1849	Ability to identify and capture the following subfac information: land values & changes from previous year, number of sales, lot value range, year built range, story type, overall quality of improvement, cost adjustment, architectural adjustment, valuation approach, number of active listings etc.				
1850	Ability to add, modify and delete codes and their descriptions used towards valuation of a building or parcel.				
1851	Ability to access details from a list of search results on a parcel.				
1852	Ability to map changes in parcel description, including any changes to the number of parcels (ex. parcel split).				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1853	Ability to track parcel modification including what, when the modification occurred, and who performed the change.				
1854	Ability to create and update new parcels.				
1855	Ability to warrant a void or change if the modification is "illogical".				
1856	Ability to add/update/delete improvements or modifications to parcel.				
1857	Ability to transfer improvements from one parcel to another.				
1858	Ability to keep the old sketch in cases where a building may be demolished.				
1859	Ability to update parcel record while in the field subject to inspection.				
1860	Ability for appraiser to add detailed notes to a case with regards to their assessment prior to the assessment finalization or the close of the case.				
1861	Ability to attach any copies of emails to a parcel or case.				
1862	Ability to define and update residential and commercial market areas, based on geographic area and each use of its own sub-market areas.				
1863	Ability to view sales comp data based on user-defined area (subdivisions).				
1864	Ability to view historical information on a parcel.				
1865	Ability to capture partial value and proposed complete future value (based on plans and specs). Unique to commercial to have a 3rd value.				
1866	Ability to manually input values as override.				
1867	Ability to link parcels in to a logical grouping related to the master parcel valuation method.				
1868	Ability to split a building value between two parcels.				
1869	Ability to add the renter's name and address information to out-parcels.				
1870	Ability to group individual parcels for mass changes to the parcels' information.				
1871	Ability to capture and view multiple zoning codes on a parcel.				
1872	Ability to group commercial parcel into "Economic units" if all parcels are owned by a single entity.				
1873	Ability to view land segments and which main building the land segments are associated with.				
1874	Ability to identify one building as the "main building" on any given commercial parcel.				
1875	Ability to identify condo units as separate taxable parcels on a given commercial development/project.				
1876	Ability to identify and value portions of a parcel and buildings as residential, commercial, taxable or non-taxable (ex. City land with a retail parcel included).				
1877	Ability to link or combine similar commercial property groupings with like characteristics for mass valuation and review.				
1878	Ability to identify and track one or more parcels in a residential or commercial mass appraisal group to be individually assessed.				
1879	Ability to perform parcel information updates for either all parcels in a mass appraisal group or to individual parcels in that same group.				
1880	Ability to maintain the mass appraisal group identity associated with each parcels mass appraisal.				
1881	Ability to filter on lot type in a work group (ex. golf course, lake front/waterfront).				
1882	Ability to assign a code to a parcel to indicate owner-requested warnings (ex. "No Trespassing", "Beware of Dog"), to be reset upon transfer of property.				
1883	Ability to identify a property sale as a "usable sale"				
1884	Ability to identify a tax-exempt property as exempt by classification or as exempt by designation accordingly.				
1885	Ability to place a user-defined upper limit to the tax-exemption amount for a property identified as tax-exempt by designation (exempt designated), where this upper limit can be set at the out-parcel level.				
1886	Ability to group parcels by sales transaction, where the transaction may involve more than one parcel.				
1887	Ability to assign a code to a parcel to indicate site-requested warnings (ex. industrial hazardous area).				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1888	Ability to proactively notify an appraiser of any site warnings.				
1889	Ability to denote mailing addresses as a "bad address" based on the US Postal Service address standards.				
1890	Ability to allow the system to truncate the property owner name, in compliance with state code.				
1891	Ability to assign and view a label for a commercial property, according to a pre-defined set of corridor codes.				
1892	Ability to manually select a commercial corridor from a map.				
1893	Ability to assign and view market-level labels on the group of commercial parcels, from a pre-defined set of market labels.				
1894	Ability to assign and view the zones within a selected market area.				
Rehabilitation					
1901	Ability to send a property owner an application for the rehab program either through mail or electronically				
1902	Ability to allow a property owner to apply for the rehab program online.				
1903	Ability to process and store all information from the rehab application within the CAMA solution				
1904	Ability to indicate that the rehab application was made within 12 months from the property owner's filed building permit application.				
1905	Ability to trigger a property inspection on a rehab application (residential rehab application).				
1906	Ability to send a property owner a letter stating the status of their rehab application (approved, denied) either by mail or electronically				
1907	Ability to send a property owner a letter indicating the final rehab abatement amount either by mail or electronically				
1908	Ability to have the system identify any parcels that may qualify for the rehabilitation program				
1909	Ability to automatically send a property owner a letter indicating that their property may qualify for the rehab program				
1910	Ability to require a qualified residential rehab application value to be equal to or greater than a user-defined percentage over the parcel's base value (currently 10%)				
1911	Ability to determine the abatement percentage of a commercial property qualified for rehabilitation, based on the base value: 15% for properties with assessed/base value below \$10M, 5% for properties with assessed/base value equal to or above \$10M.				
1912	Ability to automatically apply a commercial rehab abatement amount for 7 years based on the qualification effective date				
1913	Ability to automatically apply a residential rehab abatement amount for 15 years starting the next year after the qualification effective date				
1914	Ability to automatically apply a historical rehab abatement amount for 10 years starting the next year after the qualification effective date				
1915	Ability to cancel any rehab qualification and indicate the reason for the cancellation				
1916	Ability to send a letter to the property owner indicating the status of their rehab qualification and, if disqualified, the reason for the disqualification.				
1917	Ability to generate a report of annual statistics for properties within the rehabilitation program, based on user-defined criteria {User-defined criteria include: number of rehab applications, number of qualified rehabs, number of completed rehabs.}				
1918	Ability to indicate the type of property listed in the rehab application (residential, commercial, historic, hotel) and whether the property subject to the rehab application has met the criteria qualifying for the application.				
1919	Ability to integrate with the Tax Management system (TMS), in order to provide the abatement amount and the effective dates of the abatement of a property in the rehabilitation program.				
1920	Ability to integrate with the Tax Management system (TMS), in order to notify on any cancelled abatement amount of a property no longer in the rehabilitation program.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
1921	Ability to integrate with the Tax Management system (TMS), in order to notify on any properties where the fair market value falls below the base value during the current year, for properties within the rehabilitation program.				
1922	Ability to generate a list of properties in the rehabilitation program. {Includes: status of application (i.e. open, pending, approved, denied), application date, approval date (if approved), status of existing rehabs (i.e. open, in progress, completed, cancelled)}				
1923	Ability to generate and send a letter to the applicant property owner acknowledging that the REA office has received the rehab application.				
Reporting/Analytics					
(Note: Other Reporting/Analytics requirements may be included in other groupings as appropriate.)					
2001	Ability to report on parcel count on a daily or ad-hoc basis. {Includes: new parcels, inactive parcels, total parcels}				
2002	Ability to generate a summary report of the sales comparison valuation method.				
2003	Ability to automatically capture the effective date of any value change to the assessments, based on user-defined criteria (whether the value should incur for the current year or projected year).				
2004	Ability to manually capture building permit information from the building permitting system.				
2005	Ability to query and report on all active and assigned permits based on user-defined criteria, to initiate a parcel inspection. {User-defined criteria include: permit number, taxID, permit type, property address, assigned work area, mass appraisal grouping, date range}				
2006	Ability to query permits by area of assignment, permit number, taxID and property address, as well as view permit status (complete, voided, assigned for pickup etc.)				
2007	Ability to print building permit and worksheet if so desired to process final inspection work item.				
2008	Ability to generate list of subdivisions and neighborhoods based on area of assignment. {Includes: subdivision name, neighborhood number, number of parcels, number of sales, median sale-to-assessment ratio, coefficient of dispersion (COD)}				
2009	Ability to generate lists of existing subdivisions to indicate mass appraisal status (Complete/Not Complete).				
2010	Ability to generate list of parcels by certain attributes including subdivision, work area, neighborhood number, use code, etc. to show revaluation status (Complete/Not Complete).				
2011	Ability to display statistical analysis for a given group of parcels or workload for both current-year values and projected-year values.				
2012	Ability to query and print statistical reports for analysis of mass appraisal workgroups, including a list of parcels and a list of all sales within the workgroup.				
2013	Ability to develop ad hoc reports on all parcels and workgroups.				
2014	Ability to generate a revaluation report for a group of parcels, which contains a summary of the analysis performed during the revaluation process and adjustments applied.				
2015	Ability to identify adjustments affecting value during the revaluation process, based on appraiser-defined criteria: subdivision, neighborhood, work area, address range.				
2016	Ability to generate a file containing assessment-to-sale City information, based on state-defined criteria.				
2017	Ability to generate weekly mass appraisal reports on staff performance to be reviewed by a supervisor.				
2018	Ability to create ad hoc reports and data extracts against all available CAMA data.				
2019	Ability to generate system reports identifying value changes based on reason codes (new construction, additions, fires, demolitions etc.).				
2020	Ability to provide reports for current-year and projected-year assessments.				
2021	Ability to provide a rehabilitation credit report to be processed by the Department of Finance.				
2022	Ability to create custom report templates by querying fields from entities found in the CAMA database schema, either through a drag and drop editor or SQL commands, and make them available for staff use. (Functionality should be similar to ad hoc report writers used to create tabular data reports).				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2023	Ability to report on parcel value changes based on user-defined value thresholds.				
2024	Ability to view and print cases where significant value changes are recorded.				
2025	Ability to produce a report that shows the before&after snapshot of an inspected property.				
2026	Ability to generate reports on a specified group of parcels for review during the revaluation and approval processes, based on user-defined criteria. {User-defined criteria include: land, improvements, % value change.}				
2027	Ability to generate assessment report for any individual parcel containing a breakdown of building and land values for all out-parcels.				
2028	Ability to report on the subdivision(s) and their values within a specified community, shown under a community code.				
2029	Ability to generate and display mass appraisal stats and ratios for residential parcel groups				
2030	Ability to query all completed yearly mass appraisal groups to identify those that have had subsequent sales necessitating an additional year-end review.				
2031	Ability to query and report on all open mass appraisal cases sorted by residential or commercial and grouped by assigned appraiser.				
2032	Ability to have a list of partially valued lots to be reviewed during year-end.				
2033	Ability to filter parcels from a mass parcel update, based on certain criteria, in order to be valued manually (ex. in case of fire damage).				
2034	Ability to generate a report summarizing all the data elements used in the calculation of the sales comparison approach.				
2035	Ability to generate a report outlining the "Reval & Growth" details for a parcel or group of parcels for residential and commercial properties.				
2036	Ability to create a file in order to accurately respond to the Assessment-to-Sales Ratio Study (ASRS). {Includes: property description, grantor and grantee of sale, sale price, property assessment value, reason code if a non-qualified sale, PIN number (taxID) of the sold property} [ASRS]				
2037	Ability to generate a report on the year-end assessed values, in order for these values to be committed to the land book. [Year-end land book report]				
2038	Ability to generate the necessary information in order to accurately produce a report on properties assessed by the State Corporation Commission. [SCC Ratio Study]				
2039	Ability to generate the relevant information in order to complete the Weldon Cooper survey. {Includes: total acreage, number of parcels, percent change in property values.} [Weldon Cooper survey]				
2040	Ability to generate a taxable value summary report. {Includes: total taxable value and its breakdown, percent of tax base, previous year's land book values, current year's notice values, percent change in taxable value, residential reval percent change} [taxable value summary]				
2041	Ability to generate a report on the summary of taxable values. {Includes: total taxable value and its breakdown, percent of tax base, previous year's land book values, current year's notice values, percent change in taxable value} [Summary of taxable values report]				
2042	Ability to generate a memo summarizing all tax-exempt properties on an annual basis. {Includes: total taxable and exempt property combined, total taxable property, total tax-exempt property, percent of tax-exempt properties.} [Exempt tax memo]				
2043	Ability to generate a memo summarizing the values for all taxable properties on an annual basis. [tax rate memo]				
2044	Ability to generate a memo summarizing all relevant proffers calculations. {Includes: average assessed values for land & improvements, average assessed values for new units built & sold, number of households, summary apartment data extracted from the apartment data attachment} [proffers memo]				
2045	Ability to generate a report for the City Council, reflecting the district name and the percent change of improved property values. [BOS % change of improved properties]				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2046	Ability to generate a report listing all tax-exempt properties for submission to the State Corporation Commission (SCC). {Includes: tax-exempt parcel count, tax-exempt property value for current year, grouping by state code} [tax exempt property report]				
2047	Ability to generate the Comprehensive Annual Financial planning Report (CAFR) for taxable properties and their values. [CAFR for taxable property]				
2048	Ability to generate a spreadsheet with the relevant rehabilitation data. {Includes: exemptions approved and the value of the exemptions, property type, approved properties under rehabilitation, value change and their effective dates, property address} [rehab data]				
2049	Ability to generate a spreadsheet of properties under a user-defined Community Development Authority (CDA) or special assessment district (SAD).				
2050	Ability to generate a spreadsheet summarizing, for a user-defined date range, the values for a list of properties, and changes to the property values by category (ex. new construction, transfer), grouped by transaction codes and by property type. [monthly activity report]				
2051	Ability to generate a spreadsheet showing, based on a user-defined date range, statistics for the current and previous years for new constructions and mass appraisals depending on property type (residential, commercial). [monthly comparison analysis summary report]				
2052	Ability to generate a spreadsheet on the one-acre values for properties over one acre under tax relief, based on user-defined acreage criteria. [one-acre value for parcels on tax relief]				
2053	Ability to generate a spreadsheet on the monthly sales data. [monthly sales report]				
2054	Ability to generate a GIS map outlining the percent change in assessment value of parcels, based by district. [% assessment change map]				
2055	Ability to generate a report on the assessment-to-sales ratio of improved residential properties throughout the City, and the relevant statistics. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), number of sales City-wide} [City-wide assessment-to-sales ratio report]				
2056	Ability to generate a report on the assessment-to-sales ratio of improved residential properties, grouped by appraiser area. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), and the number of sales} [appraiser area assessment-to-sales ratio report]				
2057	Ability to generate a report on the assessment-to-sales ratio of improved residential properties, grouped by subdivision. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), number of sales, number of improved properties, sales-to-improvement-record percentage, number of records.} [subdivision assessment-to-sales ratio report]				
2058	Ability to produce a data file of all relevant parcel information for further dissemination by external sources. [CAMA data file]				
2059	Ability to produce reports in multiple formats, such as Excel files or flat data files.				
2060	Ability to allow user to perform complex data queries and analytics through the use of a SQL query builder tool.				
2061	Ability to develop and publish CAMA system data and statistics through online dashboards based on the access rights of the dashboards' users.				
2062	Ability to allow citizen to query and download assessment data through a web portal.				
2063	Ability to import sales verification codes for qualified sales, as well as non-qualifying codes for non-qualified sales.				
2064	Ability to generate a report listing all the tax-exempt properties, as well as if they are tax exempt by classification or by designation.				
2065	Ability to allow users to develop, format and publish reports produced on an ad hoc basis.				
2066	Ability to generate a report summarizing the values for the mass appraisal process, including the assessed values before and after revaluation. [360 report]				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2067	Ability to generate a statistical analysis of a user-defined work area. {Includes: appraisal status of properties, work area sales ratio, coefficient of dispersion (COD), number of sales within the work area.} [Work area statistical report]				
2068	Ability to generate a list of properties omitted from the original mass appraisal process. {Includes (grouped by appraiser and by subdivision): total number of parcels, total number of revalued parcels, total number and list of parcels to be reviewed.} [complete & non-complete report]				
2069	Ability to generate a report indicating the median last inspection date for a user-defined group of parcels, in order to assign subdivisions based on the oldest median inspection date. {Includes: subdivision name and number, number of parcels within the subdivision, last median inspection date} [Median last inspection date]				
2070	Ability to generate an audit report with a comparison of the list of parcels not contained in both the CAMA system and the GIS. [Parcel edit check]				
2071	Ability to generate a report summarizing the values for the mass appraisal process, including the assessed values before and after revaluation. [360 query]				
2072	Ability to generate a report listing all parcel splits and combinations, as well as all parent voided parcels for a given timeframe. [Log of split/combined parcels]				
2073	Ability to generate a report listing all properties overdue for inspection, as well as any reason codes or remarks for the inspection delay, for a given timeframe. [Inspection report]				
2074	Ability to generate a report listing all properties with fire/storm damage within a user-defined timeframe. {Includes: repair status of the parcel, before&after improvement values} [fire damage report]				
2075	Ability to generate a daily audit report on all parcels created by GIS integration, in order to complete parcel update. {Includes: parent parcel ID, new sibling ID, parcel addresses, subdivision number} [GIS Skeleton record report]				
2076	Ability to generate a report of all CAMA activity. {Includes: parcel count, current-year assessment values, projected-year assessment values} [Daily historical reports]				
2077	Ability to generate a daily report on all assessment changes, which result in supplemental billing or an adjusted bill. [Daily supplemental assessment totals]				
2078	Ability to generate a report listing parcels that are categorized as tax-exempt by designation, as well as the property type where applicable. [Report on exempt designated parcels]				
2079	Ability to generate a septic data report on a parcel or a group of parcels. {Includes: parcel has sewage (Y/N), parcel has water (Y/N).} [Health Department report: septic data]				
2080	Ability to generate a report on the assessment-to-sales ratio of improved residential properties throughout the City into four quadrants (based on assessed or sales value) and perform the relevant statistical analysis. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), number of sales City-wide} [City-wide assessment-to-sales ratio report]				
2081	Ability for users to maintain a list of standard queries for generating reports.				
2082	Ability for users to maintain a "Favorites" list of frequently used queries and reports.				
2083	Ability for users to perform analysis of I/E data based on user-defined criteria. [income approach]				
2084	Ability for users to perform multiple-year analysis of individual properties based on actual reported I/E data. [income approach]				
Sketching					
2101	Ability to automatically populate different building segments based on the overall building sketch.				
2102	Ability to view and maintain sketches and attributes associated to each building.				
2103	Ability to capture the square footage, story/improvement code, and calculated area to assist with the cost value calculation from the completed parcel sketch.				
2104	Ability to draw sketches in a layered fashion ex. first floor, or second floor.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2105	Ability to maintain a current and projected sketch.				
2106	Ability for a sketch to be related to the appropriate parcel valuation.				
2107	Ability to add, modify, and inactivate detailed building and miscellaneous improvement sketches on a parcel.				
2108	Ability to manually enter the square footage of each improvement on a parcel.				
2109	Ability to maintain a library of sketches by model and builder.				
2110	Ability to copy sketches to a single new parcel.				
2111	Ability to copy sketches to a group of new parcels.				
2112	Ability to edit sketches that have been copied.				
System Integration					
(Note: Includes requirements for System Integration, GIS.)					
2201	Ability to send the following information to the department of finance: identifying parcel information, effective dates, state codes with description, reason codes with description, assessment values for annual and supplemental tax bill generation, exonerations or refunds to the taxation department (with difference between new value and previous value), parcel tax exemptions, multiple land values for tax relief, special assessment districts, Rehab program.				
2202	Ability to electronically send changes in owner address to the Department of Finance Office.				
2203	Ability to integrate with Utilities for water and/or sewage connection status on a parcel.				
2204	Ability to integrate with Planning subdivision information.				
2205	Ability to integrate with Planning system and automatically open zoning cases.				
2206	Ability to view GIS map information for an individual parcel within the CAMA solution.				
2207	Ability to view GIS map information for groups of parcels within the CAMA solution.				
2208	Ability to select a single or multiple parcels from the GIS map within the CAMA solution for revaluation or mass update.				
2209	Ability to view scanned images (building plans, review forms, BOE forms) for a selected parcel.				
2210	Ability to view Pictometry images for a selected parcel or groups of parcels.				
2211	Ability to integrate with Circuit Court website to view legal papers, deeds and subdivision plats.				
2212	Ability to display relevant real estate information of a parcel on the real estate assessment website, and update this information daily.				
2213	Ability to display assessment data to the web by a user-defined date.				
2214	Ability to integrate GIS tool to plan the best route for physical inspection of parcels.				
2215	Ability to integrate with Costar for commercial appraisal review.				
2216	Ability to capture GIS parcel history/parcel boundaries and attach to the parcel.				
2217	Ability to integrate with the tax management system for changes in the following key parcel information: magisterial district, special properties code (Special Assessment Districts, CDAs), owner account number, parcel address, legal description, Property Type, parcel creation date, parcel inactivated date.				
2218	Ability to integrate with the tax management system for changes in the following key parcel ownership information: transfer date, new owner name, document type (deed, will etc.), deed book & deed page, consideration (i.e. sales price).				
2219	Ability to integrate with the tax management system for changes in the following key address information: mailing address (lines 1 and 2), mailing address, mailing state, mailing zip code & extension, mailing country code, mailing international region, mailing international postal code, mailing address for "care of" name.				
2220	Ability to integrate with the City GIS system in order to open a case based on the following factors: parcel splits/combinations/eminant domain takes, calculated acreage changes.				
2221	Ability to integrate with the City fire department, in order to open a case based on value changes to a parcel or building stemming from fire damage to the building.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2222	Ability to interface with GIS to update zoning codes wherever there is a zoning change.				
2223	Ability to communicate with the City tax system to indicate an assessment value change to the current or a prior year.				
2224	Ability to view/update ownership information based on integration with the Circuit Court system and open an appraisal case, if applicable.				
Valuation					
(Note: Other Valuation requirements may be included in other groupings as appropriate.)					
2301	Ability to value partially completed new constructions (not structural additions), applying a user-defined percentage on the system's calculated value.				
2302	Ability to calculate, compare and select the most appropriate of the three valuation models for a building (cost approach, sales comparison approach, income approach).				
2303	Ability to smooth value inequities due to square footage breaks in cost table.				
2304	Ability to enter a manual assessment value.				
2305	Ability to enter a trend value or manual percentage adjustment to the current building value.				
2306	Ability to value building on a cost approach using the Marshall Swift interface or similar methodology.				
2307	Ability to generate a report summarizing all the components used in the calculation of the cost approach.				
2308	Ability to generate a report summarizing all the components used in the calculation of the income approach.				
2309	Ability to value a building using the direct capitalization method of the income approach for various types of commercial properties (apartment, hotel/motel, mini warehouse, mobile home park, office building, office warehouse, retail, shopping center, shopping mall, warehouse). [income approach]				
2310	Ability to value a building on income approach using the discounted cash flow method. [income approach]				
2311	Ability to automatically apply depreciation from the first main building to detached or miscellaneous improvement.				
2312	Ability to apply a separate depreciation rate for the detached improvements, based on the year built of the detached improvements.				
2313	Ability to display median sale to assessment ratio of qualifying sales by subdivision, neighborhood, commercial use code and work area.				
2314	Ability to automatically re-calculate adjustments to a parcel's value for current and user-defined prior years' values, using the appropriate year's cost tables.				
2315	Ability to view and filter sales based on user-defined criteria (ex. date range, work area, story type, quality, square footage.)				
2316	Ability to calculate and display the necessary information for mass appraisal analysis and approval (mean, median, Coefficient Of Dispersion, etc.), based on user-defined sales query filters (ex. date range, work area, story type, quality, square footage.)				
2317	Ability to create and store residential cost tables by either code type and costing value or square foot ranges and related costing values for each given year, for current year plus 19 prior years' cost tables.				
2318	Ability to create and store commercial cost tables for each given year, for current year plus 19 prior years' cost tables.				
2319	Ability to assign multiple codes for value change, including reasons, transaction codes, explaining why the changes are made.				
2320	Ability to compare valuation approaches based on weighted average, where the weights are user-defined: income method, sales comparison method, cost method.				
2321	Ability to calculate our own cap rates.				
2322	Ability to calculate the three approaches to value and compare the results.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2323	Ability to separately value the land and building, designated to the main building, and the adjacent out-parcel land and building, to later consolidate the parcel's valuation.				
2324	Ability to split a building value between two or more parcels by absolute dollars or percentages.				
2325	Ability to total a building's value if it is split between two or more parcels.				
2326	Ability to value all out-parcels on any given parcel separately (both land and building).				
2327	Ability to value a group of parcels based on the use of Multiple Regression analysis (MRA).				
2328	Ability to import and update cost tables for residential valuation				
2329	Ability to import and update cost tables for commercial valuation.				
2330	Ability to re-run all valuation calculations after any parcel updates have been completed for a given mass appraisal group.				
2331	Ability to have a default approach to parcel or building valuation based on use type.				
2332	Ability to filter out a property where the value needs to be reviewed individually (ex. hotels with a 50% vacancy rate).				
2333	Ability to manually apply a value to a partially completed structure.				
2334	Ability for users to perform direct capitalization techniques. [income approach]				
2335	Ability for users to perform yield capitalization techniques. [income approach]				
2336	Ability for users to perform residual capitalization techniques. [income approach]				
2337	Ability to perform comparable sales analysis in determining benchmarks for the market approach. [market approach]				
2338	Ability to perform matched pair analysis for residential properties to determine the value of individual property components. [market approach]				
2339	Ability for users to define weights assigned to select structure components based on market modeling. [market approach]				
2340	Ability for users to perform a square-foot market analysis on selected structures or structure components, based on market modeling. [market approach]				
2341	Ability to assign a market value to each structure on one parcel. [market approach]				
2342	Ability to use gross square foot as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]				
2343	Ability to use gross acre as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]				
2344	Ability to use net square foot as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]				
2345	Ability to use net acre as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]				
2346	Ability to use buildable unit as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]				
2347	Ability to use gross building square foot as a unit of comparison for improved property analysis in the comparable sales approach. [market approach]				
2348	Ability to use rentable building square foot as a unit of comparison for improved property analysis in the comparable sales approach. [market approach]				
2349	Ability for users to override Marshall & Swift cost rates. [cost approach]				
2350	Ability to provide annual residential cost values from Marshall & Swift's nationally recognized cost service. [cost approach]				
2351	Ability to maintain replacement cost rates. [cost approach]				
2352	Ability to maintain adjustment factors to replacement cost rates. [cost approach]				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2353	Ability to maintain a depreciation schedule tied to each structure code. [cost approach]				
2354	Ability to maintain depreciation schedules. [cost approach]				
2355	Ability to maintain positive and negative multiplicative adjustments for user defined attributes. [cost approach]				
2356	Ability to adjust for observed physical condition depreciation. [cost approach]				
2357	Ability to adjust for functional obsolescence. [cost approach]				
2358	Ability to adjust for cost-to-cure as a percentage calculation. [cost approach]				
2359	Ability to adjust for cost-to-cure as a lump sum deduction. [cost approach]				
2360	Ability to adjust for economic obsolescence. [cost approach]				
2361	Ability to correlate the cost approach with the comparable sales approach through the use of an economic condition adjustment. [cost approach]				
2362	Ability to store actual construction costs as reported by the construction company. [cost approach]				
2363	Ability to value land on a per square foot basis.				
2364	Ability to value land on a per buildable unit basis.				
2365	Ability to value land on a per lot basis.				
2366	Ability to value land on a per front foot basis.				
2367	Ability to value land on a per floor area ratio basis.				
2368	Ability to value land on a per acre basis.				
2369	Ability for users to input mineral rates under development into the land valuation module.				
2370	Ability for users to input mineral rates not under development into the land valuation module.				
2371	Ability to calculate mineral rates based on an income approach to value.				
2372	Ability to calculate mineral rates based on a comparable sales approach to value.				
2373	Ability to calculate mineral rates by user defined criteria.				
2374	Ability for users to select the type of mineral rate to be used.				
2375	Ability to store mineral rate values separately from market value of the land and improvements.				
2376	Ability to automatically adjust the effective age of a structure or group of structures.				
2377	Ability to manually adjust the effective age of a structure or group of structures.				
2378	Ability to automatically apply a depreciation schedule on a structure or group of structures, based on a user-defined depreciation percentage.				
2379	Ability to group commercial parcels in to corridors for mass commercial appraisal purposes.				
2380	Ability to further divide a commercial corridor in to market areas, based on user-defined criteria.				
2381	Ability to automatically group parcels within a market area by economic size, based on user-defined parameters. (Ex. Parcels between 3 and 10 acres in size).				
2382	Ability to manually group parcels within a market area based on user-defined parameters on economic size.				
2383	Ability to view a list of physical characteristics to a commercial parcel. {Includes: location, ingress/egress, visibility, functional visibility}				
2384	Ability to rank physical characteristics to a commercial parcel, based on a set of user-defined criteria, with an assigned adjustment value. (Ex. -10% adjustment for a Poor physical characteristic)				
2385	Ability to change the assigned adjustment values on each of the physical characteristics for valuation of a commercial parcel.				
2386	Ability to value land on a per depth basis.				
Workflow Management					
2401	Ability to notify appropriate supervisor when records are ready for review and capture the notification date.				
2402	Ability to mark mass-appraised parcels as ready for supervisor review and approval.				
2403	Ability to notify an appraiser with a message of necessary corrections when an approval is rejected.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2404	Ability to configure workflow business logic steps.				
2405	Ability to keep track of current year and projected year value changes by categories (new construction, additions, revaluation, new parcels), grouped by commercial/residential/exempt property category on a daily, monthly, and yearly basis.				
2406	Ability to access parcel plans that are tentatively and finally approved, in order to automatically open a case.				
2407	Ability to require a sales review prior to an inspection/appraisal for all new property transfers.				
2408	Ability to forward an appraisal case back to pre-inspection (abstract) for any identified corrections.				
2409	Ability to distribute permits via workflow to appraisers/appraisal specialists to be worked.				
2410	Ability to route a case for supervisor approval.				
2411	Ability for supervisors to view and approve appraiser workgroups.				
2412	Ability for cases to be automatically assigned to the appropriate appraiser or staff member.				
2413	Ability for supervisor to manually assign one or multiple cases at once to individual (supervisor manual assignment) based on user-defined criteria.				
2414	Ability to add status and notes for each case created, as well as change the status and add notes on cases which have been re-assigned.				
2415	Ability to produce snapshot of before&after records on improvements or modifications.				
2416	Ability to finalize changes and have them sent for approval. The record should indicate the case age.				
2417	Ability to add in comments on overall case status.				
2418	Ability to communicate back to appraiser where there is a change in value or any other major error correction.				
2419	Ability to have a "Tentative Approval" status on case, where appraiser can contribute their opinion on a parcel's valuation.				
2420	Ability to add, update or delete minor errors where applicable.				
2421	Ability to allow a supervisor to view an appraiser-initiated case re-assignment.				
2422	Ability for auditing team to have access to all information pertaining to a case, including attached files and working web links where available.				
2423	Ability for appraiser to finalize each mass appraisal case and forward to supervisor for approval.				
2424	Ability to allow supervisor to return a rejected mass appraisal to the appropriate appraiser for re-review.				
2425	Ability to allow all supervisor-approved mass appraisal values to be fully committed as the next year's official assessment values.				
2426	Ability to define exception handling in a workflow.				
2427	Ability for users to set tickler reminders on workflow for follow-up action on a specific day and time.				
Workload Management					
2501	Ability to capture a parcel as "revalued", as well as the mass appraisal date and the appraiser responsible for the mass appraisal execution.				
2502	Ability to mass update the projected or current records.				
2503	Ability to approve a change to a single parcel not as part of workgroup.				
2504	Ability to open an appraisal case for active but not final building permits based on user-defined criteria (new buildings).				
2505	Ability for supervisor to assign new construction permit cases, for the purpose of valuing "partial" parcels, to the appropriate appraisers.				
2506	Ability to assign or reassign work for final field inspections.				
2507	Ability to indicate whether each parcel has gone through the revaluation process.				
2508	Ability to create and maintain parcel records in user-defined workgroups for mass appraisal and updates.				
2509	Ability to refresh or clear a workgroup and append or remove parcels from the group.				
2510	Ability to maintain separate workgroups by appraiser.				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L ***	Proposal Page Number**	Offeror Comments
2511	Ability to filter workgroup parcel data by user-defined criteria: subdivision, neighborhood, City code, state codes, land values etc.				
2512	Ability to assign appraisers to properties based on geographic area (subdivisions, neighborhoods), or on building use.				
2513	Ability to re-distribute cases, depending on appraiser availability.				
2514	Ability to have automatic generation of cases based on user-defined criteria.				
2515	Ability to generate and access reports or dashboards for daily jobs, or jobs done within a certain time period (monthly, quarterly etc.).				
2516	Ability to auto-prioritize an appraiser's workload based on user-defined criteria.				
2517	Ability to manually re-prioritize workload where needed or appropriate.				
2518	Ability to automatically assign cases based on user-defined criteria.				
2519	Ability for supervisor to manually re-assign a single or multiple appraisal cases to a different appraiser where needed or appropriate, with notification to both parties on workload change.				
2520	Ability to attach any associated files to case.				
2521	Ability to re-assign case to commercial or other type of appraiser for combination parcels (ex. commercial and residential).				
2522	Ability for an appraiser to further sub-divide a residential mass appraisal case by: subdivision, Sub Division Section, neighborhood or address range				
2523	Ability for an appraiser to further sub-divide a commercial mass appraisal case by: Property Use type, Building Quality, User defined geographic boundary, property access characteristics, or predefined Market Area.				
Year-end					
2601	Ability to lock current-year assessment data for update during year-end processing, but maintain it as read-only.				
2602	Ability to communicate with the Tax Management System informing of an open appeal.				
2603	Ability to identify records where a portion of the parcel lies within a special assessment district (SAD) or Community Development Authority (CDA).				
2604	Ability to scan and upload documents to case, including photos, copies of emails, and appeal email attachments.				
2605	Ability to query parcel records for current plus 3 prior years for the purpose of correcting assessments.				
2606	Ability to consolidate assessment notices by owner name or owner account number for mailing purposes.				
2607	Ability to generate a report summarizing all the assessment information for the City and magisterial districts for distribution and posting to the City website.				
2608	Ability to track the date printed assessment notices have been sent to the property owners.				
2609	Ability to track any returned assessment notices, as well as the reason the assessment notices have been returned.				
2610	Ability to mass update current-year values with the projected-year values for the year-end and assessment notice process.				
2611	Ability to generate audit reports before finalizing values for yearly assessment notices				
2612	Ability to exclude parcels with no change in ownership or assessment from annual assessment notice generation.				
2613	Ability to generate a year-end report to confirm the parcel counts and values by state code and City code before generating the yearly assessment notices. [610 & 615 reports]

The City of Richmond, Virginia Exhibit B - CAMA Technical Requirements

Integrated Web-based Portal			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Internal User Sign-in and Access			
T1.01	The proposed CAMA solution shall support single sign-on using LDAP, if the Offeror proposes that the application is hosted by the City. If it is not hosted by the City, a similar single sign-on capability that integrates with the City must be proposed.		
Integrated (Single Virtual Application) Portal			
T1.02	The system shall have the ability to be launched via a single application (versus having to launch multiple applications.)		
Web-based Applications			
T1.03	All of the system's desktop client applications shall be "thin client" applications rather than "thick or fat client" applications, meaning that no or minimal client software on the desktop will be required for their operation.		
T1.04	The system shall include a public-facing front end that all citizens can use to view parcel information from within web browsers, tablets, and mobile devices.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Technology Architecture Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Client Hardware			
T2.01	The internal client application must be compatible with the City's desktop computing standard (Dell / Microsoft Windows).		
Application Software			
T2.02	The system's client application software must be capable of running on the Microsoft Windows platform, including currently supported (e.g., Windows 10) and future versions of that platform.		
T2.03	The system's web-based client application software shall provide interface support for Microsoft Edge, Firefox, Google Chrome, and Apple Safari browsers.		
T2.04	The system shall provide the ability to use any native application or plug-in such as Adobe Acrobat, Flash, QuickTime, and Microsoft Office to create and view attachments.		
T2.05	The proposed CAMA system shall be web-based, and should use the latest client-side technologies to enhance the user experience.		
Communications			
T2.06	The proposed CAMA system shall be accessible by internal City employees from any location provided the User's terminal is located on the City's intranet.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Geographic Information Systems (GIS)			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Browser Compatibility			
T3.01	The system shall be capable of rendering and displaying properly on World Wide Web Consortium (W3C) compliant and/or most popular web browsers including Microsoft Edge, Firefox, Google Chrome and Apple Safari.		
Map Features			
T3.02	The system shall display physical locations (such as parcels/addresses) using map services from ArcGIS Server or ArcGIS Server Enterprise or ArcGIS Online.		
Data Layers / Views			
T3.03	The system shall be capable of displaying multiple GIS data layers which are user-selectable (on/off).		
Location (Pinpoint) Identification			
T3.04	The system shall be capable of identifying the location of a parcel on a map by use of a visual "push pin" or other appropriate indicator, once the address is entered.		
T3.05	The system shall be capable of deriving the address of a parcel based on the location of a "push pin" or other indicator placed on the map by a user.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Access Control and Data Security			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Internal User Access Control			
T4.01	The system shall provide role-based security controls access to specific functions for internal users.		
T4.02	The system shall provide role-based security controls access to specific data for internal users.		
T4.03	The system shall provide record ownership-based security controls access to specific functions for internal users (e.g., for Appraisors who may "own" specific parcels and should be the only ones authorized to perform certain functions.)		
External User Access Control			
T4.04	The system shall provide role-based security controls access to specific functions for external users.		
T4.05	The system shall provide role-based security controls access to specific data for external users.		
T4.06	The system shall allow an external user to see only the information relating to them.		
Passwords			
T4.07	The system shall utilize single sign on (SSO) using the city's active directory.		
Audit Trail			
T4.08	The system shall provide administrative auditing and reporting – the capability to manage users, groups and access permissions along with being able to monitor and report on user and file activity.		
T4.09	The system shall provide the ability to audit changes at the field level. This ability should be able to be turned off and on by a system administrator.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

User Interface Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
General UI Considerations			
T5.01	The system layout, design, and navigation shall be easy to use, consistent, and intuitive.		
T5.02	Screen layouts shall be capable of being tailored or personalized to individual needs (such as modifying home page contents to add daily calendars, activities, "to do" tasks, outstanding service requests, etc.)		
T5.03	The system shall support a user interface that allows for the ability to easily search for and retrieve information.		
T5.04	The system should provide "kiosk friendly" displays, or provide the option of switching to a kiosk-friendly layout suitable for use on self-contained, touch-screen computer kiosks.		
T5.05	User interface considerations apply to both desktop and mobile displays.		
City of Richmond Branding and Identity			
T5.06	The application's citizen portal color scheme should be modifiable to match the City of Richmond identity standards (color scheme).		
T5.07	The application's citizen portal color scheme should be modifiable to match the City of Richmond identity standards (fonts and sizes).		
T5.08	The application's citizen portal color scheme should be modifiable to match the City of Richmond identity standards (style sheets and wrappers).		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Accessibility Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Compliance with W3C Web Content Accessibility Guidelines			
T6.01	The system shall comply with W3C Web Content Accessibility Guidelines.		
Compliance with Section 508 Requirements			
T6.02	The system shall comply with Section 508 Requirements regarding accessibility.		
Compliance with State and City Policies			
T6.03	The system shall comply with Commonwealth of Virginia and City of Richmond policies regarding accessibility.		
Language Translation Support			
T6.04	The system shall be capable of providing support for translation of content; either through an internal facility, or by interfacing with an open-source solution (e.g., Google Translate.)		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Performance and Scalability Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Response Time Requirements			
T7.01	The system shall provide response time performance in line with leading Tier 1 commercial web applications.		
Back-up Policies			
T7.02	The system shall have sufficient backup utilities, backup and recovery procedures, and storage infrastructure to minimize the possibility of data loss.		
Monitoring, Downtime and SLA			
T7.03	The system is expected to available on a 24/7 basis except for scheduled maintenance, version upgrades and emergency "fixes".		
T7.04	The hosting services provider shall provide a minimum of a guaranteed 99.9% uptime.		
Scalability			
T7.05	The system shall be scalable to easily allow for additional capacity to be added in the future.		
T7.06	The system shall be able to initially support up to 200 internal end users as well as (and concurrently with) an unspecified number of self-service Citizen users, and shall be designed to scale in order to meet future demand.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Support Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Change Management Support			
T8.01	The solution shall include Organizational Change Management support.		
Training Support			
T8.02	The solution shall include Training support.		
Internal End User Documentation (Manuals, Cheat Sheets, etc.)			
T8.03	Context sensitive help screens shall be available to users on each screen.		
T8.04	All help screens should open in a separate window so the current screen does not have to be reloaded.		
T8.05	An online data dictionary shall be provided to assist uses with report writing and identification of fields on screens		
Help Desk Support			
T8.06	The Offeror shall provide Implementation and End User Help Desk services Monday through Friday from 7am to 7pm EST and emergency services after normal working hours, during weekends and holidays.		
T8.07	For off-hours and emergency situations, the City desires phone access and a 2 hour call back period to address problems.		
T8.08	The Help Desk shall operate from a central location providing a toll free number for the City.		
T8.09	Specific problem resolution Service Level Agreements (SLAs) in accordance with industry best practices, will be determined based on Offeror responses to the RFP, and finalized during contract negotiations.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Integration to External (Departmental) Systems			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
External APIs and Toolkits			
T9.01	The CAMA system architecture will be based on Service Oriented Architecture (SOA) principles, so that the appropriate web services will be incorporated within the system architecture to facilitate the development of required interfaces.		
T9.02	The system shall provide such external application programming interfaces (APIs) and toolkits as are necessary to enable the integration of the system with external applications without the need for extensive interface design or coding.		
T9.03	The system shall provide the ability to create and display a link to open/launch an external application, and pass such parameters to the external application as necessary to "deep link" to the relevant function and data.		
Bi-directional (two-way) Interfaces			
T9.04	The application shall provide robust bi-directional (two-way) integration with other applications. The CAMA application must be able to easily integrate with other applications that are currently in use within the City.		
T9.05	Since the City is implementing an internal and public-facing Service-Oriented Architecture (SOA) solution based on Microsoft BizTalk, the CAMA solution shall utilize Microsoft BizTalk as the means of communication with "back end" departmental systems via City's Enterprise Service Bus.		
Support for Interfaces to/from City of Richmond Departmental Systems			
T9.06	The system shall have the ability to interface Permits from the City's EnerGovapplication (inbound).		
T9.07	The system shall have the ability to interface with the City's revenue administion system (currently MUNIS) for annual CAMA file (outbound)		
T9.08	The system shall have the ability to interface with the City's ERP system (Oracle EBS) for annual CAMA file (outbound) (FY2021)		
T9.09	The system shall have the ability to interface with the City's ERP system (Oracle EBS) for daily CAMA file (outbound) (FY2021)		
T9.10	If the system does not have its own citizen portal for providing property informaiton, the system shall have the ability to interface with the cities Property Search application which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown property search applicaiton and perform this process within a consolidated CAMA system.		
T9.11	If the system does not have its own citizen portal for property transfers, the system shall have the ability to interface with the cities Property Transfer Search application which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown property transfer search applicaiton and perform this process within a consolidated CAMA system.		
T9.12	The system shall have the ability to interface with the Rehab Tracking application which currently gets data from ProVal		
T9.13	The system shall have the ability to interface with the Assessor Tracking System which currently gets data from ProVal. The city's desire to retire its home grown assessor tracking system and perform this process within a consolidated CAMA system.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Integration to External (Departmental) Systems			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
T9.14	If the system does not have the ability to track parcel editing (work flow management), the system shall have the ability to interface with the city's Edit Parcel Tracking application which currently gets data from ProVal. The city's desire to retire its home grown edit parcel tracking system and perform this process within a consolidated CAMA system.		
T9.15	If the system does not have the ability to track the process for tax exempt workflow and application processing, the system shall have the ability to interface with the city's Exempt Tracking application which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown exempt tracking system and perform this process within a consolidated CAMA system.		
T9.16	If the system does not have the ability to track area tax, the system shall have the ability to interface with the Area Tax Tracking System which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown area tax system and perform this process within a consolidated CAMA system.		
T9.17	The system shall have the ability to export a weekly "Owner Updates" text file to an external file server utilized by the Department of Public Utilities (DPU)		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Reporting, Metrics and Analytics			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Canned Reporting			
T10.01	The application shall provide broad reporting tools with numerous pre-configured or standard reports including CAMA user performance statistics.		
Ad-Hoc Reporting			
T10.02	The application shall provide an ad-hoc reporting tool that allows for reporting on all data elements within the system.		
Metrics and Key Performance Indicators			
T10.03	The application shall provide robust reporting and analysis tools. Various reports are needed to track the performance of each appraiser and the status of assignments.		
Advanced Analytics			
T10.04	The system shall provide an advanced analytics capability to include incorporation of best practices Key Performance Indicators (KPIs) and predictive analytics / forecasting capabilities based on historical data.		
T10.05	The CAMA system should provide a robust reporting and analytics capability, And also provide the ability to import and export information to and from external sources.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Solution Hosting Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Response Comments (Indicate if any manual processes are required)
Data			
T11.01	The hosting solution shall provide data encryption on transfer – this implies that data is encrypted while in transit from the CoR (City) network to the cloud provider.		
T11.02	The hosting solution shall provide data encryption at rest – this implies that data is encrypted on servers using encryption technologies such as 256 bit AES.		
T11.03	All CoR (City) data will be segmented from other customer data unless the data is designated by the CoR (City) agency as being public.		
T11.04	All CoR (City) data will be e-discoverable for litigation and FOIA requests.		
T11.05	The hosting services provider must conduct and if needed restore backups of CoR (City) data should data become corrupted or accidentally deleted.		
T11.06	All hosting servers containing CoR (City) data, including backup servers, shall be located within the United States of America.		
Data Custodianship			
T11.07	Contractor shall provide the City access to City data at the City's request in a mutually agreed upon format. Such agreement shall not be unreasonably withheld. Contractor shall also provide access to any derivatives or alterations of City data at the City's request.		
T11.08	City shall have access to data at the database level for future integrations and automations. It is preferred that this is accomplished via published APIs.		
Audit			
T11.09	The solution hosting provider shall be SAS 70 Type II Certified – Statement on Audit Standards – widely recognized auditing standard developed by the American Institute of Certified Public Accountants (AICPA). This certification represents that a service organization has been through an in-depth audit of their control objectives and activities, which includes information technology controls and related processes.		
Vulnerability			
T11.10	All systems of the hosting services provider shall be continually monitored for intrusion, malware, viruses, etc		
T11.11	The hosting services provider shall conduct on-going vulnerability assessments, scans and penetration tests.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Accessibility via Mobile Devices			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Types of Mobile Devices Supported			
T12.01	The system shall be capable of providing interfaces to both internal and external users on various mobile devices including "iPhone/iOS" through a native application, maintaining the appropriate levels of security and access to functionality as defined by the City.		
T12.02	The system shall be capable of providing interfaces to both internal and external users on various mobile devices including "Android" through a native application, maintaining the appropriate levels of security and access to functionality as defined by the City.		
T12.03	The system shall be capable of providing interfaces to both internal and external users on various mobile devices including ""HTML/WAP-enabled mobile devices," maintaining the appropriate levels of security and access to functionality as defined by the City.		
Internal Mobile Accessibility			
T12.04	Access to the internal employee / CAMA portal will be secured so that only authorized personnel are able to access it, and the same function and data access restrictions will apply as for the web-based portal.		
External Mobile Accessibility			
T12.05	Access to the external citizen portal will be restricted so that the same function and data access restrictions will apply as for the web-based portal.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Data Conversion			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Conversion			
T13.01	The City anticipates that a significant amount of data conversion will be required from existing ProVal application into the new system. The County will provide Subject Matter Experts (SME) resources to cleanse and extract legacy CAMA data. The data transformation activities will be a shared responsibility of the City and Contractor. The data load in the new CAMA system will be the Contractor's responsibility.		
T13.02	The Offeror shall lead the migration strategy and execution. The City will assist the Contractor's technical resources to help in the conversion effort. Offerors shall provide with their proposals the most complete estimate of data conversion requirements, resources and expenses. Any resources the Offeror anticipates being provided by the City should be indicated in proposal responses.		
T13.03	Offerors shall provide with their proposals a detailed implementation plan for transitioning data from the current systems into the new system to allow for searching, reporting, and editing needs. The implementation plan should specify the number of data migration iterations that would be performed, including the final data migration executed in support of production implementation.		
T13.04	The City will support the Contractor's data migration team with the data extract approach and execution for conversion. The City anticipates migrating both current and historical records. The current system has back to 1998 but City would like a minim of current plus 15 years of history.		
T13.05	Offerors shall provide with their proposals a Quality Assurance (QA) plan for the data migration. The QA Plan will include success metrics and the method for assessing the quality of the data migration. Conversion routine exception reports should reflect the legacy data and new system data to allow manual, side-by-side comparison of data to identify the specific error and conduct the research required to correct it.		

The City of Richmond, Virginia
Exhibit B - CAMA Technical Requirements

Training			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Conversion			
T14.01	The Contractor shall provide the training methodology supporting go-live. This should include provision of job aids, user manuals, or any other training activities and materials in support of the methodology. This should be provided in addition to online help available within the CAMA application.		
T14.02	Training shall be sufficient to prepare the City system administration staff to fully and completely administer and maintain the proposed solution without further reliance on contractor staff beyond normal assistance covered by the maintenance agreement.		
T14.03	Formal training sessions and cross-training is desired to transfer detailed knowledge regarding system setup, configurations, and out of the box functionality. It is expected that City staff will have the necessary knowledge to continue maintenance of configurable components after go-live.

**Good-Faith Minority Business Enterprise
and Emerging Small Business Participation Efforts
Documentation of Contacts**

All firms listed in this directory have registered with the City of Richmond as a minority owned business (MBE) or certified as an Emerging Small Business (ESB). It should be noted, that there are MBE businesses listed in this directory that are not certified. Therefore, any prime contractor/vendor desiring to use a registered MBE firm that is not certified, must be aware, that the registered MBE firm has 180 days to get certified or before the completion of the contract, whichever is less, or the prime contractor/vendor risks not receiving credit toward the minority participation goal for the said project.

Request for Qualification or Request for Proposals No.: _____

Project Name: _____

Name of Contractor: _____

Part I – Method of Contact

How did you contact each Minority Business Enterprise or Emerging Small Business?

- A. **Telephone.** For each firm contacted: ☐ YES ☐ NO **How many MBE/ESB firms were contacted?**
- State the name of the firm, the name of the person contacted, the telephone number contacted and the date of the contact.
- B. **Fax.** For each firm contacted: ☐ YES ☐ NO **How many MBE/ESB firms were faxed information regarding this project?**
- State the name of the firm, the fax number contacted and the date of the contact.
 - Attach a copy of the fax transmittal sheet indicating receipt of the fax.
- C. **E-Mail.** For each firm contacted: ☐ YES ☐ NO **How many MBE/ESB firms were emailed?**
- State the name of the firm, the name of the person contacted by e-mail, the e-mail address at which you contacted the person and the date of the contact.
 - Attach a copy of the e-mail sent. All copies of e-mails must include metadata indicating "From," "To" and "Cc" e-mail addresses as well as the date and time of the e-mail.
- D. **Newspapers and Other Publications.** For each advertisement placed in a newspaper or other publication: ☐ YES ☐ NO
- State the name of the newspaper or other publication and the date or dates on which the advertisement was published.
 - Attach a copy of both the published advertisement and any solicitation advertised.
- E. **Other.** For methods of contact not included above: ☐ YES ☐ NO **If yes, see below instructions**
- Describe the nature of the contact.
 - As applicable, state the name of the person contacted, the name of the firm contacted and the date of the contact.
 - Attach a copy of any written documentation of the contact.

Attachment A sets forth the form in which the information required above must be submitted.

INSTRUCTIONS / DEFINITIONS

1. **SUBCONTRACTOR** – a business hired by the prime contractor to perform a specific aspect of the contract. (Provide name of company, address and telephone number.)
2. **SCOPE OF WORK** – A commercially useful function performed by the contractor.
3. **EMERGING SMALL BUSINESS (ESB)** – A business that (1) has been certified by the Office of Minority Business Development (OMBD) for a period of seven years or less, (2) has annual gross receipts for each of its three fiscal years preceding application for certification of \$500,000 or less if engaged in the construction business or of \$250,000 or less if engaged in non-construction business, (3) has fewer than ten employees, (4) is not a subsidiary of another business and does not belong to a group of businesses owned and controlled by the same individuals, (5) has its principal place of business within the City of Richmond Enterprise Zone, (6) possesses a City business license, and (7) pays personal property, real estate, and business taxes to the City of Richmond.
4. **MINORITY BUSINESS ENTERPRISE (MBE)** – A business at least 51% of which is owned and controlled or 51% operated by minority group members or, in case of a stock corporation, at least 51% of the stock, which is owned and controlled by minority group members. Minority group members are citizens of the United States who are African American, Hispanic American, Asian American and American Indian.
5. **FIRST, SECOND, AND/OR THIRD-TIER SUBCONTRACTING** – The scope of work that is initially contracted by the prime contractor to a subcontractor is considered 1st-tier subcontracting. If that subcontractor further subcontracts all or a portion of the work, it becomes 2nd-tier subcontracting. Likewise, if the 2nd-tier subcontractor decides to subcontract a portion of the work, it is 3rd-tier subcontracting. The prime contractor will receive credit for 100% of the dollar value of the 1st, 2nd, 3rd-tier subcontracting for MBE/ESB participation. [In summary, only work performed by MBE/ESBs counts toward the minority participation goal. Refer to City of Richmond Office of Minority Business Development Policy and Procedures Section 6 -1.0 through 6-5.10.](#)
6. **SUPPLY PURCHASES** – The prime contractor will receive credit for 100% of the dollar value of supplies purchased from an MBE/ESB.
7. **MENTOR/PROTÉGÉ** – An arrangement based on a written development plan, approved by the City, which clearly sets forth the objectives of the parties and their respective roles, the duration of the arrangement and the services and resources to be provided by the mentor to the protégé. **MBE/ESB credit for a legitimate mentor/protégé arrangement will be four (4) points toward the satisfaction of the MBE/ESB goal for the specified project.**
8. **JOINT VENTURE** – An arranged partnership of the MBE/ESB and one or more other firms to carry out a single, for-profit project, for which the parties combine their property, capital, efforts, skills and knowledge, and in which the MBE/ESB is responsible for a distinct, clearly defined scope of work and whose share of the capital contributions, control, management, risks, and profits of the joint venture are commensurate with its ownership interest. **MBE/ESB credit for legitimate joint ventures will be five (5) points toward the satisfaction of the MBE/ESB goal for a specified project.**
9. **OTHER CREDIBLY VIABLE METHODS – BLANKET BONDING** – The prime contractor covers the bonding requirement for the subcontractor. **MBE/ESB credit for Blanket Bonding will be two (2) points toward the satisfaction of the MBE/ESB goal for a specified project.**

Apprenticeship – An apprentice that is bound to work for another for a designated amount of time in return for instruction in a trade or business. **MBE/ESB credit for Apprenticeship will be one (1) point toward the satisfaction of the MBE/ESB goal for a specified project.**
10. **DOLLAR AMOUNT & PERCENTAGE OF CONTRACT** – MBE/ESB monetary value and percentage of the subcontract.

MBE-ESB-3 Monthly Compliance Report Form – Revised Date 1/21/2021

All firms listed in this directory have registered with the City of Richmond as a minority owned business (MBE) or certified as an Emerging Small Business (ESB). It should be noted, that there are MBE businesses listed in this directory that are not certified. Therefore, any prime contractor/vendor desiring to use a registered MBE firm that is not certified, must be aware, that the registered MBE firm has 180 days to get certified or before the completion of the contract, whichever is less, or the prime contractor/vendor risks not receiving credit toward the minority participation goal for the said project.

Minority Business Enterprise/Emerging Small Business

Monthly Compliance Monitoring Report

Instructions/Definitions

1. **Vendor Name, Address, Phone No., Federal ID No.** - provide vendor name, address, phone number and include Federal ID number in column.
2. **MBE Paid This Month/Date Paid**- provide amount paid to MBE subcontractor/supplier during current pay application. (Definition of Minority Business Enterprise (MBE) - a business that is at least 51% owned and controlled by minority group members. In case of a publicly owned business, at least 51% of the stock is minority owned and minority group members control the business. Minority group members are citizens of the United States who are African American, Hispanic American, Asian American, or American Indian.
MBE Paid to Date – provide total amount paid to MBE subcontractor/supplier up to this pay application
Dollar Value of Subcontract – provide total subcontract dollar amount of original contract agreement. In summary, only work performed by MBE/ESBs counts toward the minority participation goal. Refer to City of Richmond Office of Minority Business Development Policy and Procedures Section 6-1.0 through 6-5.10.
3. **ESB Paid This Month** – provide amount paid to ESB subcontractor/supplier during current pay application. (Definition of Emerging Small Business (ESB) – a business that (1) has been certified by the Office of Minority Business Enterprise for a period of seven years or less, (2) In summary, only work performed by MBE/ESBs counts toward the minority participation goal. Refer to City of Richmond Office of Minority Business Development Policy and Procedures Section 6-1.0 through 6-5.10.
- has annual gross receipts for each of its three fiscal years preceding application for certification of \$500,000 or less if engaged in the construction of business or of \$250,000 or less if engaged in a non-construction business, (3) has fewer than ten employees, (4) is not a subsidiary of another business and does not belong to a group of businesses owned and controlled by the same individuals, (5) has its principal place of business within the City of Richmond Enterprise Zone, (6) possesses a City Business license, and (7) pays personal property, real estate, and business taxes to the City of Richmond.
ESB Paid to Date – provide total amount paid to ESB subcontractor/supplier up to this pay application.
Dollar Value of Subcontract – provide total subcontract dollar amount of original contract agreement.
4. **NON-MBE/ESB Paid This Month / Date Paid** – provide amount paid to subcontractor/supplier during current pay application.
5. **Subcontract Completed** – did the subcontract work or supplier satisfy the conditions of the contract agreement?
6. **Scope of Work** – describe work or service performed.
7. **Invoices** – include all invoices for all payments.
8. **MBE-3 Report & Invoices** – all MBE-3 forms and invoices can be mailed or emailed to MBD.Compliance@RichmondGov.com

ATTACHMENT B: CAMA SOFTWARE IMPLEMENTATION TERMS

1. DEFINITIONS. In addition to the terms defined in the Statement of Needs of the Contract, the following words and phrases, when used in this Attachment B, have the meanings ascribed to them in this section, except where the context clearly indicates another meaning is intended.

1.1 [Intentionally deleted.]

1.2 “**Customer**” means the City of Richmond, Virginia.

1.3 “**Customer Data**” means information, data, and other content, in any form or medium, that is provided or made available by Customer to Vision in connection with Customer’s receipt of Software Services. Customer Data does not include Usage Data.

1.4 “**Defect**” shall mean reproducible errors in the Software Services which prevent the Software Services from performing in all material respects in accordance with the Documentation, when operated in the proper environment and used in accordance with all applicable instructions.

1.5 “**Documentation**” means the user manuals, handbooks, and guides relating to the Implementation Services published by Vision and provided to Customer in connection with the Implementation Services.

1.6 “**Implementation Services**” means those installation and implementation services to be provided by Vision as set forth in the Implementation SOW.

1.7 “**Implementation SOW**” means the statement of work attached to this Attachment B as Appendices B1 and B2, outlining the Implementation Services to be provided under this Contract.

1.8 “**Software**” means Vision’s proprietary software product identified in the Implementation SOW.

1.9 “**Software Services**” means the access provided by Vision to Customer to the Software as described in the Implementation SOW. The Software Services may include access to Vision’s Software installed locally (“**Installed Software**”).

1.10 “**Vision Cloud Server(s)**” shall mean any server that is owned or licensed to Vision and made available by Vision in connection with the Software Services.

2. IMPLEMENTATION SERVICES. Vision shall provide Customer with those Implementation Services set forth in the Implementation SOW. Customer shall provide Vision with reasonable assistance and cooperation regarding the Vision’s provision of the Implementation Services.

3. CUSTOMER OBLIGATIONS. To the extent that Vision requires access to Customer’s premises in order to perform the Implementation Services, Customer shall provide (a) (i) media, (ii) supplies, (iii) data, the use of hardware and/or other equipment, (iv) other software, communications facilities, and (v) other materials (other than tools) required to for the Implementation Services; (b) reasonable secure storage for such Customer-provided materials; (c) reasonable secure storage for such equipment and tools as Vision elects to store at Customer’s premises. With respect to Implementation Services for Installed Software, Customer shall ensure that the environment, space, and access to and availability of power comply, at all times, with Vision’s minimum space and suitability requirements.

4. [INTENTIONALLY DELETED.]

5. FEES AND PAYMENT.

5.1 Fees. Customer will pay to Vision the fees set forth in the Implementation SOW (“**Fees**”) for the Implementation Services.

5.2 Payment Terms. The amounts and payment schedule for the Fees shall be set forth in the Implementation SOW.

5.3 Suspension. Vision reserves the right (in addition to any other rights or remedies Vision may have) to suspend or discontinue the Implementation Services if any Fees are more than 60 days overdue until such amounts are paid in full.

6. [INTENTIONALLY DELETED.]

7. PROPRIETARY RIGHTS; RESTRICTIONS ON USE. The Software, Software Services (including any updates or enhancements thereto), the look and feel and layout of any deliverables generated in connection with the Software Services, and all worldwide intellectual property rights therein, are the exclusive property of Vision and its licensors. All rights in and to the Software Services not expressly granted to Customer in this Contract are reserved by Vision. No intellectual property rights are transferred pursuant to this Contract.

8. WARRANTY; DISCLAIMER.

8.1 Performance Warranty.

(a) Vision warrants that (i) it will provide all Implementation Services in a professional and workmanlike manner in accordance with this Contract; (ii) it shall comply with all applicable laws and regulations in its provision of the Implementation Services provided herein; (iii) it is duly organized and is validly existing and in good standing under the laws of a state of the United States; and (iv) it knows of no reason why it cannot provide the Implementation Services provided for herein.

(b) For any breach of this warranty, Vision will, at its own expense and as its sole obligation and Customer’s sole remedy, use commercially reasonable efforts to reperform the Implementation Services giving rise to the breach which are reported to Vision by Customer in writing during the Term.

8.2 [Intentionally deleted.].

9. [Intentionally deleted.]

10. GENERAL.

10.1 [Intentionally deleted.]

10.2 [Intentionally deleted.]

10.3 [Intentionally deleted.]

10.4 [Intentionally deleted.]

10.5 [Intentionally deleted.]

10.6 [Intentionally deleted.]

10.7 [Intentionally deleted.]

10.8 [Intentionally deleted.]

10.9 [Intentionally deleted.]

10.10 [Intentionally deleted.]

[REST OF PAGE LEFT INTENTIONALLY BLANK.]

Appendix B1

CAMA Implementation Order

Customer Information	
Name	City of Richmond
Address	900 E Broad Street Richmond, VA 23219
Software Services	
Description of Licensed Software	Vision 8 CAMA Software
Scope of Services	☒ Implementation Services (One-Time Fee) One-Time Fee: \$765,000
Payment Schedule	Implementation Services Fee Due Date: (a) 25% due upon Commencement Date (b) 25% due upon completion of the Beta Conversion Milestone (c) 25% due upon completion of the Revised Beta Conversion Milestone (d) 25% due upon completion of the Live Database Conversion Milestone

Other Terms

1. Parcel Count.

The above Fees are based on a parcel count of 75,000. If this parcel count increases by more than 5,000, Fees may be subject to change. Fees may be changed only through a written amendment documented by the parties pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract.

2. Optional Services.

During the Implementation Period, and for the additional fees listed with each item below, the Customer may elect to add the following optional services through execution of a written amendment signed by the parties pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract. (The fees for these optional services are subject to change.)

- | | | |
|----|--|-------------------------------|
| a. | MobileAssessor Software Module
<i>(provided by subcontractor Data Cloud Solutions)</i>

<i>Site License & Implementation</i>
<i>Mobile License (4)</i>
<i>Admin Console License (3)</i>
<i>Training (3 days)</i> | \$47,500 (One Time Fee) |
| i. | MobileAssessor Annual Cloud & Subscription | \$17,503 / year |
| b. | Additional Historical Databases | \$10,250 / year converted |
| c. | Customization of COTS Software | Not included in this contract |

- | | |
|--|-----------------|
| d. Manual Data Entry of Sketches
(if data not available in format specified below) | \$4.25 / parcel |
| e. Additional User Training | \$1,400 / day |
| f. Additional Value Calibration / Appraisal Consulting Services | \$450 / hour* |
| g. Data Clean-Up Services | \$375 / hour* |
| h. Additional Custom Imports, Exports, or Reports
(8 Custom Imports/Exports included) | \$425 / hour* |
| i. Custom Property Record Card Template | \$2,500 / each |
| j. Two-week extension due to Customer Delay | \$4,000 / each |

** The election of any services to be “priced upon scoping” is subject to the availability of funds and requires execution of a written amendment signed by the parties pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract.*

3. Project Management.

- a. Vision will assign specific personnel to oversee implementation of the Software, and to act as the primary point-of-contact on behalf of Vision to communicate with the Customer.
- b. Customer will assign a primary point-of-contact to work with Vision’s Project Manager throughout the project. We request that the primary point-of-contact aims to respond to Vision inquiries within 48 hours in order to keep project schedule on track.
- c. Vision will provide basic analysis of the Customer’s requirements in comparison with the Software to identify gaps in functionality and guide the initial configuration of the Software. Vision has no duty to provide any analysis of the Customer’s business processes; however, Vision may provide suggestions to Customer with regard to the Customer’s business processes as Vision performs its work.
- d. Vision and Customer will identify a mutually agreeable schedule for regular project status check-ins to share information and feedback in the spirit of adhering to the scheduled milestones outlined in Appendix B2 of Attachment B.
- e. Decisions made or approvals granted by Customer’s primary point-of-contact will be maintained in the event of a change in primary point-of-contact, with the goal of eliminating re-work.
- f. Customer will use its best efforts to adhere to its milestones as set forth in Project Schedule provided in Appendix B2 to Attachment B. If scheduled milestones are missed by more than one (1) week due to delays caused by Customer, the project may need to be extended by the time period caused by the delay. The parties may modify the dates of any subsequent milestones subject to execution of a written amendment pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract. In no event will Vision be responsible or liable for delays caused by Customer. In no event will Customer be responsible or liable for delays caused by Vision.

4. Installation.

- a. Vision will install the Vision 8 Software on the Vision Cloud. Vision has provided the Vision 8 Hardware and Software Specifications document to Customer.

5. Conversion Services.

- a. Vision will convert the following data from the Customer’s legacy software:

- i. For the database containing information from the current year and up to five historical years, Vision will convert names, addresses, property characteristics and sketches for residential and commercial properties.
 - ii. For the remaining years as are stored in the Customer's legacy CAMA software, Vision will convert assessment history and ownership transfer history.
- b. Customer agrees to comply with following requirements to facilitate the conversion process. Customer's failure to comply may result in an adjustment to the timing of deliverables or incur additional cost subject to execution of a written amendment pursuant to section 8.5 ("Modification") of the General Terms and Conditions of the Contract:
 - i. Upon Vision's request, Customer will provide to Vision the Customer's data dictionary (i) in an ASCII file format along with an unambiguous file layout for sketches, (ii) as database files in Oracle or SQL format, or (iii) in any other manner acceptable to Vision.
 - ii. For sketches, the Customer must provide sketch data in a non-proprietary traverse format which shows "pen" movements for each sketch shape, and also links each shape to its associated sketch label. The data shall also include pointers from which Vision can derive the spatial relationship between shapes. It is the Customer's responsibility to provide the sketch data in a format that the Software can read or understand, or easily electronically convert. This may require the Customer to seek assistance from the legacy system vendor. Vision is not responsible for any fees charged by the legacy sketch vendor for extraction of sketch files.
 - iii. Prior to the commencement of conversion services, Customer will deliver a complete set of data files to Vision by internet file transfer protocol (FTP). Vision charges an additional fee on a time-and-material basis for any Customer data which Vision needs to pull from the Customer. A complete data set includes all files, sketches, photos and associated documents.
 - iv. Vision will perform two beta and one live electronic conversion of Customer's real estate file. Any changes made to the legacy system after the live electronic data is submitted to Vision are the Customer's responsibility. Only a live conversion will be completed on historical real estate files. It is Customer's responsibility to provide the live electronic database in the same format as the beta database supplied during the beta conversion.
 - v. Customer will run a full recalculation of each database prior to installation. All errors reported in the recalc error log are to be corrected prior to delivery of files to Vision.
 - vi. Parcels which encounter a value change will be placed on "value override" within the Software.
 - vii. Customer is responsible for the quality of the data it provides to Vision. Incomplete files, erroneous data, or data which is otherwise unsatisfactory for conversion which leads to rework by Vision may be an additional charge and may also impact the project timeline, subject to execution of a written amendment pursuant to section 8.5 ("Modification") of the General Terms and Conditions of the Contract.
 - viii. Customer will provide consistent parcel information. Vision will notify Customer of any discrepancies found and will make a reasonable attempt to correct errors, where feasible. Vision will provide a list to Customer of any uncorrected data that is incomplete or contradictory.
 - ix. For data conversion of multi-year databases, the same schema data layout, code tables and data content that existed for the current year database conversion must exist in the same format in all the prior year history databases to be converted. Historical conversions assume re-use of primary conversion routines developed to convert the live Customer data. Vision reserves the right to revisit conversion timing of historical databases should their structure warrant significant changes to the primary conversion routines.

- c. Vision agrees to commence installation and data conversion according to a mutually agreed upon timeline between the Parties set forth in Appendix B1. Both Vision and Customer understand and agree that any predetermined dates and/or schedules as they relate to the conversion of data may need to be adjusted to reflect the actual date of commencement, and any adjustment of dates is subject to execution of a written amendment pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract. Any delay in the Customer’s provision of any required information or documentation to Vision may require extension of deadlines subject to execution of a written amendment pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract. In no event will Vision be responsible or liable for delays resulting from Customer’s failure to timely provide required information or documentation. In no event will Customer be responsible or liable for delays resulting from Vision’s failure to timely provide required information or documentation.
- d. Vision does not guarantee that calculated values in the Customer’s legacy system will match calculated values in the Software after conversion.
- e. At the Project Manager’s best judgement and as a value-added service, Vision will partner with Customer to create a foundation for valuation as part of the conversion.
 - i. Vision will conduct up to 120 hours of market-based cost Value Calibration Services to align Vision-calculated parcel values with those calculated by the legacy system (excluding legacy system overrides). Vision will develop the initial value foundation during the project’s Revised Beta phase and finalize the Value Calibration Services during the Go-Live conversion phase.
 - ii. Customer acknowledges that all CAMA systems employ proprietary valuation engines, leveraging system-specific methodology, rates, tables, formulas, and database structures. The Vision Implementation team will integrate available legacy rates and models that align with the Vision valuation engine, statistical analysis, data mining, industry knowledge and heuristics, and customer insights to develop market-based cost models. The Customer understands that Vision does not guarantee a 1 to 1 value match upon completing these services. Deviations between the Legacy system values and Vision values will vary based on dissimilarity between systems. The valuation accuracy depends on the legacy data quality and consistency, the legacy system valuation engine, and the number of data transformations performed during the conversion.
 - iii. Customer is responsible for providing all available legacy system rates, valuation schedules, documentation, methodologies, external work files, and any other relevant legacy system information to support Vision throughout the Value Calibration Services.
 - iv. Vision performs Value Calibration Services for the Live database only. Any Historical databases will be placed on value freeze to retain legacy system parcel values. These services do not include or replace reassessment services, and the Customer understands that work conducted is strictly mathematical and does not comply with USPAP standards.
 - v. If desired, Customer may request additional Value Calibration Services or Appraisal Consulting as outlined in Section 2. Optional Services.
 - vi. Customer acknowledges that all of the above are best efforts by the Vision implementation team and are dependent on the quality of the legacy data and the responsiveness of the Customer and will not withhold payment for said value-added services.

6. Import / Export Creation

- a. As part of the Services, Vision is providing an Export to Munis, the Vision Standard Building Permit Import, and eight Custom Imports/Exports. Vision and Customer will collaborate on developing clear specifications. Changes to these specifications that result in additional work may require additional Fees subject to execution of a written amendment pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract.

- b. Additionally, should the City move to a new Tax Billing system in the future, Vision will create a new Tax export at no additional cost. This will not be part of the base scope of work prior to Go-Live Install and if the City chooses to add this Tax export to the Contract, it will be documented through execution of a written amendment pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract.
- c. Any additional imports or exports will be charged at Vision’s then-current rates subject to execution of a written amendment pursuant to section 8.5 (“Modification”) of the General Terms and Conditions of the Contract.

7. Training Services

- a. The quantity of training to be provided is as follows:
 - i. Two Sessions of Beta Testing Training
 - ii. Three Days of CAMA Sessions for Up to 20 General Users
 - iii. Two Days of Training for Appraisal/Assessment Users
 - iv. One Day of Training for System Administrators
 - v. Four Days of Banked Training to be used post go live.
- b. If training days are not used immediately after go-live, they will be banked for future use in Customer’s training day bank. Payment for implementation milestones cannot be withheld for training scheduling.
- c. Training sessions will address three distinct levels of expertise: (a) daily CAMA usage, (b) advanced appraisal usage, and (c) technical support.
- d. The Customer will provide suitable facilities for training sessions according to Vision’s requirements for effective knowledge transfer.
- e. The Customer must give notice of any training session cancellation to Vision at least forty-eight (48) hours prior to the commencement of the training session.

Appendix B2: Project Schedule (CAMA Implementation)

The Project Schedule is set forth below. The parties acknowledge that the Schedule Requirements are contingent upon each party's active and prompt participation in the Project. The Schedule Requirements are subject to change based on mutual review by Vision and Customer and only through execution of a written amendment pursuant to section 8.5 ("Modification") of the General Terms and Conditions of the Contract.

Milestone	Responsible Party	Schedule Requirements
Contract Negotiations Complete	City of Richmond and Vision	Contract Commencement Date
Project Kick-Off (Start-Up and Conversion Specifications)	City of Richmond and Vision	Schedule kick-off call upon mutual agreement, expected to be within 30 calendar days of Contract Commencement Date
Community Supplies Information to Vision	City of Richmond	+ 2 weeks from Project Kick-off Call
Data Mapping for Conversion	Vision	+ 6 weeks
Supply Non-Proprietary Legacy Sketch Data	City of Richmond	+ 0 days
Beta Conversion (the "Beta Conversion Milestone")	Vision	+ 6-8 weeks
Beta Conversion Delivery	Vision	+ 1 day
Beta Conversion Review and Feedback	City of Richmond	+ 4 weeks
Revised Beta Conversion with Initial Value Foundation, per Previously Identified Revisions	Vision	+ 6-8 weeks, assuming the City requests 20 or fewer revisions requested during the Beta Conversion Review period. For additional revisions, the schedule requirements shall be extended as necessary..
Install Revised Beta Conversion (the "Revised Beta Conversion Milestone")	Vision	+ 1 day
Revised Beta Conversion Review and Approval	City of Richmond	+ 2 weeks
Supply Live Legacy Data	City of Richmond	+ 1 day

Convert Live Legacy Data	Vision	+ 4 weeks, , assuming the City requests 20 or fewer revisions requested during the Revised Beta Conversion Review period. For additional revisions, the schedule requirements shall be extended as necessary.
Install Live Converted Data (the “Live Database Conversion Milestone”)	Vision	+ 1 day
Supply Historical Database	City of Richmond	+ 0 days
Convert Historical Databases	Vision	+ 2 weeks per database
Install Converted Historical Databases	Vision	+ 1 day
Project Go-Live	City of Richmond and Vision	+ 1 day
Schedule and Execute Training	City of Richmond and Vision	Post go-live install, at mutual convenience
Transition to Ongoing Customer Support	City of Richmond and Vision	4-week period with weekly check-in calls between Project Manager, Customer Support team, and City of Richmond

ATTACHMENT C: CAMA SOFTWARE SUBSCRIPTION TERMS

1. DEFINITIONS. In addition to the terms defined in the Statement of Needs of the Contract, the following words and phrases, when used in this Attachment C, have the meanings ascribed to them in this section, except where the context clearly indicates another meaning is intended.

1.1 “Authorized Users” means Customer’s employees, consultants, contractors, and agents (a) who are authorized by Customer to access and use the Services under the rights granted to Customer pursuant to this Contract; and (b) for whom access to the Services has been purchased hereunder.

1.2 “Confidential Information” means all information related to a Party’s business, financial affairs, or operations, including but not limited to information related to business plans, technology, source code, product or service development plans, pricing, techniques, and methods, which is either marked or identified as confidential or which the receiving Party knew or reasonably should have known, under the circumstances, was confidential; provided however, Confidential Information does not include any information required to be disclosed by a Party pursuant to applicable law or an order of a court of competent jurisdiction.

1.3 “Customer” means the City of Richmond, Virginia.

1.4 “Customer Data” means information, data, and other content, in any form or medium, that is provided or made available by Customer to Vision in connection with Customer’s receipt of Software Services. Customer Data does not include Usage Data.

1.5 “Defect” shall mean reproducible errors in the Software Services which prevent the Software Services from performing in all material respects in accordance with the Documentation, when operated in the proper environment and used in accordance with all applicable instructions.

1.6 “Documentation” means the user manuals, handbooks, and guides relating to the Services published by Vision and provided to Customer in connection with the Services.

1.7 “Professional Services” means those configuration, customization, analysis, consulting, professional and other services to be provided by Vision to Customer pursuant to an Order, but specifically excluding the Software Services.

1.8 “Services” means, collectively, the Professional Services and/or Software Services described in Appendix C1 hereto (the “**Order**”).

1.9 “Software” means Vision’s proprietary software product identified in the Order.

1.10 “Software Services” means the access provided by Vision to Customer to the Software as described in the Order.

1.11 “Usage Data” means non-personally identifiable information, data, and other content anonymized, aggregated, collected, compiled, synthesized, or modified and collected by Vision in the course of providing the Services. Usage Data does not include Customer Data, except in aggregate or non-personally identifiable form.

1.12 “Vision Cloud Server(s)” shall mean any server that is owned or licensed to Vision and made available by Vision in connection with the Software Services.

2. SOFTWARE SERVICES GENERALLY.

2.1 Access to Software Services. Vision has created several options for accessing the Software Services and managing Customer Data. Customer may choose to access the Software Services remotely using Vision’s local software, which Vision makes available to Customer for the purposes of this Contract (including any applicable third-party software, hardware, and systems, including any updates and enhancements to the foregoing, the “**Installed Software**”). Customers who license the Installed Software have the option of utilizing the Installed Software in

conjunction with Vision's Cloud Server (the "**Hosted Solution**") or by storing the Customer Data on their own servers (the "**Non-Hosted Solution**").

2.2 Additional Terms. The Software Services purchased by Customer shall be set forth in the Order. The Order may set forth additional terms and conditions applicable to Customer's relevant Software Services. If Customer chooses to use the Vision Cloud Servers, Customer shall be subject to additional terms and conditions as set forth in the Order.

2.3 Scope of License. Subject to the terms and conditions of this Contract, including but not limited to the payment of all Fees, Vision grants to Customer a limited, revocable, non-transferable (except in accordance with Section 12.2), non-sublicensable, and non-exclusive license to access and use the Software Services solely during the Subscription Period (defined in Attachment A to the Contract). The Software Services are licensed, and not sold, and shall be used by Customer solely for the purpose of accessing, viewing, editing, maintaining, or otherwise utilizing the Customer Data (the "**Purpose**"). To the extent that Customer purchases a license to the Installed Software, the license granted under this Section 2.2 includes the limited right during the Subscription Period to (i) install and use the Installed Software in executable code form on Customer's servers and workstations, only for the Purpose; (ii) make one (1) copy of the Installed Software solely for backup or archival purposes; and (iii) copy and reproduce the Documentation provided to Customer solely for the purposes of facilitating Customer's use of the Installed Software. All rights not expressly granted to Customer are reserved by Vision and its licensors. There are no implied rights hereunder.

2.4 Implementation of the Software Services. During the Implementation Period, as defined in Attachment A, Vision shall provide Customer with installation and implementation services for the Software Services and, if applicable, the Vision Cloud Server, including any necessary server software ("**Implementation Services**"). Customer shall provide Vision with reasonable assistance and cooperation regarding the Vision's provision of the Implementation Services. Customer shall promptly, upon completion of the installation of the Software Services, test the Software Services using its data and notify Vision of any errors or Defects in the Software Services.

2.5 Updates to Software Services. At no additional cost to Customer, Vision may create and implement, as part of a release generally available to all of its customers, software updates for the Software Services.

2.6 Service Level Agreement; Support. Vision will provide Customer with its standard support and consultation concerning the Software Services ("**Maintenance Services**") during the Term. Vision may charge Customer on a time and material basis for problem resolution services that exceed Vision's standard Maintenance Services, such as but not limited to: (i) when a problem has been created due to Customer error and/or neglect; (ii) when such problem is associated with third-party or pre-requisite software; (iii) when such problem is associated with client hardware or network issues; or (iv) support during a system installation, upgrade or conversion.

3. CUSTOMER OBLIGATIONS.

3.1 Minimum Hardware Requirements. Customer shall install and maintain, at its expense, hardware (including without limitation a central processing unit, local area network or network server) and communication equipment (including, without limitation, modem and remote access) that is compatible with the applicable Software Services and that meets Vision's minimum hardware configuration requirements ("**Designated Hardware**"). With respect to the Installed Software, Customer shall ensure that the environment, space, and access to and availability of power comply, at all times, with Vision's minimum space and suitability requirements.

3.2 Access and Storage. Customer shall ensure that Vision has full, free and safe access to the Installed Software and Customer's facilities and equipment for purposes of fulfilling its obligations hereunder. To the extent that Vision requires access to Customer's premises in order to perform the Services, Customer shall provide (a) (i) media, (ii) supplies, (iii) data, the use of hardware and/or other equipment, (iv) other software, communications facilities, and (v) other materials (other than tools) required to maintain and/or test the Installed Software; (b) reasonable secure storage for such Customer-provided materials; and (c) reasonable secure storage for such equipment and tools as Vision elects to store at Customer's premises.

(a) Usage and Backup of Customer Data. The content of the Customer Data, including the accuracy thereof, shall be the sole responsibility of Customer. Except where the Order provides that

Customer shall use the Hosted Solution, Customer shall back-up all files each day according to industry accepted standards. Notwithstanding the foregoing, Vision shall not be responsible for, or liable with respect to, any loss of or damage to Customer Data from failure of Customer to back-up its files or otherwise. Customer shall bear sole responsibility to correct problems or Defects in compatibility between the Software Services and Customer's hardware resulting from modifications of the Software Services, Designated Hardware, and such software by any third party.

4. PROFESSIONAL SERVICES. Vision will perform the Professional Services agreed to in, and in accordance with, the Order and the terms therein. Any purchased but unused Professional Services are forfeited upon the expiration of the Term.

5. CUSTOMER DATA; USAGE DATA. Customer hereby grants to Vision a non-exclusive, non-transferable right and license to use the Customer Data during the Term solely for the limited purpose of performing Vision's obligations hereunder for the benefit of Customer. Vision shall have no liability under this Contract for any loss, delay, or failure to perform resulting from Customer's failure to provide the necessary Customer Data. Subject to the rights granted in this Contract, Customer retains all right, title and interest in and to the Customer Data, and Vision acknowledges that it neither owns nor acquires any additional rights in and to the Customer Data not expressly granted by this Contract. Customer acknowledges that Vision may use the Usage Data during and after the Term in order to improve, modify, promote, and validate the Services, and otherwise for its own lawful business purposes; provided that such Usage Data does not in any way identify Customer or any individual whose personal information Customer has made accessible to Vision pursuant to this Contract.

6. FEES AND PAYMENT.

6.1 Fees. Customer will pay to Vision the fees set forth in the Order ("**Fees**") for the Software Services and, if applicable, the Professional Services.

6.2 Payment Terms. The amounts and payment schedule for the Fees shall be set forth in the Order.

6.3 Suspension. Vision reserves the right (in addition to any other rights or remedies Vision may have) to discontinue the Services and suspend all Authorized Users' access to the Software Services if any Fees are more than 60 days overdue until such amounts are paid in full.

6.4 Reimbursement; Expenses. Customer is not responsible for payment of any out-of-pocket expenses incurred by Vision in providing the Services for Customer under this Contract, including but not limited to expenses for travel, meals, lodging and parts.

7. CONFIDENTIALITY.

7.1 Protection. The Party receiving Confidential Information ("**Receiving Party**") from the other Party ("**Disclosing Party**") will not use any Confidential Information of the Disclosing Party for any purpose not expressly permitted by this Contract, and will disclose the Confidential Information of the Disclosing Party only to the employees or contractors of the Receiving Party who have a need to know such Confidential Information for purposes of this Contract and who are under a duty of confidentiality no less restrictive than the Receiving Party's duty hereunder. The Receiving Party will protect the Disclosing Party's Confidential Information from unauthorized use, access, or disclosure in the same manner as the Receiving Party protects its own confidential or proprietary information of a similar nature and with no less than reasonable care.

7.2 Exceptions. The Receiving Party's obligations under Section 7.1 above with respect to any Confidential Information of the Disclosing Party will terminate if and when the Receiving Party can document that such information: (a) was already lawfully known to the Receiving Party at the time of disclosure by the Disclosing Party; (b) is disclosed to the Receiving Party by a third party who had the right to make such disclosure without any confidentiality restrictions; (c) is, or through no fault of the Receiving Party has become, generally available to the public; or (d) is independently developed by the Receiving Party without access to, or use of, the Disclosing Party's Confidential Information. In addition, the Receiving Party may disclose Confidential Information of the Disclosing Party to the extent that such disclosure is: (i) approved in writing by the Disclosing Party, (ii) necessary for the

Receiving Party to enforce its rights under this Contract in connection with a legal proceeding; or (iii) required by law or by the order of a court or similar judicial or administrative body, provided that the Receiving Party notifies the Disclosing Party of such required disclosure in writing prior to making such disclosure and cooperates with the Disclosing Party, at the Disclosing Party's reasonable request and expense, in any lawful action to contest or limit the scope of such required disclosure.

7.3 Return of Information. Except as otherwise expressly provided in this Contract, the Receiving Party will return to the Disclosing Party or destroy all Confidential Information of the Disclosing Party in the Receiving Party's possession or control, and permanently erase all electronic copies of such Confidential Information, promptly upon the written request of the Disclosing Party; provided that Receiving Party shall not be required to destroy electronic records or files that have been created pursuant to Receiving Party's automatic archiving and back-up procedures and the removal of which is not technically practical.

8. PROPRIETARY RIGHTS; RESTRICTIONS ON USE.

8.1 Property of Vision. The Software Services (including any updates or enhancements thereto), the look and feel and layout of any deliverables generated in connection with the Software Services, and all worldwide intellectual property rights therein, are the exclusive property of Vision and its licensors. All rights in and to the Software Services not expressly granted to Customer in this Contract are reserved by Vision. Subject to Customer's ownership of Customer Data, Vision shall retain all right, title, and interest in and to any intellectual property rights developed by, or on behalf of, Vision in the course of performing its obligations under this Contract. Except as expressly permitted in this Contract or as otherwise authorized by Vision in writing, Customer will not, and will not permit any Authorized User to (a) modify, adapt, alter, translate, or create derivative works from the Software Services; (b) sublicense, lease, rent, loan, sell, distribute, make available or otherwise transfer the Software Services to any third party; (c) reverse engineer, decompile, disassemble, or otherwise attempt to derive the source code for the Software Services; (d) interfere in any manner with the operation of the Software Services; (e) remove, alter, or obscure any proprietary notices (including copyright notices) of Vision or its licensors displayed in connection with the Software Services; or (f) otherwise use the Software Services except as expressly allowed under this Contract.

8.2 Access and Users. Customer will use commercially reasonable efforts to prevent unauthorized access to, or use of, the Software Services, and notify Vision promptly of any such unauthorized use. Customer is responsible for maintaining the confidentiality of all Authorized Users' usernames and passwords and is solely responsible for all activities that occur under these usernames. Customer agrees (a) not to allow an unauthorized third party to use its account, usernames, or passwords at any time; and (b) to notify Vision promptly of any actual or suspected unauthorized use of its account, usernames or passwords, or any other breach or suspected breach of this Contract by Customer or any Authorized User. Vision reserves the right to terminate any username and password which Vision reasonably determines may have been used in violation of this Contract, or by an unauthorized third party, or by any Authorized User or individual other than the Authorized User to whom such username and password was originally assigned. Customer shall not permit any third party to access the Software Services without prior written approval from Vision. Third parties include all consultants, agents, and other non-employee personnel.

8.3 Violations. Customer may be subject to suspension or termination of this Contract if Customer violates Section 8 of this Contract.

9. WARRANTY; DISCLAIMER.

9.1 Performance Warranty.

(a) Vision warrants that during the Term, the Software Services will perform substantially in accordance with the Contract and its Documentation. Notwithstanding the forgoing, Customer acknowledges and agrees that the ability to use the Software Services may be affected by minimum system requirements or other factors beyond the control of Vision, and Vision shall not be liable if Customer is unable to use the Software Services due to such issues.

(b) Vision also warrants that (i) it will provide all Services in a professional and workmanlike manner in accordance with this Contract; (ii) it shall comply with all applicable laws and regulations

in its provision of the Services provided herein; (iii) it is duly organized and is validly existing and in good standing under the laws of a state of the United States; and (iv) it knows of no reason why it cannot provide the Services provided for herein.

(c) For any breach of this warranty, Vision will, at its own expense and as its sole obligation and Customer's sole remedy, use commercially reasonable efforts to correct any reproducible error in the Software Services reported to Vision by Customer in writing during the Term.

9.2 Third-Party Products. The Installed Software is intended to operate in conjunction with certain third-party products ("**Third-Party Products**"). Customer understands and agrees that Vision makes no representation, warranty, or claim related in any way to any Third-Party Products. Customer further understands and agrees that any updates, upgrades, or other modifications to Third-Party Products, whether by Customer or any other party, may cause disruption in the functionality of the Installed Software and Customer's use thereof, and Vision is not responsible for any such disruption.

9.3 [Intentionally deleted.]

9.4 Customer Warranty. Customer represents and warrants that: (a) it has the authority to enter into this Contract; (b) it has the right to use and provide the Customer Data for the purposes contemplated by this Contract; and (c) it shall not use the Software Services for any purpose or in any manner that violates applicable law.

**Appendix C1:
CAMA Order**

Customer Information	
Name	City of Richmond
Address	City of Richmond 900 E Broad Street Richmond, VA 23219
Software Subscription Detail	
Description of Licensed Software	Vision 8 CAMA Software
Applicable Model	☐ Installed Software without Hosted Solution ☒ Installed Software with Hosted Solution
Scope of Services	☒ Subscription to Software Services, which includes the following fees: Annual Subscription Fee Annual Cloud Hosting Fee Annual Web Hosting Fee <i>*The Annual Subscription Fee, the Annual Cloud Hosting Fee, and the Annual Web Hosting Fee are collectively the “Annual Fees” owed by the Customer.</i> <i>**The pricing applicable to each part of the Annual Fee is set forth in Appendix C2.</i> <i>***The Annual Cloud Hosting Fee includes One Live Environment and One Training Environment.</i>
Payment Schedule	Annual Fees to be invoiced by Vision within 14 days of the first day of the Initial Subscription Term, and on the anniversary of the first day of the Initial Subscription Term thereafter.
Number of Authorized Users	Up to 200 Users
Other Terms	

1. Software Terms

- 1.1 The Customer must keep confidential any of its passwords associated with the Software Services. In addition, Customer must secure the hardware upon which the Software will be accessed using, antivirus software, malware protection software, or similar software protecting against malicious software, computer viruses, hijacking, or other offensive attack. A failure to adhere to the preceding statements will undermine Vision's efforts for securing the Customer's data stored on Vision's servers.
- 1.2 Vision is not providing any third-party licenses, and therefore this Contract does not include any license fees for third party products, including but not limited to MS SQL License, Microsoft Windows License, ESRI's ArcGIS, Marshall & Swift Cost Calculators, or database software.
- 1.3 The Software is commercial-off-the-shelf (COTS) and may be configured, not customized, to address Customer requirements.

2. Installed Software Subscription Terms

- 2.1 During the Subscription Term, upon and subject to the terms and conditions of the Contract and this Order, Vision will provide to Customer reasonable operational support and assistance as described below in connection with the use of the Software: (a) corrections to the Installed Software and Documentation of Defects reported by Customer to Vision, which Defects are caused by errors in the then-current release of the Installed Software, provided that such Defects are reported to Vision no later than two (2) business days after the Defect first occurs or arises; (b) telephone or email support with respect to the Services delineated in this Order; and Vision's obligation to provide a response pursuant to this paragraph is void if the Customer does not allow reasonable access to the Installed Software for diagnostics and examination, or in the event of causes beyond the control of Vision, including but not limited to acts of God, fire, flood, strike, national emergency or failures of communications facilities or lines.
- 2.2 Vision shall use commercially reasonable efforts to respond to any request for support hereunder within one (1) business day of receiving such request.
- 2.3 "Business Hours" shall mean 8:30am to 4:30pm Eastern Standard Time, Monday through Friday, Vision holidays excluded
- 2.4 Notwithstanding anything herein to the contrary, the Services to be provided hereunder shall not be covered by this Contract, and shall be provided (if at all) on a time and materials basis, if the Software malfunctions due to or generates a Defect from: (a) acts of God or natural disasters, including but not limited to fire, smoke, water, earthquakes, lightning or static electricity; (b) causes external to the Installed Software such as, but not limited to, electrical power fluctuations or failures, lack of air conditioning or proper temperature control, accidents, burglary or vandalism; (c) the neglect, misuse (including faulty repair or maintenance by third parties), or improper servers or workstations on which the Installed Software is installed, or other failure to comply with the instructions set forth in the Documentation or provide a suitable environment for the Installed Software; (d) modification or alteration of the Installed Software not provided by Vision; (e) a malfunction of any equipment not provided by Vision with which the Installed Software is used or combined; (f) use of the Installed Software in a manner for which it was not designed; or (g) the failure of Customer to back-up its data or otherwise to fulfill any obligation under this Order or the Contract, for the Installed Software supported hereunder.
- 2.5 This Contract further shall not apply to, and the Services shall not be deemed to include:
- a) Development or engineering of the Software, unless Vision shall deem such development or engineering necessary in its providing services under section 2.1 above;
 - b) Upgrades, customizations or other enhancements to the Software or Installed Software;
 - c) Supplies, accessories, media or other materials which are, by their nature, expendable or consumable, except for media which may be provided as part of the Services described in section 2.1 above;
 - d) Any services, including, without limitation, installation, alterations, modifications, maintenance or removal of, or relating to any item not furnished by Vision, and
 - e) Any services related to work external to the Software, including, without limitation, electrical work, cable routing or changes that affect the Specifications or the Customer's equipment and other software.

3. Hosted Solution Terms

- 3.1 Customer may access and utilize Vision Cloud Servers only to access, view, edit, maintain or otherwise utilize their Customer Data in connection with the Software Services. Customer will not: (a) install or access any software or programs on the Vision Cloud Server without prior written approval from Vision; or (b) utilize the Vision Cloud Server to access the internet without prior written approval, other than indirect internet access through the CAMA UI. Customer will ensure that its content will not violate any applicable law. Customer is solely responsible for the development, content, operation, maintenance, and use of the Customer Data.
- 3.2 Vision may suspend Customer's right to access or use any portion or all of the Hosted Solution immediately upon notice to Customer if Vision determines that Customer's use of the Hosted Solution (a) poses a security risk or could otherwise adversely impact Vision or to any other customer of Vision; could adversely impact Vision systems, the Service Offerings or Content of any other customer; (b) is fraudulent; or (c) constitutes a breach of this Contract or a violation of applicable law.
- 3.3 Vision will provide sufficient space on Vision Server(s) for client's Vision 8 CAMA Database and Associated Documents.
- 3.4 Vision will install all required server software including SQL.
- 3.5 Vision will perform OS patching and upgrades.
- 3.6 Vision will set-up and configure 30-day rolling nightly backups of the CAMA Data and appropriate system files.
- 3.7 Customer will remain responsible to maintain their local intranet in good working order.
- 3.8 Customer will remain responsible to provide internet access with sufficient bandwidth to all CAMA users.
- 3.9 Vision will use commercially reasonable efforts to make the Software Services available continuously, as measured over the course of each calendar month, an average of 99% of the time, excluding unavailability as a result of the following exceptions: (a) scheduled maintenance where the Customer receives no less than 48 hours' notice of the scheduled outage; (b) actions or inactions of a third party; and (c) Customer's hardware or software.
- 3.10 Vision's hosting solution will provide data encryption on transfer – this implies that data is encrypted while in transit from the Customer network to the cloud provider.
- 3.11 Vision's hosting solution will provide data encryption at rest – this implies that data is encrypted on servers using encryption technologies such as 256 bit AES.
- 3.12 All Customer data will be segmented from other customer data unless the data is designated by the Customer as being public.
- 3.13 All Customer data will be e-discoverable for litigation and FOIA requests.
- 3.14 Vision must conduct and, if needed, restore backups of Customer data should data become corrupted or accidentally deleted.
- 3.15 All Vision hosting servers containing Customer data, including backup servers, shall be located within the United States of America.
- 3.16 Vision shall provide the Customer access to Customer data at the Customer's request in a mutually agreed upon format. Such agreement shall not be unreasonably withheld. Vision shall also provide access to any derivatives or alterations of Customer data at the Customer's request.

- 3.17 Customer shall have read-only access to data using SQL tools.
- 3.18 Vision shall use commercially reasonable efforts to provide a copy of its data center's most recent security certification(s) upon request from the City.
- 3.19 All systems of Vision shall be continually monitored for intrusion, malware, viruses, etc.
- 3.20 Vision is researching solutions for on-going vulnerability assessments, scans and/or penetration tests on the Hosted Solution.

Appendix C2: Pricing Schedule

		Annual Subscription Fee	Annual Cloud Fee	Annual Web Hosting Fee	Total Annual Fee:
Initial Subscription Term	Year 1	\$86,125	\$0	\$18,750	\$104,875.00
	Year 2	Not to exceed \$91,293	Not to exceed \$22,925	Not to exceed \$19,875	Not to exceed \$134,093.00
	Year 3	Not to exceed \$96,700	Not to exceed \$24,301	Not to exceed \$21,068	Not to exceed \$142,069.00
Pricing for Renewal Terms (renewal as authorized by section 1.1.2 of Part III: General Terms and Conditions)		The Annual Fee for each Renewal Term will be determined by the parties prior to renewal subject to these conditions. Vision may request a price increase for the Annual Fee for a Renewal Term by providing written notice to the City of its requested increase, and such notice must be provided at least 90 calendar days prior to the end of the Initial Subscription Term or the Renewal Term in effect. No price increase for the Annual Fee shall exceed 8% over the fee for the prior year. The City and Vision will document the agreed-upon pricing in the Contract Modification executed by the parties for that Renewal Term pursuant to section 1.1.2 (“Subscription Period”) of the General Terms and Conditions of the Contract.

Date: 12/8/2022

ADDENDUM NO. 1

DATE: December 1, 2022

Request for Proposals (RFP) No. 230003292 - Computer Assisted Mass Appraisal (CAMA) System

DUE DATE: December 13, 2022 Time: 11:00AM

SUBJECT: Questions and Answers

Ladies/Gentlemen:

Questions and Answers:

Q1: Exhibit A Number 1224: Are you referring to the ability of the Vendor or the City to create dashboards?

A1: The ability for the city to use the software to make internal and external dashboards.

Q2: Exhibit A Number 1336: Does the City have an MLS subscription that the CAMA system would integrate with to access listings?

A2: Not at this time.

Q3: Exhibit A Number 1409 and 1410: What type of communication method (e-mail, USPS etc.) is expected with builders and surveyors?

A3: Email.

Q4: Exhibit A Number 2328 and 2329: What is the source of the cost tables that would be imported for residential and commercial properties?

A4: Marshall Swift

Q5: Can the City confirm the times listed page 1 of the RFP are in Eastern Standard Time?

A5: Yes; Eastern Standard Time.

Q6: Will the City allow for vendors to submit their responses to the RFP electronically or via mail?/courier service?

A6: See Part I Statement of Needs section 3.0 “ the offeror shall submit (i) 7 of complete, bound paper copies of its proposal and (ii) electronic copies in a portable document format readable by the Adobe Reader program”. See Part II Instructions to Offerors section 4.0 for additional proposal submission instructions. In addition to 7 paper copies, the offeror should submit a PDF via flash drive.

Q7: Can the City provide copies of Exhibit A and Exhibit B in excel format?

A7: Yes, uploaded to eVA.

Q8: How many years of ProVal CAMA data attributes are required to be converted?

A8: Value History for years 2015 to current; Data attributes for current only.

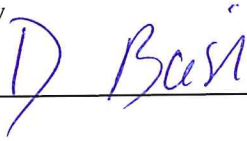

This addendum must be acknowledged and included with the bid submission as indicated in the RFP or your response may not be considered. Please include all pages of addenda submitted.

Title

Date

STATE CORPORATION COMMISSION FORM

Complete Legal Name of Offeror Firm: Vision Government Solutions, Inc.

Virginia State Corporation Commission registration information. The offeror:

- ☒ is a corporation or other business entity with the following State Corporation Commission identification number:

F1514423

-OR-

- ☐ is not a corporation, limited liability company, limited partnership, registered limited liability partnership, or business trust

-OR-

- ☐ is an out-of-state business entity that does not regularly and continuously maintain as part of its ordinary and customary business any employees, agents, offices, facilities, or inventories in Virginia (not counting any employees or agents in Virginia who merely solicit orders that require acceptance outside Virginia before they become contracts, and not counting any incidental presence of the offeror in Virginia that is needed in order to assemble, maintain, and repair goods in accordance with the contracts by which such goods were sold and shipped into Virginia from offeror's out-of-state location)

-OR-

- ☐ is an out-of-state business entity that is including with this proposal an opinion of legal counsel which accurately and completely discloses the undersigned offeror's current contacts with Virginia and describes why those contacts do not constitute the transaction of business in Virginia within the meaning of section 13.1-757 or other similar provisions in Titles 13.1 or 50 of the Code of Virginia

-OR-

- ☐ has not completed any of the foregoing options but currently has pending before the State Corporation Commission an application for authority to transact business in the Commonwealth of Virginia and wishes to be considered for a waiver to allow the offeror to submit the State Corporation Commission identification number after the due date for proposals. The offeror shall promptly provide any information the City requires to enable the City to properly evaluate the offeror's request for such a waiver. The City reserves the right to determine in its sole discretion whether to allow such a waiver.

MBE/ESB Past Good Faith Efforts Participation Form

All firms listed in this directory have registered with the City of Richmond as a minority owned business (MBE) or certified as an Emerging Small Business (ESB). It should be noted, that there are MBE businesses listed in this directory that are not certified. Therefore, any prime contractor/vendor desiring to use a registered MBE firm that is not certified, must be aware, that the registered MBE firm has 180 days to get certified or before the completion of the contract, whichever is less, or the prime contractor/vendor risks not receiving credit toward the minority participation goal for the said project.

INSTRUCTIONS / DEFINITIONS

1. **SUBCONTRACTOR** – a business hired by the prime contractor to perform a specific aspect of the contract. (Provide name of company, address and telephone number.)
2. **SCOPE OF WORK** – A commercially useful function performed by the contractor.
3. **EMERGING SMALL BUSINESS (ESB)** – A business that (1) has been certified by the Office of Minority Business Development (OMBD) for a period of seven years or less, (2) has annual gross receipts for each of its three fiscal years preceding application for certification of \$500,000 or less if engaged in the construction business or of \$250,000 or less if engaged in non-construction business, (3) has fewer than ten employees, (4) is not a subsidiary of another business and does not belong to a group of businesses owned and controlled by the same individuals, (5) has its principal place of business within the City of Richmond Enterprise Zone, (6) possesses a City business license, and (7) pays personal property, real estate, and business taxes to the City of Richmond.
4. **MINORITY BUSINESS ENTERPRISE (MBE)** – A business at least 51% of which is owned and controlled or 51% operated by minority group members or, in case of a stock corporation, at least 51% of the stock, which is owned and controlled by minority group members. Minority group members are citizens of the United States who are African American, Hispanic American, Asian American and American Indian.
5. **FIRST, SECOND, AND/OR THIRD-TIER SUBCONTRACTING** – The scope of work that is initially contracted by the prime contractor to a subcontractor is considered 1st-tier subcontracting. If that subcontractor further subcontracts all or a portion of the work, it becomes 2nd-tier subcontracting. Likewise, if the 2nd-tier subcontractor decides to subcontract a portion of the work, it is 3rd-tier subcontracting. The prime contractor will receive credit for 100% of the dollar value of the 1st, 2nd, 3rd-tier subcontracting for MBE/ESB participation. In summary, only work performed by MBE/ESBs counts toward the minority participation goal. Refer to City of Richmond Office of Minority Business Development Policy and Procedures Section 6 -1.0 through 6-5.10.
6. **SUPPLY PURCHASES** – The prime contractor will receive credit for 100% of the dollar value of supplies purchased from an MBE/ESB.
7. **MENTOR/PROTÉGÉ** – An arrangement based on a written development plan, approved by the City, which clearly sets forth the objectives of the parties and their respective roles, the duration of the arrangement and the services and resources to be provided by the mentor to the protégé. **MBE/ESB credit for a legitimate mentor/protégé arrangement will be four (4) points toward the satisfaction of the MBE/ESB goal for the specified project.**
8. **JOINT VENTURE** – An arranged partnership of the MBE/ESB and one or more other firms to carry out a single, for-profit project, for which the parties combine their property, capital, efforts, skills and knowledge, and in which the MBE/ESB is responsible for a distinct, clearly defined scope of work and whose share of the capital contributions, control, management, risks, and profits of the joint venture are commensurate with its ownership interest. **MBE/ESB credit for legitimate joint ventures will be five (5) points toward the satisfaction of the MBE/ESB goal for a specified project.**
9. **OTHER CREDIBLY VIABLE METHODS – BLANKET BONDING** – The prime contractor covers the bonding requirement for the subcontractor. **MBE/ESB credit for Blanket Bonding will be two (2) points toward the satisfaction of the MBE/ESB goal for a specified project.**

Apprenticeship – An apprentice that is bound to work for another for a designated amount of time in return for instruction in a trade or business. **MBE/ESB credit for Apprenticeship will be one (1) point toward the satisfaction of the MBE/ESB goal for a specified project.**
10. **DOLLAR AMOUNT & PERCENTAGE OF CONTRACT** – MBE/ESB monetary value and percentage of the subcontract.

MBE-ESB-3 Monthly Compliance Report Form – Revised Date 1/21/2021

All firms listed in this directory have registered with the City of Richmond as a minority owned business (MBE) or certified as an Emerging Small Business (ESB). It should be noted, that there are MBE businesses listed in this directory that are not certified. Therefore, any prime contractor/vendor desiring to use a registered MBE firm that is not certified, must be aware, that the registered MBE firm has 180 days to get certified or before the completion of the contract, whichever is less, or the prime contractor/vendor risks not receiving credit toward the minority participation goal for the said project.

Tab II: Statement of Scope

In concise terms, state the Offeror's understanding of the scope of work presented by the Request for Proposals.

Vision Response:

Vision has over 500 customers across the country, 50% of whom have been with Vision for more than 20 years. Our CAMA software has been tried and tested by hundreds of communities, including the largest municipality in the country, New York City at 1.1 million parcels, and the nation's Capital (Washington, DC).

Vision has an unparalleled commitment to the Commonwealth of Virginia: With more than 65 customers in Virginia, Vision is proud to serve more Virginia communities than any other vendor. This strong community of users provides Vision deep understanding of the needs of Virginia Assessors. With over 35 Vision CAMA implementations in the Commonwealth, we have developed efficient and effective procedures to ensure quality at all stages of the process.

We also have proven experience successfully implementing CAMA solutions in cities of comparable size and with similar challenges (e.g. City of Chesapeake, City of Falls Church (ProVal) City of Norfolk (ProVal), Prince George County (ProVal) and many others in Virginia). Vision has the unique position of being the only provider to convert a jurisdiction from ProVal to our platform in the Commonwealth of Virginia.

We are devoted to supporting our Virginia user community, and well-versed in the unique requirements and needs of the Commonwealth in providing a solution that produces truly accurate valuations to taxpayers ensuring a fair and equitable distribution of the City's tax burden.

Vision confirms review of the Request for Proposal and is proposing our Vision CAMA Version 8 as our solution to meet the requirements of your Statement of Needs as detailed in this response.

Vision has deep understanding of the processes required for successful implementations in Virginia, Vision has responded to the Functional and Technical requirements set forth in Exhibits A&B as requested. We provide detailed descriptions of how Vision CAMA addresses the stated requirements of the Exhibits. In addition, Vision has provided a response to each of the Tabs as directed in Section 3.0 of the Statement of Needs.

Should Vision be selected as the vendor of choice and awarded this project, Vision reserves the right to negotiate contractual terms associated with, but not limited to, the Requirements and Deliverables as described in the Statement of Needs. Vision is confident we will be able to reach terms that are mutually agreeable to both parties.

Tab III: Executive Summary

Vision Government Solutions, Inc. (Vision) is both pleased and proud to submit this proposal for **the RFP No. 230003292 for Computer Assisted Mass Appraisal (CAMA) System**. Vision is proposing a comprehensive, proven implementation and support solution for our state-of-the-art *Vision 8* Computer Assisted Mass Appraisal (CAMA) System, including product, installation, implementation, training, and continuing service.

In summary, Vision Government Solutions is a uniquely qualified and experienced firm that has:

1. **Demonstrated customer happiness** with more than 500 customers across the country. 50% of Vision CAMA Customers have been with Vision for more than 20 years. Our CAMA software has been tried and tested by hundreds of communities, including the largest municipality in the country (New York City at 1.1 million parcels) and the nation's Capital (Washington, DC).
2. **A deep and unparalleled commitment to the Commonwealth of Virginia:** With more than 65 customers in Virginia, Vision is proud to serve more Virginia communities than any other vendor. This strong community of users provides Vision deep experience and expertise implementing CAMA systems successfully across the Commonwealth. We are devoted to supporting our Virginia user community, and well-versed in the unique requirements and needs of the Commonwealth in providing truly accurate valuations to taxpayers.
3. Proven experience successfully implementing CAMA solutions in cities of **comparable size and with similar challenges** (e.g. City of Chesapeake, City of Falls Church (ProVal) City of Norfolk (ProVal), and Prince George County (ProVal) and many others in Virginia). Vision has the unique position of being the only provider to convert a jurisdiction from ProVal to our platform in the Commonwealth of Virginia.
4. **A robust, user friendly and proven out-of-the-box CAMA system** that fits the needs of Virginia. The flexibility of the Vision CAMA system enables deep levels of personalization and configuration within the Commercial Off-the-Shelf system, reducing cost and risk associated with software development while still enabling the City to customize its workflows through the system.

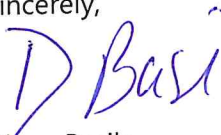

5. Vision will follow a **proven implementation process** that makes our implementations, on average, three times faster and significantly more cost competitive than our other providers across Virginia. In fact, our most recent Virginia implementations have averaged **5.3 months to complete**.
6. **Demonstrated financial stability and strength**, with more than forty years of consecutive business operations
7. A full-service commitment to providing maintenance and services to enable the **successful deployment** of our CAMA system, including installation, implementation, training, and continuing support over time. Hands down, Vision has the strongest Customer Support in the industry.

The *Vision CAMA Solution* will provide the City with a CAMA system that will deliver the optimum in system performance, growth, flexibility, reliability, user friendliness, and valuation accuracy. In addition, Vision's **product maturity for Virginia and our experience with ProVal CAMA conversions** will enable us to provide our software and services significantly faster and more cost competitively than any other provider.

The primary contact throughout the project will be *David Hickman, Vice President of Sales and Marketing* at *Vision Government Solutions*, he can be reached directly at: Phone: 804-347-7858 or Email: dhickman@vgsi.com. David resides in the City of Richmond and can make himself available should you wish to speak in person.

We thank you for your consideration and look forward to the opportunity to continue the conversations and collaborate with the City of Richmond on this most important project.

Sincerely,

Diane Basile
Chief Financial Officer
Vision Government Solutions, Inc.

Tab IV: Experience

Vision has been providing CAMA software and appraisal services to local governments since 1985. The proposed *Vision CAMA (V8)* has been live since 2017 and is today installed in more than 500 jurisdictions across the country. Vision's corporate Headquarters are in Hudson, Massachusetts, and our Virginia offices are located in Staunton, Virginia.

Vision provides CAMA software to 64 counties & cities in the Commonwealth of Virginia, making us the largest provider of CAMA software in the state. In the last 3 years, the communities of Dinwiddie County, City of Winchester, City of Falls Church, Augusta County, King William County, City of Portsmouth, City of Waynesboro, Essex County, Prince George County, The City of Williamsburg, and the City of Norfolk have all joined the Vision user community. Because of our commitment to Virginia, we host annual state-specific User Summits and provide Virginia-specific feature investments in Vision CAMA.

- A. Include a list of customers, contracts, and projects for both private and public entities, for which the Offeror has provided the proposed CAMA software and services of the last five years:

- B. Include the history of Offeror's CAMA system offerings, (e.g. initial release, date, current version number and development history); and

Vision CAMA was developed in the late 1990's and has been continually enhanced for nearly 30 years. The proposed solution, Vision CAMA Version 8, was first released in April of 2017. Since April of 2017, more than 400 existing customers have upgraded from older versions to the current Version 8.

Since its release in Virginia, all but one of our current clients in Virginia have upgraded to the Version 8, and 12 additional jurisdictions in the Commonwealth have migrated from legacy CAMA systems to Vision CAMA V8.

Vision's current cadence is to release "major" (feature) version upgrades to our 8.x platform several times per year and "minor," 8.X.X (patch / bug fix) releases more frequently, depending on the level of urgency. Vision 8 CAMA customers receive every major and minor release at no additional charge.

- C. Explain the Offeror's product roadmap over the next three years for ongoing development of their CAMA system and their commitment to and investment in the proposed CAMA system

The proposed solution Vision 8 was first released in April of 2017. Since April of 2017, more than 400 existing customers have upgraded to Version 8 and 12 Jurisdictions in the Commonwealth have migrated from legacy CAMA systems to Vision CAMA.

VGSI uses a cutting-edge Agile approach defined as Value-Driven Development (VDD). The product team actively engages with both internal and external stakeholders to find the fastest path to resolving issues and developing features that solve real problems. Led by experienced, trained, and certified product managers, engineers solve problems relative to their technologies and advise architecture upwards. This produces consensus-driven estimates that are considerably more accurate than other methodologies.

Feature selection and Road Mapping is done from a strategic level, making sure that solid business reasoning is in place for all features we develop. Our unique Iteration planning / release management approach also ensures that features are delivered regularly and that they're delivered as a whole design, not a piece of the solution.

Vision has many power users across the Commonwealth. Our Virginia User Community is strong and knowledgeable, and they gather each year to discuss feature enhancements and quality of life improvements. These users present their recommendations to our team for consideration (at the

annual user group meeting).

These user community Advisory Panels have provided many recommendations over the past 2 years that we, as a company, have been able to deliver, this includes (but is not limited to); development of Traverse for Sketch export, enhancements to Assessment History Screen, legislative updates and Separation of Land and Building. We just recently enhanced the Marshall & Swift Module and are currently enhancing our Supplemental Processing for Virginia as requested by their user community.

Specific feature enhancements are confidential and proprietary, Vision would be happy to discuss upcoming features with the City in a non-public forum.

- D. Explain the Offer's experience providing technical and customer support for governmental entities similar in size and structure to the City of Richmond

Vision's CAMA Support Package represents the highest levels of Customer Support in the industry. We have made deep investments in our Customer Success organization and are pleased to offer those services to the City of Richmond. Our investment in the Virginia market is unparalleled, and we have extensive Virginia-based resources and subject matter experts. Every Vision CAMA package includes annual support, comprised of:

- A Customer Operations team that includes Levels 1, 2, and 3 support, to ensure that any question can be answered on demand, no matter the complexity level. This team is staffed with Data Engineers, technical specialists, and subject matter experts.*
- Each new Virginia client is assigned a dedicated Customer Success Manager who will support The City through the first year post go-live to ensure your transition to Vision CAMA is successful.*
- Access to a dedicated Customer Success Team responsible for customer happiness and relationship management. Vision's Help Desk provides a luxurious support experience and is the fastest and best-staffed in the industry. With 99.5% inbound calls answered live and 80% on-call resolution for all users.*
- Vision is proud to offer a Virginia -specific Subject Matter escalation path for support inquiries specific to Virginia legislative and regulatory questions.*
- All new releases of Vision 8 CAMA at no additional charge. The City of Richmond will benefit from all the development we put into Vision 8 CAMA with no additional charge and modifications necessary to comply with any new and applicable Virginia statutes and/or administrative regulations are included.*
- Access to the Annual Virginia User Group events and our Annual National User Group Conference as well as the online Vision 8 CAMA Customer Portal.*

- E. Explain the Offeror's qualifications, including a description of the offeror's experience in providing services required by this Request for Proposals for entries similar to the City, and a brief history of the offer's experience providing services required by this Request for Proposals.

Vision has been providing CAMA software and appraisal services to local governments since 1985. The proposed Vision CAMA (V8) has been live since 2017 and is today installed in more than 500 jurisdictions across the country. Vision's corporate Headquarters are in Hudson, Massachusetts, our Virginia offices are located in Staunton, Virginia.

Vision provides CAMA software to 64 counties & cities in the Commonwealth of Virginia, making us the largest provider of CAMA software in the state. In the last 3 years, the communities of Dinwiddie County, City of Winchester, City of Falls Church, Augusta County, King William County, City of Portsmouth, City of Waynesboro, Essex County, Prince George County, The City of Williamsburg, and the City of Norfolk have all joined the Vision user community. Because of our commitment to Virginia, we host annual state-specific User Summits and provide Virginia-specific feature investments in Vision CAMA.

Vision is well versed in Virginia CAMA, we have implemented Vision in dozens of jurisdictions, Vision is the most selected provider in Virginia. We have the experience to successfully implement the proposed solution using our efficient implementation process.

Tab V: Key Personnel

Project Staffing Overview

Vision is proud to propose a project team that comprises a hand-picked combination of skillsets required for a successful conversion from the legacy ProVal platform to *Vision 8*.

The Vision Implementation Project Team provides the following benefits to the City of Richmond.

- (a) Expertise and track record of successfully converting City of Chesapeake, City of Falls Church (ProVal) City of Norfolk (ProVal), and Prince George County (ProVal)
- (b) Deep implementation engineering skillsets to aide in successful data conversion
- (c) Subject Matter Experts in assessing and appraisal
- (d) Strong customer support and technical support skillsets that ensure the City of Richmond will receive continued support long after the *Vision CAMA* implementation is complete

Proposed Implementation Project Team

NAME	ROLE	QUALIFICATION HIGHLIGHTS
JENIFER RUKSTELA	Software Implementation Department Lead	• Successfully converted more than two dozen legacy systems to <i>Vision 8</i> in the past 10 years • Every implementation in the last 2 years has been completed in 6 months or less • Over 20 years of appraisal experience • Tenured at Vision since 2006 • Knowledgeable in project management best practices, data conversion methods, and data mapping • PMP, PMI-ACP, CSSBB, CCMA I • BS in Data Analytics • MS in Project Management and Operations
GARY FIELDS	SME/Product Manager	• Implemented more than a dozen CAMA projects • Completed more than 50 Appraisal projects • 40+ years of Appraisal Experience • Available to provide consultative appraisal support to Dedicated Project Manager • Tenured at Vision since 1982

CATHERINE COURTNEY	Implementation Architect / Team Lead	• Successfully implemented Vision Software for customers across numerous states, namely Virginia, Florida, Pennsylvania, and Connecticut • Oversees Implementation Project Managers and Architects who run a combined 15+ Conversion projects at a given time • Utilizes project management methodologies to meet project delivery schedules while maintaining ongoing customer engagement and satisfaction • Leads client review sessions and general CAMA training throughout the implementation process
NICK LEONE	Project Manager	• Successfully implemented 2 complex deliveries in the past year, one of those a ProVal conversion • Successfully delivered Vision CAMA upgrades in the last year • Uses a unique skillset of project prioritization to guide clients and aid internal stakeholders during the conversion process
EMILY TEAGLE	Implementation Specialist	• Responsible for data mapping, data mining, and data analysis while also building out custom valuation processes • Previously worked in King William County, VA as a Deputy Assessor and Senior Fiscal Specialist • Works with the Project Management team to synchronize team members with customer expectations for optimal client deliveries • Emily is a Virginia Resident
BRUCE WOODZELL	Virginia Director of Business Development	• 40+ Years of Appraisal Experience • President of the Virginia Association of Assessing Officers (2001-2002) • President of the International Association of Assessing Officers (2011) • Bruce is a Virginia resident and local subject matter expert

CUSTOMER SUCCESS TEAM	Customer Success Team	Lead Customer Support organization, resolving 75+% of requests same-day, and live-answering 99% of phone calls
DATA ENGINEERING TEAM	Data Engineering Team	- The Data Engineering team has successfully upgraded 325 Vision customers from legacy Vision systems to Vision 8 in the last two years - The Data Engineering team has successfully converted more than two dozen new Vision communities in the last two years

Jenifer Rukstela

Software Implementation Dept. Lead

Summary

Performance driven professional with progressive experience in technology project consulting, software implementation management and data conversion. Recognized for outstanding time management and communication skills with demonstrated success in organizing cross-functional resources to execute multi-phase projects within tight timelines while ensuring quality of output. Track record for meeting deliverable dates, budgets, and SLAs. Exceptional architecture instincts augmented from years of training and hands-on experience leading technical project implementations.

2021 – Present

Responsible for servant leadership and oversight of all CAMA and Tax software projects and processes. Successfully implemented of over 75 new client projects.

- Ongoing cross-department collaboration to orchestrate successful implementation projects that align with the Vision virtues
- Spearhead continuous improvement initiatives incorporating Lean Six Sigma tools and techniques to enrich project methodologies and align on-time delivery with quality to surpass customer expectations
- Promote a spirit of Kaizen to all project team members while guiding constructive conflict to eliminate waste and bottlenecks and celebrate the success of high-performing teams
- Develop, maintain, and promote living process documentation that evolves with the company and the Project Management Office
- Integrate Agile and Waterfall project management methodologies to support and guide team members throughout the project management lifecycle
- Manage the interdependence across projects and project teams and report both aggregate and detailed performance to relevant stakeholders
- Promote the ongoing growth and education of project team members and the PMO as a whole

Project Manager – Software Implementation

2009- 2021

Responsible for project management, data analysis, cost model calibration and consulting for software implementations for an innovative assessment platform provider. Project implementations include New England, VA, PA, CT, MA, NH, and ME.

- Engage with clients and internal teams to ensure that software implementation efforts are aligned with unique customer needs, project timelines, and budget expectations, while instituting project management methodologies to achieve high productivity and cost efficiency levels
- Establish standards, automated processes, and enhanced procedures to streamline data flow and communication across teams; actively develop approaches and frameworks to enhance data quality/integrity and tune SQL queries

Appraisal I & Appraisal II

Evaluating Residential Construction

IAAO Standards of Professional Practice and Ethics

IAAO Fundamentals of Real Property Appraisal

IAAO Income Approach to Value USPAP

- Facilitate virtual working sessions to obtain input from multi-disciplinary teams consisting of developers and end-users to define data requirements and document application structures
 - Evaluate implementation requests including performing scope reviews, gathering business requirements, understanding future state design, and build activity analysis
 - Structure governance processes for implementation architecture, oversight and engagement; create a disciplined project management environment based on speed of decision-making and project visibility
 - Improve the planning, prioritization and execution of work streams and identify project bottlenecks
- Selected Projects:
- Fast-tracked a client full implementation and revaluation project from 18 months to 6 months; oversaw data conversion and then led all aspects of project including managing data collectors, field reviews, sales analysis and valuation, testing, and launch
 - Assigned to turnaround a complex trouble project operating in an unstable environment; developed a project plan to meet clients go-live date and executed all tactical elements of project including conversion, interface development, and training

Project Manager - Appraisal **2006 - 2009**

Managed various phases of projects including conducting current state assessments, gathering requirements, definitions and functional specifications, documentation, statistical reporting, calendar management, and timelines.

- Partnered with cross-functional resources to understand, implement and manage project life cycles; led project status updates, ensured meeting actions were documented and delivered projects on-time, on budget, and within scope
- Oversaw quality assurance, feasibility studies and release schedules while using project management techniques to improve planning, prioritization, and the tactical execution
- Directed multiple project requests simultaneously and prioritize based on business and client needs; ensured lines of communication remained open, objectives were clearly communication, and deadlines were met

Town of Manchester, Manchester, CT

Assistant Assessor **2003 - 2005**

Reviewed and determined tax assessments for property utilizing market, cost and comparable sales data.

- Investigates and reviews real property assessment challenges at the administrative and judicial stage

Jenifer Rukstela

Software Implementation Dept. Lead

- Gathered real property and data from various sources, including field data, property owners, contractors, protest applications, trade journals, income and expense reports, and market sales and listings
- Investigated, advised and explained the contents of deeds, mortgages, leases, surveys, and other related documents
- Interpreted maps, surveys, building plans, and construction

Leshar Glendinning Municipal Services, East Haven, CT

Senior Appraiser

2001 - 2003

Appraisal of residential properties and data verification of commercial and residential employees. Assisted with training of colleagues in data collection and valuation techniques.

CLT, Tolland, CT

Data Collection Supervisor

2000 - 2001

Supervised residential data collection, data entry, and performed quality control. Assisted with residential valuation review. Enter orders and returns as needed

Professional Experience

Vision Government Solutions, Hudson, MA

Director of Product

2020 – Present

Responsible for oversight, direction, and feature functionality enhancements of Vision CAMA platform. Oversee the content and direction of the release cycle of all CAMA product modules. Coordinate with Sales, Appraisal, Implementation, and Engineering to create and maintain Vision CAMA roadmap and strategy. Support sales and project teams with subject matter expertise.

Product Manager

2016 - 2020

Responsible for entire release cycle of all VGSI products. Coordinate with Sales, Appraisal, Implementation, and Engineering to create and maintain VGSI CAMA roadmap.

Manager of Value Approximation/Product

2008 – 2016

Responsibility includes the oversight and direction of special valuation projects within the company. These projects include major conversion projects such as the New York City Implementation project. Also assist with the testing and development of new software initiatives. Other duties include high level valuation assistance to appraisal staff on complex appraisal assignments.

Vice President of Appraisal Operations

2000 - 2007

Duties include oversight and organization of all projects and personnel within the appraisal department. The department consists of over 100 staff members completing 60+ assessment projects per year. Interface directly with municipal officials to negotiate terms and requirements of assessment projects. Interview, hire, train, evaluate and motivate staff.

Western New England Operations Manager

1990 - 2000

Responsible for directing a staff of 25 and overseeing all projects and operations within the Western New England District. Monitor quality standards; conduct taxpayer informal appeals as well as defense of values at ATB and Superior Court.

Senior Appraisal/Project Supervisor

1987 - 1990

Charged with overall project management, review of appraisal values and determination of final Residential, Commercial, and Industrial property values for municipal tax purposes.

Residential Staff Review Appraiser

1982 - 1987

Performed Residential Review Appraisal functions and Commercial/Industrial Data Collection functions in several New England communities. Also performed personal property appraisals in 12 New England communities.

Certifications

Massachusetts General Certified
Appraiser License #2497

Boulder, CO
2014 - 2018

Catherine L. Courtney

Implementation Architect / Team Lead

Professional Experience

Vision Government Solutions, Hudson, MA

Implementation Architect / Team Lead January 2022 – Present

- Integrate agile and waterfall project management methodologies to achieve industry-leading project delivery schedules while maintaining ongoing customer engagement and satisfaction
- Successfully manage scope, schedule, cost, quality, risk, resources, and customer satisfaction constraints of the project through servant leadership
- Synchronize project teams with customer expectations to deliver high-quality CAMA software that aligns with unique client configuration and data requirements
- Encourage active client participation throughout the project to accurately capture client visions and acceptance criteria for interim and final deliverables
- Quickly adapt to varying communication and emotional intelligence needs of stakeholders and project team members to provide exceptional communication throughout the project lifecycle
- Seamlessly welcome new clients into the Vision Family while fostering positive client-partnership experiences and building long-term relationships
- Represent the needs of customers and stakeholders in product and development conversations
- Facilitate a smooth transition from project to operations post-go-live

SS&C Eze, Boston, MA

Senior Solutions Analyst September 2021 – December 2021

- Act as the point person for high priority client projects and manage open items for multiple Top 50 revenue clients
- Oversee queue of incoming client requests, inquiries, and incidents from over 100 investment firms to ensure timely and accurate responses and balanced workload across my team of ten
- Serve as an internal and external escalation point for high impact and high urgency incidents within the Order Management System (OMS) and integrated platforms
- Mentor five team members through bi-weekly one on one meetings to assist with workload and identify development areas.
- Conduct interviews for open Associate Solution Analyst positions and assist with hiring decisions

Catherine L. Courtney

Implementation Architect / Team Lead

Solutions Analyst

October 2020 – September 2021

- Perform Team Lead duties including running team meetings, managing shift schedules, and attending organization wide meetings as a representative from Solutions team
- Coach new hires through training sessions, phone call supervision, and daily casework assistance
- Plan and coordinate process improvements for more effective cross-team collaboration and project hand-offs
- Run full-day immersion meetings for strategic clients when onboarding key stakeholder users to simulate an on-site presence
- Exemplify positivity and accountability through team building opportunities and promotion of process initiatives

Associate Solutions Analyst

June 2018 – October 2020

- Developed fundamental OMS knowledge and excelled in specialized product areas of Analytics, Modeling, and Market Data
- Built strong client relationships with excellent communication skills, timely follow through, and the ability to match tone and empathize with clients
- Demonstrated critical thinking and time management skills by balancing multiple daily inquiries with longer projects for a wide range of product areas
- Served as a representative between the US and Hyderabad Solutions teams to help improve global communication and enhance client experience for firms that trade globally

Education

College of the Holy Cross
*Bachelor of Arts with College Honors in
Political Science*
Worcester, MA
May 2020

Summary

A tenacious and trustworthy professional with technical experience in event planning, customer service, and time management. Noted for interpersonal skills amongst both coworkers and clients. Demonstrates a keen ability to balance and complete various projects without compromising the integrity of any one project. Overall, a history of research, analytics, and writing has sharpened all professional skills, which are imbued in every project undertaken.

Vision Government Solutions, Hudson, MA

Project Manager

March 2021 – Present

- Focuses on delivering stellar customer service to each client-partner as a part of the Software Project Management team.
- Provides clients with templated project plans and support resources to both keep the partner informed and have them be an active role on the project.
- Aids in customer satisfaction by taking the customer's viewpoint at every stage of the software implementation
- Coordinates post-implementation check-ins to ensure ongoing client success
- Creates and revises project plans for each upgrade, including managing contact information, scope items, exceptions, and clarifications, and more
- Proactively checks in with internal teams to ensure actions are not blocked or delayed and that the client's questions are being answered in a timely manner
- Communicates with clients regularly and responds to them swiftly in order to provide partners with transparency throughout the entire installation
- Sends along "Surprise and Delight" resources to celebrate completing stages of the project

Revere Parks and Recreation Department, Revere, MA

Event Management Associate

June 2013 – September 2020

- Acted as a liaison between the parks and the office planning and running events for the City of Revere, including National Night Out, The International Revere Sand Sculpting Festival, and Community BBQs
- Directed team workers and oversaw assignments while working alongside the team for every event
- Communicated relevant marketing and communications data in a timely and effective manner to ensure positive turnouts at events

Revere Fire Department, Revere, MA

Intern

2020

- Shadowed the Revere Fire Chief and his staff as a part of Holy Cross' Academic Internship Program
- Helped in the firehouse converting printed calling cards into an electronic format
- Used basic mapping software to create sketches of Revere's City Hall for the installment of fire detectors

Emily Teagle

Implementation Specialist

Professional Experience

Vision Government Solutions, Hudson, MA

Implementation Specialist

August 2021 – Present

Responsible for data mapping, data mining, and data analysis while also building out custom valuation processes. Sample duties include:

- Efficiently and effectively perform analytics and testing for multiple simultaneous software implementation projects
- Craft custom data mapping & valuation models for assigned new CAMA implementations in New England and national markets, including client-specific data mapping, table configuration, cost modeling, statistical analysis, and advanced valuation consulting services
- Draft specifications for unique project components, including imports, exports, and custom reports
- Conduct beta conversion validation and client-facing review sessions
- Synchronize project team members with customer expectations for optimal client deliveries
- Consulting with the Product team to define critical Vision CAMA product enhancements and gaps for new state entry
- Create custom client analytical dashboards
- Employ agile methodologies to achieve industry-leading project delivery schedules while maintaining ongoing customer engagement and excitement

King William County, King William, VA

Senior Fiscal Specialist

February 2019 – August 2021

- Responsible for processing debt service payments for both the County and County Public Schools; prepared adjustment entries for debt service; ensured timely payment of P&I for County and School Division loan payments
- Processed state and local sales tax to the schools and tracked transfers to ensure compliance with appropriated budget
- Tracked and charged out billings for insurance premiums, fixed charges, and information technology services
- Prepared and processed monthly, quarterly, and year-end tax, financial, and operating reports or payments as required
- Assisted and provided detailed financial information to the auditors and Director of Financial Services
- Assisted the Director of Financial Services and County Administrator with the budget development process
- Monitored and engaged in day-to-day activities for accounts receivable, payroll, and accounts payable
- Prepared and analyzed accounting financial reports and reviews for accuracy
- Drafted financial documents, such as budgets and State reports

Emily Teagle

Implementation Specialist

- Participated in audits and played an integral part in developing the Comprehensive Annual Financial Report (CAFR)
- Prepared, entered, and posted adjusting entries to the ledger under GAAP requirements
- Coordinated with the County Administrator and Finance Director to develop and monitor project scope, schedules, and budgets
- Served as the project manager for appraisal and ERP software implementations
- Served as the project manager for high-level County projects for multiple departments
- Coordinated procurement for special projects, including writing RFPs/IFBs, evaluating bids, coordinating meetings with vendors, awarding projects to the bidder
- Worked closely with Finance Department concerning budget and finance activities related to special projects (i.e., purchase orders, invoices, credit checks, payments, etc.)
- Provided County Administrator and Finance Director reports from the AIS system as needed
- Maintained records on all special projects as part of records retention and FOIA

King William County, King William, VA

Deputy Commissioner of Revenue **January 2017 – February 2019**

Administered state and local laws to assess various property types (personal property, business personal property, real estate, and business licenses); maintained personal property and real estate records; researched and updated maps and land parcel information; reviewed and processed state income tax returns and estimated payments.

King and Queen County, King and Queen Courthouse, VA

Deputy Commissioner of Revenue **September 2015 – March 2016**

Reviewed real estate and personal property records; maintained the assessment of various taxes; processed DMV downloads; assisted with Elderly/Disabled/Veteran Credit applications and processing

King William County, King William, VA

Land Use Technician **September 2015 – March 2016**

Assisted with land use ordinance and applying for land use; utilized Legasuite and Bright systems to research land parcel information and enter land use information; reviewed and validated qualifying parcels.

Vision grants consent for the City of Richmond to contact the references for the purpose of evaluating and we acknowledge that information obtained will not be disclosed to Vision.

We currently have over 500 CAMA software clients across the country, with 64 of them located in the Commonwealth of Virginia.

We have provided a sample list of clients below with contact information, we are happy to provide additional contacts should you desire more.

Client Contact Information

City of Chesapeake, VA (100,000 parcels; client since 2013)

Greg Daniels, CAE, Real Estate Assessor

(757) 382-6756

gdaniels@cityofchesapeake.net

The City of Chesapeake, VA is Virginia's third largest city and has been utilizing Vision's CAMA platform since 2013. Vision is proud to share that Chesapeake chose to upgrade to *Vision 8* in 2019. Chesapeake has been an extremely strong partner with Vision and most recently was awarded the IAAO Certificate of Excellence in Assessment Administration in 2019. Vision and Chesapeake recently collaborate on our *Digital Future of Assessing* webinar series to highlight *Vision 8's* GIS functionality. Read more about Chesapeake's experience with Vision below:

*"Every Assessor hopes when they purchase a CAMA system that the vendor will meet their expectations such as a successful conversion and receive a product that works as advertised. My experience with Vision CAMA system has **exceeded my expectations**. We received a successful conversion and were able to go live ahead of schedule. The product works as promised and they continue exceeding expectations by releasing enhanced versions utilizing customer feedback. I have been in the assessment field for over 30 years and **working with Vision has been the best customer experience to date.**"*

Greg Daniels, CAE

Real Estate Assessor

City of Chesapeake, VA

Essex County, VA (10,057 parcels; client since 2019)

Thomas Blackwell, Commissioner of the Revenue

804-443-4737

tblackwell@essex-virginia.org

Essex County, Virginia was implemented in 2019 by the same Project Management team proposed for the City of Richmond. Vision is pleased to be partnering with Essex County's Commissioner of the Revenue on an upcoming IAAO presentation titled "DIY Database Decluttering."

City of Williamsburg, VA (4,628 parcels; client since 2019)

Derek Green, City Assessor

Office: (757) 220-6184

dgreen@williamsburgva.gov

"We signed our Vision 8 contract on January 15th and were live by May 31st. I don't know how much better you can get than that, it is my understanding it was the fastest Vision Virginia conversion. Our IT Director Mark Barham has been with the city for quite some time and the conversion from his perspective was the best he's ever been a part of. We both attribute that to excellent project management by Jen and a highly configurable platform.

This was actually my second legacy conversion to Vision lead by Jen Rukstela having also gone through this over in Gloucester County before I started as the Assessor here in Williamsburg and I can tell you that your team has really got this process down now. We had very few hiccups and Larry Ingram, the data engineer for our project was fantastic. You've really got a top-notch team over there, and I wouldn't hesitate to recommend this system to other folks here in Virginia who may be looking for something new."

Derek Green

City Assessor

City of Williamsburg, VA

New York City, NY (1.2 million parcels; client since 2007)

Howard Wong, Director of Property Assessment Technology

Office: (212) 291-2572

WongHoward@finance.nyc.gov

New York City has been utilizing Vision's CAMA platform for over 13 years for all of their assessing needs. Chosen for its ability to handle larger, more complex municipalities, Vision integrates with New York City's mobile provider, Data Cloud Solutions, to assess the million plus parcels that make up the city. NYC recently signed with Vision to upgrade to *Vision 8*, including a 5-year software maintenance agreement.

Washington, D.C (180,000 parcels; client since 2001)

Vladimir Jadrijevic, Director of Real Property

Phone: (202) 442-6784

vladimir.jadrijevic@dc.gov

Washington D.C. has been a Vision client for over 19 years, utilizing the Vision CAMA platform to assess properties within the Nation's capital. As Vladimir Jadrijevic noted, this partnership has recently helped Washington D.C. accomplish their goal of earning the IAAO Certificate of Excellence in Assessment Administration in 2019 by providing the "best technology out there and the best partners out there."

We invite you to read more about Washington D.C.'s partnership with Vision online at our website: www.vgsi.com/testimonials

District of Columbia Uses Vision CAMA to Achieve IAAO's CEAA

"We felt very strongly that the model we had designed within Vision and the flexibility of the tools at our disposal would fit the bill!"

Additional References

Vision is proud to support our user community, and we often partner with users on webinars, testimonials, and resources for the broader Assessing Community. We are happy to provide additional references from across Virginia should the City wish to speak to other Vision users.

Tab VII: Project Approach

Overview of Vision 8 CAMA

Vision is proposing our state-of-the-art Commercial-Off-the-Shelf *Vision CAMA* platform to be implemented for the City of Richmond. Vision CAMA is currently live and implemented in over 500 communities nationwide. Below is a detailed description of the *Vision CAMA* capabilities.

The Table Stakes:

- *Vision CAMA* is fully compliant with USPAP and IAAO standards
- *Vision CAMA* is compliant with all applicable Virginia statutes and regulations
- *Vision CAMA* includes any legislative or regulatory updates in Virginia as an included component of our annual support agreement at no additional cost
- *Vision CAMA* is a Microsoft SQL based platform and can be deployed on premise or cloud hosted through Vision, if preferable
- Vision CAMA is used by more than 450 communities across the United States, including the nation's capital (Washington, DC) and the largest city in the country (New York City)
- *Vision CAMA* includes robust Assessment Administration and Valuation capabilities, designed to cover the needs of both administrative users and appraisers

Here we have highlighted a few key themes of *Vision CAMA*, and have enclosed a detailed feature overview for additional information.

Accomplish Your Work Faster

Vision CAMA is designed to reduce the number of steps required at every step of the Assessment process. Highlights include:

- Enable each user to customize their pathway through the application by enabling users to build personal workflow dashboards to manage frequent tasks (e.g., exemptions)
- Improve taxpayer communication by sending and tracking mail merges using community-specific notice templates, while automatically associating the notice to the parcel's documents, updating reportable notice history, and tracking responses with delinquency flagging
- Democratize access to data with an easy-to-use reporting module designed to empower the entire user base
- Reduce the impact of data entry with the ability to mass update
- Track and manage appeals directly in the application
- Allocate and track visit assignments
- Reduce time to sketch parcels with pre-built stamps for difficult but commonly used shapes

- Expedite the time to create new parcels with the ability to copy over all details from a parent parcel as well as tools for subdivision creation & management
- Reduce data errors and lower the training threshold with the ability to hide, require, or display any screen or field for any user permission group
- Automatically import building permit data with the built-in building permit import tool
- Reduce the number of data entry errors at the point of entry using built-in data integrity checks

Provide Extraordinary Service to Taxpayers

We all serve the public. That's why *Vision CAMA* is enabled with features designed to support the ease and accessibility of taxpayers' interaction with the assessment process:

- Demonstrate valuation transparency with instantaneous valuation worksheets that show every calculation involved in valuing the land or building on any parcel
- Increase options to assess each parcel differently with the choice of a cost, market analysis, comparable sales, or trending assessment
- Answer taxpayer questions on the fly by using our configurable easy-access parcel data header bar
- Disseminate valuation information with a taxpayer website designed for accessibility and transparency, including:
 - Display of GIS maps, Property Record Cards, sketch, imagery, and parcel data to support valuation
 - Full configurability to display your community's seal, messaging, and associated online resources, including enabling and disabling any CAMA field
 - The ability for taxpayers to submit suggested data changes for their properties online
 - Suppression and non-disclosure flags for sensitive or protected taxpayers
- Never again wonder why a piece of data changed when a taxpayer asks about value. Capture every database change in the detailed parcel audit, including changes to valuation tables and sketch adjustments, and prompt users to input trackable and reportable 'reason for change' notes for any adjustments that affect value.
- Easily differentiate between improvements and adjustments with the track changes feature while completing data entry
- Allow for unlimited images to be captured for each parcel
- Configure multiple Property Record card templates directly through the application, enabling easy information dissemination for varying purposes, e.g.: field visit cards for internal use vs. 'Property 101' cards for taxpayer use; commercial vs. residential cards, etc.

Improve Valuation Accuracy and Precision

Vision's valuation tools are designed to enable expert appraiser's ultimate flexibility to use any method of valuation, supported with robust data and analysis. Highlights include:

- Precisely calibrate your valuation models and proactively manage data outliers through an unparalleled Sales Analysis module. This module is designed to enable valuation users to test IAAO-approved statistics such as COD, PRB, PRD, and dozens of others against a 'what if database'
- Support your values with a customizable comps algorithm that displays up to five comps that is designed to provide imagery, mapping, and comparable sales data unique to your community
- Ensure no sales are lost due to improvements during same year of sale with the comp sales "snapshot"
- Eliminate overrides with infinitely customizable tables and cost models, including dozens of fields that can drive value factors specific to your community (ex: by body of water)
- Empower leadership and appraisal teams to make table and cost model updates through the User Interface without custom development
- Handle commercial valuation with ease using a detailed income module to capture and analyze both actual and market income data for commercial properties
- Easily manage condo valuation with our specialized condo valuation tools
- Improve strategies for collecting new sale information with unlimited owners associated with a parcel and a screen to view all previous owners of a parcel
- Ensure no outbuildings are improperly valued with the table-driven outbuilding screen
- Never again worry about parcels being deleted with parcels not being used set to inactive rather than being deleted forever

Achieve Dramatic Efficiencies with Desktop Review

Vision CAMA is specifically designed to reduce the burden of site visits by maximizing impact from the desktop, with a User Interface that combines:

- A GIS-first user experience that is bidirectionally integrated with CAMA data as well as the report writer module and Sales Analysis tool
- Aerial and street-level imagery such as EagleView
- Integration with geolocated services such as Google Maps, local GIS services, etc.
- Associated documents, such as deeds, notices, floorplans, income & expense data, etc.
- Sketch information
- Building and land photos stored in the application which are taken from a mobile device
- Parcel data from CAMA
- Use of dashboards to combine different screen for easier data entry

Integration with Other Software Products

Vision CAMA is more than a CAMA platform; it's an entry point into the constellation of technology-enabled valuation applications. *Vision CAMA* natively integrates with ArcGIS, Aerial imagery such as EagleView, Google Maps, Microsoft Word, Microsoft Excel/PowerPoint, building permit software, and, of course, your tax administration, billing, and collections software. Vision also has a strong partnership with Data Cloud Solutions, our mobile field data collection platform.

Mobile Module Overview (Recommended Module)

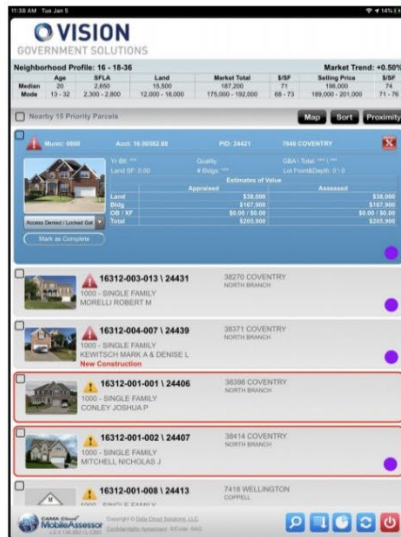

Vision is proud to offer (as a recommended feature) a field data collection platform in collaboration with our partner, Data Cloud Solutions, LLC (a Woolpert Company). This module is a field optimized platform designed to drive efficiencies for appraisers in the field and supervisors workflow direction in the office. Fully integrated for use with *Vision CAMA* to eliminate dual data entry for by your field appraisal staff.

The Data Cloud MobileAssessor Module works in conjunction with *Vision CAMA* to provide jurisdictions, as large as New York City (1.2 million parcels), and many dozens of others throughout the nation true mobility. MobileAssessor is the most widely used mobile app in the mass appraisal industry, with 5,000 users in over 200 counties in 28 states.

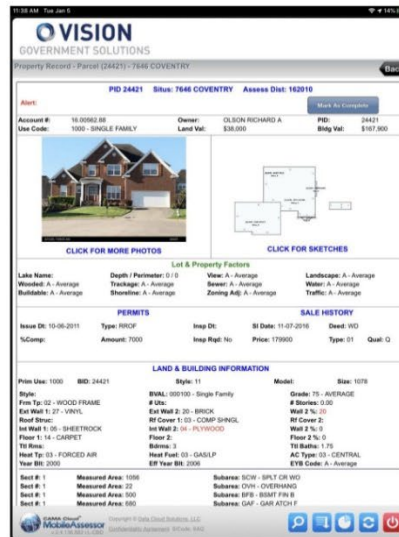

The mobile platform includes MobileAssessor for field data collection and the web-based Administrative Console for managing the field appraisal workflow; assigning work, quality control, reporting, historical and live field location tracking, and full integration with *Vision CAMA* systems.

MobileAssessor completely eliminates the need for paper and duplicate data entry. While in the field, appraisers greatly increase productivity by taking advantage of time-saving features like optimized routing (parcels sorted by the most optimized route), instant photo association, touch screen sketching, and configurable property record cards.

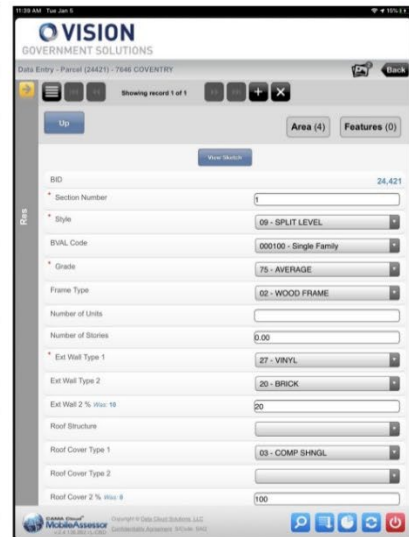

We have highlighted a few of the key features that have helped MobileAssessor / *Vision* clients to increase productivity by 300-600% below:

Parcels Sort List

Digital & Interactive PRC

Data Entry Screen

Optimized Routing

Parcels are sorted based on the most optimized route between the appraiser and the next parcel on the worklist. Once your parcels are sorted/routed, the appraiser may utilize in-app integrations such as Google Maps for turn by turn text directions as well as a full GPS voice-guided navigation experience via Sygic Navigation. This process increases your productivity through travel efficiency gains and reduces expenses related to mileage and fuel.

Instant Photo Association

Manual association of photos is one of the most time-consuming processes for many assessment offices. With MobileAssessor, the need to manually associate photos is completely eliminated. When a photo is taken in MobileAssessor, the date, time, and parcel number are added to the photo's footer and the photo is automatically associated to the correct parcel / extension within the CAMA system. The photo is also available within the live QC module at the desktop within 3 seconds to 3 minutes depending on the cellular connection.

"MobileAssessor allowed us to re-photograph all our properties in less than 3 months last year. It has also streamlined our sale inspection and building permit processes with its routing capabilities and by removing paper property record cards and the need to re-enter field data directly into our CAMA. We are just scratching the surface of what this tool can do for our office but we believe it's the future of property data collection and its allowing the appraisers who are their own data collectors to do more than ever."

*Justin Kuzmich
Real Estate Assessor
City of Salem, VA*

Touch Screen Sketching

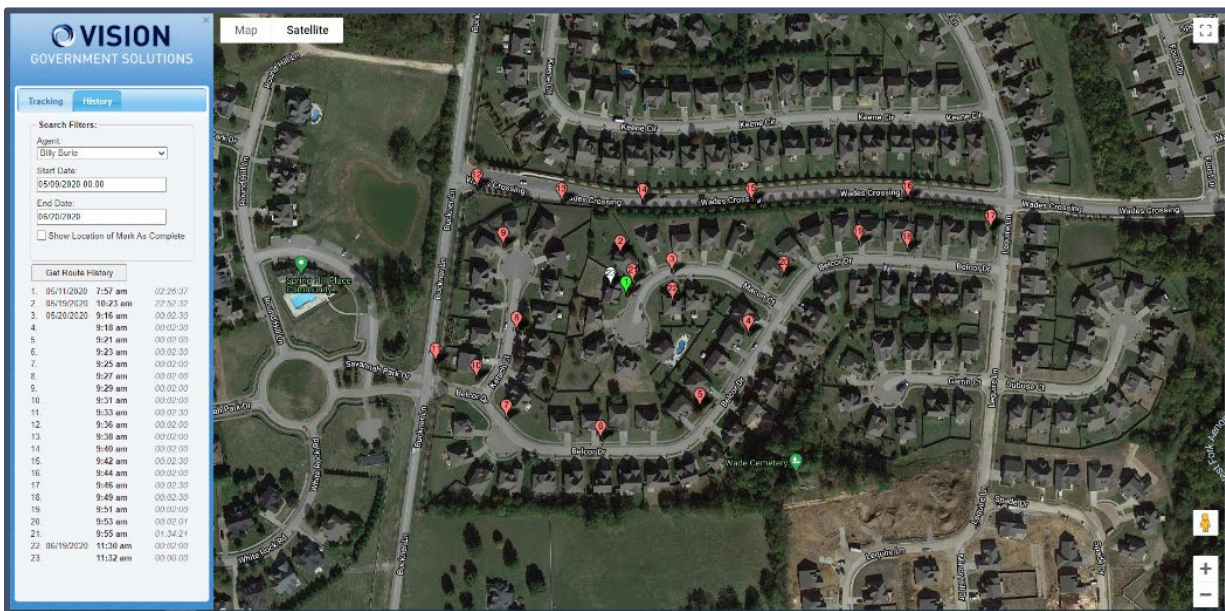

MobileAssessor's touch screen sketching is easy to use and much quicker than traditional sketching methods. From the mobile device the appraiser is able to drag, resize, delete, and add points, line segments, additions, and create new polygons -- no stylus is needed. Area and angles (rise/run) are automatically calculated; the appraiser just simply needs to know the wall/line measurements. Additionally, the sketch segments automatically "close", which not only is great for data integrity, but also assists immensely with the sketching of complicated structures.

The Administrative Console

The Administrative Console is part of the base MobileAssessor offering. This module is browser based and includes Appraisal Task Control, Quality Control, Field Tracking, Configuration Settings, and Reporting. Supervisors appreciate the ease of assigning work, real-time quality control, historical and live field location tracking, and the productivity dashboard and reports.

The screenshot displays the '38343 COVENTRY' property page in the MobileAssessor Administrative Console. The interface includes a top navigation bar with buttons like 'Set As Not Reviewed', 'Reject', 'Previous Parcel', and 'Next Parcel'. A sidebar on the left contains search and filter options. The main content area is divided into sections for 'Parcel Information', 'Land & Building Information', and 'Value Summary'. The 'Land & Building Information' section is active, showing various dropdown menus for property details such as 'Style', 'BVAL Code', 'Grade', 'Frame Type', 'Roof Structure', 'Roof Cover Type', 'Int Wall Type', 'Floor', and 'Floor 2%'. A 'Value Summary' table on the right shows the 'Initial Value' as '75 - AVERAGE' and the 'New Value' as '65 - FAIR'.

MobileAssessor – The Administrative Console

MobileAssessor – The Administrative Console

Additional add-ons and modules are available and include advanced mapping and 3rd party GIS integration, sketch validation, comparable properties reporting, grade / class calculator, Disto laser sketching, multiple regression analysis, and desktop review.

Vision has included optional pricing for the mobile platform in our pricing proposal.

IPADS

IPAD PRO 11-INCH 64 GB CELLULAR + WI-FI OR IPAD AIR 10.5-INCH 64 GB CELLULAR + WI-FI

MobileAssessor does not use the iPad full storage capabilities; for purposes of using MobileAssessor all that is required is the lowest storage amount.

****More storage may be required if iPads are to be heavily used outside of Mobile Assessor, meaning: resource-heavy apps, apps which rely on GPS, document management apps, etc. (note: this is not recommended).*

IPAD CASES

If you are looking for cases that are the most water resistant, then it would be the LifeProof brand. If you want the most rugged, then the OtterBox brand is a better choice.

However, most of our users want something **with a shoulder strap and 360-degree hand strap/swivel**. Most cases with a swivel will have enough drop protection for anything that isn't gross negligence -- easily capable of surviving a ' drop, and a momentary puddle of water.

STYLUS

Styluses are optional and are based on user preference. We recommend that you buy a few for your staff to test out and the purchase more as needed.

Using a stylus is a user's preference and is most commonly used when using the sketch editor. No specific brand or type of stylus is needed, a simple stylus purchased from a gas station will function sufficiently.

GPS NAVIGATION APP

SYGIC

Sygic is a GPS navigation app available for free through the App Store. It is a turn-by-turn application that works online and offline, like MobileAssessor. Using Sygic reduces human error when navigating to properties, and is found to be the most up-to-date GPS application with construction updates. Sygic allows the user to open a property and launch navigation without having to input the street address.

Vision Web Portal for Taxpayers

Vision Government Solutions offers (as an option), an interactive, self-service web portal for taxpayers to view CAMA and GIS data online from the comfort of their own computers.

Many of our communities opt to use this feature to improve communication with the public and reduce the time burden of fielding inquiries within the office. This feature has become especially popular after the COVID-19 pandemic, as it enables communities to stay connected to taxpayers while reducing in-office foot traffic. It is also especially popular for communicating changes to values affiliated with a reassessment process. In fact, many Vision communities' change of value notices will direct taxpayers to the Vision Web Portal for further information.

The information on the web portal is brought over from CAMA on a frequency defined by the community. The web-portal is view-only so that taxpayers cannot edit any property data.

Below are a few highlights of the web portal:

- **Configure the Data to Fit Your Community Needs:** The Vision web portal offers the CAMA administrator the utmost flexibility to control what data appears publicly (ownership information, sales information, construction details, sketches, photos and more).
- **Updated Your Data Automatically:** The Vision Web Portal comes with an automated data loader, enabling each Community to set up its preferred cadence for data updates: "set it and forget it!"
- **Hide Sensitive Taxpayer Data:** *Vision CAMA* is fully configurable to suppress sensitive or non-disclosure taxpayer records from the public portal. Common examples include members of law enforcement.
- **Log-In and Paywall Options:** Your community can determine whether citizens are able to access the page publicly or whether a log-in is required (with an optional paywall for generating revenue for your community). 95% of our communities include free access to the portal, but some states do generate revenue by charging for access.

- **Property Data Designed for Transparency:** Our property data pages are configurable to include as much or as little information as your community would like to display. This can include ownership information, sale information, values, parcel data, extra features and outbuildings, entire Property Record Cards, sketches, and photos.

The Vision web portal is an optional service, which approximately 50% of Vision customers opt for. Vision does not charge a set-up fee for this service. We do charge an annual maintenance / hosting fee, which is outlined in our price proposal.

For customers who are uncertain about whether they would like to opt for the web portal, Vision can add this option as an optional service under an eventual Statement of Work.

- **Vision hosts client partnered webinars** on assessment best practices to provide additional resources for the assessment community. One example webinar was on "Staying Connected to Taxpayers During Social Distancing", where Justin Kuzmich, Real Estate Director of Salem City, VA, Derek Green, City Assessor of Williamsburg, VA and Colleen Healy, Chair, Board of Assessors of City of Quincy, MA shared how they are effectively engaging with taxpayers.

COMMUNICATION

**Staying Connected to Taxpayers
During Social Distancing**

Date: 4/13/20 | Time: 11:00am

In a world where we're working from home or our offices are closed to the public, how can we continue to effectively engage with taxpayers?

Session Panelists:

Justin Kuzmich
Real Estate Director, City of Salem, VA

Derek Green
City Assessor, City of Williamsburg, VA

Colleen Healy
Chair, Board of Assessors, City of Quincy, MA

Vision CAMA – Feature Details

Vision CAMA is a full-featured CAMA platform in use by more than 430 communities across the United States, counting as small as 250 parcels and as large as 1.2 million parcels.

Our deep investment in *Vision CAMA* is demonstrated by the level of satisfaction reported by our users, a few highlights of which are enclosed in this proposal.

Below, we share a brief review of some critical *Vision CAMA* features. We would be grateful for the opportunity to demonstrate these features and more in a demo with your team.

- **Working the Way You Want to Work: Flexibility and Configurability**

- *Example Feature: The Administrative Module*
- *Example Feature: My Screen Dashboards*
- *Example Feature: Getting Data into the System Quickly: Sample Building Permit Import*

- **Capturing an Accurate Property Database**

- *Example Feature: Parcel Information and Property Records*
- *Example Feature: Ownership Information*
- *Example Feature: Utilities for Parcel Administration*
- *Example Feature: Sketching Capabilities*
- *Example Feature: Document and Image Management*
- *Example Feature: Capturing and Maintaining Historical and Future Year Data*

- **Generating Insights from the Data (Desktop Review):**

- *Example Feature: GIS Integration*
- *Example Feature: Aerial Imagery Integration*
- *Example Feature: Visit Management*
- *Example Feature: Report Writing*

- **Accurately Valuing Properties:**

- *Example Feature: IAAO Approaches to Value (Cost, Market, Income, Trending, etc.)*
- *Example Feature: Exemptions and Value Reductions*
- *Example Feature: Table Maintenance and Cost Modeling*
- *Example Feature: Statistical Analysis and "What If" Tools ("Sales Analysis")*

"I've always said Vision is the Cadillac of CAMA systems."

Assessor
Millis, MA

- **Communicating with the Public and Defending Values:**

- *Example Feature: Valuation Worksheets for Land & Building Valuation*
- *Example Feature: Comparable Sales*
- *Example Feature: Property Record Card Editing*
- *Example Feature: Mail Merges and Correspondence Management*
- *Example Feature: Vision Web Portal*
- *Example Feature: The Appeals Module*

“From the technology perspective, we felt very strongly that the model we had designed within Vision and the flexibility of the tools at our disposal would fit the bill.

Demonstrating how we use the Vision 8 platform with features like GIS and Pictometry to deliver accurate assessments was a vital component in meeting the international standards set by the IAAO. By completing this challenge, we were able to receive validation from an independent source on what we were doing right, as well as identify certain areas of our business practices that we can improve on in the future.

It’s been very helpful in allowing us to create a road map for future improvements that may include additional technology like the mobile solution offered by Vision through their partnership with Data Cloud Solutions.”

*Chief Appraiser for the Office of Tax and Revenue’s Real Property Tax Administration
District of Columbia*

Working the Way You Want to Work: Flexibility and Configurability

Configurability and flexibility are at the core of Vision CAMA. Vision users love that they can customize the look and feel of the application through the User Interface, without having to wait or pay for costly and risky custom software development.

With the built-in and user-friendly Admin Module, the power of configuration is put into the hands of users, who can configure nearly any component of the application, including screen order, screen layout, field names, data types, tool tips, and much more.

Not only does this enable users to **work the way they want to work**, but it also **dramatically reduces our project implementation and support time**. It also enables each customer to benefit from system enhancements made for every other Vision customer, while still deploying personalized software configurations unique to each community.

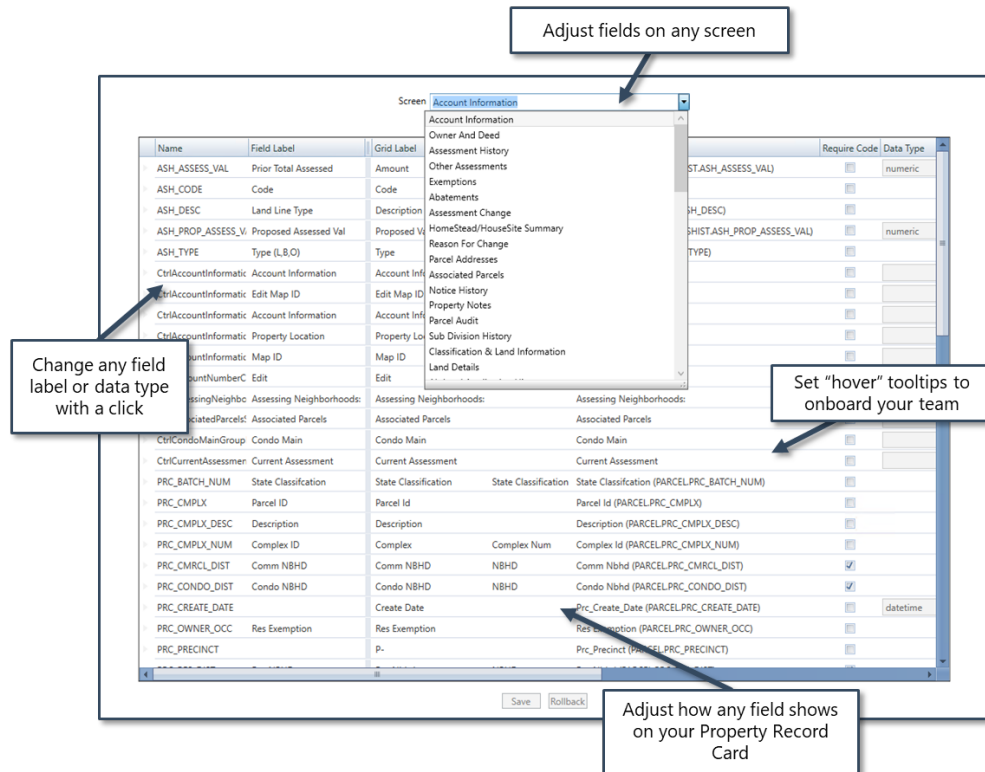

To illustrate the configurability of Vision, we have selected a few feature highlights below:

- **See What You Want, Hide What You Don't:** Reduce data entry mistakes and onboarding time for new team members by hiding, enabling, or disabling any field or screen for various user permission groups

The screenshot displays the 'Point and Click Screen Editor' interface. At the top, there are dropdown menus for 'Group From' (set to 'Administrator') and 'To' (set to 'Administrator'), with a 'Copy' button. Below these are checkboxes for 'Hide this Screen', 'Read Only', and 'Copy All'. The main area shows a form titled 'Account Information' with various fields like 'Map ID', 'Account #', 'Unit', 'Pre Direction', 'Post Direction', 'Property Location', 'City/County/Zip', 'Owner Name', 'Building Name', 'Tax Map #', 'Cross Street 1', and 'Cross Street 2'. There are also checkboxes for 'Edit Map ID', 'Res Exemption', 'Requires Field Review', and 'Value Unfrozen'. On the right side, there are dropdowns for 'Parcel Status', 'Legal Area', 'Primary Use', 'Record ID', and 'Sub-Municipality'. At the bottom, there are sections for 'Assessing Neighborhoods' (Res NBHD, Non-Tax Code, Comm NBHD, State Classification, Condo NBHD) and 'Current Assessment' (Condo Main, Parcel ID, Description, Complex ID, Associated Parcels, Associated Parcel ID, Associated %). A legend at the bottom indicates 'Control Keys' with 'Disabled' (grey), 'Hidden' (red), and 'Required' (blue). Three callout boxes with arrows point to specific features: 'Set and maintain permission groups' points to the 'To' dropdown; 'Adjust any screen in the application' points to the 'Screen' dropdown; and 'Hide, Disable, Enable, or Require Fields with "Point and Click"' points to the 'Requires Field Review' checkbox.

Point and Click Screen Editor

- **Work in Your Language:** Use your community's language by renaming any field and adjusting picklist values

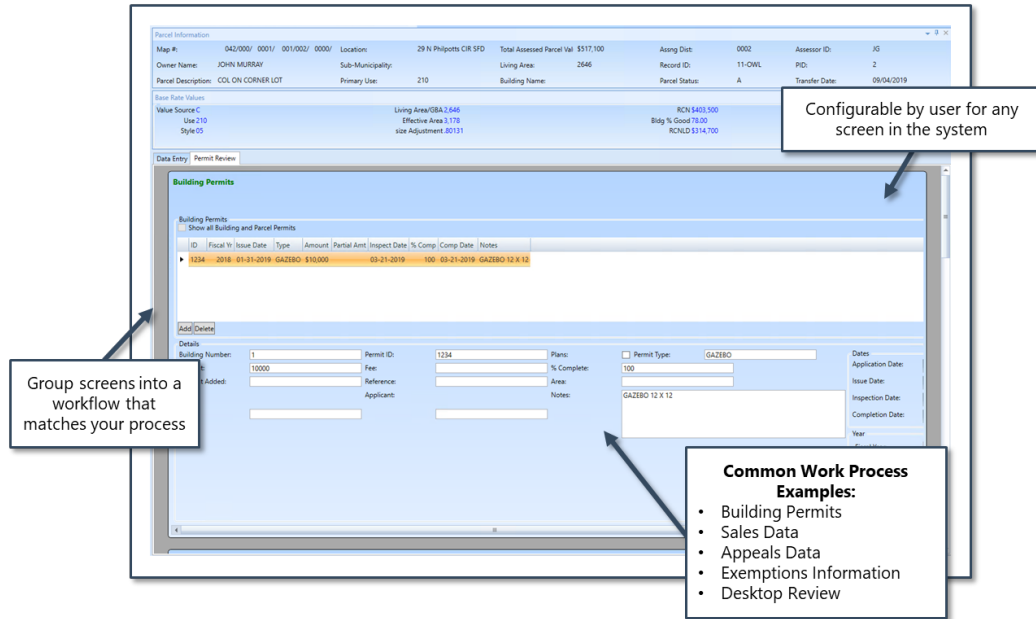

The Power to Modify Any Field is in Your Hands

- **Reduce Data Entry Errors** with data entry 'bumper lanes' such as required fields, spellcheck, picklist configuration, min/max warnings, positive/negative checks, etc. Each of these are configured to your community.
- **Improve Your Workflow Efficiency:** Create customizable user-specific User Panels to enable users to work the way they want (ex: building permit review) and decrease data entry time by tabbing through each field

"The Vision software is very user friendly. A great software database"

*Assessor
Bristol, CT*

Configure Personalized Work Processes

In addition, parcels can be assigned to individual Appraisers, who can then run reports of “work lists” to identify parcels in their jurisdiction that need to be inspected. The Appraiser ID can be assigned globally via Mass Update or manually one parcel at a time. When a new appraiser is assigned to a parcel, the prior appraiser can be captured as historical data.

- **Reduce Onboarding Time** with customizable ‘tool-tips’ to guide users through the application
- **Build Your Taxpayer’s Experience** with a customizable website, Property Record Card Editor, comparable sales snapshot, and more (additional details below)
- **Enable Your Valuation Approach:** Choose the valuation factors specific to your approach to value (for example, names of specific water bodies) and apply those factors with fine-tuned precision (ex: traffic adjustment to adjust value upwards for commercial properties and downward for residential). Additional details on valuation flexibility are included below.
- **Add Data into the System Quickly and Efficiently:** Use our Standard Building Permit Import or create an import unique to your community to enter data in a systemized and automated way.

Parcel Information: Property Records, Attributes, and Classifications

The flexibility of *Vision CAMA* enables each municipality to define the property attributes it wishes to capture. Each database is unique, which is why during the conversion phase we partner with each municipality to determine where their legacy data would best fit in *Vision*. We then move data attributes from the legacy system into the applicable fields in *Vision CAMA*.

Vision is highly configurable, and after the detailed data mapping and conversion, each community can use the Administrative Module to expose additional fields to capture information that was not available in the legacy system. Users are also able to suppress any fields or attributes that are not applicable to the municipality. Those attributes can also be repurposed and configured to meet any additional needs of the community. The property attributes can be tied to a model with value, or they can be used for descriptive purposes only.

Vision provides a natural logic for capturing land, building, and income information about any property. This includes, among many other pieces of information:

- Building Information such as style, model, grade, and dozens of other customizable fields
- Building Permits, including type, percent complete, and application / inspection date
- Land Line Information, including property factors such as utility access, waterfront access, etc., all of which can be used to drive value. Unlimited land lines can be associated with any parcel, and each land line can host unlimited “current use” codes and calculations, which are table-driven. The calculation can be a flat dollar amount or a % of assessed value for the land area that the “Current Use” is tied to.
- Robust Assessment Administration tools, including unlimited property transfer information, mailing address data, current and previous assessment information, depreciation schedules and an electronic tax roll export

City of Chesapeake, Virginia Uses Vision CAMA to Achieve the IAAO CEAA

"Vision helped us achieve the CEAA by providing features such as Mass Update, Appeal Tracking, Mailer History and Income & Expense request tracking."

"Our Vision CAMA solution helped us achieve the CEAA by providing features such as Mass Update, Appeal Tracking, Mailer History and Income & Expense request tracking. We utilized the real-time GIS and Report features to assure our data was accurate. By utilizing the features of the Vision CAMA solution, we were able to assure accurate and equitable assessments."

Assessor, City of Chesapeake, VA

Ownership Information

"I chose Vision because I'm a very visual person. I liked the way that the system is designed and look forward to using it. I also like the people!"

*Chief Assessor
Huntingdon County, PA*

The Vision Owner and Deed module allows users to manually enter Sales or import them through a sales import. Like all modules in the application, the fields on this screen are configurable and any field can be hidden or repurposed to better suit the data being captured field.

The system allows for unlimited owners to be associated to any parcel, capturing the owner(s) and corresponding mailing address for each owner as well as % ownership. Owners can be assigned more than one mailing address, a Primary and Secondary, which works well for citizens that spend part of the year at one address and relocate for part of the year to another address. The Owner Maintenance console allows users to

associate one owner with many parcels (if desired), allowing users to update critical contact information such as addresses, in a single place.

The Multi Parcel Sale Manager tool will batch insert a sales line on selected parcels allowing the user to allocate the sales price on each parcel. When new sales are added or inserted the application will retain the prior transaction, allowing the users to maintain a "Chain of Title" in Vision CAMA.

Utilities for Parcel Administration

Vision CAMA includes several built-in utilities designed to enable parcel administration. These include:

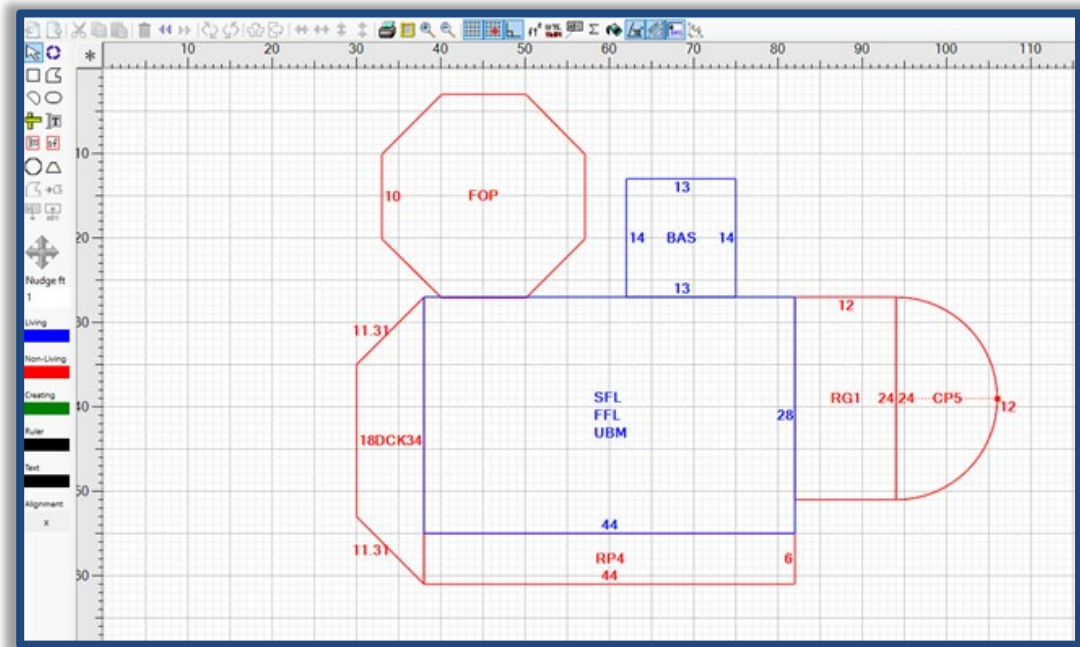

- **Create Vacant Parcels** allows the users to create parcels quickly and easily in batch for subdivisions/condo complexes etc. The parcel's genealogy is then recorded on the "Subdivision History Screen".
- **Copy Parcels** allows the users to copy user selected data from one parcel to others, this is a great timesaver for subdivisions and condos.
- **Move Buildings** is a great utility for when a parcel is merged with another or when a parcel is split and the existing building is moved to another parcel. Move building will move the building from current parcel to desired parcel.
- **Copy Exemptions** allows the users to roll the personal exemptions forward from one year to the next without having to manually key the exemptions in each year.
- **Make all Future Parcels Active** creating future parcels allows the user to work in the current year database creating parcels for a future year. All future year parcels can be made active at appropriate times using the utility "Make all future parcels active".
- **Save Assessment History** creates a snapshot of land, building and total values with a Save assessment history. These saves can be your interim values or your final values. Vision has a built-in utility to delete the unwanted saves.
- **Mass Update** allows users with the proper credentials to update parcels in batch. The user defines the parcels to mass update via a query or selecting the parcels on the GIS Map. Users can insert/update property notes, notice history, and visit history. Users with advanced mass update credentials can change value related fields in batch (example: Users can select a group of parcels on the GIS map and change neighborhood, or change the condition codes) in the database
- Generate mailing labels
- *And much more...*

Sketching Capabilities

Vision 8's native sketch module is widely considered to be the best in the industry and is specially designed to reduce sketch time and improve valuation accuracy. Vision Sketch is a mouse-driven application, allowing the user to easily draw the footprint of any building. Vision sketch drives value through square footage and designated subareas, which are correlated to configurable values in the underlying Vision tables. Numerous sketch features are included natively, such as shape splitting, rotation, easy-polygon tools, octagon and bay window stamps, nudge, labeling, export, and much more. Below are a few highlights:

- **Quickly Draw Any Building:** Quickly draw complex polygons, toggling between right angles or all angle types, while displaying the degree of any angle while drawing. Toggle to use whole numbers or inch increments when drawing dimensions.

- **Add Additions with a Click:** Add rectangular or arc-based additions with a simple click, affiliating new square footage to a designated subarea.
- **Built-In Stamps for Difficult-to-Draw Structures:** Use easily configurable stamps to easily sketch difficult-to-draw shapes such as octagons and trapezoids (e.g., gazebos and bay windows).
- **Modify Shapes Easily;** Modify entire sides of a shape or segments of a line, or split shapes with a click.
- **Repeat Sketches with a Click:** Easily flip or rotate buildings or sections to accommodate repetitive properties like condo complexes or apartment buildings. Copy or export sketches from parcel to parcel, to provide a template for each new sketch, in .xml or .jpg format. Copy sections of a sketch within a parcel to repeat.
- **Easily Add or Subtract Square Footage:** Manually enter square footage of an area without sketching the footprint, while still assigning the use of the area for proper valuation. Easily subtract square footage for difficult-to-sketch areas such as atriums.
- **Unlimited building sketches on a parcel,** especially valuable for complex commercial properties or large agricultural properties with multiple outbuildings (ex: barns or siloes)
- **Effectively Label the Sketch for Easy Viewing:** Add labels, choose the size and color of font for area codes and text, and detach labels from the sketch for easy viewing.
- **Easily correct errors** with the undo tool
- **Display the distance** between two points with the ruler tool (e.g., between a detached garage and a main building), reducing your time within the sketch by not having to calculate square footage.

Mouse-Driven Sketch with Built-In Efficiency Tools

Document and Image Management

Vision CAMA provides a robust document and photo management system. Vision offers users the ability to associate any type of electronic document with a parcel or an owner. Documents can be saved either to the Vision database or to a linked file share on the server. Sensitive documents can be set to "Private," such that only users with access rights to view private documents have read access. Vision supports unlimited file attachments, including documents such as scanned deeds, Word documents, sent notices, copies of email correspondence, still photos, and movie / video files.

Vision also offers a Mail Merge tool, which allows users to batch associate completed mail merge documents to each parcel.

Example Associated Documents

Vision also provides built-in tools to store images taken in the field, including a built-in photo viewer which has panning and zooming capabilities.

In addition to images of the parcel, Vision can also bring the parcel to you by leveraging many of the commercially available imagery viewing products from Google Maps (aerial and street level imagery), Microsoft Bing, and EagleView / Pictometry. Additional information on the application of these tools to Desktop Review is provided below.

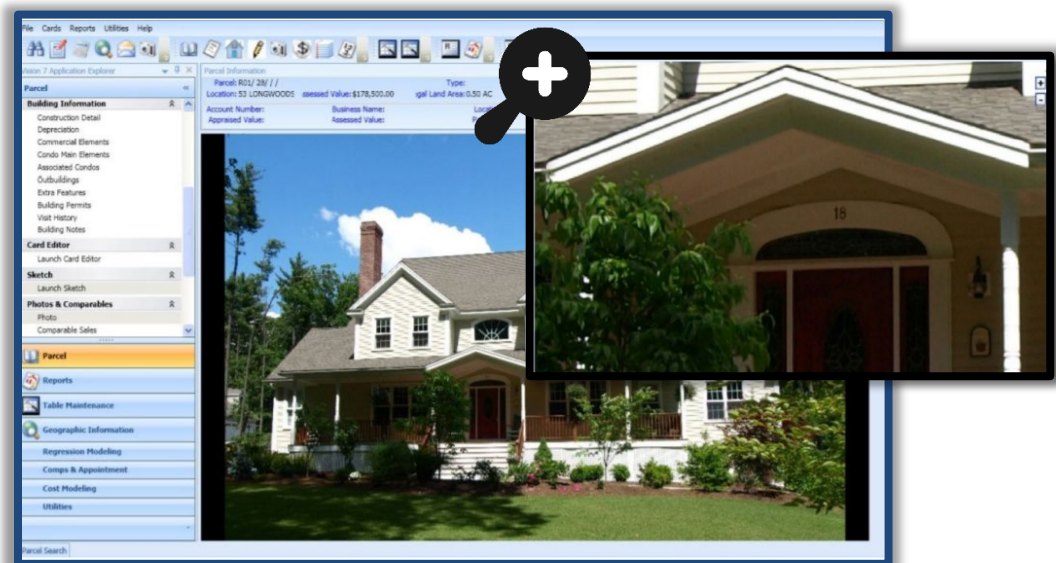

Image Zoom Tools

Customizing the Property Record Card

The Vision Property Record Card Editor enables the user to generate unlimited card templates for different uses (for instance, field review vs. taxpayer-facing; commercial vs. residential vs. condo).

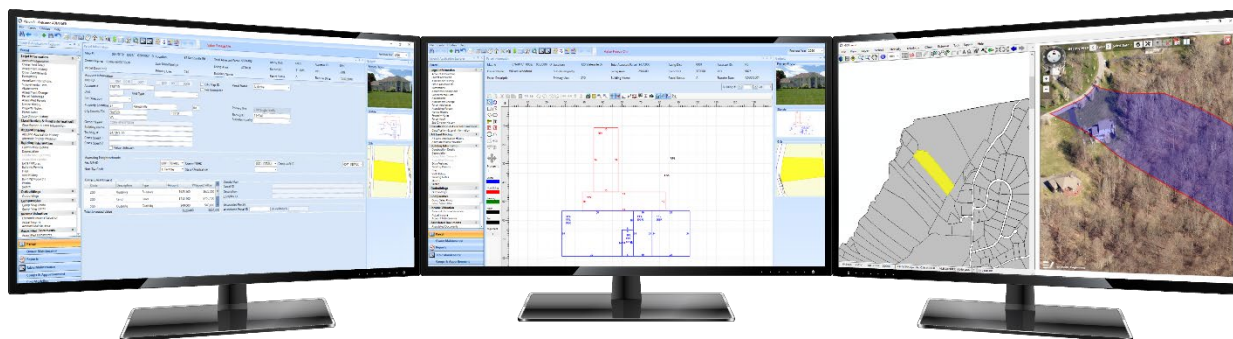

The Card Editor is highly configurable and is designed to enable communities to provide transparent, accurate valuation information to their taxpayers. Communities can customize the fields that are displayed, the layout of fields, the placement and number of images / sketches, the community seal, descriptive text information, color palette, font, and much more.

Vision Property Record Card Editor: Design your own Property Record Card

Example Customized Property Record Card

Generating Insights from the Data (Desktop Review)

Vision CAMA is built to reduce time spent in the field and enable high-quality Desktop Review. To that end, *Vision CAMA* enables the user to compare field-based information to sketch, photos, aerial and street-level imagery (both public and proprietary), and GIS layers. GIS and aerial imagery can be detached from the *CAMA* application to enable Desktop Review across multiple monitors.

Multiple Monitor Desktop Review

Past, Current and Future Year Data

At end of year processing a snapshot of the database is captured to archive all parcel data including but not limited to sketches, land data, and building attributes. Additionally, all the rate files and models that were used for valuation for that year are archived. Current and Future year data can be worked on simultaneously. Parcels for the future tax rolls can be added to the current database as “future” parcels. A utility is available to move “future” parcels to current when the time is right. The application also offers “Parcel Value Freeze” this tool will allow the users to update parcel data without affecting current year value, the value updates will be flagged a proposed value.

Visit Management

Track all Visit/Inspections to a parcel in Visit History. The visits can be independently added to each parcel or the user can select a group of user defined parcels to be updated in batch (via Vision Mass Update_) with Visit history information. Capturing this information will allow the users to build workflows for properties requiring visits. Queries can be written to identify properties that have or have not had a visit. This data can then be graphically displaced on the GIS Map.

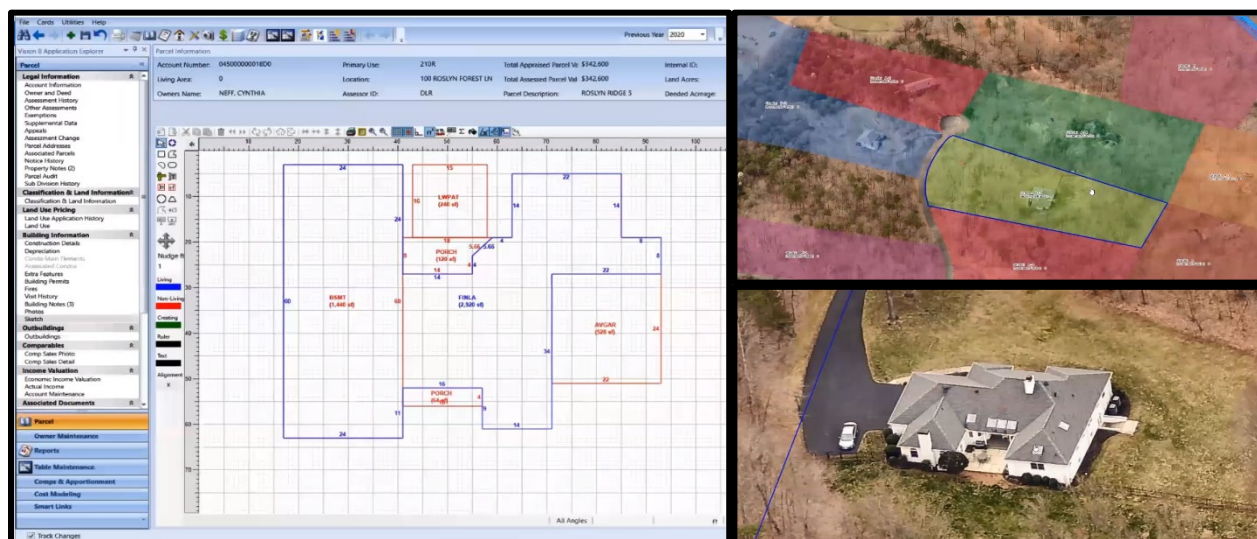

GIS and Aerial / Street-Level Imagery Integration

Our profession is a spatial one. That's why *Vision 8* is built around spatial visualization and mapping. Its deeply integrated GIS capabilities enable Assessment Teams to:

- Generate **abutter lists** with a click
- Democratize **data analysis** by easily displaying a set of parcels that meet any database criteria on the GIS map
- Answer assessment inquiries on the fly by building color-coded **thematic maps**
 - e.g. 'show me all my neighborhoods by color,' 'show me all the condos that sold over \$250,000 in the last three years,' 'show me all the parcels I'm responsible for visiting by grade,' or 'show me all the fast food establishments in the a given area.'
- Develop **strong appeals support materials** by displaying and labeling comparable sales on the map
- Identify valuation outliers by visualizing **Sales Analysis results**
 - e.g., by displaying IAAO-approved stats on GIS
- Keep the database accurate by **mass updating** directly from GIS
 - e.g., with grade or external obsolescence
- Log **notice history or visit history** directly from the map to improve workflow tracking

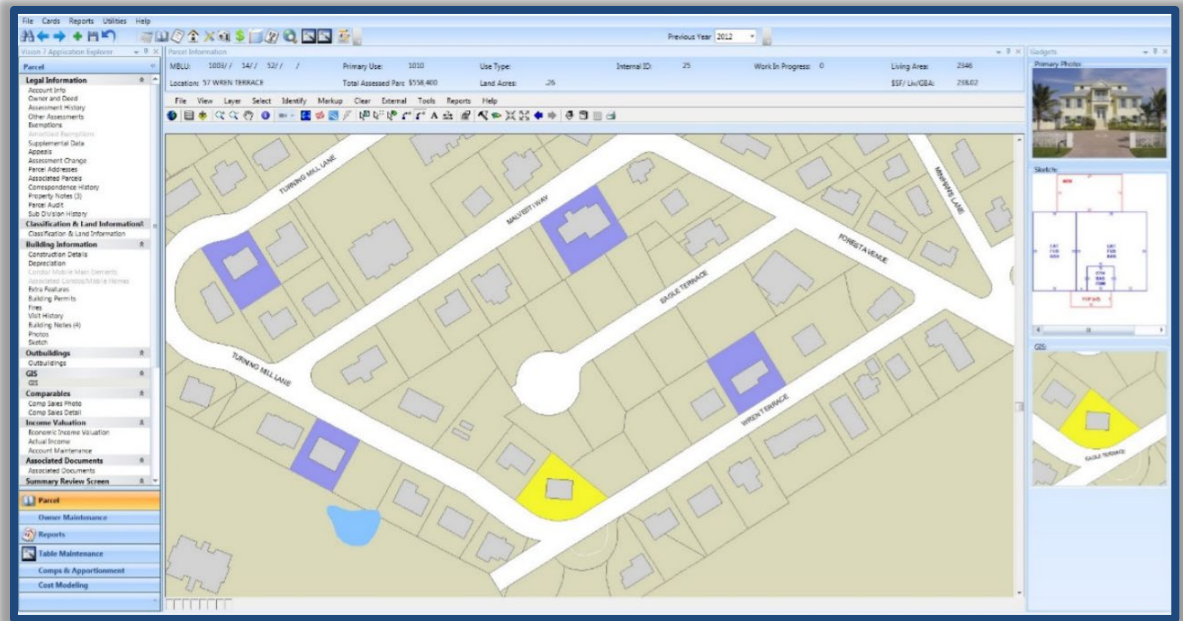

"I love Vision and using it here in my office in Hartford, VT because I have integrated maps at my fingertips. More importantly, I always feel like the customer really comes first with Vision and that's what truly makes the difference."

Assessor
Hartford, VT

Example Desktop Review w/ Aerial Imagery from Salem City, Virginia

The Vision GIS module uses ESRI's ArcGIS technologies and is integrated into nearly every element of the CAMA platform, from Sales Analysis to Reporting to Comparable Sales. Users can create reports in the Vision Report Writer and send the data to the Vision GIS module for viewing. Additionally, subsets can be created in the GIS module and sent to the CAMA report module. The GIS module can also be used to mass update database information. The software also supports personal geodatabases.

Sample GIS Screen

Ad Hoc Reporting

Vision CAMA includes an integrated business intelligence style report writer and query function to allow direct and user-friendly access to the database. The Report Writer has an easy-to-use front-end design, which allows users to create their own On-Demand reports or to pull from our Vision standard report library.

The Vision Report Writer enables users to meet external and internal management reporting requirements, track workflows, and execute ad hoc queries and reports. Reports can be used to query **any field** in the database, create **thematic maps** in GIS, and perform **mass data updates** with simple, intuitive tools that have the same look and feel as the CAMA system. Reports can be saved and exported across team members or communities for re-use.

As users build each report, they can preview the data and the format to ensure each report meets their requirements. Users can also design and save report templates to capture commonly-used information such as legal data and account information, parcel information, audit information and attribute information.

Vision reports can be saved and exported as PDF, Excel, flat file formats, and XML documents, which can be attached to any email. Reports can be printed on any printer connected to the Windows desktop operating system, including networked printers. On-demand reports can be attached to the parcel record as an associated document for longer-term storage and viewing. In addition to the on-demand reporting described above, Vision also includes a number of standard pre-created reports, which can be run at any time with user-defined parameters. Below is a sample set of Vision standard reports.

"We've now been live on Vision 8 for a few months now and we're very happy to see the same level of stability and reliability in 8 that we saw in 6. In other words, 6 was like an old Windows XP product, and 8 is functioning a lot more like the latest version of Windows 10."

*Chief Assessor
Crawford County, PA*

Sample of Standard Reports within Vision CAMA

- **Parcel Lists**
 - Sales Report
 - Sales Review
 - Old to New
 - Classification Check by State Use
 - Totals Data Check by Property Type & State Use
 - Mixed Use Special Use Properties

- **Analysis Reports**

- Res/Com Review
- Land Valuation Review
- Condo Review
- Vacant Land Sales Spreadsheet
- Com/Ind Sales Land Residual
- Multi-Fam/Apt Sales Land Residual
- Unsold Property Test
- Price Related Differential

- **Rate Files**

- Land Curve
- Building and Land Rates

- **Income Reports**

- Actual Income Spreadsheet
- Actual Vacancy Spreadsheet
- Actual Expense Spreadsheet
- Extracted Cap Rate
- Economic Income Spreadsheet
- Income/Cost Comparison
- Market Rent Schedule
- Capitalization Rates
- Adjustment Rates
- Income Land Residual
- Income Detail Review
- Cost/Income Detail Report

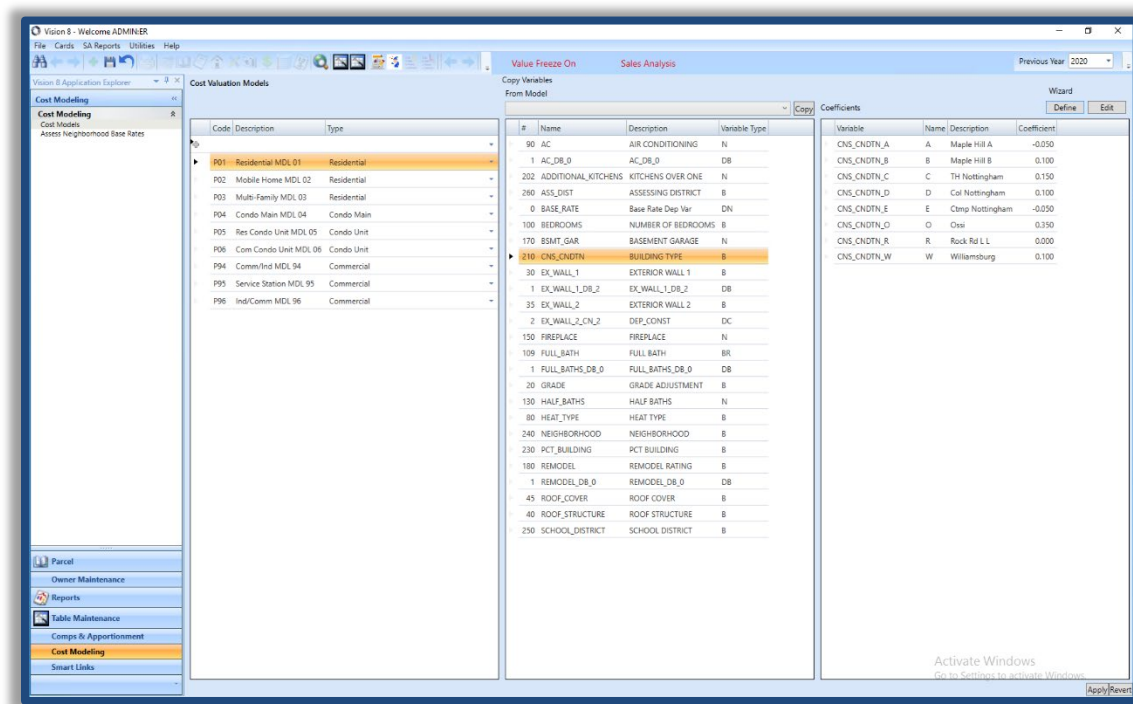

In addition to reporting on the data in the system, Vision also offers the ability to mass update single or multiple fields in the database. This enables permissioned users to assign parcels quickly and efficiently to staff members, update assessment administration information, or log visit or notice histories. This tool has special “quick insert” capabilities to insert notices or property visits. The Mass Update can be accessed either as a standard utility, or can be completed directly through the GIS application.

Together, these features enable municipalities to reduce the number of site visits, proactively identify property improvements or changes, and dramatically improve valuation accuracy.

Visit History Summary								
PID	MBLU	Address	Land Use Code	Date Of Visit	Initials Of DC	Visit Code	Previous Assessed Value	Current Assessed Value

IAAO Approaches to Value (Cost, Market, Income, Trending, etc.).

Cost Modeling Screen

Vision CAMA supports several approaches to value (Cost [Including Marshall & Swift Commercial Data], Market, Income, Condo Value Apportionment, Trending and Z Contour for land), allowing the Users to construct customized valuables within the valuation models.

The Assessment Summary screen provides an easy dashboard for reviewing every approach to value that you would like to enable in the CAMA system. This enables the appraiser to compare approaches to value in a single place and select a value source for each parcel. In this screen, you can also capture detailed Assessment History information.

Vision also contains a full-featured income valuation module, allowing the user to capture both actual and market income data for valuing all the appropriate commercial, industrial, and apartment properties within a jurisdiction. Vision enables the user to incorporate income and expense data, as well as cap rate and vacancy information.

Many Vision CAMA municipalities are using Marshall and Swift data for cost valuation of commercial properties using the Vision Marshall & Swift module. Vision CAMA users are responsible for procuring the Marshall and Swift data from CoreLogic.

Exemptions and Value Reductions

The Vision exemptions screen is designed to capture personal exemptions. Typically, exemptions are applied based on the property owner, and users can enable a setting that will flag the user of an existing exemption when adding a sales line. As an option, the exemption total(s) can be subtracted from the parcel total. Users can capture a table-driven exemption code, description, and amount (flat dollar amount), fields such as start date and end data allows users to indicate the start and the expiration date of the exemptions. Additional user defined fields can be opened to capture additional Exemption information. Vision has standard reports to identify parcels with Exemptions.

Utilizing the Vision Mail Merge functionality, "Mail Merge" fields from the Exemption Screen can be merged onto a document. This is especially useful when sending out Exemption Renewals.

Year	Code	Type/Description	Amount	Start Date	End Date	User Field 1	User Field 2	User Field 3	User Field 4	User Field 5	User Field 6

Table Maintenance and Cost Modeling

Produce fair and equitable values for your community.
Reduce the number of appeals you receive and win the ones you do.

- Puts the power of valuation in the hands of the assessor.
- Our multiple approaches to value (cost, market, income, trending and more) reconcile and defend your final approach to value.
- Cost Modeling Wizard – build your own cost models to develop rate factors and adjusts to fit your market.
- With flexible cost modeling you decide which attributes to include and how to apply them, enabling complete control over your models and values.
- Visually display your sales analysis stats on the GIS map to easily highlight outliers.
- Complete autonomy over your comp sales module attributes. Use any component of the parcel in your comp sales model to safeguard your values.
- Track your appeals history to easily manage your appeals process.

"Our upgrade to Vision 8 was great, and everything was pretty seamless. Vision has always been a robust system. It's got a lot of bells and whistles without being too frilly and it's a reasonable price for a locality. It also merges well with our financial software."

*Commissioner of the Revenue
City of Martinsville, VA*

Statistical Analysis and "What If" Tools

The Vision Sales Analysis tool was built by our Appraisal Services team, using their 45 consecutive years of revaluation experience. This powerful "what if" database enables Assessing Departments to test and calibrate their valuation models (and find data outliers) in a safe environment before rolling changes over into the Production Database.

Utilize sales analysis tools for "what-if" scenarios. Make model and table changes in your sandbox environment to run analysis reports and test your models without impacting your live data until you are ready.

First, this module enables the user to pull in sales that meet user-defined criteria such as years and sales qualification. The module then auto-generates more than two dozen **IAAO-approved statistics** to analyze the sales in the database, including Assess-to-Sale Ratio, COD, PRB, PRD, and many others. Users can then easily stratify sale properties by criteria such as style, stratum, land use, neighborhood, condo complex and many others.

The sales analysis module allows for analysis on stratification of sale property types captured in the system. Running ratio studies in Vision sales analysis to determine the level of assessment by property class is quick and easy. The ability to sort by any statistic makes for a quick review of identifying outliers.

Communicating with the Public and Defending Values

Vision CAMA is built to transparently communicate property values to taxpayers and effectively defend those values in formal and informal hearings. In one recent webinar titled *"Appeals – How to Have Less and Win More,"* a Vision user shared that his informal appeals reduced from 1,500 per year to 0 after implementing Vision CAMA. This is a testament to the easy-to-explain and transparent valuation engine. There are no black boxes in Vision! Vision CAMA provides information to help jurisdictions:

- Communicate Transparently with Taxpayers
 - Vision CAMA provides comparable sales sheets which are customizable to your community
 - Vision CAMA provides comparable sales snapshots to display additional details across multiple years
 - The information displayed on Vision's Property Record Card and Public Website are customizable
 - Generate and Manage Your Correspondence with Taxpayers
 - Vision CAMA creates easily explainable valuation worksheets, which detail every calculation in the application
 - City staff can easily use Mail Merges within the application
 - Track correspondences with our management tools
 - Track visit history for historical purposes and future taxpayer communication

Data from the Vision CAMA application can be merged onto documents through the Vision report writer. Surveys such as Sales Verification Forms and Data Mailers are frequently created with this utility.

All correspondences can be captured on Correspondence History screen. Using a table-driven user defined picklist, the user can select a correspondence code and type, fields for correspondence date, response, and comments are also available. User can add correspondences manually to one parcel at a time, or in batch utilizing the Vision Mass Update Utility.

Fiscal Yr	Correspondence Date	Notice Code	Notice Code Description	Correspondence Type	Correspondence Desc	Response Date	Response Code	Initials	Status
2017		EXMT	Exemptions Mailer	BLKM	Bulk Mail		OTHR	AO	
2017		00	Undefined	CALL	Phone Call		RCAL	AO	00

Add Correspondence

Delete Notice History

Fiscal Year	Correspondence Date	Correspondence Code	Correspondence Type
2017	Select a date	00: Undefined	CALL: Phone Call
	Response Date	Response Code	Initials
	Select a date	RCAL: Returned Phone Call	AO: Assessor's Office
Status			
00: Undefined			

Comments
Spoke to Kevin Smith on the phone, he inquired about a permit.

Example Correspondence Information

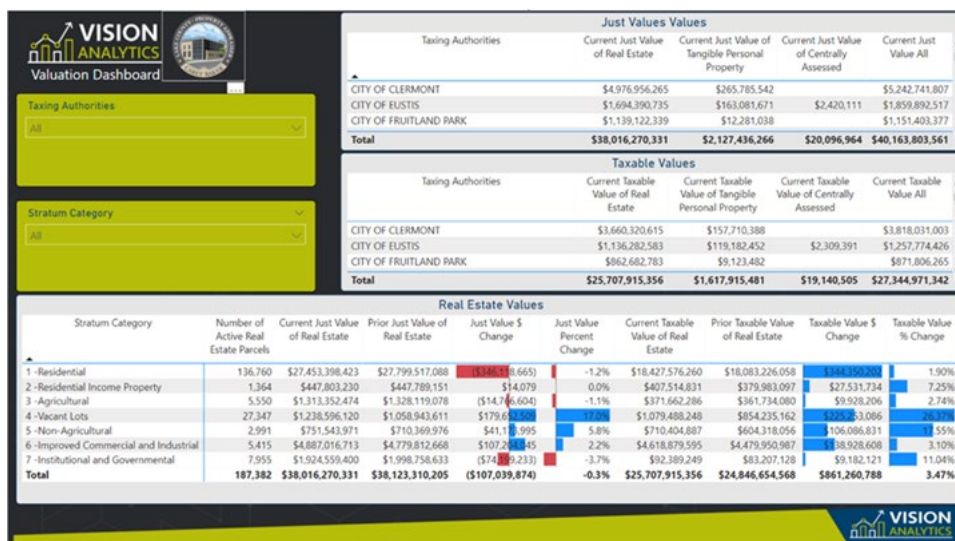

Appeals and Grievance Tracking

The Appeals and Grievance screen can be configured to capture, organize, and manage appeals. Important data such as Application Date, Inspection Time/Date, Deadline Dates, Hearing Time/Date, Appeal status, Reason Codes, and more can be captured on a parcel level. Additionally, reports can be generated from any field, displayed on the GIS map, printed to the property record card, or exported to excel.

Vision Analytics (Optional Module)

In this digital and ever-faster-changing world, every leader has little choice but to respond faster to the changes around them. This means that you must make more decisions more frequently, which in turn means you need information about the state of and trends in your office faster and more frequently. Vision Analytics delivers that capability by quickly presenting graphical representations of your critical data in the form of *executive dashboards*.

These dashboards present the measurements of productivity and performance across your office at a glance, including year-over-year analysis for departments and individuals. Property Appraisers and their executive staff can review and analyze real-time data and turn it into actionable information without spending valuable time wading through reports or being overwhelmed by irrelevant points.

Make better-informed decisions by using Vision Analytics to see the time to completion for projects and throttle your resources to ensure you meet your target dates. Productivity of teams or personnel assigned to specific areas can be reviewed and load leveling between teams or personnel when the workload is heavier in another area can ensure your work is completed within the specified timeframe, even when the amount of work across geographic areas is changing.

Vision Analytics illustrates where your office is excelling, and where it can do better by drilling down into the data behind the graphs, giving you a more detailed insight into trends and activity. Imagine proactively calling a municipality and letting them know that they are 60 days behind in providing building permit data and could be in danger of not having appraisal reviews

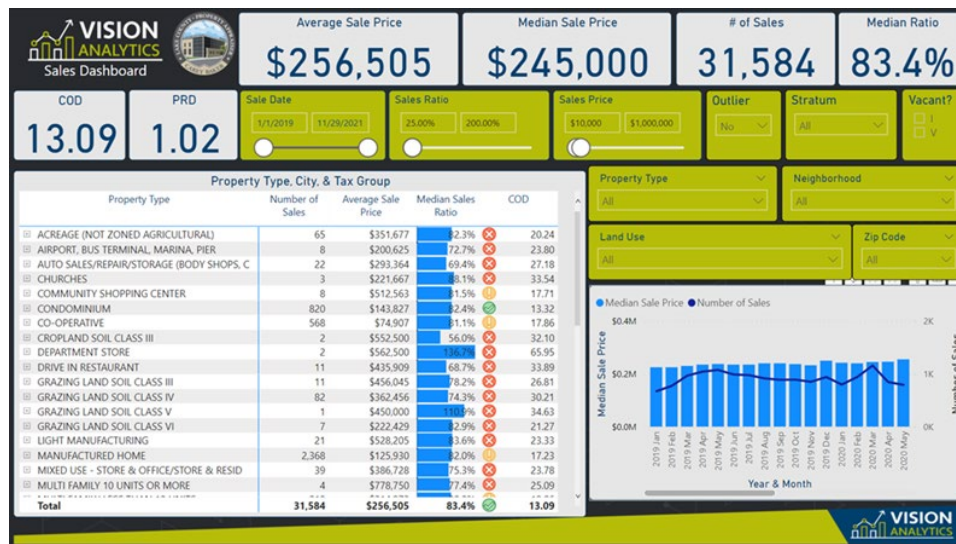

completed in time to add those buildings to the roll.

Making Vision Analytics available to your staff enhances visibility and ensures that everyone knows the overall goals and deadlines, and the part they play in helping to achieve them. This information is often a great motivator and can result in increased performance at the individual level.

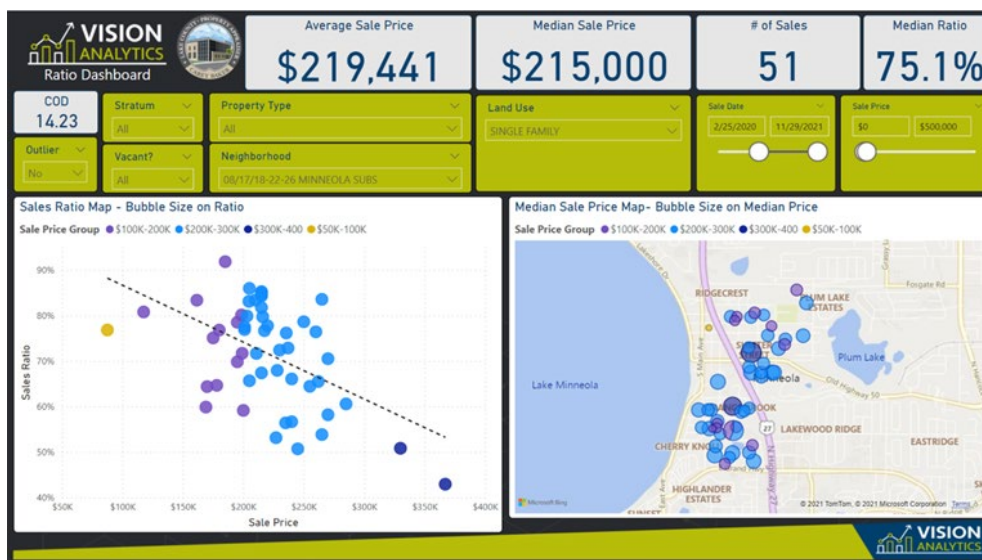

Vision Analytics executive dashboards are intuitive and dynamic, as selections are made that drill down to a particular appraisal area, only those neighborhoods that are within that area are displayed allowing for the most efficient traversing of the data.

Keep an eye on your sales data, see your COD and your PRD across all qualified sale data for a time period, and drill down to a specific neighborhood for an analysis of those market trends.

As selections are made, all the drop-down lists are dynamically filtered to provide just the options that are relevant based on your previous selection ensuring that there is not cluttered data to wade through.

Vision Analytics also provides sales ratio maps with bubble sizes to indicate sales price group, alongside a median sale price map with bubble sizes based on median price. This dual display of maps is designed to give you the right tools to assist in spotting trends and outliers in the most efficient manner.

Vision Analytics provides forward-thinking leaders with the ability to examine and evaluate their organization at every level and from multiple perspectives; assess the current status, conduct historical point-in-time analysis, examine trends or model scenarios – in minutes – not days, weeks or months.

Vision Implementation Services

Vision is committed to developing and nurturing a long-term partnership with the City of Richmond. In that spirit, we have developed a *Vision CAMA* package designed to provide all the services required for a successful implementation, from kick-off to go-live and beyond.

*"Our conversion to Vision 8 went very smoothly. We've had fantastic support from our Project Manager Jen Rukstela, and the communication process with the Vision team throughout the project was great. Our on-site training with Matt Burke was outstanding. **New technology can be challenging at first, but he was very knowledgeable about the product and was able to spend a lot of time with our staff showing them how to move forward with the new platform.** Vision has been great about holding our hand and guiding us through this process and we're excited to be part of the Vision community!"*

*Rod Compton, CAE
Real Estate Assessor
Prince George County, VA*

This package is built to embody the principles of:

1. A partnership approach to collaboration
2. Fast implementations with clear delivery milestones
3. Accountability through aligned incentives, clear commitments, and user-interface-based configuration
4. A commitment to long-term success with a long-term transition and customer support plan

To accomplish those principles, the *Vision CAMA* package comes with all the services required to make an implementation successful. This begins with implementation and onboarding, but 90% of the impact comes from the decades-long ongoing support relationship.

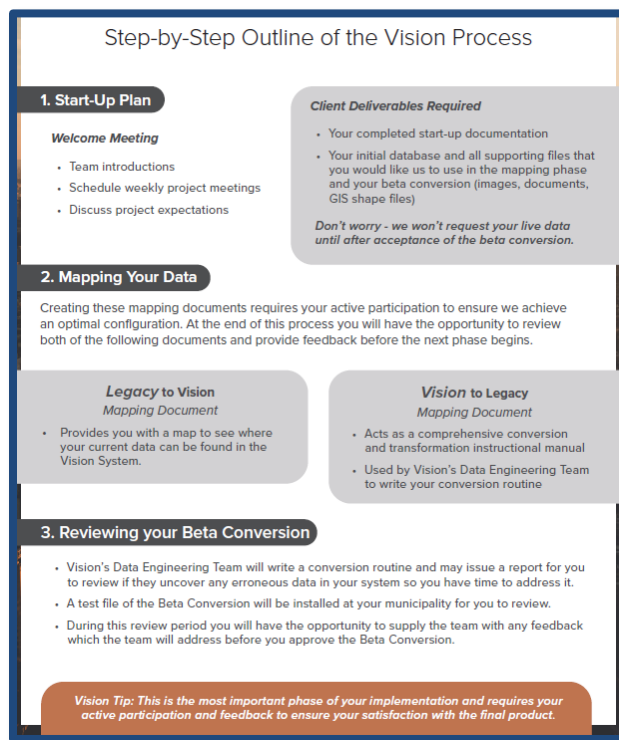

Below, we describe the speed, reliability, and standardization of our implementation services, followed by the long-term support services that we will provide to the City of Richmond.

Vision 8 Implementation Services Highlights

In Virginia, Vision has averaged 5.3 months per implementation. Based on the requirements below, Vision is proposing a 6 – 8 month implementation based on the final terms and conditions reached during the configuration phase. This implementation will follow the enhanced, Vision implementation program described below. This program consists of key milestones to ensure an efficient and smooth transition for the City of Richmond.

Based on the success of our most recent implementations, we are confident that we can achieve an aggressive schedule so long as the City of Richmond commits to returning its review and deliverables within the timeframes specified in the implementation plan. The key milestones and associated services within the proposed implementation include:

- **Successful Project Kick-Off and Project Start-Up**
 - During this phase, Vision assigns a dedicated Project Manager to guide the implementation, and the City of Richmond will designate a liaison to work collaboratively with the Vision Project Manager throughout the implementation. Vision recommends the assignment of a liaison from the City of Richmond Assessment Leadership team as well as a technical liaison from the Information Technology team.
 - Vision will provide detailed questionnaires to document the City of Richmond's data mapping needs and request a copy of the legacy system data for initial review.
 - Vision will provide project overview documentation identifying the responsibilities of both parties with clear milestones, tips & tricks, and common sticking points for implementations
 - During this phase, the City of Richmond is responsible for providing legacy system data and documentation to enable data mapping to proceed quickly

Sample Kick-Off Implementation Document

- **Regular Communication to Ensure Ongoing Collaboration**

Continuous and collaborative communication is the key to a successful implementation. Each municipality knows its data and data entry conventions better than any vendor. That's why it's vital for the City of Richmond project team to collaborate closely with the Vision Project Manager throughout the process to provide guidance on the conventions unique to your Community.

Most downstream data issues result from matters of interpretation, not the technicalities of data transfer. Examples include:

- How do you intend this field to calculate?
- Why do you use this field that way instead of this other field?
- Why do you store naming conventions that way?
- Fireplace data appears in multiple sections of your data; which is the source of truth?
- These land records are present in your data but do not appear on your property record card; are these deleted records?
- Why are some accounts missing a neighborhood identifier while others have adjustments from the global neighborhood factor?

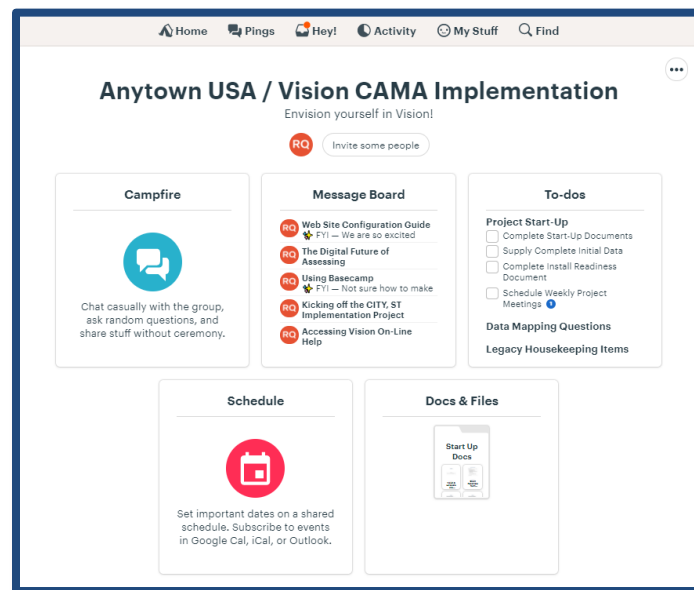

While this collaborative problem-solving approach requires more investment from both parties, it ultimately enables us to co-create a strong database foundation *upfront*, which reduces data

cleaning work or workarounds after the implementation.

To guide this communication process, every *Vision CAMA* implementation includes a dedicated Project Manager whose responsibility is to ensure implementation success, liaise with the Community, and provide feedback and recommendations for a successful outcome. Our Project Managers have an average of 10 years in the appraisal industry. This ensures that every Project Manager is deeply versed in the language of valuation to ensure optimal data mapping outcomes and provides a high-touch level of service that is unique to the CAMA industry. The *Vision CAMA* package includes Project Management services for the entire duration of the project.

Vision will also set up weekly check-in calls during the project implementation phase. These check-in calls are designed to gather feedback, ask collaborative questions, discuss complex data issues, and provide checkpoints for key project milestones.

To facilitate the real-time communication process, Vision will provide access to an online Project Management communication hub, Basecamp, at no additional cost. Basecamp is accessible via the web or your mobile phone and serves as a platform for continuous updates, real-time collaboration, project documentation, milestone management, and more. We have found that using this platform reduces implementation project times by upwards of 20%.

Example Basecamp, Project Management Site

- **Data Mapping to Ensure Smooth Transfer of Information Before Conversion**

Once Vision receives the legacy data, we enter the data mapping phase. During this phase, the Vision Project Team works in close collaboration with the City of Richmond to translate the language of the legacy system to the language of Vision.

This process oftentimes enables us to highlight data outliers or “dirty data” that can be cleaned up during the conversion process. Some examples are a bad date (2/31/2017), 15 bathrooms in a 1200 SF home, and “W” in the number of bedrooms field. The benefit of this collaborative period is that you can often end up with better data coming out of the conversion than going in! This mapping period is the special magic of the Vision conversion process and accounts for recent Vision implementation customers’ high level of satisfaction.

- **Reliable, Accurate Data Conversion Services (and Built-In Review Periods)**

Upon completing the database mapping, Vision will enter the data conversion period. Specifically, Vision will perform three conversions: a beta conversion, a revised beta conversion, and a production conversion:

1. **A Detailed Initial Beta Conversion and Review Period:** Vision will install the Vision CAMA software with your first beta database conversion after initial data mapping is complete. Specifically, Vision will provide a custom “guide to your beta review” document and will complete initial training specially designed to get you up to speed with your beta review. Not to worry – you won’t be left to fend for yourself; your Vision Project Team will be with you the entire way!

We’ve designed this period to provide a worry-free sandbox environment for learning the Vision CAMA software and ensuring that your Vision Project Team successfully interpreted your guidance during the data mapping process. For instance, we’ll share specific tips for review, such as reviewing your largest or most complex properties, searching based on different criteria, etc. During this review period, your Community will not be down from the legacy system.

Using this multiple Beta Review process and leveraging the actual *Vision CAMA* platform for the review process has significantly reduced the new software learning curve, improved data accuracy throughout the conversion process, and increased customer satisfaction following go-live.

2. **Beta Revisions and Revised Beta Conversion:** The best way to understand the outcome of decisions made during data mapping is through thorough hands-on review. Only then

can you truly make final decisions on how best to convert your data and configure your database. We integrate all requested modifications that stem from the Beta Review period during this phase.

3. **Final Production Conversion:** You and your team will be very comfortable with the Vision CAMA software by this time. Once you have approved the revised beta edits to the database conversion routine, Vision will complete a final “production” conversion with the live legacy data. Completing the heavy lifting throughout the Beta project phases allows for a speedy go-live conversion leveraging the approved routine, dramatically reducing downtime. You’ll then be officially “live,” and training and configuration will commence.

Each data conversion pass is completed by our experienced Implementation Engineers in close collaboration with your Vision Project Manager. Your Community will receive a dedicated Implementation Engineer to ensure familiarity with your database throughout the project. However, it is also important to note that Vision maintains a strong team of Implementation Engineers to provide back-up and contingency-planning support.

The conversion services provided in the *Vision CAMA* package assume that we will convert from a single legacy system with electronic data. We will convert property characteristics data and sketches for the entire production database, with unlimited years of ownership and assessment history as available in the production database. We recommend that municipalities keep the legacy system running to access historical years in parallel with Vision CAMA. We can offer conversion services for additional historical databases (i.e., with full tables and sketches) for an additional cost.

In addition, every Vision conversion includes electronic conversion of the sketch data, if available. To convert existing sketch data into the *Vision CAMA* native sketch application, customers must provide sketch data in a non-proprietary electronic “traverse” format, which shows ‘pen movements’ for each shape and links each shape to its associated sketch label. It is uncommon, but some sketch vendors do charge for extracting the sketch data.

- **Integration, Configuration, and Personalization Services**

As part of the implementation, Vision will provide integration and configuration services designed to provide a seamless roll-out personalized to the City of Richmond.

Configuration Services Summary:

- Vision will provide a recommended default configuration for Vision CAMA. This gives us a starting point for personalization.

- Vision will hold a detailed software configuration workshop, which will cover:
 1. Property Record Card template formatting
 2. Taxpayer website configuration
 3. Configuring GIS with your Community's unique shapefiles
 4. Tooltip and field naming validation
 5. Set up of usernames, user groups, and associated user permissions
 6. Screen layout, sequencing, and visibility
 7. Field layout, sequencing, and visibility on each screen
 8. The setting of field parameters for data entry
 9. Preferences for table maintenance, cost modeling, and comparable sales
 10. Review of all software features that can be enabled/disabled in the Administrative Module

Integration Services Summary:

Vision CAMA can integrate with many third-party platforms in common use by Assessing Departments. Vision has identified 20 possible import/extracts from the Matrix. Vision believes several of these procedures could be combined into one process and has allotted for the custom development of up to 8 custom Imports or Exports. See below for an example of the process followed by the Vision implementation team:

Tax System Extract:

Vision CAMA v8 is installed in over 450 communities, and we communicate with a Tax software platform in each. These communities are as complex as New York City and Washington, D.C. Deep integration with the Tax software is required to ensure the seamless calculation, dissemination, and collection of tax bills.

Vision's Project Manager will guide the City of Richmond through a questionnaire designed to inventory the business rules that will be used to integrate with the municipality's Tax system. Then, our technical staff work directly with your Tax department and vendor to create and schedule a custom and automated import *and* extract to ensure seamless flow of information that aligns with your database language.

Foundation for Valuation:

Any vendor can convert values on override. Instead, we pride ourselves on setting up a strong foundation for valuation during every *Vision 8* implementation. This foundation ensures that values are table-driven and that cost models are developed and calculating. This service includes developing initial cost models, establishing land and depreciation tables, etc. Vision will

collaborate with the City of Richmond throughout valuation to ensure that the desired rates and adjustments are in place while promoting a deep understanding of the Vision 8 valuation engine. The Vision Project Management team has deep appraisal expertise, supported by our team of over 50 Appraisal Personnel. This level of knowledge ensures that communities are working with a true valuation thought partner, setting the City of Richmond up for valuation success with a long-term foundation for table-driven values.

- **Installation and Go-Live**

The *Vision CAMA* package includes hands-on installation of the software, with two deployment options:

1. *Option 1: Cloud Hosting Deployment:* For communities opting for a cloud-based deployment, Vision will install the software on our servers and provide access credentials. Vision works with a professionalized data center to store all our cloud data. This data center is a full-service, 40,000 square-foot facility with video surveillance, a photo ID card access system, 24x7x365 onsite personnel, and iris scanners. It is backed up by three unique power sources and 14.25MW of generator back-up power and has raised floor design supports to reduce flooding and damage risk. It includes nightly back-ups and passes the tightest security compliance measures in the country (SSAE 16, SOCI, and SOC2 Type II compliance). Additional security information is available upon request.
2. *Option 2: On-Premise Deployment:* For communities opting for on-premise deployment, Vision will provide full installation services. This option includes installing the database on your servers and the client application on your Desktop PCs, using TeamViewer or a similar approved platform. If your IT team prefers, Vision can also provide instructions for your IT team to complete the installation without Vision's involvement.

Vision will share technical specifications and requirements at the beginning of the project and work directly with your IT team to ensure that all server permissions are configured to enable the seamless functioning of all relevant reporting services and integrations. Vision will also test the functioning of the tax integration, GIS module, and taxpayer website (if this option is selected) to ensure that all install requirements have been completed successfully.

In the final steps of the go-live process, the City of Richmond will send the complete legacy data for final conversion. Vision will convert and test the data before installing the live file. This process will take, on average, three weeks. This is followed by a configuration call, scheduled training, and final transition meetings, lasting on average one month. During this process, the City of Richmond is encouraged not to make any data changes for the few weeks during the final conversion. This is to ensure the most up-to-date data is converted and no double-data entry is required.

Finally, if the City of Richmond opts to use the Vision Taxpayer Web Hosting Service, Vision will set up a website dedicated to displaying property value and ownership information to taxpayers. This site is further described in the Product section of this proposal. The Vision Taxpayer Website includes an automated web loader to schedule data updates at the frequency of your choosing to ensure that all information is correctly up to date.

- **A detailed and comprehensive onboarding & training program for the City of Richmond**

Vision is deeply committed to long-term Customer Success. To that end, we provide go-live training upon installation, a bank of “refresher” training days for use at your convenience, as well as free monthly training webinars and annual User Groups to enable continuous learning. Further information about our training and long-term support plan is enclosed in their respective sections in this proposal.

For additional information about the Vision Project team and new CAMA implementation project plan, visit the Vision Blog at <https://www.vgsi.com/2021/01/28/moving-into-vision-cama-is-like-moving-to-a-new-home/>

*Jen Rukstela, Senior Director of Software Implementation
shares details about what to expect during the Vision CAMA implementation*

DID YOU KNOW?

Implementing your new Vision CAMA software is much like moving into a new home. Fortunately, you’ve selected an expert team of movers to do all of the dirty work, and you can focus on simply making decisions and preparing to move in.

Your familiar CAMA software is no longer fully meeting your needs for one reason or another. Some clients may truly love it, love the ease of use, and want to stay right where they feel comfortable. Other clients cannot wait to move out of their legacy system and into a cutting edge system. No matter where on the spectrum you fall, you are facing a move so let's talk about what you should expect.

WHAT TO EXPECT

Vision Blog: Implementation Project Plan

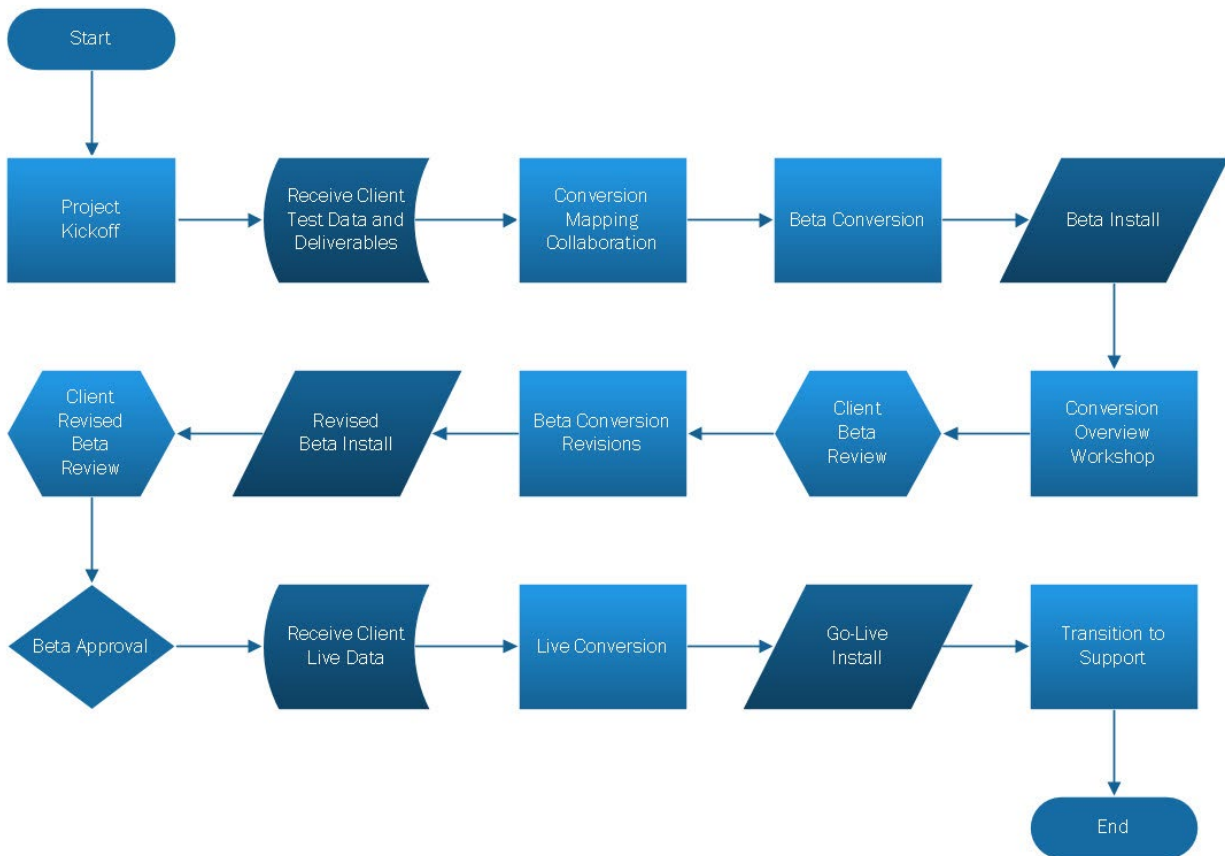

Sample Implementation Plan

The Vision implementation plan is designed to balance the competing requirements of (1) speed and (2) quality. To that end, Vision intentionally includes several checkpoints to ensure that you are happy and comfortable with the end results of your data conversion, including review of data mapping, a beta conversion period, and a revised beta conversion. Your Vision Project Manager will also coordinate weekly project touchpoints and collaborate using our online Project Management platform, Basecamp.

Below, we have included a sample implementation plan. We will update this plan according to the City of Richmond's needs and required down-time for items such as End of Year processing.

Milestone	Responsible Party	Schedule Requirements
Contract Negotiations Complete	City of Richmond and Vision	Contract signature
Project Startup and Conversion Specifications	City of Richmond and Vision	Schedule kick-off call immediately after contract signature
Community Supplies Information to Vision	City of Richmond	+ 2 weeks from kick-off call
Data Mapping for Conversion	Vision	+ 5 Weeks
Supply Non-Proprietary Legacy Sketch Data	City of Richmond	+ 0 Days
Beta Conversion	Vision	+ 5 weeks
Beta Conversion Delivery	Vision	+ 1 day
Beta Conversion Review and Feedback	City of Richmond	+ 3 weeks
Revised Beta Conversion with Initial Value Foundation, per Previously Identified Revisions	Vision	+ 4-6 weeks, depending on workload required from revisions

Install Revised Beta Conversion	Vision	+ 1 day
Revised Beta Conversion Review and Approval	City of Richmond	+ 2 weeks
Supply Live Legacy Data	City of Richmond	+ 1 day
Convert Live Legacy Data	Vision	+ 3-4 weeks, depending on valuation modifications required
Install Live Converted Data	Vision	+ 1 day
Supply Historical Database	City of Richmond	+ 0 days
Convert Historical Databases	Vision	+ 2 weeks per database
Install Historical Converted Data	Vision	+ 1 day
Project Go-Live	City of Richmond and Vision	+ 1 day
Schedule Trainings	City of Richmond and Vision	At mutual convenience
Transition to Ongoing Customer Support	City of Richmond and Vision	4-week period with weekly check-in calls between Project Manager, Customer Support team, and Customer

Tab VIII: Solution Architecture

Vision CAMA Technical Overview

Application Architecture

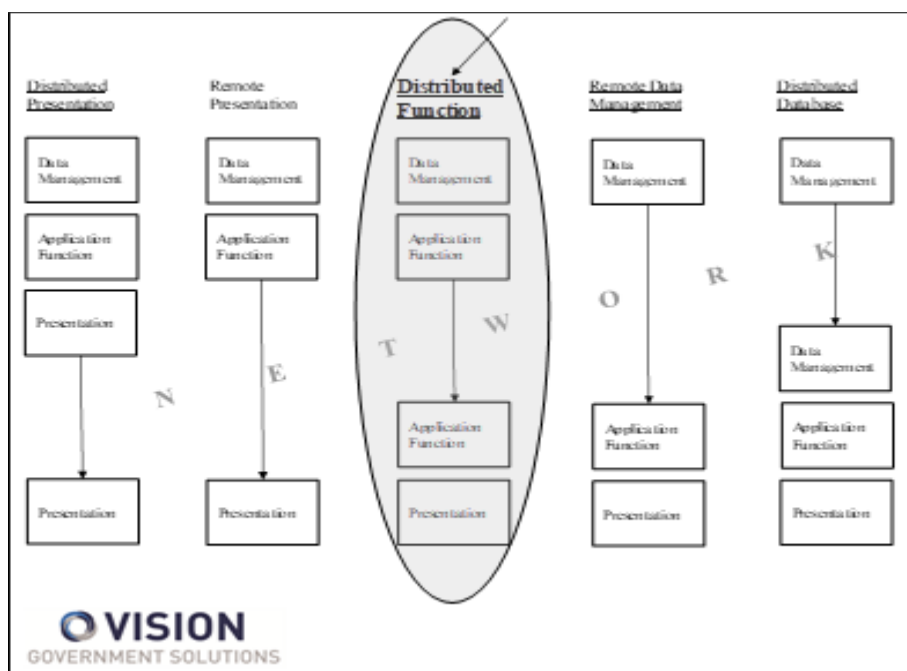

Vision CAMA has been developed for use with the SQL Server database architecture, currently SQL Server 2016 - 2019. *Vision CAMA*, like all CAMA applications, is both a data and computation bound application and, as such, is designed to perform optimally on dedicated application and database servers.

The design of *Vision CAMA* is composed of logical groupings of software components called layers. Layers buffer component dependencies increase reusability of components and enable efficient regression testing. Each logical layer is further broken down into several sub layers, with each sub layer performing a specific type of task. Vision's architecture maximizes maintainability of the code, optimizes the way that the application behaves when deployed in different ways, and provides a clear delineation between locations where certain technology or design decisions were made.

- **Interface Tier:** *Windows Presentation Framework Service:* This layer contains the user-oriented functionality responsible for managing user interaction with the system and consists of components that provide a common bridge into the core business logic encapsulated in the business layer. This layer contains user interface subsystems for rich user dialogs for data manipulation, search, reporting, user adaptive screens, and GIS/Mapping and related imagery components. This layer is implemented in the C# programming language and uses Microsoft's Windows Presentation Framework (WPF) technology.
- **Interface Tier:** *Application Interface Service:* This layer provides services to other applications as well as consumes services from other applications. This layer exposes "public access" events, data entities, and functionality of the application for integration primarily with local site-specific third-party applications such as tax billing software, data warehouses, deeds/imaging, and public facing web sites. The layer is implemented using .NET's Windows Communication Framework and it is written in C#.
- **Business Logic Service:** This layer implements the core functionality and encapsulates the complex business logic. It consists of components, some of which expose service interfaces that other internal component callers use. Business Logic Service provides validation services for business objects and data entities manipulated by the presentation

and interface services. The Business Logic Service also houses a series of CAMA calculation engines written in C#. The CAMA engines provide the core appraisal models in the *Vision 8* solution. The engines are implemented using an object-oriented design and can be extended and specialized using standard object-oriented mechanisms.

- **Data Access Service:** This layer provides access to data stored within the system, and data exposed from third-party systems or accessed through services. The data layer is implemented in C# and exposes generic interfaces and XML payloads via Windows Communication Framework that higher order components manipulate.

Vision 8 Application Architecture Diagram

Vision CAMA will need to be installed on each workstation utilizing CAMA.

Operating System

Vision 8 is developed for Version 4 of Microsoft's .NET Platform. All client and server system components utilize .NET 4.6.1 runtime services. To leverage these new technologies, Windows 10 operating system or later is required for desktop and laptops. Windows Server 2016 or later is required for servers.

Vision 8 Software Development Environment, Languages, and Tools

Our development team uses Microsoft's Visual Studio 2019 and programs in the C# programming language although there are some supporting SQL scripts and stored procedures written in the specific SQL dialect of the database. Our software engineers utilize modern object-

oriented and service-oriented architecture best practices and have designed the product as a layered services style application architecture.

Vision 8 is a Microsoft SQL based platform and has been created specifically for use with the SQL Server database architecture, currently SQL Server 2019. *Vision 8* is written using C# programming language and Microsoft's Windows Presentation Framework (WPF) and Windows Workflow Foundation (WF) .NET technologies.

Proposed Relational Database Management System

Vision software utilizes Microsoft SQL Server to store all its data.

User Interface

Vision 8 is written using Microsoft's Windows Presentation Framework (WPF).

Release and Patch Update Process

Vision's current cadence is to release "major" (feature) version upgrades to our 8.x platform several times per year and "minor" (patch / bug fix) releases every 4-8 weeks, depending on the level of urgency. Vision 8 customers receive every major and minor release at no additional charge.

If a customer is particularly impacted by a defect, their system update will be prioritized by our Support Team.

Upgrades to underlying infrastructure (Windows OS version patches, e.g.) will generally be managed by the customer's IT department.

Upgrade Creation, Testing, and Release Processes

Vision's software is developed using the agile scrum methodology. Vision works in 2-week iterations that includes writing tests as well as product code. Automated testing is augmented by a manual QA process at the end of each development cycle.

The deployment and upgrade process for application instances running on-premise at customer locations generally involves someone from our technical support team connecting to the system remotely to run installers and database migration scripts for the server installation.

In addition, any client software running on local workstations will be updated at the same time. This process can also be accomplished by the customer's own IT staff if desired. In this instance, the software can be easily downloaded from our FTP server.

Hardware Specifications

Description of Vision 8 Technical Specs:

Vision 8 is a rich client application that uses a N-tier web service-based application architecture. *Vision 8* utilizes the latest software development and operation system technologies from Microsoft.

Vision 8 is developed for Version 4 of Microsoft's .NET Platform. All client and server system components utilize .NET 4.6.1 runtime services. To leverage these new technologies, Windows 7 operating system or later is required for desktop and laptops. Windows Server 2016 R2 or later is required for servers.

The *Vision 8* core business logic and data access services are deployed within the Microsoft's Web Server (IIS 9.0). *Vision 8* is optimized to run on Microsoft's SQL Server 2016 database technology. Microsoft SQL Server 2016 or later is required for servers.

This document contains minimal and recommended configurations for the server, client PC's, and printers. There is also a section on basic networking recommendations that will provide some performance gains.

Large Installation Multi Server Setup

A multi-server configuration is required for large/high volume installations of more than 40 users or more than 40,000 parcels.

- The specifications are for a dedicated server i.e. only used by *Vision 8*.
- The disk size specs account for one copy of the database. If multiple copies of the database are needed, the appropriate hard disk sizes should be used.
- The size of server or client hard drives should account for other applications and any future expansion.
- GIS, Associated documents, and JPEG's for images take up a considerable amount of space, 5000 images need 300MB at minimum. The below hard drive recommendations do NOT include sizing for GIS, Associated documents, and images as these file sizes can vary greatly.

Large Installation Configuration

Server	Minimum Hardware Requirements	Optimum Hardware for Performance (Recommended)
Database Server	- Intel Xeon E3-1220 v5 3.0 GHz w/8MB Cache 600 GB under RAID 5 <u>SAS</u> 16 GB RAM 1Gb Ethernet Network Card - Windows 2016 Server - SQL Server 2016 with Reporting Services	- Intel Xeon E5-2630 v4 2.2 GHz w/25MB Cache 2 Channel RAID card - Operating System under RAID 1 on 1st Channel 600 GB under RAID 5 on 2nd Channel <u>SAS</u> (for SQL Server) 32 GB RAM 1 Gb Ethernet Network Card - Windows 2016 Server - SQL Server 2017 with Reporting Services
Application Server	- Intel Xeon E3-1220 v5 3.0 GHz w/8MB Cache 600 GB under RAID 5 <u>SAS</u> 16 GB RAM 1Gb Ethernet Network Card - Windows 2016 Server	- Intel Xeon E5-2630 v4 2.2 GHz w/25MB Cache 2 Channel RAID card - Operating System under RAID 1 on 1st Channel 600 GB under RAID 5 on 2nd Channel <u>SAS</u> (for SQL Server) 32 GB RAM 1 Gb Ethernet Network Card - Windows 2016 Server

Desktop PC

The minimum operating resolution for *Vision 8* is 1366x768. For that reason, Vision Government Solutions is increasing its minimum recommended client monitor size to 20"

Minimum Requirements	Optimum Performance (Recommended)
- Intel Core i5-6500 3.2 Ghz 500 GB Hard Drive (7200 RPM) - Windows 10 (64bit) 16 GB RAM - Color Monitor 22" or plus 100/1000 MB Network Ethernet Card - Small UPS - Internet Access (At least one Client)	- Intel Core i9 500 GB Hard Drive (7200 RPM) - Windows 10 (64bit) 32 GB RAM - Color Monitor 22" or plus 100/1000 MB Network Ethernet Card - Small UPS - Internet Access (At least one Client) 16:9 aspect ratio is recommended

Printer Configuration

At least one client used for large printing jobs should have sufficient disk space, i.e. 4-6 GB.

Minimum Requirements	Optimum Performance (Recommended)
HP LaserJet P3015 Series Duplex Option (dn or x models) Legal tray 42 PPM (single sided no graphics)	HP LaserJet Enterprise 600 45 PPM (single sided no graphics)

General Recommendations

- Try to keep all application users on the same network backplane as the application server. The application server and database should reside on the same network backplane.
- If possible, use a 1000 MB connection or higher from the server to the network switch
- If possible, make sure your server hard drives are in a RAID configuration for fault tolerance

Internet/network infrastructure requirements for a cloud hosted solution:

- Internet circuit capable of 20 Megabits upload and download.
- Static public SNAT IP or a range of them for whitelists on our firewall.

- Firewall rules to allow unrestricted traffic to our URLs on ports 80,443,50000. This should include our hosted CAMA server url and reporting server url.
- If you use a layer 7 Web Proxy, we ask that you allow unrestricted traffic to our URLs on ports 80,443,50000. This should include our hosted CAMA server url and reporting server url.
- Your local antivirus must exclude CAMA installation folder and all of its contents from any security scans

Overview of *Vision 8* Security

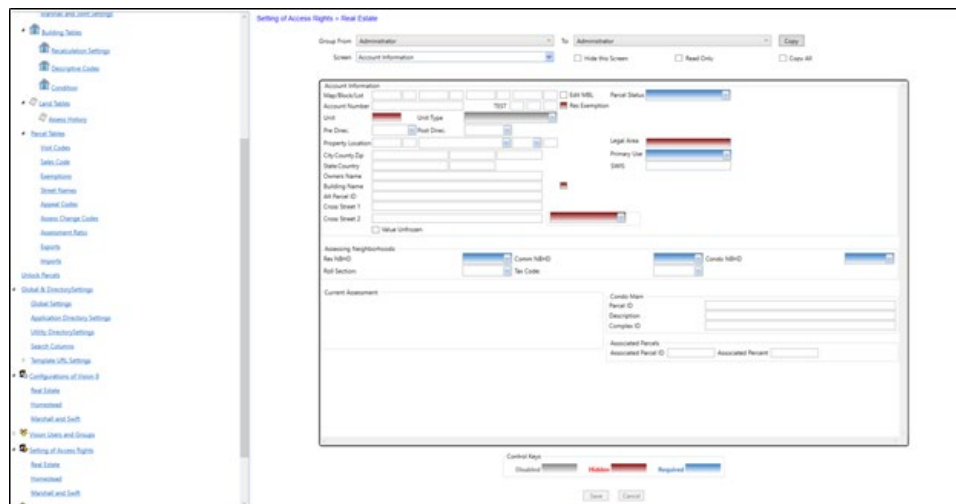

The Vision CAMA system includes a number of robust security features:

- **Password-Protected User and Administrative Access:** The system functions in *Vision 8* such as inquire, update, add and delete are controlled by a user identification code and password. The user can change their password online. Security also applies to all files and tables. Integration with Windows domain security is provided.

The application client includes a comprehensive application management user interface that controls all system metadata including configuration setting, users, groups, permissions, security, information hiding.

- **Password Policy Settings:** The Vision 8 system allows for Password Policy settings, such as:
 - **Complexity Settings,** allowing the administrator to require a minimum number of characters and specific types of characters (alpha, numeric, special)
 - **Password Life / History Settings:** optionally require users to change passwords at a certain cadence, and prevent users from re-using old passwords
 - **User Lock Settings** for sequential failed log-in attempts
- **Robust User Permissioning and Access Control:** Various user login levels can be established to define a set of user permissions, which control access to screens, fields and tables. The administrator can set user access to screens or to specific fields. Within each screen and field, the administrator can set "edit", "read only" or "disabled" permissions. The disabled field will remove the field from the user's view.

In addition to user level access rights, there are multiple levels of administrator access rights. Some of the permissioning levels include the ability to change other's user permissions, and/or the ability to change security level permissions. An example is the IT department can have the permissions to change and monitor security access, but not have the ability to change data within the application.

Sample Screenshot: Vision Admin Module

- **Comprehensive Audit Trail:** The Vision Audit trail captures every change made to the database by any user. The administrator can utilize this feature to track every aspect of the system. If desired, the system can report every incident of data manipulation, including the ID of the user who made the change and the date/time of the modification. This includes modifications to parcel data as well as table changes.
- **Inactivity Timeout:** Vision CAMA has an inactivity time-out setting, which allows the Administrator to set the number of inactive minutes before Vision 8 requires a password for re-entry. The time-out length is a database setting that applies to all users.

Vision will work closely with your team and with your community's IT during post-implementation training to configure and set-up security features, in accordance with your organization structure and community controls.

Tab IX: Development Methodology

This tab should include detail about how the Offeror approaches the ongoing development of features and functionality as well as support and prioritization processes for evaluation of reported bugs, enhancement requests, releases and upgrades. The Offeror must include, at minimum, the following descriptions as well as any other information that the Offeror believes is relevant:

A. Describe development methodology, including how best practices, UX design and usability are factored into the design and development process for proposed CAMA;

Vision CAMA has been developed for use with the SQL Server database architecture, currently SQL Server 2016 - 2019. Vision 8 CAMA, like all CAMA applications, is both a data and computation bound application and, as such, is designed to perform optimally on dedicated application and database servers.

The design of Vision 8 CAMA is composed of logical groupings of software components called layers. Layers buffer component dependencies increase reusability of components and enable efficient regression testing. Each logical layer is further broken down into several sub layers, with each sub layer performing a specific type of task. Vision's architecture maximizes maintainability of the code, optimizes the way that the application behaves when deployed in different ways, and provides a clear delineation between locations where certain technology or design decisions were made.

- *Interface Tier: Windows Presentation Framework Service: This layer contains the user-oriented functionality responsible for managing user interaction with the system and consists of components that provide a common bridge into the core business logic encapsulated in the business layer. This layer contains user interface subsystems for rich user dialogs for data manipulation, search, reporting, user adaptive screens, and GIS/Mapping and related imagery components. This layer is implemented in the C# programming language and uses Microsoft's Windows Presentation Framework (WPF) technology.*
- *Interface Tier: Application Interface Service: This layer provides services to other applications as well as consumes services from other applications. This layer exposes "public access" events, data entities, and functionality of the application for integration primarily with local site-specific third-party applications such as tax billing software, data warehouses, deeds/imaging, and public facing web sites. The layer is implemented using .NET's Windows Communication Framework and it is written in C#.*
- *Business Logic Service: This layer implements the core functionality and encapsulates the complex business logic. It consists of components, some of which expose service interfaces*

that other internal component callers use. Business Logic Service provides validation services for business objects and data entities manipulated by the presentation and interface services. The Business Logic Service also houses a series of CAMA calculation engines written in C#. The CAMA engines provide the core appraisal models in the Vision 8 CAMA solution. The engines are implemented using an object-oriented design and can be extended and specialized using standard object-oriented mechanisms.

- *Data Access Service: This layer provides access to data stored within the system, and data exposed from third-party systems or accessed through services. The data layer is implemented in C# and exposes generic interfaces and XML payloads via Windows Communication Framework that higher order components manipulate.*

Vision software utilizes Microsoft SQL Server to store all its data. Our development team uses Microsoft's Visual Studio 2019 and programs in the C# programming language although there are some supporting SQL scripts and stored procedures written in the specific SQL dialect of the database. Our software engineers utilize modern object-oriented and service-oriented architecture best practices and have designed the product as a layered services style application architecture.

Vision 8 CAMA is a Microsoft SQL based platform and has been created specifically for use with the SQL Server database architecture, currently SQL Server 2019. Vision 8 is written using C# programming language and Microsoft's Windows Presentation Framework (WPF) and Windows Workflow Foundation (WF) .NET technologies.

Vision's software is developed using the agile scrum methodology, VGSI uses a cutting-edge Agile approach defined as Value-Driven Development (VDD). Vision works in 2-week iterations that includes writing tests as well as product code. Automated testing is augmented by a manual QA process at the end of each development cycle.

The deployment and upgrade process for application instances running on-premise at customer locations generally involves someone from our technical support team connecting to the system remotely to run installers and database migration scripts for the server installation.

In addition, any client software running on local workstations will be updated at the same time. This process can also be accomplished by the customer's own IT staff if desired. In this instance, the software can be easily downloaded from our FTP server.

Modern Architecture/.net/Configurability: Vision strives itself on being one of the only CAMA vendors to have updated the platform architecture to the latest standards. Operating on MS SQL leveraging the .NET framework, you can be assured the architecture is compliant with today's standards. In addition, during the development of this latest version, Vision took the time to ensure the total configurability of each of the fields, dropdowns, screens and user rights. This level of configurability ensures useability for the end user and significantly reduces implementation time

associated with the risky process of developing code to align to implementation requirements.

Vision has the advantage of having a modern tech stack and architecture, while also having enough time in the state to ensure smooth operation and usability of the Virginia requirements. Vision understands that Valuation Processes and Legislative Demands in the Commonwealth, we have developed a CAMA system to fit these processes and demands.

B. Indicate whether resources are dedicated to the ongoing development of proposed solution;

Vision has an extensive team dedicated to the development of Vision CAMA. This includes a technical team led by our Chief Technology Officer, Jason Chin. Our team consists of multiple teams including; IT, Product Development, and Product Engineering. This team consists of nearly 100 individuals.

C. Describe the tracking system to report on and prioritize the product backlog of proposed features and functionality into product roadmap;

Vision uses Jira software to manage the Product Process from inception to final delivery.

D. Describe how customers are kept aware of product roadmap, and how much future visibility is available;

Vision has multiple avenues for publishing product roadmap releases. Releases are announced through our customer support team via user groups, mailing lists, support phone calls, and the Vision Customer Portal.

In addition, Vision hosts User Group Summits in each of our major markets, (including Virginia) in addition to training and peer to peer discussions, Vision leadership presents strategic plans to our users and meets with the Advisory Panels to receive recommendations for future enhancements.

E. Describe the tracking system for reporting on and prioritizing problems or bugs;

Vision uses Salesforce.com as our Customer Relationship Management platform, this tool has a full featured Client Support Module. Vision utilizes the Client Support Module to manage customer support cases, service issues and reported bugs.

F. Describe methodology for evaluation of problems and bugs and prioritization for hotfix compared to standard release;

Vision leverages the Salesforce.com Support Module to manage both customer support issues and platform bugs. Issues and Bugs are rated based on critical rank. Depending on the urgency of the issue, Vision practices the use of Hot Fixes if the situation requires as well as bug-fix deployment in standard releases.

G. Describe customer communications processes for new releases and provide sample of typical release notes;

All software releases are distributed by our customer support organization and made available on our ftp server. Releases are announced through our customer support team via user groups, mailing lists, support phone calls, and the Vision Customer Portal.

Our staff is always available to walk customers through the update process and to walk through any modified or enhanced functionality. We try to move customers forward to the most feature rich and stable versions of our product through the customer support process.

Should the City elect to deploy your CAMA on the Vision Cloud, Vision will work with the City to determine an update time and date to install any releases. These will be deployed on our cloud. Our team will work closely with you and your staff to determine optimal processes for versioning updates.

Vision CAMA release notes are considered confidential information, we will be pleased to provide these to you in a non-public forum.

H. Describe Offeror's process for receiving, evaluating, and implementing requests from customers for enhancements to the proposed system post implementation.

The content of future releases is typically determined from feedback from Implementation Services staff and our clients, as well as thought leadership sessions within the IAAO/VAAO organization. We maintain a product backlog of functional needs and requests. We utilize a cross functional team to drive our product management process where we prioritize the product backlog items and assign them to short development sprints. These sprints are combined into releases, tested, and deployed to customers.

Tab X: Subcontracting

Vision Government Solutions, Inc. will not use subcontractors for the CAMA segment of the project, . Should the City elect the Mobile option, our partner DataCloud Solutions would provide the implementation and support services under the Vision Contract.

Tab XI: Offeror History

Tab 11 – Offeror History. This tab should include a comprehensive narrative history of the Offeror’s firm, including the development of its experience in providing the solicited services. Explain the size of the firm, including years in business, office location, and legal structure. This section of the proposal must contain the following organizational information and data for the Offeror’s organization:

- A. If a corporation, include: state of incorporation; date of incorporation; principal place of business; Federal I. D. number; whether the corporation is a Subchapter S corporation; the name, position, address, and number of years in position of each officer and director; and the names of any affiliates, partner corporations, and subsidiaries;

Vision Response: Incorporated in Massachusetts on January 11, 1984, EIN 04-2867314, Principal place of business 1 Cabot Road, Suite 100, Hudson, MA 01749. Paul Smith, CEO, 4+ years, Katryna Cadle, COO, 4+ years, Diane Basile, CFO, 1 year. Wholly owned subsidiaries: Appraisal Research Corporation, Evaluator Services and Technology, Lexur Enterprises, Stonewall Technologies.

- B. If a limited liability company, include: state in which the limited liability company is organized; date organized; list of all managers of the limited liability company, including the name, telephone number, and years as a manager for each manager; and list of all members of the limited liability company, including the name, telephone number, years as a member, and membership interest for each member;

Vision Response: N/A

- C. If a partnership, include: state in which the partnership was formed; date formed; type of partnership; and list of all general and limited partners, as applicable, including the name, telephone number, years as a partner, and partnership interest for each partner;

Vision Response: N/A

- D. If a joint venture, include: date of formation; name and address of each joint venture partner; name and address of the principals of each joint venture partner; and percentage of interest of each joint venture partner;

Vision Response: N/A

- E. If the Offeror is not a corporation, limited liability company, partnership, or joint venture, this tab must identify the type of business entity and provide any pertinent information.

Vision Response: N/A

- F. This tab should state whether the Offeror has operated under another name within the past ten years and, if so, the other name, the number of years in business under this other name, and the State Corporation Commission identification number under this name.

Vision Response: Vision Government Solutions has operated under this name for more than ten years.

- G. This tab must state whether the Offeror is a subsidiary or affiliate of another organization and, if so, the name and address of each parent or affiliate organization.

Vision Response: Vision Government Solutions, Inc. is 100% owned by Hemi Topco, LLC, 1 Cabot Road, Suite 100, Hudson, MA 01749.

- H. This tab must include the following statement, signed by the Offeror's contractually binding authority:

"By submitting its proposal, Vision Government Solutions, Inc. (the "Offeror") certifies and represents the information the Offeror provides in response to this Request for Proposal is accurate and complete as of the date of such submission. If the Offeror provides no information in response to any of the requirements of this Request for Proposal, then the Offeror, by submitting its proposal, certifies and represents such requirements do not apply because no information exists that would respond to the requirement. The Offeror further covenants that, during the time between the submission of its proposal and the City's announcement of its decision to award the Contract, the Offeror will furnish the City with any changes or additions to such information necessary to ensure this information remains accurate, complete and up-to-date.

Executed By:

Diane Basile
Chief Financial Officer
Vision Government Solutions

Vision Company History

Vision is proud to have served Assessing Departments since 1985, with 35 consecutive years of business operations.

In that time, we have served more than 500 jurisdictions across the United States, ranging from 250 parcels to 1.2 million parcels.

Vision's full portfolio of services includes CAMA software, Tax Administration and Collection software, software implementation and maintenance services, and Appraisal services, providing a full-service firm for all Assessing Department needs.

Vision is proud to be specially positioned as the only vendor small enough to hear your voice at the highest level of our organization, while still providing the stability, longevity, and continued product investment of a larger national firm.

Our Commitment to Customers: The Vision Partnership Approach

Vision commits to building long-term partnerships built to last.

We are especially proud to share that more than 50% of our customers have been with Vision for more than 20 years. In addition, of our 500+ customers, 370+ have upgraded to our latest platform, *Vision 8*, in the last two years (and growing).

This high adoption is rooted in user-friendly software and dedicated customer support, which our team provides at every stage, from implementation to training to long-term support. Vision is proud to offer white-glove customer service, complete with a dedicated Customer Success Team, a fully staffed Customer Support Help Desk, online help resources, annual regional and national User Groups, and monthly training webinars, among many more continuous learning options.

As an example, we build customer collaboration into every step of the implementation process, from providing a beta database review period to collaborating on our online Project Management platform, Basecamp. This is why every Vision implementation in the last two years has been completed in 6 months or less!

OUR WINNING COMBINATION

- ✓ INDUSTRY LEADING TECHNOLOGY
- ✓ FULLY INTEGRATED MOBILITY
- ✓ STRONG CLIENT BASE
- ✓ PROVEN IMPLEMENTATION METHODOLOGY

A Full-Service Firm for Longevity

An experience and qualified firm, Vision has demonstrated longevity and financial stability, with:

- 1) More than **35 years of consecutive business operations** (in business since 1985).
- 2) The ability and commitment to provide **future maintenance and services** (Vision is a full-service firm offering both desktop and mobile products, installation, implementation, training, and continuing service under a sole source agreement).
- 3) A broad and **skilled staff of more than 300 employees**, including a Data Engineering team, Product Development Team, a fully staffed IT department, a Project Implementation team, a Customer Support team, and an **Appraisal team** with more than 170 members who complete over 100 reassessments per year.
- 4) A deep commitment to continuous improvement of implementation efficiencies. In fact, **every Vision implementation in the last two years has been completed in 6 months or less.**
- 5) Proven experience in providing **similar implementation services** to comparable organizations of the same size, with similar scope of functionality and technical complexity. Vision has 35 customers in Virginia running Vision CAMA.
- 6) The average Vision software customer has been with us for **more than 20 years**, demonstrating our commitment to long-term partnership.
- 7) The broader Vision community benefits from the financial stability and product innovation driven by **flagship Vision users** such as Washington, D.C. and New York City.

Tab XII: CAMA Functional Requirements

Please see following page for Exhibit A - Functional Requirements

Exhibit A

Offeror Response F = Fully Provided "Out-of-the-Box" (no configuration needed) C = Fully Provided with user based Configuration (no changes to underlying source code; configuration set by user within applicat CP = Fully Provided with technical Configuration (no changes to underlying source code: configuration set outside of the applicati D = Custom Development to Underlying Code RT = Can be created by customer with customer report generator, ad hoc report, or built in analytics tool OR = On Companies Product Roadmap (please include estimated availability date) TP = Accomplished through Third Party Software (Identify the tool and any additional licensing commitments and costs) NA = Not Available					
--	--	--	--	--	--

*Requirement ID - Used only to uniquely identify each requirement for internal purposes.

REQ ID*	Requirement Description	Response	Offeror	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
Appeals						
1001	Ability to maintain a log of appeal-related call-ins by the property owner after the assessment notices have been sent out, as well as the principal reasons for the inquiry.	F				Appeal Related calls can be captured in the Appeals Tracking Screen or Tax Payer Correspondence Screen
1002	Ability to open an appeals appraisal case.	F				
1003	Ability to maintain a time stamp on an appeal-related inquiry, as well as any additional remarks on the call (ex. complexity of the inquiry, did the property owner communicate with an appraiser?)	F				
1004	Ability to maintain a record of all documents sent to the property owner as part of an appeals case.	F				Via Associated Documents
1005	Ability to import scans of the completed appeals package and supporting evidence to an open appeals case.	F				Scanned Documents can be stored in Associated Documents on the corresponding parcel
1006	Ability to track the date a completed appeals package is received.	F				
1007	Ability to assemble a list of appeals to be examined by the Board of Equalization (BOE).	F				
1008	Ability to create a comp adjustment report as part of the appeals list to be examined by the Board of Equalization (BOE), to include maps and locations of the parcel (or group of parcels) in question.	F				
1009	Ability to tag an appeals case as needing additional inspection, and to track and notify of appointment times if an inspection is set.	F				
1010	Ability to add remarks to an open appeals case, noting the date and any comments from a physical inspection of the appealed property.	F				
1011	Ability to identify an appeal to be addressed by the Board of Equalization (BOE).	F				
1012	Ability to open an appeals appraisal case and automatically assign an appeals case to the appropriate appraiser.	F				Once the appeal is opened on the subject parcel the appriaser assigned to that parcel will assume the apprea;
1013	Ability to report in appeals cases: status (open, closed), BOE status, appraiser, outcome (no-change, \$ change, original vs. revised values), change reason where applicable.	RT				
1014	Ability to send a property owner an assessment appeal package by mail or email.	RT				The assessment package package can be mailed or printed to PDF and sent electronically
1015	Ability to allow a property owner to file an assessment appeal electronically, email or secure on-line portal	CP/TP				Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1016	Ability to identify an appeals appraisal case needing completion within a user-defined due date.	RT				
1017	Ability to send a letter to the property owner if the appeal is not completed 30 days prior to the 1st BOE meeting	RT				
1018	Ability to open an appeals appraisal case and manually assign an appeals case to the appropriate appraiser.	RT				
1019	Ability to generate an authorization letter to the property owner of an appeals case who has requested for their appeal to be submitted to the Board of Equalization (BOE).	RT				
1020	Ability to generate a letter to a property owner regarding the results of their assessment appeal to include any assessment changes to the appeal, if applicable, on completed appeals.	RT				
1021	Ability to generate a report listing all the appeals cases forwarded to the Board of Equalization (BOE), as well as their status and the final decision if the appeals case is completed/closed. [BOE report (April)]	RT				
1022	Ability for the Hearing Schedule module to automatically create hearing panels and parcel assignments to panels based on user defined criteria.	F				

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1023	Ability to create a hearing schedule listing all hearings scheduled for each hearing panel.	RT			
1024	Ability to schedule a hearing automatically for the next available hearing date.	N/A			Vision maintains Hearing dates within the platform, however our users use Microsoft Office Groups to Manage Hearing Dates/Times and locations.
1025	Ability to schedule a hearing for a specific date and time.	F			Vision maintains Hearing dates within the platform, however our users use Microsoft Office Groups to Manage Hearing Dates/Times and locations.
1026	Ability to create a form letter for each owner indicating the date and time for which the hearing has been scheduled.	F/RT			Vision has a Mail Merge tool built into the Report Writer that can accomplish this task.
1027	Ability to create a postcard for each owner indicating the date and time for which the hearing has been scheduled.	RT			Vision has a Mail Merge tool built into the Report Writer that can accomplish this task.
1028	Ability for taxpayers to attach electronic documents to their online appeals.	CP/TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1029	Ability for taxpayers to attach photos to their online appeals.	CP/TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1030	Ability to automatically populate online appeal forms with required data from the CAMA system.	CP/TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1031	Ability to prevent taxpayers from submitting online appeal forms if required information is omitted.	CP/TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1032	Ability to add an indicator on each parcel indicating whether the parcel's value has been appealed before.	F			
Assessment Notices					
1101	Ability to generate assessment notices on an on-demand basis for current year plus five previous years.	RT			
1102	Ability to post assessment values at year-end and generate assessment notices.	RT			
1103	Ability to generate annual assessment notices for all properties on record, or only for parcels where the value or ownership has changed.	RT			
1104	Ability to re-print annual assessment notices on an ad-hoc basis.	RT			
1105	Ability to generate supplemental assessment notices reflecting the current year and prior three years' assessment values.	RT			
1106	Ability to have the option of sending annual assessment notices based on user-defined criteria, such as properties with a change in value and properties with a change in ownership but no value changes.	RT			
1107	Ability to send assessment notices to property owner either through mail or any other form of communication (ex.RVA.gov website account, email).	F/RT			Vision has a Mail Merge tool built into the Report Writer that can accomplish this task.
1108	Ability to store records or images of any assessment notices on a parcel from the current and previous years, according to regulatory guidelines.	F			
1109	Ability to print a random sample of assessment notices and preview the notices prior to publication/mailling, for quality control purposes.	RT			
1110	Ability to store international mailing addresses.	F			
1111	Ability to identify when the notices are ready for printing.	F			
1112	Ability to mass print assessment notices.	RT			
1113	Ability to send consolidated assessment notices to either the owner of the main commercial parcel or individually to each of the out-parcel's designated recipient separately.	F			
1114	Ability to manually or automatically produce an updated assessment notice if the current or prior years' assessed value is changed based on user-defined rules.	RT			
1115	Ability to generate the Assessment facts spreadsheet which compares the current year's assessment values and parcel count to the previous year's assessment values and parcel count. [Assessment facts]	F			
1116	Ability to generate a report detailing changes to assessed property values for a user-defined date range, which will result in a supplemental or adjusted tax bill. [Includes: change reason code, date, supplemental assessment grouping, exoneration] [Changes in assessed value report]	F/RT			Standard Growth report
Audit					
1201	Ability to establish a quality control point to check on whether the value adjustment is for current or projected assessment value.	F			
1202	Ability to identify an improvement/modification to a parcel warranting a projected value adjustment versus an improvement/modification leading to a current value adjustment.	F			

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1203	Ability to create and manage workflow items including task, assignment, status, approval, and routing integrated with the application (i.e., not external emails).	F/TP			Vision accomplishes the management of Assignments (as related to field inspections) with the recommended Mobile Module
1204	Ability to view historical tracking of closed cases to identify areas for improvement.	F			
1205	Ability to query workflow items by selected criteria (ex. Person, type, assignments, etc.)	F/TP			Vision accomplishes the management of Assignments (as related to field inspections) with the recommended Mobile Module
1206	Ability to perform a quality assurance assessment on a case or group of cases at any specified point(s) within the case flow process, where the review should be based on a set of user-defined logic rules that trigger the process.	F/RT			
1207	Ability to produce transaction and balancing reports.	RT			
1208	Ability to verify and update usable sale and arm's length transaction indicators as part of the appraisal.	F			
1209	Ability to view and track the following information to all cases: review date, reviewer, person assigned to case.	F			
1210	Ability to tag a new appraisal case for correction purposes, and allow the user to update the assessment for the current year and, if applicable, have the system automatically calculate the value changes for one or more of the previous 5 years from the effective date.	F			
1211	Ability to view an individual record or a list of records for comparison of projected values and current assessment values.	F			
1212	Ability to view change history on the workgroup.	F			
1213	Ability to generate audit reports, sorted by reason code, indicating summary changes in current and projected values, as well as reason code changes and other identified data elements to audit.	F/RT			
1214	Ability to send audited cases back to appraiser for error correction.	F			via Vision Audit Reporting
1215	Ability to send an open case to Audit for additional quality control, after supervisor approval, based on a set of user-defined criteria.	F			Vision has Three distinct audits to manage quality control. In addition, Vision has extensive Quality Control and Audit Capabilities as standard functionality in the recommended field inspection module.
1216	Ability to identify, for quality assurance purposes, mass parcel updates based on the following user-defined criteria: outliers, percent increase, equity on subdivisions/multiple parcels/user-selected parcel group, lot values.	F			
1217	Ability to define randomized samples of cases or parcels, based on user-defined criteria, to be included in the REA's quality assurance program.	F/RT			
1218	Ability to produce quality control reports on active appeals, value changes, new constructions, and all other cases affecting the billing rate of the parcel.	F/RT			
1219	.Ability to generate a report on the reason codes for records containing a factual error. (Includes: erroneous record count, percent of erroneous records detected in open/approved cases, grouping by state code (residential/commercial classification))	F/RT			
1220	Ability to identify any individual parcel as needing a final end of year review after its initial yearly mass valuation.	F/RT			
1221	Ability to track the appraiser worksheets that correspond to a particular parcel or group of parcels.	F/RT			
1222	Ability to access mass appraisal report at the parcel detail level.	F			
1223	Ability to generate a summary report of all assessed property values for a given year. [Value Summary report]	F/RT			
1224	Ability to develop and publish CAMA dashboards with drill-down capabilities in order to enhance analytics	F			Vision Analytics
1225	Ability to generate a performance report on each appraiser on a weekly basis. (Includes: appraiser name, number of parcels assigned to an appraiser, total number of completed parcels, total number of changed parcels, percent of changed parcels) [weekly production report by appraiser]	F/RT			
1226	Ability to generate a case workload analysis report, highlighting essential statistics for a given date or date range. (Includes: number of cases worked, type of case, assigned appraiser, length of time to complete case, completed within required timeframe (Y/N)) [Case workload analysis report]	F/RT			
1227	Ability to generate a report of non-usable sales for audit check purposes. [non-usable sales report]	F/RT			

1228	Ability to perform a quality assurance assessment on a case or group of cases for any specified points within the case flow process, through an overall review of the case details.	F/RT			
1229	Ability to maintain version control of documents and reports created.	F/RT			
1230	Ability to print previous versions of a document or report.	F/RT			
REQ ID* Requirement Description Response Offeror Level of Effort H/M/L*** Proposal Page Number** Offeror Comments					
Case Management					
1301	Ability to have an approval process for all changes to assessed values.	F/RT			
1302	Ability to capture appraisal approval date, authorizing personnel, reason code and any associated notes justifying the reason for the approval.	F			
1303	Ability to monitor active/open cases and manage workflow.	F/RT			
1304	Ability to manually modify the parcel zoning codes on one or multiple parcels.	F			
1305	Ability to require a field inspection for a sale dependent on the sale-to-assessment ratio.	F			This is accomplished with Reporting via Sales Analysis
1306	Ability to print appraiser worksheets by tax id, subdivision, neighborhood, building use code, work area and address range in any combination for an individual parcel or group of parcels.	F			Vision has the ability to generate Field Worksheets from the report writer based on user defined criteria, or one can generate work lists electronically and distribute to directly to a field appraiser with the recommended field mobile module.
1307	Ability to select multiple cases and print associated appraiser worksheets.	F			Vision has the ability to generate Field Worksheets from the report writer based on user defined criteria, or one can generate work lists electronically and distribute to directly to a field appraiser with the recommended field mobile module.
1308	Ability to view and report on the status of final inspection cases, as well as final inspection case details, based on user-defined criteria.	F/RT			Vision has the ability to generate Field Worksheets from the report writer based on user defined criteria, or one can generate work lists electronically and distribute to directly to a field appraiser with the recommended field mobile module.
1309	Ability to have a summary view of outstanding final inspections with assignments and status, filtered by permit type and supervisor.	F/RT			Vision has the ability to generate Field Worksheets from the report writer based on user defined criteria, or one can generate work lists electronically and distribute to directly to a field appraiser with the recommended field mobile module.
1310	Ability to create a Board of Equalization package for a given set of parcels.	F/RT			
1311	Ability to set user-defined parameters (ex. sales-to-assessment ratio) to determine if a sale needs to be inspected.	F			via Sales Analysis
1312	Ability to automatically open a case based on the following factors: transfer, final inspections, parcel re-zoning, external appraisal request, internal appraisal request, rehabilitation, routine inspection, appeal.	C/RT			Vision has the ability to generate Field Worksheets from the report writer based on user defined criteria, (however, this is a manual process, or one can generate work lists electronically and distribute to directly to a field appraiser with the recommended field mobile module.
1313	Ability to manually open a residential appraisal case based on input from internal sources, such as a call-in by a source within the City.	F			
1314	Ability to manually open a residential appraisal case, and identify the reason for opening it.	F			
1315	Ability for cases to automatically capture, at a minimum, the person opening the case, the person assigned to the case, the date the case was opened, as well as the reason the case has been opened.	F			All entries made to Vision CAMA are captured in a parcel level audit and database level audit log.
1316	Ability to relate any appraisal case to one or more parcels (ex. re-zoning case, splits).	F			
1317	Ability to allow other Richmond City agencies to open a case (ex. fire department).	F			
1318	Ability to open a case, communicate current status of parcel, and add initial notes to case before sending to appraiser	F			
1319	Ability to open a "draft" case, where further information on the case is still pending before being finalized.	F			
1320	Ability to see open cases which haven't been assigned.	F/RT			
1321	Ability to generate report on case type and age.	F/RT			
1322	Ability for appraiser to add items to the inspection checklist on an ad-hoc basis, such as MLS review parameters.	F			The recommended Mobile Module is full featured, however, it is pre-configured, inspection criteria are fixed not added ad-hoc.
1323	Ability to view cases based on their age, type, assigned appraiser, case priority.	F/RT			
1324	Ability to produce reports on the number of cases open, closed, the age of the cases, and the appraiser assigned to them.	F/RT			
1325	Ability to add supervisor notes, in the case the valuation is rejected.	F			
1326	Ability to send case back to appraiser if value adjustment is rejected.	F			Vision's recommended Mobile Module has extensive Quality Control module that allows the reviewer to send inspected properties back to the inspector.
1327	Ability to add remarks to case.	F			
1328	Ability to allow the supervisor to re-assign cases on an individual or mass scale.	F			
1329	Ability to track who has sent their survey back and who hasn't, and to track attempt to send response twice.	F			
1330	Ability to identify which properties need surveys sent out, sorted by use code.	F			
1331	Ability to open an appraisal case due to zoning code changes.	F			

1332	Ability to add comments or remarks on a parcel record justifying the reason for further review.	F			
1333	Ability to automatically open a case based on a zoning change.	C/RT			
1334	Ability to manually open a case, based on a zoning change identified in the Planning interface (ELM).	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1335	Ability to allow a supervisor to open a mass appraisal case with pre-defined appraisal assignments (such as work area and responsible appraiser), and assign the case to the appropriate appraiser.	F			Vision has the ability to generate Field Worksheets from the report writer based on user defined criteria, or one can generate work lists electronically via user defined criteria and distribute to directly to a field appraiser with the recommended field mobile module.
1336	Ability to access MLS listings while processing an individual or mass residential valuation.	N/A			You can view MLS on an additional screen should you desire, Vision is not linked as we do with GIS. MLS/ Zillow & Realtor.com have all declined to allow CAMA providers access to their platform as they do not want to be associated with a tool that works to assess taxes.
1337	Ability to manually open a case using information on tentatively and finally approved plans.	F			
1338	Ability to assign commercial mass appraisal cases for land valuation, building valuation, or both.	F			
1339	Ability for a supervisor to re-open a closed appraisal case.	F			
Correspondence					
(Note: includes requirements for Commercial Surveys, Correspondence. Other Correspondence requirements may be included in other groupings as					
1401	Ability to capture commercial income&expense survey data.	F			
1402	Ability to produce commercial income&expense survey questionnaire and cover letter for mass mailing.	F			Using the City of Richmond's I& E survey, Vision can populate the required cover letter data.
1403	Ability to allow the commercial property owner to complete commercial income&expense survey online.	TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1404	Ability to have online surveys for different property types.	TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1405	Ability to generate statistical reports on commercial property based on income&expense reports.	F/RT			
1406	Ability to check if survey sent in is adequate.	F/RT			Vision CAMA has the ability to allow the user to Report on imported data and conduct quality control reviews.
1407	Ability to integrate with Laserfiche to scan income & expense surveys for a commercial property.	F			Via Vision Smart Links or Directly into Vision using Associated Documents by bypassing the Laserfiche platform.
1408	Ability to email standard and ad hoc reports from within the reporting tool	F			From the reporting tool the data can be exported for electronic distribution.
1409	Ability to communicate with builders on the plans of a building or multiple buildings under development within a parcel or group of parcels.	F			Requires the user to use their own email platform.
1410	Ability to communicate with surveyors on the geographic layout of a parcel or group of parcels, as needed.	F			Via Vision Desk Top GIS or Public Facing Web Portal
1411	Ability to communicate with the property owner for feedback on customer service, through issuance of the customer service survey.	F			Requires the user to use their own email platform.
1412	Ability to prevent document mailings for each account with a "bad" mailing address based on configurable criteria.	F/TP			The Functionality exists within Vision to prevent mailings due to known bad addresses, however The City will need to use a provider like USPS that offers address verification, however the City may find other solutions that better fit the needs. Once the addresses are exported out and corrected, Vision can create an import to bring the corrected addresses back into the system.
1413	Ability for authorized users to configure the criteria for preventing document mailings for each account with a "bad" mailing address	F			Vision can track bad addresses and the City can eliminate addresses with 'bad address' flags from the mailing lists.
Customer Support					
(Note: Other Customer Support requirements may be included in other groupings as appropriate.)					
1501	Ability to provide real estate information to a third party, based on user-defined criteria, on a routine or ad hoc basis.	F/RT			
1502	Ability to communicate with the property owner through email or web account on any information pertaining to a parcel's details or valuation.	F			Parcel Data can be presented on a public facing Web Portal, or the Appraiser can print Property Cards to be distributed via email to the taxpayer.
1503	Ability to access online or inline user documentation for different applications within the solution (ex. user guide, application FAQs).	F			
1504	Ability to log and track all inquiries made by external or internal customers.	F			
1505	Ability to attach and view all information sent to a customer as part of a customer service inquiry.	F			
1506	Ability to collect customer information via the City's website and have that data passed to the CAMA system for processing (ex. Request for parcel data correction).	F			Vision can import data via custom data import provided the City has configured CAMA with matching fields. This data can also be manually inputted or electronically attached using the included Associated Documents feature.
1507	Ability to process FOIA requests for a certain reason, with a certain due date, and set a tickler reminder.	RT			FOIA data can be exported via the Vision Report Writer. Due dates and reminders would be a manual process
Land Book					
1601	Ability to review and finalize real estate values prior to creation of the land book.	F			

1602	Ability to generate a report of assessment information to validate the value recorded in the land book. (Includes parcel count and values for: CDAs, SADs, taxable properties, tax-exempt properties)	F			
1603	Ability to integrate with the Department of Finance in order to send annual land book assessment values for annual tax billing purposes.	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1604	Ability to indicate the final assessment value for the notice land book and for the annual land book submissions.	F			
Operational					
(Note: Includes requirements for Document Management, Historical Data Tracking, Notes&Remarks, Mobile Capability, Security Permissions.)					
1701	Ability to maintain a history of all changes and approvals for a parcel.	F			
1702	Ability to view and maintain records on a parcel for the current year, the projected year, and prior 19 years. The record sets should include all of the parcel's detail records used to create assessments.	F			
1703	Ability to create custom CAMA interface templates to satisfy data presentation needs for various end user roles. (Aspects of this feature might include modular/drag and drop design editors, queries/scripting, user defined aggregated fields, etc.)	F			
1704	Ability to maintain current year plus nineteen-year history of sketches.	F			via historical year databases
1705	Ability to store multiple years' of commercial income&expense survey data.	F			
1706	Ability to interface with the permitting system (Energygov) to view a permit based on user-defined criteria (ex. no auxiliarypermits).	F/CP			Vision has a standard building permit import, however a custom import can be created to fit the needs of the City of Richmond. Permits can be attached via the standard Associated Documents Feature.
1707	Ability to view sub-fact information linked to each parcel's details.	F			
1708	Ability to view a historical record of sub-fact information for each parcel record for at least the previous 5 years.	F			Via historical year databases
1709	Ability to identify who has access to run and view different reports.	F			
1710	Ability to access FAQs or related documentation on the CAMA solution features.	F			
1711	Ability to purge selected parcel data by tax or fiscal year, according to user-defined timeline, while meeting VA state retention guidelines.	F			Vision does not have an End User purge feature. Vision can provide purge services should the City elect to purge documents. In addition, Associated Documents can be purged by the end user if the City elects to store Associated Documents in on a City Shared drive.
1712	Ability to take a snapshot of what information was prior to case being opened or appraisal process starts.	F			
1713	Ability to add external web links to case.	F			External web links can be added to the case notes
1714	Ability to update parcel records in real time while in the field.	F			This is achieved with the recommended Mobile Module.
1715	Ability for appraiser to work online and offline from the CAMA system.	F			This is standard functionality within the recommended Mobile Module
1716	Ability to allow remote use of system.	F			This is accomplished with either VPN access to CAMA or via the Mobile Module.
1717	Ability for appraiser to print out an inspection cover sheet (electronic or paper-based).	F			
1718	Ability to add remarks to parcel during inspection.	F			
1719	Ability to keep a historical record of valuation approaches.	F			
1720	Ability to assign and include detailed workload expectations on a parcel or a group of parcels.	F			
1721	Ability to restrict survey data access based on security controls.	F			
1722	Ability to upload an aerial image of a parcel and attach it to the parcel details.	F			
1723	Ability for the appraiser to create a comprehensive set of mass valuation notes as part of their mass appraisal process, as attachments to the case.	F			
1724	Ability for a supervisor to review all appraiser notes for each mass appraisal group.	F/RT			
1725	Ability for a supervisor to view log notes for their approval review and either reject the proposed valuations or approve the proposed valuations.	F			
1726	Ability to add a flag to restrict owner information from being displayed on the website.	F			
1727	Ability to have a bar code associating to parcel ID and printed on all correspondence as needed.	OR			Estimated Q4 2023
1728	Ability to view permits on a mobile device, and make comments on the permit when onsite.	F			Vision has the ability to manage permit data and write notes to Vision CAMA Permit data via the recommended Vision Mobile Module.
1729	Ability to retain notes and remarks on a parcel's appraisal, where the remarks can be purged at a user-defined date.	F/NA			Vision has the ability to make and retain notes. However, Vision does not have end user Purge capabilities, the Vision Support team would work with the City to purge data
1730	Ability to allow the CAMA system to automatically capture subfacts information on mass residential appraisal cases, based on the published subfacts rules for subdivisions. See subfacts guidelines attachment.	F			via Vision Mass Update
1731	Ability to require Director approval for an appeal of a mass residential appraisal case, where the change in value is not based on the correction of parcel data.	F/C			via configuration of Reason for Change Codes

REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1732	Ability to transfer notes & remarks from the parent parcel to new parcels in the case of parcel splits and combinations.	F			
1733	Ability to view and attach a Certificate of Assessment letter to the assessment notice before sending to the appropriate property owner.	F			
1734	Ability for authorized user to create custom user roles with specifically defined privileges to CAMA modules, utilities and individual data fields.	F			
1735	Ability for authorized user to create access accounts for other users and assign roles, user names, passwords and account expiration dates.	F			
1736	Ability for authorized user to track user log in/out times over a specified timeframe.	F			
Parcel Maintenance					
(Note: Other Parcel Maintenance requirements may be included in other groupings as appropriate.)					
1801	Ability to record improvements or modifications to residential buildings which lead to an adjustment to the building's projected value for the next year.	F			
1802	Ability to track the date a building permit final inspection occurs.	F			
1803	Ability to query parcels by selected criteria (owner name, owner account, property address, tax id, legal subdivision, commercial use).	F			
1804	Ability to create a custom search query to view parcels.	F			
1805	Ability to identify, search, access and maintain records of parcels with special assessment district codes and CDAs.	F			
1806	Ability to display parcel change history.	F			
1807	Ability to identify land segments and buildings as tax exempt, including partially tax-exempt parcels.	F			
1808	Ability to maintain a "master" record on a condominium, where the master record is not considered an active parcel, but would consolidate all individual condominium tax records and accessory improvements (ex. Rec building, pool).	F			
1809	Ability to view and maintain land segment information.	F			
1810	Ability to verify the total acreage of all land segments based on the deeded acreage or the GIS calculated acreage if deeded acreage is not available.	F			
1811	Ability to link appropriate land segments to commercial buildings for calculation of income approach to value and sales comparison approach. This would include the parcel where the building resides as well as another parcel.	F			
1812	Ability to capture additional land information: flood plain acreage amount and percentage, Resource Protection Area (RPA) amount and percentage, zoning amount and percentage, major easements' amount and percentage.	F			
1813	Ability to capture the number of tentatively approved and actually approved lots for any parcel.	F			
1814	Ability to view a list (summary) of all main buildings on a parcel (year built, building use, model, value and building sequence) when viewing the parcel's details.	F			Reviewing building data requires toggling from one building to another
1815	Ability to add, update, transfer, delete and view main physical characteristics on a building.	F			
1816	Ability to capture specific building segment information pertaining to building elements associated with value, such as square footage, value per square foot, quality, exterior code, cost adjustments, architectural adjustments, percent complete.	F			
1817	Ability to require comments justifying edits to the following information: cost adjustment, architectural adjustment, economic and functional obsolescence, land segment adjustments, additional physical depreciation, and adjustments to effective age of building.	F			
1818	Ability to identify a sketch segment/component for current valuation and/or projected valuation of a building.	F			
1819	Ability to view a list (summary) of all commercial buildings on a parcel (year built, building use, building name, model, value and building sequence)	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments

1820	Ability to add building information for valuation of partially complete structures using a percentage.	F			
1821	Ability to add, update, transfer, delete and view miscellaneous improvements on a parcel.	F			
1822	Ability to require adding and displaying comments for adjustments to key data elements on a parcel.	F			
1823	Ability to display a summary view of the Assessment History on a given parcel.	F			
1824	Ability to access and view a historical snapshot of a parcel for any previous given year.	F			
1825	Ability to view all ownership history of a parcel.	F			
1826	Ability to display current and historical owner address information.	F			
1827	Ability to capture multiple owner addresses, with one effective address for a given time.	F			
1828	Ability to apply batch changes to any information on a group of parcels where necessary (i.e. neighborhood number, model selection, cost year, depreciation, market adjustment), using input files, SQL commands or expression builders, for the purposes of revaluation, valuation of new lots, and data cleanup.	F			
1829	Ability to create a new parcel record with a reason code and a description on the created parcel (City-initiated, owner-initiated, owner-initiated family).	F			
1830	Ability to transfer a given parcel to a new owner account and maintain an owner history record.	F			
1831	Ability to search and select a current owner to assign to a given parcel.	F			
1832	Ability to have multiple owners assigned to a parcel, with one owner identified as the primary owner.	F			
1833	Ability to add, edit and view all property owners for a parcel.	F			
1834	Ability to add an indicator on each owner indicating whether they wish to receive correspondence.	F			
1835	Ability to view and enter the following information on a transfer case: review date, reviewer, notes and reason code (recommended by Dept of Taxation) related to qualification status of sale.	F			
1836	Ability to display sale to assessment ratio at time of sale.	F			Via included Vision Sales Analysis
1837	Ability to identify a transaction as foreclosure.	F			
1838	Ability to view and search owner account by account number, name, parcel number, address and legal description.	F			
1839	Ability to manually create new parcels, splits and combinations.	F			
1840	Ability to keep track and view all parents and siblings of each individual parcel when parcels are split or combined.	F			
1841	Ability to select a parent or child parcel to open corresponding parcel details.	F			
1842	Ability to update current assessment plus five previous years.	F			
1843	Ability to copy corrected sketches and descriptions to a parcel for the prior years being adjusted.	F			
1844	Ability to identify parcel records subject to further review after a Pictometry update.	F			
1845	Ability to access individual parcel details from a summary list.	F			
1846	Ability to view summary information, based on user-defined criteria, for a selected group of parcel records, including parcels containing multiple buildings.	F			
1847	Ability to perform one or more changes (incremental data submission, percentage base, or value replacement) to an individual or a mass group of records based on specified criteria for either residential or commercial properties (i.e., model selection, cost year (MS), depreciation, market adjustment, neighborhood number.)	F			
1848	Ability to view results of proposed changes to a group of parcels before final submission of the changes for review/approval.	F			
1849	Ability to identify and capture the following subfac information: land values & changes from previous year, number of sales, lot value range, year built range, story type, overall quality of improvement, cost adjustment, architectural adjustment, valuation approach, number of active listings etc.	F			
1850	Ability to add, modify and delete codes and their descriptions used towards valuation of a building or parcel.	F			
1851	Ability to access details from a list of search results on a parcel.	F			
1852	Ability to map changes in parcel description, including any changes to the number of parcels (ex. parcel split).	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1853	Ability to track parcel modification including what, when the modification occurred, and who performed the change.	F			

1854	Ability to create and update new parcels.	F			
1855	Ability to warrant a void or change if the modification is "illogical".	F			
1856	Ability to add/update/delete improvements or modifications to parcel.	F			
1857	Ability to transfer improvements from one parcel to another.	F			
1858	Ability to keep the old sketch in cases where a building may be demolished.	F			Sketch can be printed to a jpeg and stored in associated documents. Sketches will be available in the prior years databases as well.
1859	Ability to update parcel record while in the field subject to inspection.	F			
1860	Ability for appraiser to add detailed notes to a case with regards to their assessment prior to the assessment finalization or the close of the case.	F			
1861	Ability to attach any copies of emails to a parcel or case.	F			
1862	Ability to define and update residential and commercial market areas, based on geographic area and each use of its own sub-market areas.	F			
1863	Ability to view sales comp data based on user-defined area (subdivisions).	F			
1864	Ability to view historical information on a parcel.	F			
1865	Ability to capture partial value and proposed complete future value (based on plans and specs). Unique to commercial to have a 3rd value.	F			
1866	Ability to manually input values as override.	F			
1867	Ability to link parcels in to a logical grouping related to the master parcel valuation method.	F			
1868	Ability to split a building value between two parcels.	F			Via overrides
1869	Ability to add the renter's name and address information to out-parcels.	F			
1870	Ability to group individual parcels for mass changes to the parcels' information.	F			
1871	Ability to capture and view multiple zoning codes on a parcel.	F			
1872	Ability to group commercial parcel into "Economic units" if all parcels are owned by a single entity.	F			Via associated parcels
1873	Ability to view land segments and which main building the land segments are associated with.	F			Via associated parcels
1874	Ability to identify one building as the "main building" on any given commercial parcel.				
1875	Ability to identify condo units as separate taxable parcels on a given commercial development/project.	F			
1876	Ability to identify and value portions of a parcel and buildings as residential, commercial, taxable or non-taxable (ex. City land with a retail parcel included).	F			
1877	Ability to link or combine similar commercial property groupings with like characteristics for mass valuation and review.	F			Via associated parcels
1878	Ability to identify and track one or more parcels in a residential or commercial mass appraisal group to be individually assessed.	F			
1879	Ability to perform parcel information updates for either all parcels in a mass appraisal group or to individual parcels in that same group.	F			
1880	Ability to maintain the mass appraisal group identity associated with each parcels mass appraisal.	F			
1881	Ability to filter on lot type in a work group (ex. golf course, lake front/waterfront).	F			
1882	Ability to assign a code to a parcel to indicate owner-requested warnings (ex. "No Trespassing", "Beware of Dog"), to be reset upon transfer of property.	F			
1883	Ability to identify a property sale as a "usable sale"	F			
1884	Ability to identify a tax-exempt property as exempt by classification or as exempt by designation accordingly.	F			
1885	Ability to place a user-defined upper limit to the tax-exemption amount for a property identified as tax-exempt by designation (exempt designated), where this upper limit can be set at the out-parcel level.	F			The ability exists, but this is a Manual Process.
1886	Ability to group parcels by sales transaction, where the transaction may involve more than one parcel.	F			Via multi parcel sales manager
1887	Ability to assign a code to a parcel to indicate site-requested warnings (ex. industrial hazardous area).	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1888	Ability to proactively notify an appraiser of any site warnings.	F			
1889	Ability to denote mailing addresses as a "bad address" based on the US Postal Service address standards.	F			

1890	Ability to allow the system to truncate the property owner name, in compliance with state code.	F			
1891	Ability to assign and view a label for a commercial property, according to a pre-defined set of corridor codes.	F			
1892	Ability to manually select a commercial corridor from a map.	F			
1893	Ability to assign and view market-level labels on the group of commercial parcels, from a pre-defined set of market labels.	F			
1894	Ability to assign and view the zones within a selected market area.	F			
Rehabilitation					
1901	Ability to send a property owner an application for the rehab program either through mail or electronically	F			Via Vision Mail Merge or exporting data to the City's print vendor
1902	Ability to allow a property owner to apply for the rehab program online.	F/TP			Vision can consume data from third party online forms to populate fields within Vision. Vision will work with the City to determine an optimal provider for Online Forms or to develop an Online Portal.
1903	Ability to process and store all information from the rehab application within the CAMA solution	F			
1904	Ability to indicate that the rehab application was made within 12 months from the property owner's filed building permit application.	F			
1905	Ability to trigger a property inspection on a rehab application (residential rehab application).	F/RT			Reports would need to be run to identify properties needing an inspection
1906	Ability to send a property owner a letter stating the status of their rehab application (approved, denied) either by mail or electronically	RT			
1907	Ability to send a property owner a letter indicating the final rehab abatement amount either by mail or electronically	RT			
1908	Ability to have the system identify any parcels that may qualify for the rehabilitation program	F/RT			
1909	Ability to automatically send a property owner a letter indicating that their property may qualify for the rehab program	RT			Via Vision Mail Merge
1910	Ability to require a qualified residential rehab application value to be equal to or greater than a user-defined percentage over the parcel's base value (currently 10%)	F			The ability exists, but this is a Manual Process.
1911	Ability to determine the abatement percentage of a commercial property qualified for rehabilitation, based on the base value: 15% for properties with assessed/base value below \$10M, 5% for properties with assessed/base value equal to or above \$10M.	F			The ability exists, but this is a Manual Process.
1912	Ability to automatically apply a commercial rehab abatement amount for 7 years based on the qualification effective date	F			
1913	Ability to automatically apply a residential rehab abatement amount for 15 years starting the next year after the qualification effective date	F			
1914	Ability to automatically apply a historical rehab abatement amount for 10 years starting the next year after the qualification effective date	F			
1915	Ability to cancel any rehab qualification and indicate the reason for the cancellation	F			
1916	Ability to send a letter to the property owner indicating the status of their rehab qualification and, if disqualified, the reason for the disqualification.	F/RT			
1917	Ability to generate a report of annual statistics for properties within the rehabilitation program, based on user-defined criteria {User-defined criteria include: number of rehab applications, number of qualified rehabs, number of completed rehabs.}	RT			
1918	Ability to indicate the type of property listed in the rehab application (residential, commercial, historic, hotel) and whether the property subject to the rehab application has met the criteria qualifying for the application.	RT			
1919	Ability to integrate with the Tax Management system (TMS), in order to provide the abatement amount and the effective dates of the abatement of a property in the rehabilitation program.	CP			This can be accomplished with Custom Export.
1920	Ability to integrate with the Tax Management system (TMS), in order to notify on any cancelled abatement amount of a property no longer in the rehabilitation program.	CP			This can be accomplished with Custom Export.
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
1921	Ability to integrate with the Tax Management system (TMS), in order to notify on any properties where the fair market value falls below the base value during the current year, for properties within the rehabilitation program.	RT			This can be accomplished with Old/New Report
1922	Ability to generate a list of properties in the rehabilitation program. {Includes: status of application (i.e. open, pending, approved, denied), application date, approval date (if approved), status of existing rehabs (i.e. open, in progress, completed, cancelled)}	F/RT			

1923	Ability to generate and send a letter to the applicant property owner acknowledging that the REA office has received the rehab application.	RT			
Reporting/Analytics					
(Note: Other Reporting/Analytics requirements may be included in other groupings as appropriate.)					
2001	Ability to report on parcel count on a daily or ad-hoc basis. (Includes: new parcels, inactive parcels, total parcels)	RT/F			
2002	Ability to generate a summary report of the sales comparison valuation method.	F			Via Comparable Sale Module
2003	Ability to automatically capture the effective date of any value change to the assessments, based on user-defined criteria (whether the value should incur for the current year or projected year).	F			
2004	Ability to manually capture building permit information from the building permitting system.	F			Permit Data can be manually entered or ingested via a building permit import
2005	Ability to query and report on all active and assigned permits based on user-defined criteria, to initiate a parcel inspection. (User-defined criteria include: permit number, taxID, permit type, property address, assigned work area, mass appraisal grouping, date range)	F			
2006	Ability to query permits by area of assignment, permit number, taxID and property address, as well as view permit status (complete, voided, assigned for pickup etc.)	RT/F			
2007	Ability to print building permit and worksheet if so desired to process final inspection work item.	F			Property Record Card?
2008	Ability to generate list of subdivisions and neighborhoods based on area of assignment. (Includes: subdivision name, neighborhood number, number of parcels, number of sales, median sale-to-assessment ratio, coefficient of dispersion (COD))	RT/F			
2009	Ability to generate lists of existing subdivisions to indicate mass appraisal status (Complete/Not Complete).	RT			
2010	Ability to generate list of parcels by certain attributes including subdivision, work area, neighborhood number, use code, etc. to show revaluation status (Complete/Not Complete).	RT			
2011	Ability to display statistical analysis for a given group of parcels or workload for both current-year values and projected-year values.	F			Via Sales Analysis
2012	Ability to query and print statistical reports for analysis of mass appraisal workgroups, including a list of parcels and a list of all sales within the workgroup.	F			Via Sales Analysis
2013	Ability to develop ad hoc reports on all parcels and workgroups.	RT			Ad hoc templates can be saved so that the users can modify and continue to run.
2014	Ability to generate a revaluation report for a group of parcels, which contains a summary of the analysis performed during the revaluation process and adjustments applied.	F			
2015	Ability to identify adjustments affecting value during the revaluation process, based on appraiser-defined criteria: subdivision, neighborhood, work area, address range.	F			
2016	Ability to generate a file containing assessment-to-sale City information, based on state-defined criteria.	F			Via Sales Analysis
2017	Ability to generate weekly mass appraisal reports on staff performance to be reviewed by a supervisor.	F			
2018	Ability to create ad hoc reports and data extracts against all available CAMA data.	F			Via Vision Report writer
2019	Ability to generate system reports identifying value changes based on reason codes (new construction, additions, fires, demolitions etc.).	F			Reason for Value Change
2020	Ability to provide reports for current-year and projected-year assessments.	F			
2021	Ability to provide a rehabilitation credit report to be processed by the Department of Finance.	F			
2022	Ability to create custom report templates by querying fields from entities found in the CAMA database schema, either through a drag and drop editor or SQL commands, and make them available for staff use. (Functionality should be similar to ad hoc report writers used to create tabular data reports).	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2023	Ability to report on parcel value changes based on user-defined value thresholds.	F			
2024	Ability to view and print cases where significant value changes are recorded.	F			
2025	Ability to produce a report that shows the before&after snapshot of an inspected property.	F			via comp snapshot

2026	Ability to generate reports on a specified group of parcels for review during the revaluation and approval processes, based on user-defined criteria. {User-defined criteria include: land, improvements, % value change.}	F/RT			
2027	Ability to generate assessment report for any individual parcel containing a breakdown of building and land values for all out-parcels.	F			
2028	Ability to report on the subdivision(s) and their values within a specified community, shown under a community code.	F/RT			
2029	Ability to generate and display mass appraisal stats and ratios for residential parcel groups	R			
2030	Ability to query all completed yearly mass appraisal groups to identify those that have had subsequent sales necessitating an additional year-end review.	R			
2031	Ability to query and report on all open mass appraisal cases sorted by residential or commercial and grouped by assigned appraiser.	F/RT			
2032	Ability to have a list of partially valued lots to be reviewed during year-end.	F/RT			
2033	Ability to filter parcels from a mass parcel update, based on certain criteria, in order to be valued manually (ex. in case of fire damage).	F			
2034	Ability to generate a report summarizing all the data elements used in the calculation of the sales comparison approach.	F			
2035	Ability to generate a report outlining the "Reval & Growth" details for a parcel or group of parcels for residential and commercial properties.	F			
2036	Ability to create a file in order to accurately respond to the Assessment-to-Sales Ratio Study (ASRS). {Includes: property description, grantor and grantee of sale, sale price, property assessment value, reason code if a non-qualified sale, PIN number (taxID) of the sold property} [ASRS]	F/RT			
2037	Ability to generate a report on the year-end assessed values, in order for these values to be committed to the land book. [Year-end land book report]	F/RT			
2038	Ability to generate the necessary information in order to accurately produce a report on properties assessed by the State Corporation Commission. [SCC Ratio Study]	F			
2039	Ability to generate the relevant information in order to complete the Weldon Cooper survey. {Includes: total acreage, number of parcels, percent change in property values.} [Weldon Cooper survey]	RT			
2040	Ability to generate a taxable value summary report. {Includes: total taxable value and its breakdown, percent of tax base, previous year's land book values, current year's notice values, percent change in taxable value, residential reval percent change} [taxable value summary]	F			
2041	Ability to generate a report on the summary of taxable values. {Includes: total taxable value and its breakdown, percent of tax base, previous year's land book values, current year's notice values, percent change in taxable value} [Summary of taxable values report]	F			
2042	Ability to generate a memo summarizing all tax-exempt properties on an annual basis. {Includes: total taxable and exempt property combined, total taxable property, total tax-exempt property, percent of tax-exempt properties.} [Exempt tax memo]	F			
2043	Ability to generate a memo summarizing the values for all taxable properties on an annual basis. [tax rate memo]	F			
2044	Ability to generate a memo summarizing all relevant proffers calculations. {Includes: average assessed values for land & improvements, average assessed values for new units built & sold, number of households, summary apartment data extracted from the apartment data attachment} [proffers memo]	F			
2045	Ability to generate a report for the City Council, reflecting the district name and the percent change of improved property values. [BOS % change of improved properties]	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2046	Ability to generate a report listing all tax-exempt properties for submission to the State Corporation Commission (SCC). {Includes: tax-exempt parcel count, tax-exempt property value for current year, grouping by state code} [tax exempt property report]	RT			

2047	Ability to generate the Comprehensive Annual Financial planning Report (CAFR) for taxable properties and their values. [CAFR for taxable property]	F			
2048	Ability to generate a spreadsheet with the relevant rehabilitation data. {Includes: exemptions approved and the value of the exemptions, property type, approved properties under rehabilitation, value change and their effective dates, property address} [rehab data]	RT			
2049	Ability to generate a spreadsheet of properties under a user-defined Community Development Authority (CDA) or special assessment district (SAD).	RT			
2050	Ability to generate a spreadsheet summarizing, for a user-defined date range, the values for a list of properties, and changes to the property values by category (ex. new construction, transfer), grouped by transaction codes and by property type. [monthly activity report]	RT			
2051	Ability to generate a spreadsheet showing, based on a user-defined date range, statistics for the current and previous years for new constructions and mass appraisals depending on property type (residential, commercial). [monthly comparison analysis summary report]	RT			
2052	Ability to generate a spreadsheet on the one-acre values for properties over one acre under tax relief, based on user-defined acreage criteria. [one-acre value for parcels on tax relief]	RT			
2053	Ability to generate a spreadsheet on the monthly sales data. [monthly sales report]	RT			
2054	Ability to generate a GIS map outlining the percent change in assessment value of parcels, based by district. [% assessment change map]	RT			
2055	Ability to generate a report on the assessment-to-sales ratio of improved residential properties throughout the City, and the relevant statistics. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), number of sales City-wide} [City-wide assessment-to-sales ratio report]	F			Via Sales Analysis Module
2056	Ability to generate a report on the assessment-to-sales ratio of improved residential properties, grouped by appraiser area. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), and the number of sales} [appraiser area assessment-to-sales ratio report]	F			Via Sales Analysis Module
2057	Ability to generate a report on the assessment-to-sales ratio of improved residential properties, grouped by subdivision. {Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), number of sales, number of improved properties, sales-to-improvement-record percentage, number of records.} [subdivision assessment-to-sales ratio report]	F			
2058	Ability to produce a data file of all relevant parcel information for further dissemination by external sources. [CAMA data file]	RT			
2059	Ability to produce reports in multiple formats, such as Excel files or flat data files.	RT			
2060	Ability to allow user to perform complex data queries and analytics through the use of a SQL query builder tool.	RT			
2061	Ability to develop and publish CAMA system data and statistics through online dashboards based on the access rights of the dashboards' users.	F/RT			Via Vision Analytics/City's web portal
2062	Ability to allow citizen to query and download assessment data through a web portal.	F			This is a standard feature of our Web Portal should the City elect to Deploy. Taxpayers have the ability to perform basic queries (sales search and abutters).
2063	Ability to import sales verification codes for qualified sales, as well as non-qualifying codes for non-qualified sales.	F			
2064	Ability to generate a report listing all the tax-exempt properties, as well as if they are tax exempt by classification or by designation.	F/RT			
2065	Ability to allow users to develop, format and publish reports produced on an ad hoc basis.	RT			
2066	Ability to generate a report summarizing the values for the mass appraisal process, including the assessed values before and after revaluation. [360 report]	RT			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2067	Ability to generate a statistical analysis of a user-defined work area. {Includes: appraisal status of properties, work area sales ratio, coefficient of dispersion (COD), number of sales within the work area.} [Work area statistical report]	F			

2068	Ability to generate a list of properties omitted from the original mass appraisal process. (Includes (grouped by appraiser and by subdivision): total number of parcels, total number of revalued parcels, total number and list of parcels to be reviewed.) [complete & non-complete report]	RT			
2069	Ability to generate a report indicating the median last inspection date for a user-defined group of parcels, in order to assign subdivisions based on the oldest median inspection date. (Includes: subdivision name and number, number of parcels within the subdivision, last median inspection date) [Median last inspection date]	RT			
2070	Ability to generate an audit report with a comparison of the list of parcels not contained in both the CAMA system and the GIS. [Parcel edit check]	RT			the comparison between CAMA and GIS can be accomplished in excel.
2071	Ability to generate a report summarizing the values for the mass appraisal process, including the assessed values before and after revaluation. [360 query]	RT			
2072	Ability to generate a report listing all parcel splits and combinations, as well as all parent voided parcels for a given timeframe. [Log of split/combined parcels]	RT			
2073	Ability to generate a report listing all properties overdue for inspection, as well as any reason codes or remarks for the inspection delay, for a given timeframe. [Inspection report]	RT			
2074	Ability to generate a report listing all properties with fire/storm damage within a user-defined timeframe. (Includes: repair status of the parcel, before&after improvement values) [fire damage report]	RT			
2075	Ability to generate a daily audit report on all parcels created by GIS integration, in order to complete parcel update. (Includes: parent parcel ID, new sibling ID, parcel addresses, subdivision number) [GIS Skeleton record report]	RT			
2076	Ability to generate a report of all CAMA activity. (Includes: parcel count, current-year assessment values, projected-year assessment values) [Daily historical reports]	RT			
2077	Ability to generate a daily report on all assessment changes, which result in supplemental billing or an adjusted bill. [Daily supplemental assessment totals]	RT			
2078	Ability to generate a report listing parcels that are categorized as tax-exempt by designation, as well as the property type where applicable. [Report on exempt designated parcels]	RT			
2079	Ability to generate a septic data report on a parcel or a group of parcels. (Includes: parcel has sewage (Y/N), parcel has water (Y/N).) [Health Department report: septic data]	RT			
2080	Ability to generate a report on the assessment-to-sales ratio of improved residential properties throughout the City into four quadrants (based on assessed or sales value) and perform the relevant statistical analysis. (Includes: mean, median, standard deviation, coefficient of variance (COV), coefficient of dispersion (COD), number of sales City-wide) [City-wide assessment-to-sales ratio report]	RT			
2081	Ability for users to maintain a list of standard queries for generating reports.	RT			
2082	Ability for users to maintain a "Favorites" list of frequently used queries and reports.	F/NA			The end user has the ability to maintain User Specific Reports, however they cannot drill down into their report list to store Favorites.
2083	Ability for users to perform analysis of I/E data based on user-defined criteria. [income approach]	F/RT			The application comes standard with I&E reports Actual Expense, Vacancy and Income Spreadsheets, Adjusted Capitalization Rates, Capitalization Rates, Economic Income Spreadsheet, Extract Cap Rate, Income Cast Comparison, Income Detail Review, Income Land Residual and Market Rent Schedules. Additional all data in Vision CAMA can be extracted via the Vision Ad Hoc Report writer. The AD Hoc Templates can be saved to run again at later dates and times.
2084	Ability for users to perform multiple-year analysis of individual properties based on actual reported I/E data. [income approach]	F			
Sketching					
2101	Ability to automatically populate different building segments based on the overall building sketch.	F/NA			Vision has a full featured Sketch program, that operates slightly different from ProVal. You can populate building segments at the time of creation.
2102	Ability to view and maintain sketches and attributes associated to each building.	F			
2103	Ability to capture the square footage, story/improvement code, and calculated area to assist with the cost value calculation from the completed parcel sketch.	F			
2104	Ability to draw sketches in a layered fashion ex. first floor, or second floor.	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2105	Ability to maintain a current and projected sketch.	F			

2106	Ability for a sketch to be related to the appropriate parcel valuation.	F			
2107	Ability to add, modify, and inactivate detailed building and miscellaneous improvement sketches on a parcel.	F			
2108	Ability to manually enter the square footage of each improvement on a parcel.	F			
2109	Ability to maintain a library of sketches by model and builder.	F			
2110	Ability to copy sketches to a single new parcel.	F			
2111	Ability to copy sketches to a group of new parcels.	F			
2112	Ability to edit sketches that have been copied.	F			
System Integration					
(Note: Includes requirements for System Integration, GIS.)					
2201	Ability to send the following information to the department of finance: identifying parcel information, effective dates, state codes with description, reason codes with description, assessment values for annual and supplemental tax bill generation, exonerations or refunds to the taxation department (with difference between new value and previous value), parcel tax exemptions, multiple land values for tax relief, special assessment districts, Rehab program.	CP			This can be accomplished with Custom Extract and configured during implementation.
2202	Ability to electronically send changes in owner address to the Department of Finance Office.	F			
2203	Ability to integrate with Utilities for water and/or sewage connection status on a parcel.	CP			This can be accomplished with Custom Import and configured during implementation.
2204	Ability to integrate with Planning subdivision information.	F			
2205	Ability to integrate with Planning system and automatically open zoning cases.	F			
2206	Ability to view GIS map information for an individual parcel within the CAMA solution.	F			
2207	Ability to view GIS map information for groups of parcels within the CAMA solution.	F			
2208	Ability to select a single or multiple parcels from the GIS map within the CAMA solution for revaluation or mass update.	F			
2209	Ability to view scanned images (building plans, review forms, BOE forms) for a selected parcel.	F			
2210	Ability to view Pictometry images for a selected parcel or groups of parcels.	F			
2211	Ability to integrate with Circuit Court website to view legal papers, deeds and subdivision plats.	CP/TP			Vision has the ability to consume data, this would be accomplished with a custom Import at implementation. We do however interface with a Third Party tool to directly manage the Property transfer process.
2212	Ability to display relevant real estate information of a parcel on the real estate assessment website, and update this information daily.	F			
2213	Ability to display assessment data to the web by a user-defined date.	F			
2214	Ability to integrate GIS tool to plan the best route for physical inspection of parcels.	F			This feature is accomplished with the recommended Mobile Module.
2215	Ability to integrate with Costar for commercial appraisal review.	D/TP			
2216	Ability to capture GIS parcel history/parcel boundaries and attach to the parcel.	F			
2217	Ability to integrate with the tax management system for changes in the following key parcel information: magisterial district, special properties code (Special Assessment Districts, CDAs), owner account number, parcel address, legal description, Property Type, parcel creation date, parcel inactivated date.	CP			This is accomplished with Custom Extract. Vision can work with the City on the details and content of any Import/Export at time of implementation.
2218	Ability to integrate with the tax management system for changes in the following key parcel ownership information: transfer date, new owner name, document type (deed, will etc.), deed book & deed page, consideration (i.e. sales price).	CP			This is typically captured from the Clerk's Office at time of transfer and Transmitted to the tax management system via Custom Extract. Vision can work with the City to determine frequency of these data extracts to the tax management system at time of implementation.
2219	Ability to integrate with the tax management system for changes in the following key address information: mailing address (lines 1 and 2), mailing address, mailing state, mailing zip code & extension, mailing country code, mailing international region, mailing international postal code, mailing address for "care of" name.	CP			This is accomplished with Custom Extract. Vision can work with the City on the details and content of any Import/Export. Vision can work with the City to determine content and frequency of these data extracts to the tax management system at time of implementation.
2220	Ability to integrate with the City GIS system in order to open a case based on the following factors: parcel splits/combinations/eminent domain takes, calculated acreage changes.	F			Vision will work with the City to determine preferred business process.
2221	Ability to integrate with the City fire department, in order to open a case based on value changes to a parcel or building stemming from fire damage to the building.	F			Vision has the ability to manage Calamity, there are several different methods of accomplishing this task. Vision will work with the City to determine the desired method.
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2222	Ability to interface with GIS to update zoning codes wherever there is a zoning change.	F			
2223	Ability to communicate with the City tax system to indicate an assessment value change to the current or a prior year.	F			
2224	Ability to view/update ownership information based on integration with the Circuit Court system and open an appraisal case, if applicable.	F			Vision can accomplish this, we will work with the City to determine the desired method of managing this process.
Valuation					
(Note: Other Valuation requirements may be included in other groupings as appropriate.)					
2301	Ability to value partially completed new constructions (not structural additions), applying a user-defined percentage on the system's calculated value.	F			

2302	Ability to calculate, compare and select the most appropriate of the three valuation models for a building (cost approach, sales comparison approach, income approach).	F			
2303	Ability to smooth value inequities due to square footage breaks in cost table.	F			
2304	Ability to enter a manual assessment value.	F			
2305	Ability to enter a trend value or manual percentage adjustment to the current building value.	F			
2306	Ability to value building on a cost approach using the Marshall Swift interface or similar methodology.	F			
2307	Ability to generate a report summarizing all the components used in the calculation of the cost approach.	F			
2308	Ability to generate a report summarizing all the components used in the calculation of the income approach.	F			
2309	Ability to value a building using the direct capitalization method of the income approach for various types of commercial properties (apartment, hotel/motel, mini warehouse, mobile home park, office building, office warehouse, retail, shopping center, shopping mall, warehouse). [income approach]	F			
2310	Ability to value a building on income approach using the discounted cash flow method. [income approach]	NC			
2311	Ability to automatically apply depreciation from the first main building to detached or miscellaneous improvement.	F			
2312	Ability to apply a separate depreciation rate for the detached improvements, based on the year built of the detached improvements.	F			
2313	Ability to display median sale to assessment ratio of qualifying sales by subdivision, neighborhood, commercial use code and work area.	F			
2314	Ability to automatically re-calculate adjustments to a parcel's value for current and user-defined prior years' values, using the appropriate year's cost tables.	F			
2315	Ability to view and filter sales based on user-defined criteria (ex. date range, work area, story type, quality, square footage.)	F/RT			
2316	Ability to calculate and display the necessary information for mass appraisal analysis and approval (mean, median, Coefficient Of Dispersion, etc.), based on user-defined sales query filters (ex. date range, work area, story type, quality, square footage.)	F/RT			
2317	Ability to create and store residential cost tables by either code type and costing value or square foot ranges and related costing values for each given year, for current year plus 19 prior years' cost tables.	F			Vision can store unlimited years of full parcel data. Vision will work with the City to determine desired number of years for historical table data.
2318	Ability to create and store commercial cost tables for each given year, for current year plus 19 prior years' cost tables.	F			Vision can store unlimited years of full parcel data. Vision will work with the City to determine desired number of years for historical table data.
2319	Ability to assign multiple codes for value change, including reasons, transaction codes, explaining why the changes are made.	F			
2320	Ability to compare valuation approaches based on weighted average, where the weights are user-defined: income method, sales comparison method, cost method.	F			
2321	Ability to calculate our own cap rates.	F			
2322	Ability to calculate the three approaches to value and compare the results.	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2323	Ability to separately value the land and building, designated to the main building, and the adjacent out-parcel land and building, to later consolidate the parcel's valuation.	F			
2324	Ability to split a building value between two or more parcels by absolute dollars or percentages.	F			
2325	Ability to total a building's value if it is split between two or more parcels.	F			
2326	Ability to value all out-parcels on any given parcel separately (both land and building).	F			
2327	Ability to value a group of parcels based on the use of Multiple Regression analysis (MRA).	F			
2328	Ability to import and update cost tables for residential valuation	F			
2329	Ability to import and update cost tables for commercial valuation.	F			
2330	Ability to re-run all valuation calculations after any parcel updates have been completed for a given mass appraisal group.	F			
2331	Ability to have a default approach to parcel or building valuation based on use type.	F			

2332	Ability to filter out a property where the value needs to be reviewed individually (ex. hotels with a 50% vacancy rate).	F			
2333	Ability to manually apply a value to a partially completed structure.	F			
2334	Ability for users to perform direct capitalization techniques. [income approach]	F			
2335	Ability for users to perform yield capitalization techniques. [income approach]	F			
2336	Ability for users to perform residual capitalization techniques. [income approach]	F			
2337	Ability to perform comparable sales analysis in determining benchmarks for the market approach. [market approach]	F			
2338	Ability to perform matched pair analysis for residential properties to determine the value of individual property components. [market approach]	F			
2339	Ability for users to define weights assigned to select structure components based on market modeling. [market approach]	F			
2340	Ability for users to perform a square-foot market analysis on selected structures or structure components, based on market modeling. [market approach]	F			
2341	Ability to assign a market value to each structure on one parcel. [market approach]	F			
2342	Ability to use gross square foot as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]	F			
2343	Ability to use gross acre as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]	F			
2344	Ability to use net square foot as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]	F			
2345	Ability to use net acre as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]	F			
2346	Ability to use buildable unit as a unit of comparison for land valuation analysis in the comparable sales approach. [market approach]	F			
2347	Ability to use gross building square foot as a unit of comparison for improved property analysis in the comparable sales approach. [market approach]	F			
2348	Ability to use rentable building square foot as a unit of comparison for improved property analysis in the comparable sales approach. [market approach]	F			
2349	Ability for users to override Marshall & Swift cost rates. [cost approach]	F			Vision displays all value methodologies and allows the user to determine preferred method, as well as override any methodology if desired.
2350	Ability to provide annual residential cost values from Marshall & Swift's nationally recognized cost service. [cost approach]	NA			Vision has Marshall & Swift for Commercial, Vision uses Vision Cost tables for Residential. This is a large cost savings to the City.
2351	Ability to maintain replacement cost rates. [cost approach]	F			
2352	Ability to maintain adjustment factors to replacement cost rates. [cost approach]				
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2353	Ability to maintain a depreciation schedule tied to each structure code. [cost approach]	F			
2354	Ability to maintain depreciation schedules. [cost approach]	F			
2355	Ability to maintain positive and negative multiplicative adjustments for user defined attributes. [cost approach]	F			
2356	Ability to adjust for observed physical condition depreciation. [cost approach]	F			
2357	Ability to adjust for functional obsolescence. [cost approach]	F			
2358	Ability to adjust for cost-to-cure as a percentage calculation. [cost approach]	F			
2359	Ability to adjust for cost-to-cure as a lump sum deduction. [cost approach]	F			
2360	Ability to adjust for economic obsolescence. [cost approach]	F			
2361	Ability to correlate the cost approach with the comparable sales approach through the use of an economic condition adjustment. [cost approach]	F			
2362	Ability to store actual construction costs as reported by the construction company. [cost approach]	F			
2363	Ability to value land on a per square foot basis.	F			
2364	Ability to value land on a per buildable unit basis.	F			
2365	Ability to value land on a per lot basis.	F			

2366	Ability to value land on a per front foot basis.	F			
2367	Ability to value land on a per floor area ratio basis.	F			
2368	Ability to value land on a per acre basis.	F			
2369	Ability for users to input mineral rates under development into the land valuation module.	F			
2370	Ability for users to input mineral rates not under development into the land valuation module.	F			
2371	Ability to calculate mineral rates based on an income approach to value.	F			
2372	Ability to calculate mineral rates based on a comparable sales approach to value.	F			
2373	Ability to calculate mineral rates by user defined criteria.	F			
2374	Ability for users to select the type of mineral rate to be used.	F			
2375	Ability to store mineral rate values separately from market value of the land and improvements.	F			
2376	Ability to automatically adjust the effective age of a structure or group of structures.	F			
2377	Ability to manually adjust the effective age of a structure or group of structures.	F			
2378	Ability to automatically apply a depreciation schedule on a structure or group of structures, based on a user-defined depreciation percentage.	F			
2379	Ability to group commercial parcels in to corridors for mass commercial appraisal purposes.	F			
2380	Ability to further divide a commercial corridor in to market areas, based on user-defined criteria.	F			
2381	Ability to automatically group parcels within a market area by economic size, based on user-defined parameters. (Ex. Parcels between 3 and 10 acres in size).	F			
2382	Ability to manually group parcels within a market area based on user-defined parameters on economic size.	F			
2383	Ability to view a list of physical characteristics to a commercial parcel. (Includes: location, ingress/egress, visibility, functional visibility)	F			
2384	Ability to rank physical characteristics to a commercial parcel, based on a set of user-defined criteria, with an assigned adjustment value. (Ex. -10% adjustment for a Poor physical characteristic)	F			
2385	Ability to change the assigned adjustment values on each of the physical characteristics for valuation of a commercial parcel.	F			
2386	Ability to value land on a per depth basis.	F			
Workflow Management					
2401	Ability to notify appropriate supervisor when records are ready for review and capture the notification date.	F/RT			
2402	Ability to mark mass-appraised parcels as ready for supervisor review and approval.	F/RT			
2403	Ability to notify an appraiser with a message of necessary corrections when an approval is rejected.	F/RT			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2404	Ability to configure workflow business logic steps.	NA			
2405	Ability to keep track of current year and projected year value changes by categories (new construction, additions, revaluation, new parcels), grouped by commercial/residential/exempt property category on a daily, monthly, and yearly basis.	F/OR			Q4 2023
2406	Ability to access parcel plans that are tentatively and finally approved, in order to automatically open a case.	F/RT			Plans Can be uploaded in Associated Documents, would use a report to track Case history
2407	Ability to require a sales review prior to an inspection/appraisal for all new property transfers.	F/RT			This can be accomplished with Reporting
2408	Ability to forward an appraisal case back to pre-inspection (abstract) for any identified corrections.	F/RT			A field can be designated to capture pre-inspection. A report can be created for appraisers to identify cases that have been set to pre-inspection.
2409	Ability to distribute permits via workflow to appraisers/appraisal specialists to be worked.	F			The recommended Mobile Module has the ability to alert for permit inspections to field appraisers.
2410	Ability to route a case for supervisor approval.	F/RT			This functionality exists within Vision CAMA, it is a manual process by reports.
2411	Ability for supervisors to view and approve appraiser workgroups.	F			Appraisers can mark properties for review in the Reason For Change coding, or the Supervisor can set Field reviews for any field inspections. The recommended Mobile Module has full featured Quality Review of Field work.
2412	Ability for cases to be automatically assigned to the appropriate appraiser or staff member.	F			Parcels can be assigned to an appraiser individually or automatically by user defined criteria.
2413	Ability for supervisor to manually assign one or multiple cases at once to individual (supervisor manual assignment) based on user-defined criteria.	F			
2414	Ability to add status and notes for each case created, as well as change the status and add notes on cases which have been re-assigned.	F			
2415	Ability to produce snapshot of before&after records on improvements or modifications.	F			Via Comparable sales snapshot
2416	Ability to finalize changes and have them sent for approval. The record should indicate the case age.	F			

2417	Ability to add in comments on overall case status.	F			
2418	Ability to communicate back to appraiser where there is a change in value or any other major error correction.	F/RT			This can be accomplished via Value Tracking and Parcel Notes within the Vision CAMA application and re-calc error report
2419	Ability to have a "Tentative Approval" status on case, where appraiser can contribute their opinion on a parcel's valuation.	F			Vision is a Mass Appraisal tool, value is determined from the Tables. Appeals/ Case Management is designed to host Case/Appeals information. This screen can host a field for Case status and Option of Value.
2420	Ability to add, update or delete minor errors where applicable.	F			
2421	Ability to allow a supervisor to view an appraiser-initiated case re-assignment.	F			
2422	Ability for auditing team to have access to all information pertaining to a case, including attached files and working web links where available.	F			Vision CAMA has 3 comprehensive Audit modules, One for Parcel Data, One Database level Audit and one Audit for the Administrative Console. All data can be audited.
2423	Ability for appraiser to finalize each mass appraisal case and forward to supervisor for approval.	F			
2424	Ability to allow supervisor to return a rejected mass appraisal to the appropriate appraiser for re-review.	F/RT			
2425	Ability to allow all supervisor-approved mass appraisal values to be fully committed as the next year's official assessment values.	F			Vision has realtime valuations, there is no "Commit" procedure.
2426	Ability to define exception handling in a workflow.	NA			
2427	Ability for users to set tickler reminders on workflow for follow-up action on a specific day and time.	RT			Via Vision Report Writer and tracking follow up dates/times in a designated field
Workload Management					
2501	Ability to capture a parcel as "revalued", as well as the mass appraisal date and the appraiser responsible for the mass appraisal execution.	F			
2502	Ability to mass update the projected or current records.	F			
2503	Ability to approve a change to a single parcel not as part of workgroup.	F			
2504	Ability to open an appraisal case for active but not final building permits based on user-defined criteria (new buildings).	F			
2505	Ability for supervisor to assign new construction permit cases, for the purpose of valuing "partial" parcels, to the appropriate appraisers.	F			
2506	Ability to assign or reassign work for final field inspections.	F			
2507	Ability to indicate whether each parcel has gone through the revaluation process.	F			
2508	Ability to create and maintain parcel records in user-defined workgroups for mass appraisal and updates.	F			
2509	Ability to refresh or clear a workgroup and append or remove parcels from the group.	F			
2510	Ability to maintain separate workgroups by appraiser.	F			
REQ ID*	Requirement Description	Offeror Response	Level of Effort H/M/L***	Proposal Page Number**	Offeror Comments
2511	Ability to filter workgroup parcel data by user-defined criteria: subdivision, neighborhood, City code, state codes, land values etc.	F			
2512	Ability to assign appraisers to properties based on geographic area (subdivisions, neighborhoods), or on building use.	F			
2513	Ability to re-distribute cases, depending on appraiser availability.	F			
2514	Ability to have automatic generation of cases based on user-defined criteria.	F			
2515	Ability to generate and access reports or dashboards for daily jobs, or jobs done within a certain time period (monthly, quarterly etc.).	F			
2516	Ability to auto-prioritize an appraiser's workload based on user-defined criteria.	RT			Vision has the ability to maintain an appraisers workload using via report writer and mass update tools, however, we cannot auto prioritize based on user defined criteria, this is a manual process.
2517	Ability to manually re-prioritize workload where needed or appropriate.	F			
2518	Ability to automatically assign cases based on user-defined criteria.	RT			Vision has the ability to maintain an appraisers workload using via report writer and mass update tools, however, we cannot auto proioritize based on user defined criteria, this is a manual process.
2519	Ability for supervisor to manually re-assign a single or multiple appraisal cases to a different appraiser where needed or appropriate, with notification to both parties on workload change.	F			
2520	Ability to attach any associated files to case.	F			
2521	Ability to re-assign case to commercial or other type of appraiser for combination parcels (ex. commercial and residential).	F			
2522	Ability for an appraiser to further sub-divide a residential mass appraisal case by: subdivision, Sub Division Section, neighborhood or address range	F			
2523	Ability for an appraiser to further sub-divide a commercial mass appraisal case by: Property Use type, Building Quality, User defined geographic boundary, property access characteristics, or predefined Market Area.	F			
Year-end					

2601	Ability to lock current-year assessment data for update during year-end processing, but maintain it as read-only.	F			
2602	Ability to communicate with the Tax Management System informing of an open appeal.	F			This is accomplished with Custom Extract. Vision can work with the City on the details and content of any Import/Export during implementation. Vision can work with the City to determine content and frequency of these data extracts to the tax management system.
2603	Ability to identify records where a portion of the parcel lies within a special assessment district (SAD) or Community Development Authority (CDA).	F			
2604	Ability to scan and upload documents to case, including photos, copies of emails, and appeal email attachments.	F			
2605	Ability to query parcel records for current plus 3 prior years for the purpose of correcting assessments.	F			
2606	Ability to consolidate assessment notices by owner name or owner account number for mailing purposes.	F			
2607	Ability to generate a report summarizing all the assessment information for the City and magisterial districts for distribution and posting to the City website.	F			
2608	Ability to track the date printed assessment notices have been sent to the property owners.	F			
2609	Ability to track any returned assessment notices, as well as the reason the assessment notices have been returned.	F			
2610	Ability to mass update current-year values with the projected-year values for the year-end and assessment notice process.	F			
2611	Ability to generate audit reports before finalizing values for yearly assessment notices	F			
2612	Ability to exclude parcels with no change in ownership or assessment from annual assessment notice generation.	F			
2613	Ability to generate a year-end report to confirm the parcel counts and values by state code and City code before generating the yearly assessment notices. [610 & 615 reports]	F			

Tab XIII: CAMA Technical Requirements

Please see following page for Exhibit B - Technical Requirements

Exhibit B

The City of Richmond, Virginia Exhibit B - CAMA Technical Requirements

Integrated Web-based Portal			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Response Comments (Indicate if any manual processes are required)
Internal User Sign-in and Access			
T1.01	The proposed CAMA solution shall support single sign-on using LDAP, if the Offeror proposes that the application is hosted by the City. If it is not hosted by the City, a similar single sign-on capability that integrates with the City must be proposed.	Yes	
Integrated (Single Virtual Application) Portal			
T1.02	The system shall have the ability to be launched via a single application (versus having to launch multiple applications.)	Yes	
Web-based Applications			
T1.03	All of the system's desktop client applications shall be "thin client" applications rather than "thick or fat client" applications, meaning that no or minimal client software on the desktop will be required for their operation.	Yes	The Vision applicaion is required to be installed on all computers accessing Vision
T1.04	The system shall include a public-facing front end that all citizens can use to view parcel information from within web browsers, tablets, and mobile devices.	Yes	
Technology Architecture Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Response Comments (Indicate if any manual processes are required)
Client Hardware			
T2.01	The internal client application must be compatible with the City's desktop computing standard (Dell / Microsoft Windows).		Please see enclosed Hardware specificaions
Application Software			
T2.02	The system's client application software must be capable of running on the Microsoft Windows platform, including currently supported (e.g., Windows 10) and future versions of that platform.	Yes	Please see enclosed Hardware specificaions
T2.03	The system's web-based client application software shall provide interface support for Microsoft Edge, Firefox, Google Chrome, and Apple Safari browsers.	NA	Vision is not a browser based solution
T2.04	The system shall provide the ability to use any native application or plug-in such as Adobe Acrobat, Flash, QuickTime, and Microsoft Office to create and view attachments.	Yes	
T2.05	The proposed CAMA system shall be web-based, and should use the latest client-side technologies to enhance the user experience.	NA	Vision is not a browser based solution
Communications			
T2.06	The proposed CAMA system shall be accessible by internal City employees from any location provided the User's terminal is located on the City's intranet.	Yes	As long as the Vision applicaion is installed on the terminal.
Geographic Information Systems (GIS)			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Response Comments (Indicate if any manual processes are required)
Browser Compatibility			
T3.01	The system shall be capable of rendering and displaying properly on World Wide Web Consortium (W3C) compliant and/or most popular web browsers including Microsoft Edge, Firefox, Google Chrome and Apple Safari.	Y	Vision's public facing portal.
Map Features			
T3.02	The system shall display physical locations (such as parcels/addresses) using map services from ArcGIS Server or ArcGIS Server Enterprise or ArcGIS Online.	Y	Vision's public facing portal.

Data Layers / Views			
T3.03	The system shall be capable of displaying multiple GIS data layers which are user-selectable (on/off).	Y	Vision's public facing portal.
Location (Pinpoint) Identification			
T3.04	The system shall be capable of identifying the location of a parcel on a map by use of a visual "push pin" or other appropriate indicator, once the address is entered.	Y	Vision's public facing portal.
T3.05	The system shall be capable of deriving the address of a parcel based on the location of a "push pin" or other indicator placed on the map by a user.	Y	Vision's public facing portal.
Access Control and Data Security			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Internal User Access Control			
T4.01	The system shall provide role-based security controls access to specific functions for internal users.	Yes	
T4.02	The system shall provide role-based security controls access to specific data for internal users.	Yes	
T4.03	The system shall provide record ownership-based security controls access to specific functions for internal users (e.g., for Appraisors who may "own" specific parcels and should be the only ones authorized to perform certain functions.)	Yes	
External User Access Control			
T4.04	The system shall provide role-based security controls access to specific functions for external users.	Yes	Assuming the External User is from a City of Richmond Department "External to the Assessor's Office"
T4.05	The system shall provide role-based security controls access to specific data for external users.	Yes	Assuming the External User is from a City of Richmond Department "External to the Assessor's Office"
T4.06	The system shall allow an external user to see only the information relating to them.	Yes	Assuming the External User is from a City of Richmond Department "External to the Assessor's Office"
Passwords			
T4.07	The system shall utilize single sign on (SSO) using the city's active directory.	Yes	
Audit Trail			
T4.08	The system shall provide administrative auditing and reporting – the capability to manage users, groups and access permissions along with being able to monitor and report on user and file activity.	Yes	
T4.09	The system shall provide the ability to audit changes at the field level. This ability should be able to be turned off and on by a system administrator.	No	Audit cannot be turned off.
User Interface Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
General UI Considerations			
T5.01	The system layout, design, and navigation shall be easy to use, consistent, and intuitive.	Yes	
T5.02	Screen layouts shall be capable of being tailored or personalized to individual needs (such as modifying home page contents to add daily calendars, activities, "to do" tasks, outstanding service requests, etc.)	No	Screen labels and sort order can be tailored for the City of Richmond. User can create User Panels to configure screens for an efficient work process.
T5.03	The system shall support a user interface that allows for the ability to easily search for and retrieve information.	Yes	
T5.04	The system should provide "kiosk friendly" displays, or provide the option of switching to a kiosk-friendly layout suitable for use on self-contained, touch-screen computer kiosks.	Yes	
T5.05	User interface considerations apply to both desktop and mobile displays.	Yes	Provided the DCS Mobile option is selected

City of Richmond Branding and Identity			
T5.06	The application's citizen portal color scheme should be modifiable to match the City of Richmond identity standards (color scheme).	No	The Vision Web Portal is a COTS solution. However, Vision could create an abstract for the City to display in your Portal.
T5.07	The application's citizen portal color scheme should be modifiable to match the City of Richmond identity standards (fonts and sizes).	No	The Vision Web Portal is a COTS solution. However, Vision could create an abstract for the City to display in your Portal.
T5.08	The application's citizen portal color scheme should be modifiable to match the City of Richmond identity standards (style sheets and wrappers).	No	The Vision Web Portal is a COTS solution. However, Vision could create an abstract for the City to display in your Portal.
Accessibility Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Response Comments (Indicate if any manual processes are required)
Compliance with W3C Web Content Accessibility Guidelines			
T6.01	The system shall comply with W3C Web Content Accessibility Guidelines.	See Note	Vision has worked with communities in the past to deal with accessibility needs. We would be happy to discuss these needs at the time of contracting.
Compliance with Section 508 Requirements			
T6.02	The system shall comply with Section 508 Requirements regarding accessibility.	See Note	Vision has worked with communities in the past to deal with accessibility needs. We would be happy to discuss these needs at the time of contracting.
Compliance with State and City Policies			
T6.03	The system shall comply with Commonwealth of Virginia and City of Richmond policies regarding accessibility.	See Note	Vision has worked with communities in the past to deal with accessibility needs. We would be happy to discuss these needs at the time of contracting.
Language Translation Support			
T6.04	The system shall be capable of providing support for translation of content; either through an internal facility, or by interfacing with an open-source solution (e.g., Google Translate.)	See Note	Vision has worked with communities in the past to deal with accessibility needs. We would be happy to discuss these needs at the time of contracting.
Performance and Scalability Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Response Comments (Indicate if any manual processes are required)
Response Time Requirements			
T7.01	The system shall provide response time performance in line with leading Tier 1 commercial web applications.	No	Vision is not a browser based solution
Back-up Policies			
T7.02	The system shall have sufficient backup utilities, backup and recovery procedures, and storage infrastructure to minimize the possibility of data loss.	Yes	Nightly backups are sent offsite
Monitoring, Downtime and SLA			
T7.03	The system is expected to be available on a 24/7 basis except for scheduled maintenance, version upgrades and emergency "fixes".	Yes	Hosted platform 24/7
T7.04	The hosting services provider shall provide a minimum of a guaranteed 99.9% uptime.	Yes	
Scalability			
T7.05	The system shall be scalable to easily allow for additional capacity to be added in the future.	Yes	Platform is scalable with customer growth.
T7.06	The system shall be able to initially support up to 200 internal end users as well as (and concurrently with) an unspecified number of self-service Citizen users, and shall be designed to scale in order to meet future demand.	Yes	Each customer implementation is customized based on planned usage scenarios.
Support Standards and Requirements			

Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Change Management Support			
T8.01	The solution shall include Organizational Change Management support.	Yes	Vision Staff will work with the City to determine if Organizational Changes are necessary. This is a professional service, not inherent within the software.
Training Support			
T8.02	The solution shall include Training support.	Yes	
Internal End User Documentation (Manuals, Cheat Sheets, etc.)			
T8.03	Context sensitive help screens shall be available to users on each screen.	Yes	
T8.04	All help screens should open in a separate window so the current screen does not have to be reloaded.	Yes	
T8.05	An online data dictionary shall be provided to assist uses with report writing and identification of fields on screens	Yes	The users can hover (tool tip) over any field within the applicaion to identify the table and field name to assit with report writing
Help Desk Support			
T8.06	The Offeror shall provide Implementation and End User Help Desk services Monday through Friday from 7am to 7pm EST and emergency services after normal working hours, during weekends and holidays.	See Note	Vision Help Desk is open from 8:30 - 4:30 Eastern. We are happy to discuss off hours support on a case to case basis
T8.07	For off-hours and emergency situations, the City desires phone access and a 2 hour call back period to address problems.	See Note	Vision Help Desk is open from 8:30 - 4:30 Eastern. We are happy to discuss off hours support on a case to case basis
T8.08	The Help Desk shall operate from a central location providing a toll free number for the City.	Yes	
T8.09	Specific problem resolution Service Level Agreements (SLAs) in accordance with industry best practices, will be determined based on Offeror responses to the RFP, and finalized during contract negotiations.		Thank you.
Integration to External (Departmental) Systems			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
External APIs and Toolkits			
T9.01	The CAMA system architecture will be based on Service Oriented Architecture (SOA) principles, so that the appropriate web services will be incorporated within the system architecture to facilitate the development of required interfaces.	Yes	
T9.02	The system shall provide such external application programming interfaces (APIs) and toolkits as are necessary to enable the integration of the system with external applications without the need for extensive interface design or coding.	Future	Vision currently uses SSRS scheduler to communicate with external applications via import export. API capability is on the Roadmap.
T9.03	The system shall provide the ability to create and display a link to open/launch an external application, and pass such parameters to the external application as necessary to "deep link" to the relevant function and data.	Yes	Via Vision Smart Links
Bi-directional (two-way) Interfaces			
T9.04	The application shall provide robust bi-directional (two-way) integration with other applications. The CAMA application must be able to easily integrate with other applications that are currently in use within the City.	Future	Vision currently uses SSRS scheduler to communicate with external applications via import export. API capability is on the Roadmap.
T9.05	Since the City is implementing an internal and public-facing Service-Oriented Architecture (SOA) solution based on Microsoft BizTalk, the CAMA solution shall utilize Microsoft BizTalk as the means of communication with "back end" departmental systems via City's Enterprise Service Bus.	More Info Required	Vision will work with the City to determine requirements at time of contracting.
Support for Interfaces to/from City of Richmond Departmental Systems			
T9.06	The system shall have the ability to interface Permits from the City's EnerGovapplication (inbound).	Yes	Via Import/Export

T9.07	The system shall have the ability to interface with the City's revenue administion system (currently MUNIS) for annual CAMA file (outbound)	Yes	
T9.08	The system shall have the ability to interface with the City's ERP system (Oracle EBS) for annual CAMA file (outbound) (FY2021)	Yes	
T9.09	The system shall have the ability to interface with the City's ERP system (Oracle EBS) for daily CAMA file (outbound) (FY2021)	Yes	
T9.10	If the system does not have its own citizen portal for providing property informaiton, the system shall have the ability to interface with the cities Property Search application which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown property search applicaiton and perform this process within a consolidated CAMA system.	Both	Vision Has a Public Portal OR can provie data to the Current City System
T9.11	If the system does not have its own citizen portal for property transfers, the system shall have the ability to interface with the cities Property Transfer Search application which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown property transfer search applicaiton and perform this process within a consolidated CAMA system.	Both	Vision Has a Public Portal OR can provie data to the Current City System
T9.12	The system shall have the ability to interface with the Rehab Tracking application which currently gets data from ProVal	Yes	
T9.13	The system shall have the ability to interface with the Assessor Tracking System which currently gets data from ProVal. The city's desire to retire its home grown assessor tracking system and perform this process within a consolidated CAMA system.	Yes	More information needed, however Vision is confident these features are available natively in Vision CAMA and you will be able to retire Assessor Tracking.
Integration to External (Departmental) Systems			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
T9.14	If the system does not have the ability to track parcel editing (work flow management), the system shall have the ability to interface with the city's Edit Parcel Tracking application which currently gets data from ProVal. The city's desire to retire its home grown edit parcel tracking system and perform this process within a consolidated CAMA system.	Yes	Vision has full Audit Tracking
T9.15	If the system does not have the ability to track the process for tax exempt workflow and application processing, the system shall have the ability to interface with the city's Exempt Tracking application which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown exempt tracking system and perform this process within a consolidated CAMA system.	Yes	Vision has full Audit capabilities
T9.16	If the system does not have the ability to track area tax,the system shall have the ability to interface with the Area Tax Tracking System which currently gets data from ProVal and Assessment Data Mart. The city's desire to retire its home grown area tax system and perform this process within a consolidated CAMA system.	Yes	More information needed, however Vision is confident these features are available natively in Vision CAMA and you will be able to retire Assessor Tracking.
T9.17	The system shall have the ability to export a weekly "Owner Updates" text file to an external file server utilized by the Department of Public Utilities (DPU)	Yes	
Reporting, Metrics and Analytics			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Canned Reporting			
T10.01	The application shall provide broad reporting tools with numerous pre-configured or standard reports including CAMA user performance statistics.	Yes	
Ad-Hoc Reporting			

T10.02	The application shall provide an ad-hoc reporting tool that allows for reporting on all data elements within the system.	Yes	
Metrics and Key Performance Indicators			
T10.03	The application shall provide robust reporting and analysis tools. Various reports are needed to track the performance of each appraiser and the status of assignments.	Yes	via Vision analytics
Advanced Analytics			
T10.04	The system shall provide an advanced analytics capability to include incorporation of best practices Key Performance Indicators (KPIs) and predictive analytics / forecasting capabilities based on historical data.	Yes	Vision has an Analytics tool as well as full features Sales Analysis Module.
T10.05	The CAMA system should provide a robust reporting and analytics capability, And also provide the ability to import and export information to and from external sources.	Yes	
Solution Hosting Standards and Requirements			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Data			
T11.01	The hosting solution shall provide data encryption on transfer – this implies that data is encrypted while in transit from the CoR (City) network to the cloud provider.	Yes	Platform uses HTTPS for end-to-end encryption in transit
T11.02	The hosting solution shall provide data encryption at rest – this implies that data is encrypted on servers using encryption technologies such as 256 bit AES.	Yes	All data is encrypted at rest using AES 256 encryption
T11.03	All CoR (City) data will be segmented from other customer data unless the data is designated by the CoR (City) agency as being public.	Yes	All customer data is segmented from each other
T11.04	All CoR (City) data will be e-discoverable for litigation and FOIA requests.	Yes	
T11.05	The hosting services provider must conduct and if needed restore backups of CoR (City) data should data become corrupted or accidentally deleted.	Yes	All data is backed up nightly
T11.06	All hosting servers containing CoR (City) data, including backup servers, shall be located within the United States of America.	Yes	All servers in the US
Data Custodianship			
T11.07	Contractor shall provide the City access to City data at the City's request in a mutually agreed upon format. Such agreement shall not be unreasonably withheld. Contractor shall also provide access to any derivatives or alterations of City data at the City's request.	Yes	The Data belongs to the City, you will have full access.
T11.08	City shall have access to data at the database level for future integrations and automations. It is preferred that this is accomplished via published APIs.	YES	Vision provides some limitations should you elect to Host Data on Vision Cloud.
Audit			
T11.09	The solution hosting provider shall be SAS 70 Type II Certified – Statement on Audit Standards – widely recognized auditing standard developed by the American Institute of Certified Public Accountants (AICPA). This certification represents that a service organization has been through an in-depth audit of their control objectives and activities, which includes information technology controls and related processes.	Yes	Our datacenter provider is SAS 70 Type II.
Vulnerability			
T11.10	All systems of the hosting services provider shall be continually monitored for intrusion, malware, viruses, etc	Yes	Vision continually monitors all systems using endpoint protection software.
T11.11	The hosting services provider shall conduct on-going vulnerability assessments, scans and penetration tests.	Yes	Vision is in the process of evaluating vulnerability and penetration solution enhancements as part of our ongoing effort to provide best-in-class security for our hosting environment.
Accessibility via Mobile Devices			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Types of Mobile Devices Supported			

T12.01	The system shall be capable of providing interfaces to both internal and external users on various mobile devices including "iPhone/iOS" through a native application, maintaining the appropriate levels of security and access to functionality as defined by the City.	Yes	Vision supports interface with the recommended MobileAssessor it is an iOS based platform.
T12.02	The system shall be capable of providing interfaces to both internal and external users on various mobile devices including "Android" through a native application, maintaining the appropriate levels of security and access to functionality as defined by the City.	Yes	Vision supports interface with the recommended MobileAssessor it is an iOS based platform.
T12.03	The system shall be capable of providing interfaces to both internal and external users on various mobile devices including ""HTML/WAP-enabled mobile devices,"" maintaining the appropriate levels of security and access to functionality as defined by the City.	No	Vision supports interface with the recommended MobileAssessor it is an iOS based platform.
Internal Mobile Accessibility			
T12.04	Access to the internal employee / CAMA portal will be secured so that only authorized personnel are able to access it, and the same function and data access restrictions will apply as for the web-based portal.	Yes	More information needed, Vision believes we can accomplish this, however, more information needed to describe Internal Portal.
External Mobile Accessibility			
T12.05	Access to the external citizen portal will be restricted so that the same function and data access restrictions will apply as for the web-based portal.	Yes	Vision believes we can accomplish this, however, Clarification needed to describe "so that the same function and data access restrictions will apply as for the web-based portal."
Data Conversion			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Conversion			
T13.01	The City anticipates that a significant amount of data conversion will be required from existing ProVal application into the new system. The County will provide Subject Matter Experts (SME) resources to cleanse and extract legacy CAMA data. The data transformation activities will be a shared responsibility of the City and Contractor. The dataload in the new CAMA system will be the Contractor's responsibility.	Yes	
T13.02	The Offeror shall lead the migration strategy and execution. The City will assist the Contractor's technical resources to help in the conversion effort. Offerors shall provide with their proposals the most complete estimate of data conversion requirements, resources and expenses. Any resources the Offeror anticipates being provided by the City should be indicated in proposal responses.	Yes	
T13.03	Offerors shall provide with their proposals a detailed implementation plan for transitioning data from the current systems into the new system to allow for searching, reporting, and editing needs. The implementation plan should specify the number of data migration iterations that would be performed, including the final data migration executed in support of production implementation.	Yes	
T13.04	The City will support the Contractor's data migration team with the data extract approach and execution for conversion. The City anticipates migrating both current and historical records. The current system has back to 1998 but City would like a minim of current plus 15 years of history.	Yes	

T13.05	Offerors shall provide with their proposals a Quality Assurance (QA) plan for the data migration. The QA Plan will include success metrics and the method for assessing the quality of the data migration. Conversion routine exception reports should reflect the legacy data and new system data to allow manual, side-by-side comparison of data to identify the specific error and conduct the research required to correct it.	Yes	The Vision Project Management Office uses an iterative approach to software implementations and conversions to ensure data is transferred accurately and completely. Upon converting the initial data set, we provide a Beta Install for users to review the data mapping and review the software to make sure data has converted completely and accurately. We also hold a Guided Beta Review session (either onsite or remotely based on the client's preference) where we review every screen in the software in detail to ensure the data meets the standards of the client. Once the initial Beta Phase is complete, we move into the Revised Beta Phase where we rerun the conversion with any changes discovered during initial review. We then enter a second Beta period of review to ensure the changes discovered were properly addressed and that the new data mapping is complete and accurate prior to running the final conversion on a live data set. This iterative approach creates an open partnership between the Projects Team and the user to promote transparency and understanding leading to a complete and accurate conversion of the legacy data to the Vision platform. This process is only possible on a mature platform with configuration points built into the platform's DNA. In addition, the Beta testing phases serve as an initial training tool to help the end user familiarize themselves with the new solution. Easing many of the tensions and apprehension associated with a software implementation of this nature. The QA Plan will include success metrics and the method for assessing the quality of the data migration. Conversion routine exception reports should reflect the legacy data and new system data to allow manual, side-by-side comparison of data to identify the specific error and conduct the research required to correct it.
Training			
Req #	Description of Requirement	Solution Supports Requirement	CAMA Offeror Reponse Comments (Indicate if any manual processes are required)
Conversion			

T14.01	The Contractor shall provide the training methodology supporting go-live. This should include provision of job aids, user manuals, or any other training activities and materials in support of the methodology. This should be provided in addition to online help available within the CAMA application.	Yes	Vision deploy's our platform leveraging a Beta Release approach which includes training from early in the process. We include 3 Beta Trainings prior to the final training sessions before Go-Live. In addition, Vision provides extra "Banked" days of training to be used later in the learning process (something no other vendor does). Vision Does Monthly training webinars, Annual user Group Trainings at the VAAO Summer Seminar. Lastly the City will be assigned a dedicated Customer Success Manager for the first year post go live. Vision focuses on long-term software fluency rather than transactional support "tickets." To that end, we aim to provide three progressive levels of learning: (a) Level 1: How to Use Vision 8 CAMA: This encompasses questions like 'what is the exemptions screen for' or 'what does the export report button do.' We call this point-and[1]click training, and it is a necessary element of any training program. Many training programs stop here, we believe additional training is required to achieve true fluency. (b) Level 2: Accomplish Your Workflows with Vision 8 CAMA: This type of training is oriented around real use cases such as closing out the year, responding to taxpayer inquiries, identifying valuation outliers, or managing inspections. (c) Level 3: Improve Your Workflows with Vision 8 CAMA: Software should do more than enable your work; it should improve the way you work. This level of learning focuses on the question of: "How can I use Vision to accomplish my job with greater efficiency, improved data and valuation accuracy, and the highest levels of service to our taxpayers?" Our fluency programs are designed to accomplish all three objectives through continuous learning programs. Vision has the best training in the industry.
--------	--	-----	--

T14.02	Training shall be sufficient to prepare the City system administration staff to fully and completely administer and maintain the proposed solution without further reliance on contractor staff beyond normal assistance covered by the maintenance agreement.	Yes	Vision deploy's our platform leveraging a Beta Release approach which includes training from early in the process. We include 3 Beta Trainings prior to the final training sessions before Go-Live. In addition, Vision provides extra "Banked" days of training to be used later in the learning process (something no other vendor does). Vision Does Monthly training webinars, Annual user Group Trainings at the VAAO Summer Seminar. Lastly the City will be assigned a dedicated Customer Success Manager for the first year post go live. Vision focuses on long-term software fluency rather than transactional support "tickets." To that end, we aim to provide three progressive levels of learning: (a) Level 1: How to Use Vision 8 CAMA: This encompasses questions like 'what is the exemptions screen for' or 'what does the export report button do.' We call this point-and[1]click training, and it is a necessary element of any training program. Many training programs stop here, we believe additional training is required to achieve true fluency. (b) Level 2: Accomplish Your Workflows with Vision 8 CAMA: This type of training is oriented around real use cases such as closing out the year, responding to taxpayer inquiries, identifying valuation outliers, or managing inspections. (c) Level 3: Improve Your Workflows with Vision 8 CAMA: Software should do more than enable your work; it should improve the way you work. This level of learning focuses on the question of: "How can I use Vision to accomplish my job with greater efficiency, improved data and valuation accuracy, and the highest levels of service to our taxpayers?" Our fluency programs are designed to accomplish all three objectives through continuous learning programs. Vision has the best training in the industry.
--------	--	-----	--

T14.03	Formal training sessions and cross-training is desired to transfer detailed knowledge regarding system setup, configurations, and out of the box functionality. It is expected that City staff will have the necessary knowledge to continue maintenance of configurable components after go-live.	Yes	Vision deploy's our platform leveraging a Beta Release approach which includes training from early in the process. We include 3 Beta Trainings prior to the final training sessions before Go-Live. In addition, Vision provides extra "Banked" days of training to be used later in the learning process (something no other vendor does). Vision Does Monthly training webinars, Annual user Group Trainings at the VAAO Summer Seminar. Lastly the City will be assigned a dedicated Customer Success Manager for the first year post go live. Implementation Services

Project Implementation Services

Data Conversion Services	Included
--------------------------	-----------------

Beta Conversion

Revised Beta Conversion

Production Conversion

Project Management Services	Included
-----------------------------	-----------------

6-8-Month Implementation Plan *(As decided by the project teams)*

Dedicated Project Manager for Duration of Project

Access to Online Project Management Platform for Collaboration

Access to Vision Cloud for Duration of Project	(Optional)	Included
--	------------	-----------------

Imports & Exports	Included
-------------------	-----------------

Export to Munis

Vision Standard Building Permit Import

8 Custom Developed Imports / Exports

Training Services	Included
-------------------	-----------------

3 Days of Training Sessions for Up to 20 General Users

2 Days of Training for Appraisal/Assessment Users

1 Day of Training for System Administrators

Bank of 2 "Refresher" Training Days

Historical Databases (5 Years Included)	Included
---	-----------------

TOTAL	\$785,575
--------------	------------------

Proposal Scope Clarifications

- This proposal assumes 75,000 parcels, should this number increase, Vision reserves the right to adjust pricing.
- This quote is valid for 90 days
- Conversion services include current year database plus 5 Full Historical years and unlimited years of prior assessment history and ownership history that can be provided by the City of Richmond.
- Conversion services assume the City of Richmond will provide legacy data in electronic format, using the same database language and structure for each historical database year. For sketch conversion, we assume the City of Richmond will provide sketch data in non-proprietary traverse / string language format which shows "pen" movements for each sketch shape and links each shape to its associated sketch label. The sketch data shall also include pointers from which we can derive spatial relationship between shapes.
- Vision assumes that legacy data has been cleansed for data conversion prior to extract to Vision. This quote does not include data clean-up or data collection services.
- The *Vision 8* license assumes Vision's Commercial-off-the-Shelf software.
- This proposal does not include license fees for third-party products such as ESRI's ArcGIS or any hardware or SQL licensing. If the City of Richmond elects for Vision cloud hosting, SQL licensing will not be required.
- Vision invoices are based on milestone deliverables, rather than Time & Materials. These keep us aligned with deliverable timelines and ensures accountability.

Annual Software Subscription

TOTAL	\$86,125
--------------	-----------------

Vision 8 CAMA Software License

Commercial Off-the-Shelf *Vision 8* Software

Included

Includes 200 *Vision 8 CAMA* Full Access Users

Included

Includes *Vision GIS* and *Marshall & Swift* Modules

Includes:

Access to Vision's Help Desk for assistance and support, with 99.5% of live calls answered and 85% first-call resolution.

Access to our online *Vision 8* Customer Portal, including help documentation, monthly training webinars, tips & tricks, release communication, and more.

Access to monthly online training webinars and our webinar library.

All new releases of *Vision 8 CAMA* at no additional charge.

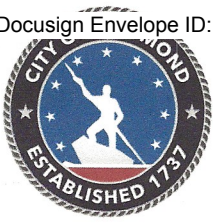

Modifications necessary to comply with new and applicable Virginia statutes and/or administrative regulations.

Access to our Virginia User Group events and annual National User Group event.

Optional Implementation Add-Ons

In order to keep costs down as requested, we factored out several modules and add-on services that we believe may be optional for the City of Richmond:

<u>Optional Item</u>	<u>Price</u>
Taxpayer Website Hosting Services	\$18,750 / year
Annual Cloud Hosting Services	\$22,925 / year
Marshall & Swift Module	\$Included
Mobile Platform, Implementation, and Training	\$49,470
Mobile Platform Maintenance	\$17,502.50/year
Additional Custom Imports or Exports	Priced upon scoping
Per Diem Training	\$1,400 / day
Additional Historical Database	\$10,250 / year converted

Contract No. 23000012317

CITY OF RICHMOND**PROCUREMENT SERVICES CONTRACT MODIFICATION No. 2**

THIS CONTRACT MODIFICATION is made and entered into as of the 17th day of June, 2025, by and between the City of Richmond, hereinafter referred to as the "City," and Vision Government Solutions, Inc., hereinafter referred to as the "Contractor."

WITNESSETH

WHEREAS, on September 5, 2023, the City and the Contractor entered into Contract No. 23000012317 (the "Contract");

WHEREAS, the term of the Contract is outlined in section 1.0 ("Duration of Contract") of the General Terms and Conditions of the Contract as modified by Attachment A: Negotiated Modifications to the Contract;

WHEREAS, by Contract Modification No. 1 dated September 18, 2024, the parties (i) documented an increase to the contract amount set forth in Section 3 ("Contract Amount") of the Goods and Services Contract and (ii) attempted to modify certain implementation timelines set forth in Appendix B2 of Attachment B of the Contract;

WHEREAS, due to unintended typos, there is ambiguity around whether Contract Modification No. 1 effectively modified the timelines in Appendix B2 of Attachment B of the Contract, and the parties desire to now update the timelines as intended;

WHEREAS, the Contract requires the Contractor to implement a website dedicated to displaying property value and ownership information to taxpayers, referred to as the "Vision Taxpayer Web Hosting Service";

WHEREAS, the City has made payments for the Vision Taxpayer Web Hosting Service to be provided by the Contractor under the Contract;

WHEREAS, the Contractor has proposed a new product, DataScout Web, to be implemented by the Contractor to meet the Contract requirements for a website dedicated to displaying property value and ownership information to taxpayers; and

WHEREAS, the parties deem it to be to their mutual benefits to modify the aforementioned Contract to (i) document and ratify the inclusion of an adjusted project timeline in Appendix B2 of Attachment B of the Contract, (ii) incorporate the Contractor's implementation of the DataScout Web product into the Contract and set forth relevant terms, conditions, and pricing for the DataScout Web product, and (iii) document and ratify an increase of the contract amount;

NOW, THEREFORE,

That for and in consideration of the mutual benefits to be derived by the City and the Contractor, the Contract is hereby modified as follows:

1. "Appendix B2: Project Schedule (CAMA Implementation)" of "Attachment B: CAMA Software Implementation Terms" of the Contract is hereby replaced in its entirety with "Appendix B2: Project Schedule (CAMA Implementation)," attached hereto as EXHIBIT 1.

2. The parties agree that paragraph 2 of Contract Modification No. 1 dated September 18, 2024, is rescinded and bears no effect on the Contract.
3. "Appendix C2: Pricing Schedule" of Attachment C: CAMA Software Subscription Terms" of the Contract is hereby replaced in its entirety with "Appendix C2: Pricing Schedule," attached hereto as EXHIBIT 2.
4. The parties agree to substitute the "DataScout Web" product in place of the "Vision Taxpayer Web Hosting Service" in the Contract. The pricing adjustment for the DataScout Web product is set forth on EXHIBIT 2 hereto, and supplemental terms and conditions for the DataScout Web product are attached hereto as EXHIBIT 3: DataScout Web Terms. EXHIBIT 3: DataScout Web Terms is hereby incorporated into the Contract through this Contract Modification No. 2.
5. Section 2 ("Contract Amount") of the Goods and Services Contract is hereby revised to read in its entirety as follows:
 2. **Contract Amount.** The maximum authorized contract amount for this Contract is One Million Two Hundred Eighteen Thousand Six Hundred Sixty-Eight and NO/100 U.S. Dollars (\$1,218,668.00). The aggregate of all payments by the City under this Contract shall not exceed this amount. All payments shall be as provided in the Contract Documents.
6. The City and the Contractor covenant and agree each with the other that the Contract, between the parties, except as modified herein, shall be and remain in full force and effect.

IN TESTIMONY WHEREOF, the City and the Contractor have executed this instrument as of the respective dates written below.

APPROVED:

Appendix B2: Project Schedule (CAMA Implementation)

The Project Schedule is set forth below. The parties acknowledge that the Schedule Requirements are contingent upon each party's active and prompt participation in the Project. The Schedule Requirements are subject to change based on mutual review by Vision and Customer and only through execution of a written amendment pursuant to section 8.5 ("Modification") of the General Terms and Conditions of the Contract.

Milestone	Responsible Party	Schedule Requirements	Status
Contract Negotiations Complete	Richmond and Vision	Upon signature	Complete
Project Kickoff	Richmond and Vision	Following Signature	Complete
City Information Supplied to Vision	Richmond	+ 2 weeks from kick-off call	Complete
Data Mapping for Conversion	Vision	+ 6 weeks	Complete
Sketch Data Supplied to Vision	Richmond	Upon Data Delivery	Complete
Beta Conversion	Vision	+ 6 weeks (original schedule) + 18 weeks (added delay from providing sketch data)	Complete
Beta Conversion Delivery	Vision	+ 1 day	Complete
Beta Conversion Review and Feedback	Richmond	+ 4 weeks	Complete
Revised Beta Conversion	Vision	+ 12 weeks	Scheduled
Install Revised Beta Conversion	Vision	+ 4 days	Scheduled
Revised Beta Conversion Review and Approval	Richmond	+ 2 weeks	Scheduled
Supply Live Legacy Data	Richmond	+ 3 days	Scheduled
Convert Live Legacy Data	Vision	+ 4 weeks	Scheduled
Install Live Converted Data	Vision	+ 3 days	Scheduled
Supply Refreshed Live Legacy Data	Richmond	+ 10 weeks	Scheduled
Convert Refreshed Live Legacy Data	Vision	+ 4 weeks	Scheduled

Appendix C2: Pricing Schedule

		Annual Subscription Fee	Annual Cloud Fee	Annual Web Hosting Fee	Total Annual Fee:
Initial Subscription Term	Year 1	\$86,125	\$0	\$29,000*	\$115,125.00
	Year 2	Not to exceed \$91,293	Not to exceed \$22,925	Not to exceed \$30,740	Not to exceed \$144,958.00
	Year 3	Not to exceed \$96,700	Not to exceed \$24,301	Not to exceed \$32,584	Not to exceed \$153,585.00
		*Contractor agrees City has credit of \$18,750.00 to be credited toward Annual Web Hosting Fee for Year 1. City owes only the balance of \$10,250.00 for Annual Web Hosting Fee for Year 1.			
Pricing for Renewal Terms (renewal as authorized by section 1.1.2 of Part III: General Terms and Conditions)		The Annual Fee for each Renewal Term will be determined by the parties prior to renewal subject to these conditions. Vision may request a price increase for the Annual Fee for a Renewal Term by providing written notice to the City of its requested increase, and such notice must be provided at least 90 calendar days prior to the end of the Initial Subscription Term or the Renewal Term in effect. No price increase for the Annual Fee shall exceed 8% over the fee for the prior year. The City and Vision will document the agreed-upon pricing in the Contract Modification executed by the parties for that Renewal Term pursuant to section 1.1.2 ("Subscription Period") of the General Terms and Conditions of the Contract.			

EXHIBIT 3: DATASCOOT WEB TERMS

1. Definitions: All capitalized terms within Contract No. 23000012317 (the “Contract”) shall have the same meanings within this Exhibit 3: DataScout Web Terms unless otherwise defined herein. The term “Vision” means Vision Government Solutions, Inc., and the term “Customer” means the City of Richmond, Virginia.
2. Scope of License. Subject to the terms and conditions of the Contract, Vision grants to Customer a limited, revocable, non-transferable, non-sublicensable, and non-exclusive license to access and use the Software Services selected in Section 3 solely during the Subscription Period of the Contract. The Software Services are licensed, and not sold, and shall be used by Customer solely for the purpose of accessing, viewing, editing, maintaining, or otherwise utilizing the Customer Data (the “Purpose”). All rights not expressly granted to Customer are reserved by Vision and its licensors. There are no implied rights hereunder. Vision represents and warrants that it is the owner of the Software Services or otherwise has the right to grant to the Customer the license to use the Software Services granted hereunder without violating or infringing any law, rule, regulation, copyright, patent, trade secret or other proprietary right of any third party.
3. Software Services: Vision shall provide the Customer with the following products & services (the “Software Services”): DataScout Web.
 - a. Product Descriptions:

DataScout Web: DataScout Web is an online web portal where Customer’s property data will be presented on a public website.

All Software Services licensed under this Section 3 are commercial, off-the-shelf, software and may be configured, but not customized, to address Customer requirements.
 - b. Term: Vision shall commence the work outlined in this Exhibit 3 upon final signature of the Contract Modification No. 2 to Contract No. 23000012317, and Vision shall complete the work no later than 45 calendar days thereafter (“Implementation Period”); provided, however, the Implementation Period may be increased by the number of calendar days during which the Customer is reviewing revisions provided by Vision.
 - c. Fees: The balance of the Annual Web Hosting Fee for Year 1 (as shown in Appendix C2: Pricing Schedule” of Attachment C: CAMA Software Subscription Terms” of the Contract) shall be due and payable on the following schedule: 50% upon the execution of Contract Modification No. 2 to Contract No. 23000012317, and 50% upon Vision’s completion of the implementation of the DataScout Web product.
4. Obligations for Legacy Product:

Upon execution of Contract Modification No. 2 to Contract No. 23000012317(the “Execution Date”):

- (a) Vision's obligations to provide, maintain, offer, and/or support any version of legacy Web Hosting, "Vision Taxpayer Web Hosting Service," (the "Legacy Product") shall immediately cease,
- (b) Except as provided in the Contract, and except with respect to those obligations relating to the Legacy Product that are intended, by their nature or context, to survive termination or expiration of the Contract, neither party shall owe any further obligation to the other party with respect to the Legacy Product following the execution of Contract Modification No. 2 to Contract No. 23000012317. The Legacy Product is defined only as "Vision Taxpayer Web Hosting Service" and Contract Modification No. 2 to Contract No. 23000012317 does not impact any obligations of Vision or Customer with respect to CAMA Subscription, Cloud Hosting, or any other Products elected in the Contract.

5. Conditions of Service:

- a. Non-Standard Data Modifications: Customer acknowledges that the Software Services will provide access to standard data fields. Requests to add, remove, reconfigure, or adjust data fields may be charged at additional fees. A listing of standard data fields shall be provided upon request from Customer to Vision.
- b. Data Update Frequency for DataScout Web: Vision shall update Real Property data no more than once per calendar day. GIS parcel data shall be updated by Vision on a weekly basis, with updates occurring on either Saturday or Sunday. Vision shall update photos and sketches no less than once per week.
- c. Data Use: Customer agrees that Vision may utilize one or more of Customer's Databases for additional public and private internet access via other Vision paid subscription services or licenses. However, access to the Customer's data via the DataScout Web platform shall be provided to users at no cost. Fees paid under this Addendum have been quoted assuming this Data Use consideration.
- d. Web Compatibility: Customer must provide suitable Internet access to use the Software Services. The Software Services are designed to support access via most major web browsers. Vision does not provide support for the specific use of any particular browser.
